FUSELI, HENRY, R.A., was born at Zürich, 7th February, 1741, and was originally brought up for the church, and entered into holy orders; but for some municipal interference his family thought it necessary for him to leave Zürich for a time, and he visited England in company with Sir Andrew Mitchell in 1763. He there maintained himself by literature, and finally by the advice of Sir Joshua Reynolds, adopted the profession of a painter, and in 1770 set out for Italy: he returned to London in 1779, after an absence of eight years. He first attracted the public attention by his picture of the 'Night-mare,' painted in 1781. This was a fair indication of the unusual bent of Fuseli's fancy, thoroughly developed in his great Milton gallery. He was elected an associate of the Academy in 1788, and an academician in 1790. In 1799 he finished his great Milton gallery of forty-seven large pictures, which had occupied him only nine years; of these remarkable compositions, the Lazar House; Satan Starting from the

Touch of Ithuriel's Spear; Satan Calling up his Legions; the Lubber Fiend; the Vision of the Deluge; Eve Newly Created, Led to Adam; and Sin Pursued by Death; were striking and original works, of great power of conception and treatment, though deficient in all minor technicalities of execution. Fuseli was chosen professor of painting in 1801, but resigned on being appointed to the keepership in 1805; he was, however, re-elected in 1810, and held that office, together with the keepership, until his death, 16th April, 1825. He delivered in all twelve lectures in the Academy, which are among the most valuable contributions to English art literature.—(Knowles, *Life and Writings of Fuseli*, 3 vols. 8vo, 1831; Wornum, *Lectures by the Royal Academicians*, &c., Bohn, 1848.) GADD, PETER ADRIAN, a native of Sweden. He was professor of chemistry in the university of Abo in Finland, and author of several works on geology.

GADDESDEN, JOHN OF, an English ecclesiastic and medical author, 14th century.

GADEBUSCH, F. C., a Germ. *savant*, 1719–88.

GADSDEN, CHRISTOPHER EDWARDS, Prot. Epis. bishop of South Carolina, was born at Charleston. Died 1852, aged 68.

GADSDEN, CHRISTOPHER, lieutenant-governor of South Carolina, was born in Charleston, in 1724. He was appointed one of the delegates to the congress which met at New York, to petition against the Stamp act. In 1774 he was also chosen a member of Congress. He was one of the first to advocate republican principles. Several months after the capitulation of Charleston, he, with most of the civil and military officers, by the order of Lord Cornwallis, and in violation of the rights of persons on parole, was transported in a guard-ship to St. Augustine.

In 1782 he was elected governor, but on account of his age declined the office. He died August 28th, 1805, aged 81 years.

GALEN, ALEX. VAN, a Dutch painter, pupil of John Van Huchtenberg, 1670–1728.

GAERTNER, C. CHR., a German translator, 1712–91.

GAERTNER, JOSEPH, an eminent botanist, was born at Calu in the duchy of Wirtemberg, in 1732. He died in 1791. Gaertner studied medicine at the university of Gottingen, and attended the lectures of the celebrated Haller. He was much devoted to the pursuit of natural history, and the lessons of his illustrious teacher there, and afterwards of the able botanist Adrian Van Rogen, at Leyden, confirmed him in his choice. After taking his degree, he travelled into Italy, France, Holland and England, and published several memoirs upon various subjects connected with marine zoology and botany. In 1768 he was instituted professor of botany and natural history at the university of St. Petersburg, where he formed the plan of his great work, upon which his eminent reputation depends. His health obliged him to resign his professorship at the end of two years, and return to his native land. There for eight years he steadily pursued his arduous undertaking. He then revisited England and Holland, where Sir Joseph Banks, and the equally celebrated Thunberg opened to him the collections which they had made, the one in the South Seas, the other in Japan. At length his excellent work was given to the world, and it will remain a monument to his fame as long as the science of botany continues to be studied. Its object is to illustrate the fruits and seeds of plants, and contains the essential generic characters and particular descriptions of the fruits of 1,000 genera,

illustrated by excellent figures drawn by himself. In the definition and anatomical elucidation of the parts of seeds, Gaertner excels, and his work has rendered most essential service to the science of botany. Schreber has named a genus of plants after him, *Gaertnera*. [W.B.]

GAFFAREL, JAMES, a French Orientalist, distinguished for his rabbinical learning, 1601–1681.

GAFFARELLI, an Italian singer, 1703–1783.

GAFFURIO, F., an Italian composer, 1451–1520.

GAGE, THOMAS, the last appointed governor of Massachusetts by the king. He accompanied Gen. Braddock to America, and was present when that officer was killed. In 1760 he was made governor of Montreal, and in 1763 was appointed commander-in-chief of the British forces in North America in succession to General Amherst. In 1774 he was appointed governor of Massachusetts, in which office he rendered himself very obnoxious to the people by his arbitrary proceedings, and in the following year the Provincial Congress disqualified him from serving as governor. Soon after he returned to England, where he died in 1787.

GAGE, THOMAS, an Irish catholic missionary, educated at St. Omers, and joined the Dominicans. In 1625 he went from Spain to Mexico with a band of missionaries destined for the Philippine Islands, but not relishing so distant a mission fled to Guatemala, in which neighborhood he lived as missionary to the Indians ten or eleven years. In 1637 he escaped to England, and became a protestant minister at Deal. He published a new Survey of the West Indies, giving an account of his mission to New Spain and of his travels, a curious and interesting book. Died 1655.

GAGER, WILLIAM, an English dramatist, 16th century.

GAGINI, ANT., a Sicilian sculptor, 1480–1571.

GAGLIARDI, P., an Ital. *savant*, 1695–1742.

GAGNIER, JOHN, a distinguished Orientalist, was born in Paris. He was educated for the catholic priesthood, and rose to be a canon in the church of St. Genevieve, but abjuring the Roman church, he embraced the protestant religion, and settled in England, where he was patronized by several persons of eminence. Died in 1740.

GAGUIN, R., a French historian, died 1501.

GAIL, JOHN BAPTIST, professor of Greek literature at the college of France. He was the author of several works, among others translations of Xenophon, Theocritus, &c. Born in 1755, died 1828.

GAIL, SOPHIA, wife of the preceding, was born in 1779. At an early age she displayed a taste for music, and in after years became a celebrated composer. Died 1819.

GAILLARD, ANT., a French poet, 17th cent.

GAILLARD, AUGIER, a burlesque poet, 16th c.

GAILLARD-DE-LONJUMEAU, J., a Provençal bishop, first projector of a Universal Historical Dictionary, for which he collected materials afterwards used by Moreri, 1634–1695.

GAILLARD, G. H., a French historian, 1726–1806.

GAILLARD, JOHN ERNEST, the son of a peruke maker, was born at Zell about the year 1666, and was instructed in the science and practice of music by Marichal, by Farinelli, and by Steffani. At the termination of his studies he was taken into the service of George, prince of Denmark, and after the marriage of that prince Gaillard came to England, where he remained till his death, which occurred in the beginning of the year 1749. He was generally esteemed as an elegant and tasteful composer. His

principal employment for several years of his life in London, was composing for the stage. [J.M.]

GAILLARD, JOHN, senator from South Carolina, was born in St. Stephen's district. He presided on several occasions over the Senate, in the absence of the vice-president, and always gave satisfaction. Died in 1826.

GAINAS, a Gothic general, killed 400.

GAINES, EDMUND PENDLETON, major-general in the American army, was born in Virginia, 1777. Entered the army in 1799, and distinguished himself in the war of 1812. Died 1849, aged 72.

GAINSBOROUGH, THOMAS, R. A., was born at Sudbury in Suffolk, in 1727. He was the pupil of Hayman, but settled in 1758 in Bath, where he practised both portrait painting and landscape, with such success, that he was induced to try his fortune in London, whither he removed in 1774; and he was soon accounted both the rival of Sir Joshua Reynolds and Wilson: Sir Joshua himself said of him in his 'Character of Gainsborough,'—'Whether he most excelled in portraits, landscapes, or fancy pictures, it is difficult to determine.' He was one of the original members of the Royal Academy, founded in 1766. He died in London 2d August, 1788, and was buried in Kew churchyard.—(Edwards' *Anecdotes of Painters*, &c.)

GALE, THEOPHILUS, a popular dissenting minister and theological author, 1628–1678.

GALE, THOMAS, a divine of the Church of England, celebrated as a scholar and antiquary, 1636–1702. His son, ROGER, a numismatist, 1672–1744. His son, SAMUEL, an archæological writer, histor. of Winchester cathedral, 1682–1754.

GALEANO, JOSEPH, an Italian *savant*, 1605–1675.

GALEN, CHR., BERNARD VAN, prince-bishop of Munster, born about 1607, died after a reign of 28 years occupied in warfare, 1678.

GALEN, J. VAN, a Dutch mariner, died 1653.

GALENUS, CLAUDIUS, usually called GALEN, a celebrated Greek physician, who flourished in the second century of our era, and whose authority in schools of medicine long continued to be equal to that of Aristotle in the schools of philosophy. He was the son of Nicon, an architect and geometrician, who had also cultivated with success various branches of knowledge, including astronomy, arithmetic, and grammar, and was born at Pergamus, a city of Mysia in Asia Minor, in, as is generally believed, A.D. 130, the 15th year of the reign of the Roman emperor Adrian. His mother's name is unknown, but she is described as a woman of violent passions and of an ungovernable temper, who, according to the testimony of her son, tormented her husband 'more than Xantippe did Socrates.' He received his medical education in his native city, but upon the death of his father,

which happened in the twenty-second year of his age, he visited the medical schools of Smyrna, Corinth, and Alexandria, the latter of which enjoyed at that time a high reputation; and subsequently repaired to Cilicia, Phœnicia, Palestine, Scyros, and Crete. Having spent nine years in these travels, he returned to Pergamus, where he began the practice of his art; and having been appointed by the high priest medical superintendent of the gladiators, it is supposed that in this melancholy occupation he acquired some knowledge of the nature and cure of wounds. His subsequent history is very imperfectly known, but it seems tolerably certain that he visited Rome twice in the course of his life, where he acquired a high character for skill, and where, though bitterly opposed, and, as some think, even persecuted by the Roman physicians, he formed intimate friendships with many of the leading men of the state, including the emperor Marcus Aurelius, who intrusted to his care his son Commodus, then a child of nine years of age, and in a tender state of health. The place and the time of his death are equally unknown. Some respectable authorities, following Suidas, a Byzantine lexicographer, say that he remained at Rome after his second visit, and died there, A.D. 200, in the seventieth year of his age, and in the reign of the emperor Severus; but one of his Arabian commentators has preserved a tradition that he died in the island of Sicily, at the age of eighty-eight, which, as he was born in 130, would give the year 218 as the year of his death.—Galen was a man of great talents and extensive erudition, and a very voluminous writer. His native tongue was Greek, and in that language he wrote, but he understood the Latin, the Ethiopic, and the Persian languages. His works are written for the most part in the Attic dialect, but his style, though eloquent, is diffuse and prolix. Suidas, who is our chief authority on this subject, says that he wrote no less than five hundred books on medicine, and two hundred and fifty on other subjects. Of these the greater part are lost. Of the former not above a half remain, and of the latter only a few fragments; while of his medical treatises forty-five are deemed spurious, and many are considered of doubtful authenticity; yet notwithstanding these defections, the received works of Galen, with the Latin translations, fill thirteen folio volumes. The best, or at least, the most commodious, edition is that of Kühn, in twenty 8vo. volumes, begun in 1818, and finished in 1833. [J.M'C.]

GALERIUS, a Roman emp., reigned 305–311.

GALGACUS, chief of the Caledonians, 1st ct.

GALHEGOS, M. DE, a poet and dramatic writer of Portugal, 1597–1665.

GALILEO, GALILEI, a distinguished astronomer, was born at Pisa on the 15th of July, 1564. His father, who was himself a philosopher, had a family of three sons and three daughters, of which Galileo was the eldest. He was distinguished as a child by his skill in constructing toys and pieces of machinery. To these mechanical accomplishments he added a taste for music, drawing and painting, and so great was his passion for pictures, that he was desirous of following painting as a profession. His father however, having observed very decided indications of early genius, resolved to send him to the university to study medicine. He accordingly went to Pisa, on the 9th November, 1581, and was placed under the celebrated botanist Cæsalpinus, who then filled the chair of medicine. In studying music and drawing, he found it necessary to acquire some knowledge of geometry, but no sooner had he entered upon

[Galileo's Tower.]

Euclid than he conceived a violent passion for mathematics, and devoted himself wholly to its study. While pondering over the treatise of Archimedes *De insidentibus in fluido*, he wrote an essay on the hydrostatic balance, which was the means, through Guido Ubaldi, of obtaining for him the appointment of lecturer on mathematics in the university of Pisa, with a salary of only sixty crowns. Galileo had even in his eighteenth year exhibited a great antipathy to the philosophy of Aristotle; but in the discharge of his new functions at Pisa, he did not scruple to denounce his mechanical doctrines, and expose their errors in the language even of asperity and triumph. On the subject of falling bodies he disproved his doctrine by actual experiments made from the leaning tower of Pisa, and so great was the prejudice which was then roused against him, that he quitted Pisa in 1592, and accepted the professorship of mathematics in the university of Padua. Galileo was converted to the doctrines of Copernicus by the lectures of Christian Vurstisius, but even after his conversion he taught the Ptolemaic system in compliance with popular feeling.—The reputation of Galileo was now widely extended. Cosmo, grand duke of Tuscany, invited him, in 1609, to resume his original situation at Pisa. Galileo accepted of the invitation on condition that he should receive the title of Philosopher to his Highness, as well as that of mathematician; and while this negotiation was going on he went to pay a visit to a friend in Venice. There he learned, by common report, that a Dutchman had given Prince Maurice an optical instrument which made distant objects appear near the observer. Anxious to know what this instrument was, he discovered the principle of it on his return to Padua, and having placed at the ends of a leaden tube two spectacle-glasses, the one a plano-convex, and the other a plano-concave, the latter being nearest the eye, he obtained a telescope exactly the same as a modern opera-glass. This little instrument, which had a magnifying power of only three times, he exhibited at Venice to crowds of the principal citizens, and he presented one of them to the senate, who in return gave him his professorship at Padua for life, and raised his salary from 520 to 1,000 florins.—After having made other two telescopes, one magnifying eight, and the other thirty times, Galileo applied them to the heavens. With them he discovered the mountains and cavities in the moon, the round disc of the planets, and the four satellites of Jupiter. He counted forty stars in the Pleiades, and found that many of the nebulae were clusters of small stars. The satellites of Jupiter were discovered on the 7th January, 1610, and they were afterwards found by

our celebrated countryman, Thomas Hariot, on the 17th of October of the same year. In directing his telescope towards Saturn, Galileo observed it to be like three o's, namely, oOo, the middle one being the largest, thus approximating to the discovery of Saturn's ring, afterwards made by Huygens. About the same time he discovered the crescent of Venus, and the spots on the sun, which were seen about six months later by Hariot in England.—In the early part of 1611, Galileo went to Rome, and took with him his best telescope. Here, princes, cardinals, and prelates, hastened to do him honor, and had the gratification of seeing the spots on the sun in the Quirinal gardens.—The discoveries of Galileo were ill received by the followers of Aristotle. Prejudice and ignorance were thus combined against him, and in the controversies into which he was led, he treated his opponents and their opinions with undue ridicule and sarcasm. The philosophers and freethinkers of the day, many of whom had been Galileo's pupils, marshalled themselves on his side, while the Aristotelian sages were supported with all the influence of the church. While these parties were resting on the defensive, Galileo, in 1613, addressed a letter to his friend, the Abbé Castelli, to prove that the Scriptures were not intended to teach us science and philosophy, and that it was equally difficult to reconcile the Ptolemaic and the Copernican system with expressions in the Bible. In replying to this letter, Caccini, a Dominican monk, made a personal attack upon Galileo from the pulpit, ridiculing the astronomer and his followers. Roused by this attack, Galileo published a long letter defending his former views, which he dedicated to the grand duchess of Tuscany. Its reasoning was conclusive, and its influence powerful. It was felt to be hopeless to meet his arguments by any other weapons than those of the civil power, and with the resolution to crush the dangerous innovation, his enemies determined upon appealing to the inquisition. A Dominican monk had paved the way for such a process by denouncing to that body Galileo's letter to Castelli, and Caccini was induced to settled at Rome, in order to embody the evidence against his opponent.—In the year 1617, Galileo went to Rome, cited probably by the inquisition, and was lodged in the palace of the grand duke's ambassador. When summoned before that body for his heretical doctrine, he was charged with maintaining the stability of the sun, and the motion of the earth, and of trying to reconcile this doctrine to Scripture; and after inquiring into the truth of these charges on the 25th February, 1615, it was decreed that Galileo should be enjoined by Cardinal Bellarmine to renounce the obnoxious tenets, and to pledge himself, under the pain of imprisonment, neither to teach nor publish them in future. He accordingly appeared before the cardinal, and having renounced his opinions, and declared that he would neither teach nor defend them, he was dismissed from the bar of the inquisition. Thus successful in their first attempt to put down the truths of science, they conceived the bold plan of condemning the whole system of Copernicus as heretical. In order to frustrate this plan, Galileo remained at Rome, and there is reason to believe that he thus injured his cause. His letter to Castelli, Copernicus's work 'On the Revolutions of the Heavenly Bodies,' and 'Kepler's Epitome of the Copernican System,' were all inserted among the prohibited books. Notwithstanding these acts of hostility, Galileo was graciously received by Pope Paul V., in March, 1616, and even assured that while he occupied the pope's chair, he would protect

him against the calumnies of his enemies.—About this time Galileo proposed a method of finding the longitude at sea by the eclipse of Jupiter's satellites, and expected that Philip III. of Spain would employ him to devote his time to the perfection of a method so useful to commerce. He failed, however, in this attempt. But the mortification which it gave him was compensated by the elevation of his friend Urban VIII. to the pontificate. In October, 1623, Galileo went to Rome to offer his congratulations to his holiness. The pope loaded him with presents, promised him a pension for his son, and on the death of Cosmo, recommended him in a special letter to the new grand duke of Tuscany. The cardinals even were propitiated, and in the same spirit his friend Castelli was made mathematician to the pope. Notwithstanding these acts of kindness, however, Galileo cherished the deepest hostility against the church, and his resolution to propagate his opinions seems to have been coeval with the vow by which he renounced them. He resolved to write a work in which the Copernican system should be demonstrated. This work, entitled 'The System of the World, by Galileo Galilei,' was published in 1626, and consists of four dialogues, in which he discusses the Ptolemaic and the Copernican systems. The work is dedicated to Ferdinand, grand duke of Tuscany, and contains an ironical and insulting attack upon the decree of the inquisition. The doctrines which it defended were so widely disseminated, and so eagerly received, that the Church of Rome felt the blow which was thus given to its intellectual supremacy. Under these circumstances the pope did not hesitate in his resolution to punish its author. Galileo was accordingly summoned before the inquisition. Worn out with age and infirmities, he arrived in Rome on the 14th February, 1633, and on the advice of his friends he remained in strict seclusion in the house of the Tuscan ambassador. Early in April, when his examination in person took place, he was removed to the holy office, and lodged in the house of the fiscal of the inquisition, his table being provided by the Tuscan ambassador. It is stated by M. Libri, and generally believed, that in his examination he was put to the torture, and after this had taken place, he was allowed a reasonable time for his defence. Having duly considered his confession and excuses, he was again summoned to the holy office. On the 22d of June he was conducted in a penitential dress to the convent of Minerva, sentence of imprisonment during the pleasure of the inquisition was pronounced upon him, and he was ordered to abjure and curse the heresies he had cherished.—'The account of the trial and sentence of Galileo,' says Sir David Brewster, 'is pregnant with the deepest interest and instruction. Human nature is here drawn in its darkest coloring; and in surveying the melancholy picture, it is difficult to decide whether religion or philosophy has been most degraded. While we witness the presumptuous priest pronouncing infallible the decrees of his own erring judgment, we see the high-minded philosopher abjuring the eternal and immutable truths which he has himself the glory of establishing. In the ignorance and prejudices of the age; in a too literal interpretation of the language of Scripture; in a mistaken respect for errors that have been venerable from their antiquity, and in the peculiar position which Galileo had taken among the avowed enemies of the church, we may find a shadow of an apology, evanescent though it be, for the conduct of the inquisition. But what excuse can we devise for the humiliating abjuration of Galileo? Why did

this master spirit of the age—this high priest of the stars—this representative of science—this hoary sage, whose career of glory was near its consummation—why did he reject the crown of martyrdom which he had himself created, and which, plaited with immortal laurels, was about to descend upon his head? If instead of disavowing the laws of nature, and surrendering in his own person the intellectual dignity of his species, he had boldly asserted the truth of his opinions, and confided his character to posterity, and his cause to an all-ruling Providence, he would have strung up the hair-suspended sabre, and disarmed for ever the hostility which threatened to overwhelm him. The philosopher, however, was supported only by philosophy, and in the love of truth he found a miserable substitute for the hopes of the martyr. Galileo cowered under the fear of man, and his submission was the salvation of the church. The sword of the inquisition descended on his prostrate neck, and though its stroke was not physical, yet it fell with a moral influence, fatal to the character of its victim, and to the dignity of science.—From the prison of the inquisition, where he remained only four days, Galileo was allowed to go to the house of the Tuscan ambassador, and after six months' residence there, to pass the term of imprisonment in his own house at Arcetri. The happiness of rejoining his family, however, was of short duration. His favorite daughter was seized with an illness of which she died; and having himself fallen into a state of ill health, he was permitted to go to Florence for its recovery in 1638. Here he was debarred from all intercourse with society, and it was only in the presence of an officer of the inquisition that his friend Castelli was permitted to visit him. During his five years' confinement he composed his 'Dialogues on Local Motion,' and in 1636 he discovered the interesting phenomena of the moon's libration. About this time he lost the use of both his eyes, when he was negotiating with the Dutch government respecting his method of finding the longitude. At a somewhat later period almost total deafness supervened, and having been attacked with fever and palpitation of the heart, he died on the 8th January, 1642, in the seventy-eighth year of his age. He was buried in the church of Sta Croce in Florence, and a splendid monument erected to his memory in 1737. For further information respecting Galileo see an admirable life of him in the 'Library of Useful Knowledge' by the late Mr. Drinkwater Bethum, and another of a more popular kind in Sir David Brewster's 'Martyrs of Science.' A complete edition of his works was published at Milan in 1811, in 11 volumes, under the title of 'Opere di Galileo Galilei Nobile Fiorentino.'

GALL, FRANCIS JOSEPH, the founder of that celebrated intellectual or cerebral physiology known as *Phrenology*: born at Tiefenbrunn, in the duchy of Baden, 9th March, 1758; died in Paris in 1828. The incidents of Gall's life were not numerous, and resemble those of many other propounders of new moral and intellectual doctrines in Germany; silenced by one government, harbored for a time by another, he became through compulsion a peripatetic. His longest residence was in Paris, where, in con-

junction with his disciple Spurzheim, he published his chief works.—Gall's fundamental maxims are as follows:—1. Moral qualities and intellectual faculties are innate. 2. The exercise or manifestation of these faculties and qualities depends on our organization. 3. The brain is the organ of all our appetites, sentiments, and faculties. 4. The brain is composed of as many special organs as there are original and independent appetites, sentiments, and faculties in human nature. 5. The form of the head or skull, which in the main corresponds with the shape of the brain, suggests the means of discovering by observation what are any one's primary faculties and qualities.—Of these maxims the last two alone are peculiar to Gall: they contain the germs of his new philosophy, and suggested his method of observation. The philosophy, as distinguished from all previous physiologies, represents the brain not as an *organ*, but an *apparatus*; to each convolution or independent part of which, a distinct mental function belongs: and the task of allocating our various functions is reduced to that of eliminating by aid of multitudes of instances, that special cranial organ, which always coexists and varies with one special intellectual power or tendency. In conducting observation Gall rightly resorted to the method of extreme instances,—seeking the meaning of an organ from the mental accompaniments of its great excess or signal defect. It is impossible in this place to criticise phrenology: its subdivision of the skull, however, into a region of the appetites and sentiments, a region of the emotions and moral powers, and a region of the intellectual faculties—these last subdivided into powers of observation and powers of combination,—is in striking consistency with all the dynamic phenomena of the human mind as manifested through history. Gall had, and still has, many followers and expositors: in Scotland the place of honor is unquestionably occupied by Mr. Combe of Edinburgh. [J.P.N.]

GALUPPI, B., an Ital. composer, 1703–1785.

GALVANI, LUIGI, born at Bologna 1737, died 1798. A distinguished physician and physiologist. The name of Galvani has become a household word. His great discovery of galvanism appears to have been made about 1790. The story as told is as follows:—The physician had been preparing some frog-soup for his sick wife, and some of these animals were lying stripped of their skins. An assistant had accidentally touched the crural nerves of one of the animals with the point of a scalpel in the neighborhood of the conductor of an electrical machine, which stood on the table, when the limbs were immediately thrown into convulsions. Galvani soon satisfied himself that this same phenomenon occurred with all animals' muscles, and thus laid the basis of the great science which has been since erected. Galvani fell into a melancholy from the death of his wife, and the loss of his offices from the occupation of Italy by the French, preyed on his mind,

although he was ultimately restored to his position a short period before his death in 1798. The account of his discovery of galvanism is contained in his treatise 'De Viribus Electricitatis in Motu Musculari Commentarius, 1791.'

GALVER, L., a Spanish poet, 1549–1610.

GAMA, ANTHONY DE LAON Y., a Mexican geographer and astronomer, end of 18th century.

GAMA, J. DE, a Portuguese mariner, 17th ct.

GAMA, JEANNE, a Portug. poetess, 1515–86.

GAMA, PH. J., a Portuguese poet, 1713–1742.

GAMA, VASCO DE, a Portuguese gentleman belonging to the household of Emanuel, king of Portugal, was a native of the small seaport town of Sines in that country; the date of his birth is uncertain, and little is known of the events of his life till he was sent out on a voyage to India, in 1497, ten years after the practicability of the passage by this noted promontory had been established by Diaz. He sailed July 8, with three small vessels, carrying sixty men; and, after encountering tremendous gales in the neighborhood of the Cape, which so discouraged his men, that he had the utmost difficulty in prevailing on them to persevere, he succeeded in doubling this dreaded headland Nov. 19th, and steered E. and then N.E. along the African coast till he reached Melinda, in lat.  $2\frac{1}{2}^{\circ}$  S. Here he found Christian merchants from India; guided by one of whom he crossed the Indian Ocean to Calicut between May 5th and 28th, 1498, being the first European who navigated these seas. Returning to Lisbon, September, 1499, he was received with distinguished honor by his sovereign, who conferred upon him the title of admiral of the Indian, Persian, and Arabian seas. The expedition of Cabral followed; and in 1502 De Gama was sent out with a powerful fleet. He returned in the end of the following year laden with rich treasures, and was created count of Videqueyra. For twenty years, discovery and conquest in the east had been prosecuted by others, when De Gama, appointed governor of Portuguese India, sailed for Cochin. He died, however, soon after his arrival, December, 1525. 'Married to immortal verse,' the exploits of De Gama have gained a greater celebrity than sober history warrants. Diaz had already robbed the formidable Cape of its terrors—had determined its place with accuracy; and led the way into seas before unknown. Beyond lay the richest countries of the world; their treasures were unfolded by De Gama after a voyage exhibiting great skill and noble daring; and the results of which are only second in importance to the grand discovery of Columbus.

The same name was borne by a descendant of the sovereigns of Peru, called, on that account, 'The Inca,' and distinguished as a writer on the history and antiquities of his country, 1530-1616.

GARCIAS-Y-MATAMOROS, ALPHONSO, a Spanish *savant* and biographical writer, 16th century.

GARDEN, ALEXANDER, distinguished as a zoologist and botanist, was a native of Scotland. After graduating at the University of Edinburgh he emigrated to America. Though he practised as a physician in Charleston, his chief occupation consisted in researches in natural history, and especially in botany. He was for some years a correspondent of Linnæus. His labors were attended with considerable success, and many new species, both of plants and animals, were discovered by him, or previous accounts of them confirmed. Born in 1730, died in England in 1791.

GARDEN, FRANCIS, Lord Gardenstone, a Scotch lawyer and miscellaneous writer, 1721-1793.

GARDIE, THE COUNTS DE LA, distinguished in Swedish history, trace their origin to Pontus de la Gardie, a French adventurer, who entered the service of the king of Sweden, and married his natural daughter, and was accidentally drowned, 1585. The most distinguished is MAGNUS GABRIEL, Count de la Gardie, grand chancellor and seneschal of Sweden, and a great patron of arts and letters, 1622-1686.

GARDINER, JAMES, a British officer, remarkable for the incidents of his conversion to a religious life,

as related by Dr. Doddridge, born 1688, killed at the battle of Prestonpans, 1745.

[Birth-place of Colonel Gardiner.]

GARDINER, JOHN, a lawyer, was born in Boston, Mass., in 1731. Having studied his profession in England, he was admitted to practice at Westminster. In 1765 he was appointed attorney-general in the West Indies, and on peace being established between England and America in 1783, he removed to the latter country. After practising law in Boston for some time he removed to Maine, and died in 1793.

GARDINER, JOHN SYLVESTER JOHN, D.D., minister of the Episcopal Church in Boston, and assistant to Dr. Parker, April 12, 1792. He was a man distinguished for his literary attainments. Died in England, July 26, 1830, aged 65.

GAROFALO, B., an Italian artist, 1481-1559.

GAROFALO, B., an Italian antiq., 1677-1762.

GARRARD, JAMES, governor of Kentucky in 1796, was born in Virginia, and an officer in the American army during the revolution. He was one of the first settlers of Kentucky. He died in Bourbon County, January 19, 1822, aged 73.

GARRICK, DAVID, the most respected actor that ever trod the English boards, was born at Hereford, and was baptized in the church of All-Saints, in that city, 28th February, 1716. His father, Captain Peter Garrick, generally resided at Lichfield, but was about that time on a recruiting party; his mother's maiden name was Clough, daughter to one of the vicars in Lichfield cathedral. David at ten years of age was entered of the grammar school at Lichfield. At eleven he formed the project of getting a play acted by young gentlemen and ladies. The trial was made with 'The Recruiting Officer.' One of his sisters played the part of the chambermaid; he himself undertook *Serjeant Kite*. The after celebrated Doctor, Samuel Johnson, his boy-friend, was applied to for the prologue, which, however, he

[Garrick's Villa, near Hampton.]

neglected to write. Not long after Garrick went to Lisbon, at the request of an uncle, a wine merchant there, and was acquainted with the unfortunate Duke d'Aveixo. On his return to England he, in 1736, became one of Johnson's scholars at Lichfield; but the latter growing tired of teaching the classics to two or three pupils, resolved on trying his fortune in London, and thither Garrick accompanied him. Here the latter lost no time in getting introduced to theatrical managers, and in 1741 obtaining an engagement at Ipswich, met with much success, under the assumed name of Lyddal. His first effort was in the pathetic character of *Aboan*, in 'Oroonoko;' but he matriculated in all kinds of stage business, condescending even to harlequin. In the winter of the same year Garrick ventured on the London stage. On the 19th October, 1741, he made his *début* in Richard the Third at the playhouse in Goodman's Fields, and with his novel and natural style, startled the critics and the reigning actors. Quin, in particular, was much annoyed, saying—'If the young fellow was right, he and the rest of the players had been all wrong.' Being told that Goodman's Fields theatre was crowded every night to see the new actor, he said—'That Garrick was a new religion; Whitfield was followed for a time; but they would all come to church again.' Whereupon Garrick wrote this epigram:—

'Pope Quin, who damns all churches but his own,  
Complains that heresy infects the town,  
That Whitfield-Garrick has misled the age,  
And taints the sound religion of the stage:  
Schism, he cries, has turn'd the nation's brain;  
But eyes will open, and to church again!  
Thou great infallible, forbear to roar,  
Thy bulls and errors are revered no more;  
When doctrines meet with gen'ral approbation,  
It is not heresy, but reformation.'

After a visit to Dublin, Garrick returned to London, and acted at Drury, having entered into an engagement with Fleetwood, the manager, for five hundred pounds a-year. At this theatre he proved equally great in *Abel Dragger* and *Hamlet*. He was also wonderful in *Lear*. But in consequence of Fleetwood's farming the theatre to his treasurer, he soon seceded from the establishment. On his return to the stage he was involved in a controversy with Macklin; and soon after was engaged for Covent Garden. Ultimately he was solicited to purchase the moiety of Drury Lane patent, which he did for eight thousand pounds. When Garrick retired from the stage in 1776, this same patent he sold for thirty-five thousand pounds; a fact which of itself is sufficient warrant of his excellent management. One merit claimed for him is the restoration of 'Macbeth,' and other Shaksperian dramas, with a closer adherence to the text than was then usual. The chief

complaint against him was his conduct towards living authors; and it must be confessed, that in him was confirmed that usurpation of the poet's rights by the actor from which the stage is hardly yet emerging. Davies, his biographer, observes on this point that,—‘The time bestowed in rehearsing the piece, and the expense of new scenes, dresses, music, and other decorations, make it often very ineligible to a director of a theatre to accept a new play especially when it is considered that the revival of a good old play will answer his end of profit, and reputation too, perhaps as well.’ The actor-manager, as the representative and inheritor of the wealth of all dead poets, proves too powerful a competitor for the living dramatist. In this way tragic actors find Shakspeare a tower of strength, and are by this means enabled to suppress the proofs of living genius. Garrick had strong reason for the Stratford jubilee in 1769, by which he gained increased celebrity and power. This pageant he afterwards transferred to the stage, where it ran for one hundred nights. Mr. Garrick was also the founder of the Drury Lane Fund for decayed performers. A thoroughly successful man in life, he was equally prudent and benevolent. He lived generously, kept the best society, made lavish gifts to his friends and neighbors, and basked, till his death, in the sun of popular favor. He died 20th January, 1779, and was magnificently interred in Westminster Abbey, being attended to his grave by persons illustrious for their genius and rank. In the opinion of his admirers he was the greatest actor that ever graced the stage. He was certainly the most exemplary as a man and moralist; and preserved, if he did not originate, the dignity of his profession. He was also the author of several dramatic pieces, some of which displayed considerable humor, and of many brief poems, prologues, and epilogues, abounding in wit, and in allusions to the measures of his time.

GASSENDI, PIERRE, born 22d January, 1592, near Digne; died in Paris, 24th October, 1655; in the words of Tenneman, the most learned among the philosophers, and the ablest philosopher among the learned, of the seventeenth century. In speculative thinking, Gassendi represented the *Sensational School*, of which he may be considered the Founder in modern times: as such, he made stand against the *Meditations* of Des Cartes. In the eager polemic between these remarkable men, the critical question of Sensationalism, almost in the form in which it still presents itself, was fairly raised: it must be conceded that the temper and moderation lay with Gassendi, although, in the estimation of the writer of this notice, the weight of argument belonged to his illustrious opponent. During the disputation, Gassendi had the merit of insisting that every mental conception of *Principle*, is necessarily preceded by the *fact of an Experience*; an assertion by no means sufficient to establish his philosophy, but remarkable as having first given expression to a maxim now held alike by Sensationalists and Idealists,—that in Sensation is the beginning or the occasion of all knowledge; a maxim of which Des Cartes himself, perhaps, saw enough to render unjustifiable Locke’s subsequent singular misrepresentation of the doctrine of innate ideas. This proposition granted, however, it in no wise follows, as Gassendi contended, that the content of sensation is the measure of human knowledge; or that an Absolute and Necessary Truth is a mere generalization. Rational Psychology, according to Des Cartes, contradicts this: the attributes of universality and necessity cannot attach to simple generalizations; and these attributes belong to many of our ideas. It is hardly requisite to say that the dispute thus raised, exists still; nay, the student desirous to master it, will scarcely find better instructors than Des Cartes and Gassendi.—Gassendi was one of our most distinguished reformers, at a period when many great minds pushed forward the work of reform,—claiming independence for thought. It may be forgiven, perhaps, that in his early work against the authority of Aristotle, he was not careful to separate the true doctrines of the immortal Stagyrice, from wretched and sapless formulæ deduced from him by the Schoolmen; or that in his youthful zeal, he failed to approach with rightful respect, that great Shade to which so many ages have done willing reverence. His attack on Aristotle is the weakest of his writings, and cannot be acquitted of rashness: nevertheless, he was not wanting in respect for antiquity,—witness his treatment of *Epicurus*. His life of this philosopher is one of the best and most appreciative memoirs, among the many that have been given of him: he wrote *con amore*. The Atomic Philosophy suited Gassendi’s predilections; and one respects the just ardor with which he vindicates the character of his master, and clears his doctrines from vulgar misapprehension. Gassendi’s attachment to physical inquiries was strong: although not an original discov-

erer, the labors of no man of that day contributed more to diffuse right principles regarding the method of physical inquiry. In this department, his superiority to the Cartesians cannot be questioned: Des Cartes himself knew too little of that sphere of pure Induction, within which what we term Law or general Truths, can be nothing other than *generalizations*. As might have been expected, he adopted the Copernican system of the Universe, cautiously but intelligently; and greatly contributed to bring about a right understanding of its significance. His life of Copernicus is a composition of much interest; although probably inferior to his life of Tycho. He was a friend and correspondent of Galileo; he avowed himself the disciple of Bacon; and unquestionably his writings prepared the way for those of Locke.—Gassendi's personal character was of the highest order; gentle, serene, and dignified; modest, notwithstanding his wide repute; impartial and forbearing. As a pious and faithful ecclesiastic he achieved a place in the hearts of the mountaineers amidst whom he lived, which long after years did not efface: they raised a statue to his memory.—The works of this industrious thinker and voluminous writer have appeared in various forms. The *Sieur de Montmort*, to whom he bequeathed the duty, published a complete edition of them at Lyons, in 6 vols. folio, in 1658: another edition appeared at Florence in 1727, edited by Averanius. GAVIROL, SOLIMAN BEN, a Spanish rabbi, grammarian, philosopher, astronomer, &c., died 1070.

GAY, JOHN, who was born in 1688, and died in 1732, was first a silk-weaver's shopman, but became an author, and the easy dependent of gay and great people. He had much note in his own day as a pastoral and mock-heroic poet; and his name is still preserved by his notorious 'Beggars' Opera,' and his fluent and agreeable 'Fables.' Perhaps he deserves remembrance better for his ballads, 'Black-Eyed Susan,' and 'Twas when the Seas were Roaring.'

GAY, J. J. PASCAL, a Fr. architect, 1775–1832.

GAY LUSSAC, N. F., one of the most distinguished chemists of modern times, is described by all his associates as equally characterized by the amiability of his disposition, his kindness to the student, and his disinterested and generous nature. Brought up in the laboratory of Berthollet, he subsequently showed that he had eminently benefited by the instructions of such a master in the science. His first important discovery was that in 1808 of the union of gases by volume, forming an additional argument in favor of the atomic theory of Dalton in 1804, of the union of bodies by definite weights in the formation of chemical compounds.

[Gay Lussac.]

He took an active part in the investigation of iodine in 1813, and in 1815 he made the important discovery of cyanogen, which, although a compound gas, performs all the functions of a simple body. Gay Lussac was possessed of great powers of practical application; it is only necessary to refer to his alcolometer, to his process of chlorimetry, and to his very convenient method of assay of silver by the wet way, which has been familiar for above twenty years to those who were fortunate enough to visit the Parisian mint, so ably conducted under the auspices of the subject of our notice. His long and useful life terminated on the 9th May, 1850, after several months' illness, having been a member of the Academy from 1806. [R.D.T.]

GEMBICIUS, J., a Polish theolog., 1569-1633.

GEMIGNANO, an Italian painter, 1490-1530.

GEMINIANI, FRANCESCO, one of the greatest violinists of his age, was born at Lucca about the year 1666. He received his first lessons on the instrument from Carlo Ambrogio Lonati of Milan, and the foundation of his musical knowledge was laid by Alessandro Scarlatti. His last master on the violin was Corelli. Geminiani composed three sets of concertos, a work on Harmony, two treatises on the Art of Playing the Violin, and several pieces for the harpsichord. In the year 1714 he came to London, and soon established his reputation as a great artist. Geminiani seldom played in public, and the money he received for his compositions, the fees from pupils, and the presents he received from the noble and the wealthy when he could be prevailed upon to play at their houses, were the chief means from which he

derived his living. Even with such sources of emoluments he might have made a fortune, but he was improvident. Geminiani died at Dublin in 1762.

GEMINUS, TH., an English painter, 16th cent.

GEMISTUS, GEORGE, surnamed 'Pletho,' a Greek philosopher, and writer on the wisdom of antiquity, 1390-1491.

GENET, FRANCIS, a Fr. casuist, 1640-1702.

GENET, EDMOND CHARLES, minister to the United States from France in 1793 during the first revolution. His sister was Madame Campan, who was the attendant and friend of the unfortunate Marie Antoinette, of whom Madame Campan in her memoirs has given many intimate and interesting revelations. Genet on his arrival in America strove to inveigle the United States in the quarrel of France with England, but, finding Washington and his administration proof against his intrigues, became enraged, and is charged with having threatened to appeal from the President to the people. After his official mission ended he continued to reside in the United States, and passed the remainder of his life in America, where he died July 14, 1834, at the age of 72.

GENEVIEVE, the patron saint of Paris, believed to have contributed to the conversion of Clovis, born at Nanterre about 423, died about 512.

GENGHIS KHAN, the founder of the great Mogul empire, and of the dynasty now tottering on the throne of China, was the son of a simple chief, and was born in Tartary in 1164. He succeeded to his father's authority when only fourteen years of age, and soon afterwards, being compelled to take up arms in self-defence, struck terror into his opponents by his military talents and ferocious disposition. In 1205 he was crowned grand khan of all the Moguls and Tartars in a ceremony of great state, in the course of which he was hailed lord of the four quarters of the world, in a manner well calculated to excite the enthusiasm of his followers. In 1213 he was master of Pekin and all Northern China, and a few years subsequently had subjugated Persia and the most fertile regions of Asia, dying in the heat of his conquests 1227. His grandson, in 1255, seized on Bagdad, and completed the extirpation of Mohammedanism begun by his ancestor. [E.R.]

GENLIS, STEPHANIE, Countess De, was a native of Burgundy, and born in 1746. Becoming well known in society after her marriage had given her aristocratic rank, she was chosen as *gouvernante* to the children of the notorious Duke of Orleans; and by him she had a daughter, who was married, in 1792, to the unfortunate Lord Edward Fitzgerald. She died, after a wandering life, in 1830, when her pupil, Louis Philippe, had just become king of the French. Her writings were numerous and miscellaneous; the principal of them being novels, which possess little merit either of style or of matter, while they teach, with an affectation of fine sentiment, a morality very slippery and accommodating. Her best and least exceptionable works are her stories and dramas for youth; such as 'Adèle and Theodore,' 'The Tales of the Castle,' and 'The Theatre of Education.' [W.S.]

GENNADIUS, the name of two patriarchs of Constantinople, the *first* of whom ruled the church, 458-471, and the *second* after the capture of the city by the Turks, 1453-1460. The latter is author of several theological works.

GEOFFROY, STEPHEN FRANCIS, a celebrated French physician and chemist, member of the Academy of Sciences, professor of chemistry to the Garden of Plants, and of medicine and pharmacy to the College of France, 1672-1731. His brother, CLAUDE JOSEPH, a naturalist and physiological author, 1685-1752. STEPHEN LOUIS,

son of Stephen Francis, a distinguished naturalist, 1725-1810.

**GEOFFROY ST. HILAIRE, ETIENNE**, a celebrated zoologist, was born at Etampes in 1772. He died in 1844.—He was a pupil of the great mineralogist Haüy, and was appointed through his recommendation assistant-keeper and demonstrator of the museum of natural history at the Garden of Plants. A few months afterwards he became professor of zoology there, and from that time forwards he devoted himself with great zeal to that particular branch of natural history. In 1798 he was appointed one of the scientific commission which accompanied the French army to Egypt, and it is to his firmness France owes the possession of the papers and drawings made in that country by himself and colleagues. Upon his return from Egypt he resumed his situation at the Garden of Plants; but in 1810 he was again despatched by government on a mission to Portugal. Here he collected a vast quantity of minerals and animals from the museums of that country, and succeeded in transporting them to Paris. Geoffroy is the author of many important memoirs and valuable works upon zoology. The most important, perhaps, of all is his 'Philosophie Anatomique,' the chief object of which is to demonstrate throughout the animal kingdom a uniform plan of organization, recognizable by the existence, not of the same organs, but of the materials of the same organs, in all. In connection with Cuvier, Geoffroy has contributed much to the progress of zoology in Europe. They created a school in which the study assumed a truly scientific character, and one which will long continue to exercise a salutary influence over the labors of succeeding generations. [W.B.]

GHEZZI, N., an Italian naturalist, 1685–1766.

GHEZZI, SEBASTIANO, a scholar of Guercino, distinguished as an architect, painter, and sculptor, died about 1650. His son, JOSEPH, a painter, 1634–1720. The son of the latter, PETER LEO, a painter and engraver, 1674–1755.

Ghiberti, LORENZO, a celebrated Florentine sculptor and goldsmith, was born in 1381. In 1400 he left Florence for fear of the plague, but returned shortly afterwards, when he received notice of the great competition that was to take place on the occasion of completing the bronze gates of the Baptistery of St. John. The centre gates opposite to the west end of the cathedral had been already put up by Andrea Pisano, the new gates were for the two sides.—The commission for these two new gates was obtained by Lorenzo Ghiberti, then a young man only twenty-two years of age: the contract was given to Ghiberti and his father, and other assistants, on the 23d November, 1403, and the first gates, representing the life of Christ, were put up in the place of those by Andrea Pisano, in April, 1424; and the third gates, commenced on 2d January, 1425, with the histories from the Old Testament, were not completed until 16th June, 1452, when they were gilded and put up in the place of Ghiberti's first gates, which were removed to the other side, opposite to those of Andrea Pisano. These great works, of the last of which entire casts may be seen at Marlborough House, caused a new epoch in ornamental art, being remarkable for their bold and accurate imitation in the detail, for their skilful modelling of the figure, and masterly symmetrical grouping of the whole; on a scale of magnificence, and technical completeness, altogether unprecedented in modern art. During the nine and forty years that Ghiberti and his assistants, of whom his own son Vittorio was one of the principal, were occupied

on these complicated works, he executed also many others, monumental and ecclesiastical, which must explain the apparently long delay in the completion of the gates. Ghiberti died at Florence in 1455.—(Vasari, *Vite de' Pittori*, &c., Florence 1848; Patch, *La Porta Principale del Battistero di San Giovanni*, &c., Florence, 1773.) [R.N.W.]

GHINI, LUKE, an Italian botanist, 1500–1556.

GHIRLANDAJO, DOMENICO, an Italian painter and goldsmith, teacher of Michelangelo, 1449–1493. His son, RIDOLFO, also a painter, scholar of his uncle David Curadi, 1485–1560.

GIACOBI, J., an Italian composer, 1575–1650.

GIAFAR, a Mahomedan *savant*, died 764.

GIAHEDH, a Mahomedan *savant*, died 840.

GIAMBERTI, F., an Italian architect, 15th cent.

GIAMBERTI, GIULIANO, son of the preceding, born in 1443. He was the most celebrated architect and engineer of the age. He built many palaces, among others one for the Grand Duke Lorenzo. Died 1517.

GIANNONE, PETER, a Neapolitan historian, was born at Ischitella in Apulia in 1676. He was an advocate at Naples. He was the author of a 'History of Naples,' which gave offence to the Court of Rome, and was the cause of his excommunication and banishment. Died at Turin in 1748.

GIANNOTTI, D., a Venetian author, 1494–1563.

GIARDINI, FELICE, who has been called the reformer, if not the founder, of the violin school in England, was born at Turin in 1716, and was entered a chorister at the *Duomo* in Milan, where he studied singing, the harpsichord, and composition, under Paladini. He afterwards adopted the violin, and studied under Lorenzo Somis, one of Corelli's most famous followers. After having visited the principal cities of Italy, he travelled over Germany, and at length reached London in the year 1750, where he soon reached the top of his profession, and where he filled the highest professional posts then open to the musical artist. It is said that when he first appeared at the Haymarket theatre, and played a solo on the violin, 'the applause was long, loud, and furious, and such as nothing but that which Garrick called forth had ever equalled.' In the year 1756, he, in company with Mignotti, became the manager of the Italian Opera, and though he composed several operas, and acquired much fame, his undertaking was very unsuccessful. Giardini, in the year 1763, retired from the management, after having lost a large sum of money. In 1784 Giardini went to Italy, where he remained five years. In 1789 he came back to England, but was not so successful as during his first residence. In 1793 he went to Russia. His public performances at Moscow and St. Petersburg failed to produce the effect of his earlier efforts. He died in the latter city in poverty in the year 1796. [J.M.]

GIATINI, J. B., an Italian poet, 1600–1672.

GIB, ADAM, a Scotch divine, 1713–1788.

GIBBES, J. A., a French physician, 1616–77.

GIBBON, EDWARD, was born at Putney in Surrey, in 1737. He was the only child who survived infancy, of a gentleman well connected and tolerably wealthy. Feeble health made his school days to be profitable in nothing but the acquisition of miscellaneous and undigested knowledge; and, being sent to Oxford too young and quite unprepared, he spent fourteen months there in alternations of irregular study and extreme idleness. At the end of this time, being a little more than sixteen years old,

[Residence of Gibbon at Lausanne.]

he embraced the Roman Catholic faith, and formally announced his conversion to his father. He was immediately placed under the care of a Calvinist minister at Lausanne, whose instructions led him in a few months back to protestantism. The five years he spent at Lausanne, closing in 1758, when he was just of age, formed the real commencement of his education; and at their close, he was not only a ripe scholar in French and Latin, but possessed of an extraordinary amount of historical and other information. He found leisure, however, for falling in love, unsuccessfully, with a young lady, who afterwards became the wife of M. Necker, and the mother of Madame de Stael.—For several years after Gibbon's return to England, he lived chiefly at his father's house in Hampshire; and, failing in attempts to obtain diplomatic employment, he accepted a militia commission, attended zealously to his duties, and rose to be lieutenant-colonel. But the studious habits and literary ambition which he had acquired, never flagged. In 1761, he published, in French, a short essay 'On the Study of Literature.' He extended his acquaintance with English authors, and, beginning to learn Greek thoroughly, pursued the study zealously, when, in 1763, he was allowed again to visit the continent. In Rome, next year, he conceived the design of his great historical work. Returning home in 1765, he passed some years unsatisfactorily to himself, but not without much improvement both in knowledge and in skill of writing. In 1774, he entered the House of Commons, in which he sat for eight sessions; and he was rewarded for his silent votes in favor of Lord North's administration, by holding for three years a seat at the board of trade. In 1770, he published, in answer to Warburton, his spirited Dissertation on the Sixth Book of the *Æneid*. In the same year, the death of his father placed him in possession of a fortune, which, though embarrassed, he was able to extricate so far that it afforded a handsome competence, and enabled him to devote himself exclusively to study and composition.—In 1776, he published the first volume of 'The History of the Decline and Fall of the Roman Empire,' the first edition of which was sold in a few days, and was rapidly followed by others. The second and third volumes, appearing in 1781, brought down the narrative to the Fall of the Western Empire; and for a while the author hesitated whether he should not here allow the work to drop. He resumed the design, however, in 1783, when he fixed his abode at Lausanne. He has recorded, in an eloquent passage

of his Memoirs, the mixed emotions with which, in a moonlight night of June, 1787, in a summerhouse in his garden, he completed his great undertaking. Its last three volumes were published next year, the author visiting London to superintend the press, but returning in a few months to Lausanne. There he remained till, in 1793, he was called to England to console his friend Lord Sheffield on the death of his wife. His health was now very infirm; and he labored under dropsy. He died in London in January, 1794.—The volumes called his 'Miscellaneous Works,' contain, besides reprints of his minor writings, and several essays not previously printed, an interesting collection of his letters, and an instructive autobiography. Some of these pieces show all that various erudition, and that command of apt and powerful language, of which his chief work is so remarkable a monument. His exotic diction, and the pompous structure of his style, are open to strong exceptions; yet he is one of the most strikingly eloquent writers in the English language. The historical value of his 'Decline and Fall,' is very great; and the extraordinary union of excellencies, of vast variety with general correctness of learning, of good judgment with vigor of narrative and description, deepens the regret with which we contemplate the sceptical taint that is diffused so steadily through the whole. [W.S.]

GIBBON, JOHN, an ancestor of the celebrated historian, known as a writer on heraldry, born 1629, died about 1700.

GIBBONS, EDWARD, general, emigrated to America in 1629, and shortly after was a representative of Boston. In 1649 he was appointed major-general, and was succeeded in that office by Robert Sedgwick. Died December 9, 1654.

GIBBONS, GRINLING, a celebrated carver in wood, was born at Rotterdam, 4th April, 1648, and appears to have visited England in 1667, the year after the great fire. Evelyn, who calls him the incomparable Gibbons, introduced him to King Charles II., and also to Sir Christopher Wren, who employed him extensively in the decoration of St. Paul's. Gibbons received a place in the Board of Works, and was much employed at Windsor. In 1714 he was appointed master carver in wood to George I., with a salary of eighteen pence a-day. He died in London, 3d August, 1721.—There are many fine specimens of Gibbons's carvings at Hampton Court, and at Petworth, the state room there being considered by some his masterpiece: also at Houghton; and there are some specimens still in St. James's Church, London. His works are in very high relief, and the details, fruit, flowers, game, &c., generally grouped in great clusters or festoons, and though from the proper distance they appear to be of extreme delicacy, are of a solid character, and very judiciously disposed. He made a taste for carvings of this class fashionable, and had several skilful scholars and imitators, as Selden, Watson, Devot, and Laurens; much work attributed to Gibbons was doubtless executed by some one of these men.—(Walpole, *Anecdotes of Painters*, &c., ed. Wornum. Bohn, 1849.) [R.N.W.]

GIBBONS, ORLANDO, Mus. Doc., who is regarded as one of the greatest English musicians, was born at Cambridge in 1583. He was only twenty-one years of age when he was appointed organist to the chapel royal, and in 1622, on the recommendation of the learned antiquary Camden, who was his personal friend, the University of Oxford conferred upon him their degree of Doctor of Music. Some years afterwards, while he was at Canterbury for the pur-

pose of conducting the musical performances at the marriage of Charles I., he fell ill of small-pox and died. He was buried in the cathedral of Canterbury, where his wife caused a simple and elegant marble monument to be erected to his memory. His first publications were madrigals in four parts for voices and viols, but the best of his works are his church services and anthems, many of which are still extant. 'The compositions of Gibbons are for the most part,' says one of his biographers, 'truly excellent, and the study of them cannot be too strongly recommended. The characteristics of his music are fine harmony, unaffected simplicity, and an almost unexampled grandeur.' Another writer says, 'after a lapse of upwards of two hundred years, his compositions seem to have lost none of their freshness, and are still, and likely to continue, the admiration of all real judges of what is excellent in music.' He left a son, CHRISTOPHER, who was also a musician, but who inherited only a very meagre share of his father's genius. Orlando Gibbons was survived by two brothers, EDWARD, who was organist of Bristol, and master of the celebrated Matthew Locke, and ELLIS, organist of Salisbury.

GIBBONS, RICHARD, an English Jesuit, professor of philosophy and divinity, 1549–1632.

GIBBONS, THOS., an English Calvinist, 1720–85.

GIBBS, JAMES, a Scotch architect, designer of the Radcliffe Library at Oxford, the church of St. Martin's-in-the-Fields, &c., 1680–1754.

GIBBS, GEORGE, an American mineralogist, died 1833, aged 57.

GIBERT, J. P., one of the most learned of French authors on the canon law, 1660–1736. BALTHASAR GIBERT, of the same family, a writer on rhetoric, 1662–1741. JOHN BALTHASAR, a learned historian and chronological writer, 1711–1770.

GIBSON, EDMUND, successively bishop of Lincoln and London, distinguished as a writer on ecclesiastical antiquities, and as a classical editor and translator, 1669–1748.

GIBSON, RICHARD, a celebrated dwarf and portrait painter, time of Cromwell, 1615–1690.

GIBSON, THOMAS, a writer of the reformation, died 1562.

GIBSON, WILLIAM, a mathematical teacher, 1720–91.

GIBSON, JOHN, General, a soldier of the French and revolutionary wars, was born in Lancaster, Pennsylvania, in May, 1740. He was with General Forbes in the expedition to Fort Duquesne. Here he remained trading with the Indians, and acquired a knowledge of their language. In 1774 he was particularly useful to Governor Dunmore in negotiating the treaty with the Indians. In 1788 he was chosen a member of the Pennsylvania convention. He died May 1822, aged 81.

GIFFEN, H., a Dutch critic, 1534–1604.

GIFFORD, ANDREW, a Calvinistic and antiquarian writer, especially on numismatics, 1700–84.

GIFFORD, JOHN, a political and historical writer, whose real name was J. R. Green, 1758–1818.

GIFFORD, R., an English divine, 1725–1807.

GIFFORD, WILLIAM, the son of a poor and dissipated tradesman, was born in Devonshire in 1756. Becoming in childhood a destitute orphan, he was successively a cabin-boy and a shoemaker's apprentice: but a benevolent patron put him to school; and finding his way to Oxford, he there gained aristocratic patronage, and attaching himself to the Tory party, proved one of its most effective literary advocates. In 1798, he became editor of the *Antijacobin*;

and for about sixteen years from 1809, he edited the *Quarterly Review*. He was eminently qualified for such offices both by his aptness and force of writing, his variety of information, and his readiness and unhesitating vehemence of satire. Not far from the close of the century appeared his two satirical poems, 'The Baviad' and 'The Mæviad;' and his vigorous and spirited translation of Juvenal was published in 1802. His best services to letters were his editions of Old English Dramatists. His 'Massinger' appeared in 1808; his 'Ben Jonson,' the most valuable of the series, in 1816: and his editions of Ford and Shirley, completed by other hands, were published in 1827 and 1833. He died in the end of 1826, bequeathing the bulk of his property to the son of his early benefactor.

GIGLI, JEROME, an Italian poet and satirical writer, who gained popularity by his attacks upon the academy Della Crusca, also for his dramatic works, was born at Siama in 1680, and died in 1722.

GIL, FATHER, a Spanish patriot, dist. in 1808.

GIL, POLO GASPAR, an advocate and poet, was born in Valencia, Spain, in 1516. He wrote the work entitled, 'Diana Enamorada,' died 1572.

GILBERT, DAVIES, born at St. Erth in Cornwall 1767, known as an antiquarian, and successor of Sir Humphry Davy as president of the Royal Society, author of 'A Plain Statement of the Bullion Question,' and many scientific papers. Gilbert was M.P. for Bodmin from 1806-32, died 1840.

GILBERT, F. H., a Fr. veterinarian, 1755-1800.

GILBERT, GAB., a French poet, died 1680.

GILBERT, SIR HUMPHREY, half-brother of Sir Walter Raleigh, was a man of ardent temperament and chivalrous character, who engaged in geographical discovery from the love of fame and adventure. Under patent from Queen Elizabeth, he sailed, in 1583, with five vessels and 260 men, to take possession of the northern parts of America. In Newfoundland, whose fisheries were already much frequented by French, Spanish, and Portuguese ships, he succeeded in establishing a colony, and thus secured the influence of England in those parts, the title being founded upon the first discovery by Sebastian Cabot. He ventured across the Atlantic, on his homeward voyage, in a vessel of only ten tons; but after passing the Azores he perished during the night in a storm, with all on board his little barque. He was seen on the evening before, struggling with the waves, by those in the Golden Hind (see DRAKE), which had accompanied him from the coast of Virginia, and in which he had been urged to take his passage home. He has been called 'the father of western colonization.'

GIOJA, M., an Italian economist, 1767-1829.

GIORDANI, GUISEPPE, sometimes called GIOR-DANELLO, whose songs at one time enjoyed the highest popularity in Britain, was born in Italy about the year 1750. He came to England very young, and soon had all his time filled up in giving lessons in music. In 1779 he entered into partnership with Leoni the singer, and they jointly became lessees of a theatre in Dublin, Giordani as composer, and his partner as singer. This speculation proved a complete failure, and in four years they were bankrupt. Giordani after this continued to reside in Dublin, where he had several pupils of distinction, and where he married the daughter of Tate Wilkinson. He composed two operas, 'Antigone' and 'Artaserse,' for the Italian Opera in England, and one for the English stage. He died in Dublin in 1789.

GIORGI, MARINO, a Venetian doge, succeeded and died 1311.

GIORGIONE, the name by which GIORGIO BAR-BARELLI is commonly known. He was born near Castelfranco in 1477, and was the fellow-pupil of Titian with Giovanni Bellini at Venice. He became a great colorist, and his pictures are further distinguished for objective truth of representation and effective light and shade. His pictures are very scarce; they consist chiefly of portraits. He died at Venice in 1511, at the early age of thirty-three.—(Vasari, *Vite de' Pittori*, &c.; Ridolfi, *Maraviglie dell' Arte*, &c.)

GIOSEPPINO, an Italian painter, died 1640.

GIOTTINO, TH., an Italian painter, 1324-1356.

GIOTTO DI BONDONE, was born at Vespignano in 1276; he was the pupil of Cimabue, and appears to have owed the development of his extraordinary faculties almost wholly to that painter, who, in one of his walks near Florence, saw Giotto, then a shepherd boy, sketching one of his flock on the ground, and perceived so much native talent in the attempt, that he persuaded the boy's parents to let him take him with him to Florence, and make a painter of him. Florence dates its preponderance in the history of Tuscan painting from the time of Giotto; his works mark the era of the first great epoch of the art

in modern times; the rigid traditional forms of the Byzantine school were finally laid aside for nature; the beautiful now supplanting the hideous as the fundamental element of the canons of art.—Giotto was painter, sculptor, architect, and mosaic worker; he enriched many cities in Italy with his works, (chiefly in fresco,) especially in Florence, Rome, Naples, Padua, and Assisi; and by his introduction of individuality of treatment through the careful study of nature, established legitimate portraits. The frescoes of the Arena chapel, Padua, are in course of publication by the Arundel Society. Giotto was in Rome in 1298, he was at Avignon for some years afterwards, between 1305 and 1314; in 1316 he returned to Florence, in 1327 he visited Naples, and he died at Florence in 1336.—(Vasari, *Vite de' Pittori*, &c., ed. Florence, 1846.) [R.N.W.]

GLUCK, CHRISTOPH, was born in Weidenwagen in the upper Palatinate, in the year 1714, where his father held the situation of forester to the Prince Lobkowitz. Early in childhood he went with his family to Bohemia, where his father died and left him without education, and in circumstances little removed from absolute penury. Gluck was, however, gifted with a mind of no ordinary power, and he soon made his proficiency in music the means of placing himself above want. He went from town to town as an itinerant musician until he arrived at Vienna, where he met with a nobleman who became his patron, and in whose suite the young Gluck went to Italy, and became the pupil of the renowned Padre Martini. Here he was put upon the establishment of Prince Melzi as composer, and before he returned to Germany he produced several successful operas. His fame had now spread so far beyond the city of Milan, that in 1745 he was invited by the directors of the king's theatre to come to London, where he was to hold the situation of composer to that establishment. His success in London was not very decided. While in this situation he produced his 'La Caduta dei Giganti,' and 'Artamene' operas, and 'Piramo e Tisbe,' a *pasticchio* consisting of selections from all his previous works. After this Gluck went for a short time to Copenhagen, from whence he was invited to return to Italy, where he produced his 'Clemenza di Tito,' 'Antigonus,' 'Clelia,' 'Baucis e Philemon,' and 'Aristideo,' with varied success. He then went to Vienna, where in connection with Signor Calzabigi, an ingenious poet, he projected a new style of operatic composition, and in 1764 produced his 'Orfeo' with the most complete success, 'Helen of Paris,' and 'Alceste,' speedily following. Gluck now visited the principal cities of Italy, and when at Naples was engaged to compose two operas. On

his return to Vienna he composed and produced his 'Iphigenia in Aulide,' the *libretto* of which was an adaptation of the text of Racine's Iphigenia. The fame of this piece reached Paris, whither Gluck was invited by the Academie Royale. On his arrival at Paris, Marie Antoinette immediately became his pupil and patron, and at her bidding the Iphigenia was produced on the 19th of April, 1776, under his own direction, and with the most triumphant success, notwithstanding the prejudice which had been fostered against it before its performance. Immediately after this Paris was divided into two bodies, Gluckistes and Piccinistes, the latter party being the devoted admirers of Piccini the Italian composer, who was then rising into eminence; but though the musical war raged for a long time, nevertheless, when the termination of hostilities arrived the triumph of Gluck was complete. Having composed two more operas, Gluck returned to Vienna in 1779, and never after quitted that city. In 1784 he was attacked by paralysis, under which he suffered until 1787, when he died, leaving a fortune of £30,000, the fruits of his talents and industry. The writer of the sketch of his life in the Musical Library says—'The Chevalier Gluck—for he had received an order of knighthood—was a man of powerful mind, by means of which he supplied the deficiencies of early education. He read much, associated with literary and scientific persons, and reflected deeply; hence, all his works display an intellectuality not often found in the productions of the lyric stage, which have preserved them, and will continue to preserve them, while nearly all the compositions of his contemporaries and rivals have sunk into oblivion.'

GODEBERT, a king of the Lombards, 661-662.

GODESCHALCUS or GOTTESCHALCUS, was by birth a Saxon, and was educated in a monastery at Fulda. On arriving at manhood, he struggled hard against a monastic life, but Rabanus Maurus his future persecutor interfered, the influence of Louis the emperor was invoked against him, and his early and unconscious consecration as a monk by his father, was held to be an inviolable bond. On his subsequent removal to Orbais in the diocese of Soissons he was ordained a presbyter, and we find him soon after travelling in Italy and Dalmatia. He had already in retirement drunk deep into the spirit of Augustine, and he reproduced in a prominent form his views on grace and predestination, especially in a discussion before Notting, bishop of Verona. But violent opposition was stirred up against him, and his tenets were condemned by the Synod of Mentz in A.D. 847. His fierce antagonist Rabanus Maurus, then sent him to Hincmar, archbishop of Rheims, to whose see the so-called heretic belonged. Hincmar immediately arraigned him before the Synod of Chiersey in 849, degraded him, scourged him severely, and incarcerated him in the monastery of Hautevilliers in the diocese of Rheims, where, after twenty-one years of confinement, the noble confessor died. In his last illness the communion was refused him, and his corpse was denied Christian burial. The controversy raised by Gotteschalcus agitated the Romish Church for many years. Prior to his polemical appearances, Gotteschalcus, for the brilliancy of his scholarship, had been named Fulgentius. That his enemies caricatured his opinions is plain, but it is no less true that his naked and extreme statements were liable to misconception, and unnecessarily stirred up prejudice. His long and shameful imprisonment never shook in the least his sincere attachment to the Augustinian theology. [J.E.]

GODFREY OF BOUILLON, duke of Lorraine and first Christian king of Jerusalem, was born at Bézy, near Nivelles. He served while young with high distinction in the armies of the emperor Henry the IV.; and when near the close of the eleventh century all Western Europe was roused to the rescue of the Holy Land from the infidels, the fame of Godfrey was high throughout Christendom for piety and moral excellence, as well as for knightly prowess. He entered fervently into the great movement of his age, and was confessedly the first in rank and worth among the chiefs of the first crusade. He not only signalized himself by valor among the valorous, and by enthusiasm among the enthusiastic, but he showed also disinterestedness, probity, skill, and prudence, which were of a higher and rarer order. He maintained the most complete discipline among his divi-

sion of the Christian army, which he brought safely to the appointed muster-place beneath the walls of Constantinople, in the winter of 1096. By his sagacity and firmness, he prevented hostilities breaking out between the host of the crusaders and the Greek emperor, Alexius Comnenus; and, in the spring of 1097, Godfrey led the Frankish nations into Asia Minor, to the siege of the capital of the Turkish sultan of Nice. This city was captured after a siege, in which the personal valor of Godfrey, as well as his generalship, was frequently displayed. He was tall, well-proportioned, and of such remarkable strength and dexterity in the use of his weapons, that he is said in more than one encounter to have cloven his foe by a single sword-stroke from skull to centre. After Nice was captured, the crusaders marched forward, and defeated a Turkish army in the great battle of Dorylæum. They reached Antioch, in Syria, late in the winter of 1097. The city was captured after an obstinate resistance; and the weakened army of the victors was in turn besieged in its walls by an innumerable host of the Mahomedans. After enduring much suffering and loss, Godfrey led the crusaders in a sudden sortie upon their enemies, which was completely victorious. The enthusiasm caused among the Christian army by the supposed discovery of the relic of the Holy Lance, was one great cause of this success. It was not till 1099 that the crusaders reached Jerusalem; and their numbers were then reduced by the sword and by disease to only 1,500 horse and 20,000 foot fit for service. The Mahomedan garrison was far more numerous, and the city was formidably strong. But the zeal of the crusaders was indomitable. After a siege of forty days, a successful assault was made, and 'on a Friday, at three in the afternoon, the day and hour of the Passion, Godfrey of Bouillon stood victorious on the walls of Jerusalem' (Gibbon).—When the crusaders were sated with carnage and pillage, they deliberated on the important subject of choosing a ruler of their conquest; and, with the universal consent of the assembly, Godfrey was hailed king of the Christian kingdom of Jerusalem. He showed his humility and piety by refusing to wear a golden diadem in the city where his Saviour had been crowned with thorns, and he desired to be called only Defender and Baron of the Holy Sepulchre. During his short reign he gained several military advantages in the field against the Mahomedans, especially at Ascalon, where he routed a large army which the sultan of Egypt had sent to reconquer Jerusalem. Godfrey deserved still higher honor for his exertions in establishing order and justice in his dominions, and in compiling a code of laws for his subjects. Unhappily for the infant kingdom, he died within a year from his accession. [E.S.C.]

GODFREY, SIR EDMUND, an English magistrate who exerted himself in the discovery of the Popish Plot, and is supposed to have been murdered, being found dead 17th October, 1768.

GODINOT, J., a French theologian, 1661-1749.

GODIVA, an English lady, wife of Leofric, earl of Leicester, in the reign of Edward the Confessor, celebrated in the legends of Coventry for riding naked through the streets to deliver the citizens from a tax.

**GODMAN, JOHN D.**, an anatomist and naturalist, was born at Annapolis, in Maryland. He was at an early age indentured an apprentice to a printer, but not relishing the employment, joined the flotilla in 1813 then stationed in the Chesapeake. At the termination of the war he commenced the study of medicine and anatomy under Dr. Davidge, of Baltimore. After obtaining his degree, he commenced the study of natural history. He was some years after chosen professor of anatomy in Rutgers' Medical College, New York. He died at Germantown, near Philadelphia, April 17, 1830, aged 31.

**GODOLPHIN, J.**, an English civilian, 17th cent.

**GODOLPHIN, SIDNEY**, earl of, lord high treasurer of England under Queen Anne, died 1712.

**GODOLPHIN, SIDNEY**, an English poet, 1610-1643.

**GODONIN, J.**, a French Hebraist, died 1700.

**GODOONOFF, BORIS**, czar of Moscow after the murder of Demetrius, 1599, died 1605.

**GODOY, DON MANUEL**, the celebrated 'Prince of Peace,' originally a private soldier, rose to be prime minister of Spain, 1764-1851.

**GODWIN, earl of Kent**, a powerful English baron in the Saxon period, celebrated for his turbulence and political intrigues, died 1053.

**GODWIN, MRS.** See **WOLSTONCRAFT**.

**GODWIN, THOMAS**, an English prelate, successively dean of Christ Church, dean of Canterbury, and bishop of Bath and Wells in the reign of Elizabeth, 1517-1590. His son, **FRANCIS**, successively bishop of Llandaff and Hereford, and author of historical and antiquarian works, 1561-1633. **MORGAN**, son of the latter, also a churchman, deprived as a royalist during the civil war, died 1645.

**GODWIN, TH.**, an English divine, 1587-1643.

**GODWIN, WILLIAM**, was born in 1756, at Wisbeach in Cambridgeshire. His father was a dissenting minister; and he, himself, after having completed his education in the college at Hoxton, embraced the same profession, and preached for some years to a congregation near London. About 1782 he abandoned the pulpit, his opinions having undergone serious changes; and thenceforth he strove to make a livelihood by authorship. In 1793 he became famous, or notorious, by the publication of his 'Inquiry concerning Political Justice.' This celebrated work, founded on the dream of human perfectibility, is remarkable for that combination of vigor with want of comprehensiveness and real profundity, which marked all its author's writings. His crusade against the existing system of things in all its parts was next prosecuted in a more popular shape, and with singular force of passionate and descriptive eloquence, in his novel of 'Caleb Williams.' Strongly democratic in political opinions, but gentle as well as brave, he always protested against the bringing about of social changes by force; but, though he kept sedulously aloof from the plots which, in 1794, exposed Horne Tooke and others of his friends to prosecution for treason, he did them good service by his pen. In 1797, he published essays, moral and literary, under the title of 'The Inquirer.' The same year he married Mary Wolstoncraft, in deference to the opinion of the world, after having lived with her for some time in obedience to the opinion which he himself held in regard to marriage, and which she had advocated in her 'Vindication of the Rights of Women.' His wife died in giving birth to a daughter, who became Mrs. Shelley. By a subsequent marriage he had a son, a young man of great promise, who died of cholera in 1833. In 1799, Godwin published the picturesque novel of

'Saint Leon,' his last work of this kind that was worthy of his genius. 'Fleetwood,' published in 1804, and 'Mandeville,' in 1816, are much inferior; and 'Cloudesley,' which appeared in 1830, showed that the vein of self-scrutiny on which his strength depended, had been quite worked out. But, in 1803, he had entered a new path in his 'Life of Chaucer,' which, though wanting in unity and consecutive interest, is very instructive. For some time after this he attempted business as a bookseller, and wrote a good many school-books under the name of Baldwin. In 1815, he published his 'Lives of John and Edward Phillips,' the nephews of Milton; in 1820, he attacked Malthus in his 'Treatise on Population;' in 1828, he published the last of the four volumes of his heavy but valuable 'History of the Commonwealth;' in 1830 appeared his essays called 'Thoughts on Man;' and in 1834, his 'Lives of the Necromancers.' The poverty of his old age was alleviated by an appointment from the ministry of Earl Grey. He died in 1836. [W.S.]

[Johann Wolfgang Von Goethe.]

**GOETHE, JOHANN WOLFGANG VON**, is one of the most celebrated names in European literature. It is the name of a poet who united, in an extraor-

dinary degree, power of imagination and power of expression; and who, not less remarkable for versatility than for vigor, produced, by the exertions of sixty years, works which exemplify, in one shape or another, every possible form and kind of poetry. Goethe holds, likewise, in the intellectual history of Germany, the position of a founder and inventor. His poems were almost the earliest in the language that deserved wide celebrity; they were, without exception, the first that were fortunate enough to attain it. Nor have they been more admired than imitated. To say nothing of the influence they have exerted among ourselves and elsewhere, nine tenths of the poetry that has been heard in Germany during the last seventy or eighty years, have been little more than echoes thrown back from that of Goethe. The fact is a decisive testimony to the strength of his genius; yet it could not have occurred but for that closeness of sympathy with the spirit of his time, which the poet felt in every stage of his progress. Each of the most powerful impulses by which, in turn, the social and intellectual life of Germany was governed, found in him its earliest and also its most striking representative; and, while he interpreted the tendencies of the age with felicitous intuition, and prefigured their results with wonderful richness of imagination, he gained a firm hold on popular feeling through that very coldness and practicality of moral sentiment, which always kept him, in an ethical point of view, on a level with the world around him. He aimed sedulously at purifying and elevating poetical art; he never aimed at making poetry the teacher of goodness. If the noble-minded and impassioned Schiller often embodied his lofty aspirations after truth and virtue in a form too anxiously and openly didactic, and if, even when he did not thus err, he imprinted on his pictures a character of austere melancholy which repels the worldly and the careless; yet, on the other hand, Goethe assuredly violated higher laws of his art, when he studiously avoided that indirect and suggestive teaching of goodness which is the most sublime prerogative of poetry, and when he intrenched himself in a seeming tolerance which is really little else than sceptical indifference.—Goethe's father, a man in easy circumstances, was a citizen of Frankfort-on-the-Maine; and there the poet was born, on the 28th of August, 1749. His boyhood and youth thus fell into the period when Germany was excited by the seven years' war; and when, in literature, the clear and energetic Lessing was laying the foundations of philosophical criticism, inculcating intelligent respect and affection for the arts of design, and protesting against that slavish subservience to French taste which had long prevailed among German men of letters. Sickness in childhood cherished Goethe's native precocity; and his mind was developed with remarkable rapidity. Besides the common branches of education, he busied himself with drawing, music, and natural history; and a boyish poem on the scriptural history of Joseph, indicated at once his poetical inclinations, and the serious direction which his thoughts then took. After the breaking off of a youthful love affair, which gave a name to the heroine of 'Faust,' and some features to 'Wilhelm Meister,' he was sent to the university of Leipzig to prepare himself for the legal profession. Law, however, was little attended to; and for speculative philosophy the young poet contracted a disgust, which he did not seek to overcome in mature life, when Kant had become the guide of almost all the finer minds of his country. To classical studies, under the teaching of the correct and tasteful Ernesti, he

[Goethe's Study.]

paid more attention. To his early French reading was now added some acquaintance with English literature. The discrepancies, however, between the different poetical schools, which he was unable to reconcile by any critical theory that had yet been presented to him, almost gave him a distaste even for poetry. His inquisitive and doubting temper found not less food in the contemplation of the relations of society, presented to him in no clearer light than that which he derived from the French Encyclopedists; and his mind had already taken its earliest steps in that course of thought and feeling, which, breaking out at first in rebellion against all existing systems, led him by degrees to care little as to the truth or falsehood of any. Attempts were made at play-writing; and the uneasy state of mind, which he thus endeavored to remove by giving vent to it, was allayed more effectually by the diversion of his thoughts to the study of the fine arts, in the works of Winckelmann and other philosophical antiquaries. In 1768, he left Leipzig, and resided for a while in the country, where he studied alchemy and chemistry, Paracelsus and Boerhaave, and sketched for himself a new religion, resting on a basis of mysticism or New-Platonism. In Strasburg he nominally completed his professional studies, taking his degree of doctor in laws in 1771. The intimacy which he there formed with Herder, worked beneficially both on his literary opinions and taste, and on his views of life.—In 1773, he published 'Götz of Berlichingen with the Iron Hand,' a romantic play, written in prose, and cast in the flexible and irregular mould of Shakspeare's dramatic histories. The novelty of the undertaking was as attractive as the force of imagination with which it was performed; and, while every one was moved by the character and fate of the true-hearted Götz, there was for reflective minds a deep significance in the picture which was presented (under the symbolic forms of feudalism), of the destruction of the reign of force, and the rise of a new world ruled by reason and established order. Here, too, the poet, in the tumultuous excitement of youth, poured forth his emotions with an unrepressed and infectious enthusiasm. Still more unreserved was the expression of despondent and rebellious feelings, in his second work, 'The Sufferings of the Young Werter,' which appeared in 1774. In its design nothing more than a sentimental novel, and thus bidding for a popularity much wider than 'Götz,' 'Werter' displayed domestic scenes so interesting, and described these with a pathos so profound and an eloquence so flowing, that the hollowness of the morality was overlooked, and

the real insignificance of the events forgotten. The German language possessed as yet nothing comparable to either of the two works; their author himself never surpassed the 'Götz;' and, after the appearance of 'Werter,' Goethe was not only the most popular writer of his day, but also the writer from whom competent judges most confidently expected great performance in his maturity. His fame immediately gained for him a position which enabled him to devote his energies, without interruption or anxiety, to literary study and invention. The opportunities were used with zealous industry throughout the whole remainder of his long life; and his skill of art was developed with a success atoning in some degree for that narrowing of his sympathies, which was caused by the artificial atmosphere of a petty court.—The duchess of Saxe-Weimar, left a widow in the infancy of her son, the duke Karl-August, not only administered wisely the civil affairs of her little sovereignty, but conceived the idea of making her miniature capital the intellectual centre of Germany. In 1774, in the course of his travels, the young duke made the acquaintance of Goethe; and, on his assuming the government in 1775, the poet accepted the invitation he received to attach himself to the court of Weimar. Wieland, whose mental history was in some points not unlike that of Goethe, was already there, having been the prince's tutor; Herder was added to the band in 1776; Schiller was afterwards one of its members for a few years; and other poets, and critics, and novelists, were gathered round these chiefs. Goethe was the leading spirit of the group, even during the last quarter of the eighteenth century, when these men and others were constructing and guiding the literature of all Germany; and his supremacy became yet more absolute afterwards, when, for another generation, he stood alone, the last survivor of a race greater than the greatest of their successors.—He was ennobled, received honorary councillorships and other appointments, and had even some share in the real business of the small state. But, in the most active period of his life, his most important office was that of theatrical director. Journeying to Italy in 1786, he spent two years in that country, which had much effect on his opinions and sentiments. In 1792 he accompanied the duke on the campaign in France. In 1806 he married. Not long afterwards he retired from all active business; but in 1815 he was obliged to take office as prime minister, which he held till the death of his friend and patron the grand duke in 1828. He died at Weimar on the 22d of March, 1833, energetic to the last, both in body and in mind.—For a dozen years after his settlement at Weimar, he seemed to be reposing on his quickly-won laurels. But he was very far from being idle; nor, in that later period in which his most distinguished works successively appeared, were these by any means the only fruits of his labor. He wrote accounts of his travels in Switzerland and Italy, and many critical and other essays; and, amidst an unceasing stream of small poems—few of them possessing much merit—were some exquisite ballads and other pieces of a lyrical or reflective cast. For the stage of Weimar, likewise, he furnished many plays; among which, as having importance literary as well as theatrical, may be named his prose tragedies of 'Egmont' and 'Clavigo.'—There still remain to be briefly noticed the works on which his celebrity mainly rests. The earliest of these were two dramas, which appeared in 1787, and flowed from the twofold inspiration of his residence in Italy. The 'Iphigenia in Tauris' is a modern echo, finely and

originally modulated, of the classical antique; the 'Tasso' is a realization of the fluttering spirit of romance which lingered in the courts and society of Italy when the realities of the middle ages had passed away. None of Goethe's works are so admirable as these two for skill of art; none are more exquisite in ideal beauty of imagery; none are so characteristically illustrative of the desire he always felt to attain, though it were by the sacrifice of sternly solemn truths, a placid and meditative harmony of feeling. In 1795 appeared the first part ('The Apprentice-Years') of his novel 'Wilhelm Meister.' It is one of the most poetical, and the Germans hold it to be also the most philosophical, of all prose romances. Its philosophy, like its slippery morality, must here be left untouched. Its introduction of criticisms on literature and art was eagerly emulated, giving birth to those 'Art Novels,' the breed of which has been propagated to our own day. The poet's fame rose to its zenith in 1798, on the publication of his world-renowned 'Faust.' It is easy to feel, or rather it is impossible not to feel, the singular poetic beauty of this wonderful poem, its unsurpassed felicities of imagery and diction, and the impressiveness of the despondent melancholy which is the ruling temper of the whole. Philosophically considered, the 'Faust' is a propounding of the enigma of human life, with a refusal to accept, from religion, its only possible solution. In the same year, in 'Hermann and Dorothea,' Goethe attempted, as others had before him, at once to naturalize the classical hexameter in his native tongue, and to give epic form to a narrative of familiar life.—At this point the series of the poet's great works may be said to close. There next occurred a long interval, marked by nothing of distinguished note. The appearance, in 1810, of the notorious novel of the 'Wahlverwandschaften' (Elective Affinities), while assuredly it denoted a falling off in creative genius, betrayed as clearly a settled declension of moral sentiment. The epicureanism in which the poet now found repose, was worse than the sceptical spirit of resistance which had disturbed his aspiring youth. In 1811 he published his interesting autobiography called 'Poetry and Truth,' (Dichtung und Wahrheit). His countrymen place much value on the collection of lyrics entitled the 'Westöstlicher Divan,' which appeared in 1819, but seem to have been written much earlier. In 1821 'Wilhelm Meister' was completed by the second part, the 'Years of Wandering' (Wanderjahre).—After this, Goethe's only sustained effort in poetry was the second part of 'Faust,' which was under his hands till the close of his life. None but his most bigotted disciples have ventured to pronounce it in any respect worthy of a great poet. During the last few years of his old age, his favorite employments were some of the physical sciences both in vegetable physiology, and in optics, he published speculations which scientific men have thought worthy of notice. GOLDSMITH, F., a Latin translator, 17th cent.

GOLDSMITH, LEWIS, an English Jew, author of the 'Crimes of Cabinets,' and afterwards a hireling writer against Buonaparte, born 1763.

GOLDSMITH, OLIVER, the son of an Irish curate, was born in the county of Longford in 1728. Lissoy, in his native parish of Forney, is said to have been the original of his 'Sweet Auburn.' The assistance of an uncle enabled him in 1744 to enter at Trinity College, Dublin, where he was idle and extravagant, and probably ill-used. He is said to have applied unsuccessfully for ordination, and to have been for same time a family tutor. He threw away in a gaming-house the money which his uncle had given him to aid in his study of law; but the same kind relative enabled him to become a student of medicine in Edinburgh, where he spent two years from the close of 1752, afterwards passing a year at Leyden. He next took a pedestrian tour of twelve months on the continent, travelling as far as the north of Italy; and before or after this he was an usher in a school. Both of these experiences he has described in his famous novel.—In 1756 he came to London. He attempted medical practice in a humble way, with small knowledge and no success; and, on submitting to examination at the College of Surgeons, to qualify him for an appointment abroad, he was rejected as insufficiently informed. He had already been writing for the booksellers; and authorship now became perforce his only means of livelihood. He drudged for the *Monthly and Critical Reviews*, and for other periodicals; and compiled his well-written 'Histories of Greece and Rome,' and his

[Goldsmith's House at Lissoy.]

'History of the Earth and Animated Nature.'—It was in the intervals of such toils that he produced those original works, which made him both in prose and verse, one of the classics of English literature. In 1761 he wrote, while in confinement for debt, his inimitable 'Vicar of Wakefield;' and soon afterwards appeared 'The Citizen of the World.' 'The Traveller,' which had been partly written abroad, and the beautiful ballad of 'The Hermit,' were published in 1765. The former of these poems gave him great and deserved fame as a descriptive poet, which was increased in 1769 by the publication of 'The Deserted Village.' He became yet more popular as a play-writer. His comedy of 'The Good-Natured Man,' which was acted in 1768, did not succeed greatly on the stage, but was highly esteemed by Johnson and other critics; and 'She Stoops to Conquer,' appearing in 1773, was received with universal applause.—The author survived this brilliant success but a short time, and profited very little by the wealth which was now accruing to him. Industrious through necessity, he was indolent by temperament: he was careless and improvident in money matters, equally ready to squander his painfully-earned gains at the gaming-table, or to spend them in charity. Gentle, amiable, and good-hearted, he was also irresolute, vain, and capricious; and, while Johnson and his other literary friends did not estimate highly enough his fine genius, his conduct gave them much excuse for treating him, as they did, like a favorite and petted child. He died 1774.

GORE, CHRISTOPHER, governor of Mass., was born at Boston in 1758, was the son of a respectable mechanic in that city. In 1789 was appointed by Gen. Washington first U. S. district attorney for Massachusetts, and in 1790 was chosen in conjunction with William Pinckney, to settle the claims of America upon Great Britain for spoiliations. Through his great exertions in this affair he rendered much service to his countrymen in causing the restitution of a large amount of property. In 1803 he acted as charge d'affaires at London in the absence of Rufus King, the American minister. He was chosen governor of Mass. in 1809, and in 1814 was elected to the senate of the U. S. He died in 1827, aged 68.

GORE, SIR J., a naval officer, died 1836.

GORE, TH., a writer on heraldry, 1631-1684.

GORGES, FERDINANDO, SIR, sole proprietor of the province of Maine, and governor of Plymouth. Wishing to engage the Scotch in the settlement of New England, he promoted the patent of Nova Scotia to Sir Wm. Alexander in 1621. He published a narrative relative to the settlement of New England. In 1639, he obtained from the crown, the grant of land called the province of Maine and was made Lord palatine. At his death in June 1647, he left his estate to his son John Gorges, who so totally neglected the province, that in 1652 the people placed themselves under the government of Massachusetts.

GORGES, FERDINANDO, grandson of Sir Ferdinando Gorges, succeeded to the rights of his father. On his petitioning the king against the usurpation of Massachusetts, commissioners were sent over to adjust the affairs of government, but in 1677 he sold his rights to Massachusetts for £1,250. In 1659, he published a work on New England, entitled 'America painted to the life.'

**GORGAS, LEONTINUS**, a distinguished orator, was born at Leontium in Sicily, in the 5th century before Christ. A statue of gold was erected to his memory at Delphi.

**GORHAM, JOHN, M.D.**, a physician of Boston, graduated at Harvard College in 1801, and afterward studied physic at the University of Edinburgh. In 1809 he was appointed adjunct professor of chemistry and materia medica at Cambridge, and in 1816 he was chosen professor of chemistry and mineralogy. Died 1829.

**GORHAM, NATHANIEL**, president of Congress, was born in Charlestown, Mass., in 1738. He was several times a member of the legislature, and in 1784 was elected to Congress. He was for many years a judge of the court of common pleas. He assisted as a member of the convention, in forming the constitution of the United States. Died in 1796, aged 58.

**GORI, G. A.**, an Ital. antiquarian, 1691-1757.

**GORLÆUS, A.**, a Flem. numismatist, 1549-1609.

**GORSAS, A. J.**, a Fr. political wr. and member of the convention, exec. with the Girondins, 1793.

**GORTON, SAMUEL**, emigrated to America in 1636, and was one of the first settlers of Warwick, Rhode Island. A few years afterward, he rendered himself notorious in Boston, by the extraordinary notions on religious matters which he promulgated. He soon went to Plymouth, where he was publicly whipped for his misdemeanors, and in Newport a similar punishment was inflicted on him. Having purchased some property in Providence in 1641, proceedings were soon instituted against him, for trespassing upon other lands adjoining, when, being apprehensive of the consequence, he quitted the neighborhood, and with some others purchased a tract of land at Mishawomet from Miantonimo, the Narragansett Sachem, in 1643, where he founded the town of Shawomet, afterward called Warwick in honor of the Earl of that name. In 1644 he was banished from the colony as a heretic, and went to England, where, through the influence of the Earl of Warwick, government reinstated him in his property. In 1648 he returned to America, took possession of his lands and acted as minister at Warwick, disseminating his antinomian doctrines extensively. He died at an advanced age in 1676.

**GOW, NEIL**, was born in Strathband, Perthshire, of humble but honest parents, in the year 1727. His taste for music was early decided. At the age of nine he began to play, and was, it is said, self-taught, till about his thirteenth year, when he received some instruction from John Cameron, an attendant on Sir George Stuart of Grandtully. A trial of skill having been proposed, Neil was persuaded to enter the lists, and one of the minstrels, who was blind, being made the umpire, the prize was adjudged to Neil Gow, by a sentence in the justice of which the other competi-

tors cheerfully acquiesced. Having now attained the summit of his profession at home, the distinguished patronage, first of the Athole family, and afterwards of the duchess of Gordon, soon introduced him to the notice and admiration of the fashionable world. From this period, Gow was unrivalled in his department of Scotch national music. The different publications which have appeared under the name of Neil Gow, and which contain not only his sets of the older tunes, but various occasional airs of his own composition, are striking specimens of feeling and power of embellishment. These were set and prepared for publication by his son NATHANIEL, whose respectable character and propriety of conduct secured for him the esteem and favor of the public. In private life, Neil Gow was distinguished by a sound vigorous understanding, by a singularly acute penetration into the character of those, both in the higher and lower spheres of society, with whom he had intercourse, and by the conciliating and appropriate accommodation of his remarks and replies, to the peculiarities of their station and temper. Though he had raised himself to independent and affluent circumstances in his old age, he continued free from every appearance of vanity and ostentation. He maintained to the last the same plain unassuming simplicity in his carriage, his dress, and his manners which he had observed in his early and more obscure years. He died at Inver, near Dunkeld, in 1807. Besides his son Nathaniel, he left another (JOHN), who long resided in London, and who inherited much of his father's musical taste and power of execution. Two other sons of equal eminent musical talent (WILLIAM and ANDREW), died a few years before their father, but not till they had established their reputation as true descendants of *famous Neil*. GRABERG, OLAVE, a protestant theologian of Sweden, au. of 'Thoughts on the Bible,' 1715-69.

GRACCHI. The Gracchi, so often mentioned in Roman history, were the two sons of Tib. Sempronius Gracchus and Cornelia, the daughter of Scipio Africanus, the elder. Gracchus, who had been twice consul, and had obtained two triumphs, died while his sons were yet young, and Cornelia devoted herself exclusively to the charge and education of her children. Under her maternal guidance, aided by the best Greek masters, they soon surpassed in accomplishments all the Roman youths of the time.—1. TIB. SEMPRONIUS GRACCHUS, the elder of the two, was born B.C. 164. Scipio Africanus the younger had married his only sister; and when he entered upon the command of the army against Carthage, Tiberius accompanied him, and was present at the destruction of that renowned city. Nine years after he accompanied the consul Mancinus as quæstor to Spain, where, by his integrity and disinterestedness,

he gained the esteem of the enemy as well as the affections of the Roman soldiers. When the Roman army under Mancinus was defeated by the Numantines (B.C. 137), Tiberius succeeded in effecting a treaty on reasonable terms, which, however, the senate refused to ratify. Tiberius, notwithstanding, reaped the glory of having saved 20,000 men from destruction, and the people rewarded his services with affection and gratitude. During the long wars in which the Romans had been engaged, many encroachments had been made on the public domains; the nobles had obtained possession of extensive tracts, which were cultivated by foreign slaves; and the poorer classes of Roman citizens, being thus thrown out of employment, were reduced to a state of pauperism. Tiberius, sympathizing with the privations of the poor, resolved to revive the Licinian law, which defined the extent of public land tenable by any citizen. With this view he was elected tribune of the people in B.C. 133, and, in the face of unscrupulous opposition on the part of the nobility, carried a law similar to that of Licinius. Tiberius himself, his brother Caius, and his father-in-law, Appius Claudius, were appointed commissioners for measuring and distributing the land. At this crisis of affairs, Attalus, king of Pergamus, died, bequeathing his kingdom and treasure to the Roman people, and Tiberius proposed to divide the treasure among the recipients of the land under the new law, to enable them to stock their farms. This proposal raised the indignation of the nobles to a still higher pitch. To prevent his law from being abolished, and also to secure his person against imminent danger, he resolved to offer himself a candidate for the tribuneship of the following year. On the day of election, his opponents demurred to his eligibility, and night intervened before the question was decided. Next morning both parties presented themselves at the capitol in readiness for acts of violence; the senators were resolved to kill Tiberius, and his own partisans were prepared to defend him. Hereupon Scipio Nasica, after in vain calling upon the consul to defend the state, rushed from the temple of Faith, where the senate had assembled, followed by the nobility, overawed the mob, seized their weapons, and killed about three hundred, of whom Tiberius Gracchus was one, B.C. 133. Thus perished one of the truest Roman patriots, whose memory has only in recent times been freed from the odium which centuries of misrepresentation had heaped upon it.—2. CAIUS SEMPRONIUS GRACCHUS was nine years younger than Tiberius; and at the time of his brother's death was in the army of Scipio Africanus in Spain. The fate of his brother seems to have deterred him from acting as a commissioner under the agrarian law, or from taking any prominent part in public affairs, till B.C. 123. Returning then from Sardinia, where he had served two years as quæstor, he was elected tribune of the people, and commenced a career which speedily led to a fatal conclusion. The measures which he proposed were partly vindictive and partly intended to establish his own popularity; of the latter class was a poor-law authorizing a monthly distribution of corn to the people at a merely nominal price; the effect of which was to make the population of Rome paupers, and to attract the poor and indolent from all parts of Italy. Caius next directed his efforts against the power of the senate, deprived them of the right of electing the judges from their own number, transferring it to the equites, and passed a law enacting that the provinces of the consuls and prætors should be fixed before the election of these magistrates.

Being re-elected to the tribuneship of the following year, he was chiefly employed in passing laws respecting the colonies, and himself established a colony on the ruins of Carthage. But his popularity was now on the wane; he was outbid in popular favor by his colleague, Livius Drusus, the tool of the senate; and the fickle mob, whose idol he had lately been, now forsook him. After the expiry of his period of office, he united with the tribune Fulvius in inciting the populace to acts of violence, which led the senate to arm the consul Opimius with absolute power. The consul summoned Gracchus and Fulvius before him to answer for their conduct; and, after some attempts at negotiation, attacked and dispersed the popular party. Gracchus, who had taken no part in the struggle, fled across the Tiber, and entering a grove sacred to the Furies, ordered his slave to kill him. He thus perished, B.C. 121, at the age of thirty-three. The praise of disinterested patriotism cannot be extended to Caius. Though a man of greater talent than his brother, he was less sincere; and some of the measures which he advocated were positively pernicious. [G.F.]

GRATIUS, O., a controversial writer, 16th cent.

GRATTAN, HENRY, an Irish statesman and lawyer, was born in Dublin about the year 1750. He was called to the Irish bar in 1772; and having attached himself to Lord Charlemont, he obtained, by the powerful influence of that aristocratic national leader, a seat in the Irish parliament in 1775. His fiery eloquence, essentially Irish in its impetuosity, which yet was guided by good taste and strong judgment, gave him an immediate influence both with parliament and the public, and his bold spirit speedily grasped at projects far beyond the more hesitating policy of his leader. His great object was to have a recorded declaration of the legislative independence of Ireland, and by obtaining it as he did,

[The Four Courts, Dublin.]

there is no doubt that he prepared his country to receive juster terms and a higher position in a legislative union with Britain than she might have otherwise obtained. Besides the old assertion of the supremacy of the English crown in Poyning's Act, there stood, in the British statute book, so lately as the reign of George I., an offensive declaration of the legislative authority of the British parliament over Ireland. On the 16th of March, 1782, the Irish Commons, as the result of Grattan's exertions, carried a declaration of rights condemning this legislative assumption, and by the cordial aid of Fox, then fortunately in power, the offensive act was repealed by the British parliament. The Irish legislature resolved to show their gratitude by a vote of money to Grattan, which, at his own desire, was reduced from the £100,000 originally suggested to £50,000. His popularity was subsequently occasionally shaken by the hostility of his great rival Flood. Unlike many of his coadjutors in the struggle for Irish nationality, he was a warm friend of catholic emancipation. He strongly opposed the union, and was for some time a member, but not a remarkable one, of the united parliament. He died on 14th May, 1820. [J.H.B.]

GRAY, ROBERT, bishop of Bristol, author of a 'Theory of Dreams,' 'Connection between the Sacred Writings and the Literature of Jewish and Heathen Authors,' &c., 1762-1834.

[Gray's House at Stoke.]

GRAY, THOMAS, the son of a scrivener in London, was born there in 1716. From Eton school he passed to Cambridge, where he busied himself with languages and poetry, and neglected mathematics and philosophy, as indeed he did ever afterwards. Leaving the university in 1738, without taking a degree in arts, he intended to study law, but in the mean time entered on a continental tour with Horace Walpole. The two indifferently assorted companions travelled through France and Italy; but a misunderstanding taking place, Gray returned to England in 1741.—His father being now dead, he seems to have been in possession of means enabling a person of moderate wishes and indolent habits to dispense with the labor of a profession. He settled himself at Cambridge for the remainder of his days, hardly ever leaving the place, unless when he made tours to Wales, Scotland, and the lakes of Westmoreland, and when he passed three years in London, for access to the library of the British Museum. His life thenceforth was purely that of a scholar; and it was spent in reading and desultory thinking, rather than in authorship. His knowledge was multifarious and exact.—That he was intellectually active, in his own lazy and miscellaneous fashion, is shown by his 'Letters,' published after his death. These are admirable specimens of English style; they contain some of the most picturesque pieces of descriptive writing in the language; they are full of acute, though fastidious criticism; and they have innumerable touches of quiet humor. He planned editions of classical authors, and made collections for the purpose. But he completed nothing except those little poems, which, flowing from an intense, though not fertile imagination, inspired by the most delicate poetic feeling, and elaborated into exquisite terseness of diction, are among the most splendid ornaments of English literature.—His 'Ode to Eton College,' published in 1747, attracted little notice; the 'Elegy in a Country Churchyard,' appearing in 1749, became at once, as it has always continued to be, one of the most popular of all poems. Most of his other odes were written in the course of the three years following 1753; and the publication of the collection in 1757 established his poetical reputation with all who were competent to appreciate the most refined beauties of poetry. In 1768, after having been disappointed of the place when it was last vacant, he became professor of modern history at Cambridge. He had long been distressed by attacks of gout; and one of these killed him in 1771. [W.S.]

GRAY, WILLIAM, lieutenant-governor of Massachusetts, an eminent merchant, was born in Lynn about 1751. He acquired a large fortune in trade. In 1810 he was elected lieutenant-governor, Mr. Gerry being chosen as governor. He died November 4, 1825, aged 74.

GRAYDON, ALEXANDER, naval capt. in the Revolutionary war. After peace was established, he engaged in the profession of the law in Dauphin Co., Pennsylvania. In 1811 he published authentic memoirs of a life chiefly passed in Pennsylvania. He died at Philadelphia, May 2, 1818.

GRAYSON, WILLIAM, a senator of the United States, was born in Virginia. In 1784 he was chosen representative to Congress from his native state, and continued many years. In 1788 he was a member of the Virginia Convention, which was called for the purpose of considering the present constitution of the United States, and united with Henry in opposing its adoption. In 1789 he was appointed one of the senators from Virginia. Died March 12, 1790.

GREGORY. The saints of this name are—GREGORY THUAMATURGUS, a convert of Origen, distinguished by his writings and marvellous power in the conversion of the heathen, died about 270. GREGORY NAZIANZEN, for whose history see farther on. GREGORY OF NYSSA, another of the Greek fathers, the biographer of Gregory Thuamaturgus, and himself a philosophical divine of the highest talents, b. about 330, died 400. GREGORY OF TOURS, author of a 'History of France,' and 'The Miracles of the Saints,' &c., 559-595. GREGORY LOUSAVORISCH, 'The Illuminator,' the apostle and first patriarch of Armenia, died about 336. GREGORY, bishop of Agrigentum, author of Greek commentaries, died early in the 7th century. And the first two popes of the name.

GREGORY. The popes of this name are—GREGORY I., surnamed 'The Great,' and a saint in the Romish calendar, author of works which have often been reprinted, born about 544, raised to the pontificate 590, died 604. GREGORY II., also a saint of Rome, succeeded 715, died 731. GREGORY III., reigned about ten years, and died 741. GREGORY IV., 827-844. GREGORY V., born 972, died, after a pontificate of two years and nine months, 999. GREGORY VI., elected pope 1045, deposed 1046. GREGORY VII., elected 1073, died 1085. GREGORY VIII., pope two months only, elected and died 1187. GREGORY IX., reigned 1227-1241. GREGORY X., 1271-1276. GREGORY XI., born 1331, reigned 1370-1378. GREGORY XII., born 1325, reigned 1406-1417. GREGORY XIII., distinguished by the reformation of the calendar, and one of the ablest civilians of his age, born 1502, reigned 1572-1585. GREGORY XIV., born 1534, succeeded 1590, d. 1591. GREGORY XV., born 1554, succeeded 1621, distinguished as the founder of the College of the Propaganda, died 1623. GREGORY XVI., born 1765, succeeded Pius VIII., 1831, died 1846.

GREGORY. The patriarchs of Constantinople of this name are—GREGORIUS, or GREGORIUS CYPRIUS, died 1290; GREGORY OF RIMINI, a celebrated scholar, died 1357; and a third of the name who played an important part in the divisions which agitated the Turkish empire, and was hung by the populace of Constantinople 1821.

GREGORY. The princes and patriarchs of Armenia of this name, besides G. Lousavoritch in the list of saints, are—GREGORY, the last prince of the race of the Mamigoneans, acknowledged by the caliph under the title of patriarch 659, killed in battle with the Chazars 683. GREGORY MAGISDROS, a prince of the royal race of the Arsacides of Persia, distinguished as a poet and man of letters, author of an Armenian grammar, &c., commenced his political career in the time of John, king of Armenia, 1030, and died 1058. GREGORY II., the son and successor of the preceding, governed the patriarchate 1058-1105. GREGORY III., nephew of Gregory II., succeeded Basil 1113, died 1166. GREGORY IV., nephew of the preceding, reigned 1173-1193. GREGORY V., nephew and successor of Gregory IV., imprisoned by the lords and clergy of Armenia on account of his debaucheries, and perished in attempting to escape, 1193-1194. GREGORY VI., father of Gregory V., and his successor in 1193, died 1198. GREGORY VII., successor of Constantine I., 1294, d. 1306. GREGORY VIII., maintained a long struggle

for the royal authority, and was at length killed 1411-1418. GREGORY IX., elected by certain of the clergy 1440, and not being recognized by the Eastern Armenians, submitted to Vartabed, chosen by them in 1441, and confined his own authority to Cilicia, died 1447. GREGORY X., reigned 1443-1461. GREGORY XI., 1536-1541. GREGORY XII., 1569-1573. GREGORY XIII., known at first under the name of Serapion, elected after the flight of David V. and Melchisedech 1603, fell into the hands of the dispossessed patriarchs, aided by the Persians, and was cruelly tortured 1605, died, probably in consequence, 1606.

GREGORY: an illustrious Scottish family name, recalling the continuous splendors of the Bernouillis or Cassinis: we shall give the names and little more of its most remarkable scions.—1. Earliest and perhaps loftiest, stands JAMES GREGORY, born in 1639; son of the progenitor of the family, the minister of Drumoack in Aberdeenshire. At the age of twenty-nine he became professor of mathematics in St. Andrews; from which he was transferred to the same chair in Edinburgh, 1674. He died at the early age of thirty-six, having given the most brilliant promise as well as great performance. We owe him one form of the reflecting telescope; and in analytic power he sometimes rivalled Newton. His memoirs are very numerous, all bespeaking talents and originality of the first order.—2. DAVID GREGORY, nephew of James, born at Aberdeen in 1661; at the age of twenty-three he succeeded his uncle in the metropolitan chair. David was an elegant mathematician and a good astronomer. He became Savilian professor at Oxford; and was one of the first who comprehended and taught the philosophy of Newton. He died in 1708.—3. JAMES and CHARLES, brothers of the preceding, were also able mathematicians: James succeeded David in Edinburgh, and Charles held the chair in St. Andrews, which he transmitted to another mathematician, his son, DAVID.—4. Next the Medical branch of this singular family. It originated in JAMES, son of the great James Gregory, and professor of medicine in King's College, Aberdeen. He bequeathed his abilities and chair to his son, Dr. JAMES GREGORY, a man of repute: but his celebrated son was,—6. JOHN GREGORY, M.D., born at Aberdeen in 1724. Few men have more deserved a high fame than this eminent and excellent person. Thoroughly educated as a physician, he united to that culture, great sagacity and moral excellence, as well as refined tastes that led him into intimacy with all the eminent men of the brightest era of Scottish literature. From the year 1766 he held the chair of Practice of Physic in the university of Edinburgh; and continued until his death in 1792 an acknowledged ornament of the metropolis. John Gregory is the author of the 'Father's Legacy to his Daughters,' and he will long be remembered professionally by his 'Elements of the Practice of Physic.' There is a life of him by the naturalist Smellie.—7. Dr. JAMES GREGORY, son of the preceding, succeeded to his chair, and sustained his place as a leading member of the Edinburgh Medical School. The kind of genius which most distinguished this great family was not extinct; its mathematical powers again broke forth. Son of Dr. James, was—8. The late D. F. GREGORY, of Trinity College, Cambridge, an analyst reft from Science at the earliest age: he would have rivalled his greatest predecessor.—It is stated that of this family no less than 16 members have held British professorships.

GREGORY, archbishop of Corinth, 12th cent.

GREGORY, a king of Scotland, reigned 875-892.

GREGORY, GEORGE, D.D., an Irish divine, and historical and miscellaneous writer, 1754-1808.

GREGORY OF NAZIANZUS, commonly called St. GREGORY NAZIANZEN, was born at Arianzus, a village at no great distance from the town which has given to Gregory his distinctive cognomen. His pious mother Nonna, devoted him when an infant to the service of Christ and the church. His education, which commenced at Cæsarea in Cappadocia, was prosecuted next at Cæsarea Philippi, and at Alexandria, and was finished at Athens, where he began a life-long intimacy with Basil the Great. His father, of the same name, had been bishop of Nazianzus for many years, and in the course of time he was joined with his father in the administration of the church. He had previously refused from Basil the diocese of Sasima. At his father's death he retired to Seleucia the capital of Isauria, and spent three years in solitude and meditation. In 379 he went by urgent request to Constantinople, to preach to the remnant of the orthodox party who survived the Arian persecutions. His private chapel he named Anastasia, but his eloquence and popularity became so immense, that with the concurrence of the emperor Theodosius, the general council exalted him to the patriarchate or archiepiscopal chair. But objections were soon started to the regularity and validity of his election, and he gladly resigned the see, delivering a magnificent farewell oration in the great church St. Sophia in June, 381. On his journey homeward he visited Cæsarea, and pronounced his glowing funeral discourse on his friend Basil. He discharged the duties of a bishop for a brief period at Nazianzus till his cousin Eulalius was installed, and at once he retired to the country, where on his paternal estate at Arianzus he spent the remainder of his life in the cultivation of his garden, and the composition of religious poetry. Gregory died about the year 389. Among his literary remains have been preserved about 50 sermons, 250 epistles, and nearly 400 poems. The life of this theologian was a species of combat between the active and the contemplative propensity with him. Ever seeking quiet he was ever forced into agitation and strife. Seclusion was earnestly coveted by him, but peculiar crises in the church summoned him into the arena, in which he no sooner found himself, than he sighed again for his calm retreat. His style, which seems based on the model of Isocrates, is often highly eloquent, but is frequently disfigured by exaggeration and overlaid with rhetorical embellishments. His poems are often distinguished by peculiar beauties, though marred by their artificial structure and allusions. Several editions of his works have been published, but a good edition is still a desideratum. The editio princeps was published at Basle in 1550, and of the Benedictine edition only one volume has appeared, and that at Paris, 1778. [J.E.]

GREGORY, OLINTHUS GILBERT, LL.D., an able and industrious English mathematician and author, born in 1774, died 1841. He wrote valuable elementary books of science, but is best known by his 'Evidences of Christianity.'

GREGORY, GEORGE, an English physician and medical writer, author of a work on the 'Theory and Practice of Medicine;' died 1853.

GREGORY, St. VINCENT, a Flemish mathematician, born at Bruges in 1584, died in 1667.

GREIFF, F., a German chemist, 1601-1668.

GREIG, SAM. CARLOWITZ, a naval officer, born in Scotland, and distinguished in the Russian service, died 1788.

GRENDALE, L. DE, a Spanish ascetic, 1505-88.

GRENVILLE. Several members of this family are known as statesmen, the principal of whom are—RICHARD GRENVILLE, afterwards Earl Temple, and his brother GEORGE, commonly called Mr. Grenville, the reputed author of the American Stamp Act. Lord Temple was born 1711, commenced his public life as a member of parliament in 1734, and died in retirement 1779. Mr. George Grenville was born in 1712, and served in parliament as member for Buckingham from the year 1741, till his death in 1770. The names of the brothers are mixed up with the party politics of the whole of this period, sometimes as warmly attached friends, and at others as political enemies. Mr. Grenville was connected with the administration in several subordinate offices from 1744 to 1762; the last five years of this interval, as a colleague of his brother, Lord Temple. In the last mentioned year he became secretary of state in the ministry of Lord Bute, and from that time to 1765 his brother was associated with Mr. Pitt in the opposition. In 1765 Mr. Grenville, who had risen to the premiership two years previously, was dismissed by the king, and a breach occurring at the same period between Mr. Pitt and Lord Temple the brothers were reconciled. Their characters were very different, but they were both agreed on the principle of taxing America as a legislative right, and Mr. Grenville had the manliness to carry out his convictions irrespective of the consequences. He was always regarded as the ablest man of business then in the House of Commons, and seems to have resembled the late Sir Robert Peel in many points. Lord Temple, on the other hand, was a man of factious and turbulent disposition, and if his name was not before the public in connection with any useful measure, it was sure to be extant in some *pasquinade*, perhaps as 'Lord Gawkey,' or 'Tiddy-doll.' He was a partisan of Wilkes, and thus united the opposite extremes in his political conduct. The late librarian of Stowe has recently edited the correspondence of the brothers, which throws much light upon the political transactions of the period. In the third volume of these interesting papers he has collected a mass of evidence tending to prove that Lord Temple is the original of 'Junius.' [E.R.]

GRENVILLE, RIGHT HON. WILLIAM WYNDHAM, Lord Grenville, third son of Mr. George Grenville, distinguished as a member of the House of Commons and a statesman from 1789 to 1806, when he succeeded Pitt as prime minister, died 1834.

GREPPI, CARLO, an Ital. dramatist, 1751-1811.

GRESHAM, SIR THOMAS, founder of the Royal Exchange of London, and the Gresham Lectures, was the son of Sir Richard Gresham, merchant and lord mayor of that city, and acquired universal fame as a merchant for his knowledge, sound judgment, and integrity. Besides his munificent endowments in the interest of commerce and the arts, he served the state as ambassador, and contributed greatly to placing the financial affairs of England upon a sound basis, being in constant intercourse and correspondence with Sir W. Cecil. He was greatly honored by Queen Elizabeth. He was born in London 1519, and died suddenly at his house in Bishopgate-Street, 1579.

GRESLON, A., a French missionary, 1618-97.

GRESSET, F., a French philologist, 1795-1831.

GRESSET, JEAN BAPTISTE LOUIS, a French dramatist, was born in 1709. His works were greatly admired, the best of which was considered to be his 'Ver Vert,' 'Le Mechant,' &c. Died in 1777.

GRESWELL, W. P., an English divine and bibliographical writer; died 1854, aged 89.

GRÉTRY, ANDRÉ ERNEST MODESTE, a celebrated compo. of Fr. operas, and wr. on music, 1741-1813.

GRETSEK, J., a Ger. contriv. writer, 1561-1625.

GREUZE, J. B., a French painter, 1726-1805.

GREVILLE, FULKE or FOULQUE, Lord Brook, a distinguished patron of letters, author of the 'Life of Sir Philip Sydney,' and member of the privy council, 1554-1628.

GREVILLE, M. DE, a French antiquary; died 1853, aged 84.

GREVIN, J., a French dramatist, 1540-1570.

GREW, OBADIAH, an English divine settled at Coventry, 1607-1698. His son—

GREW, NEHEMIAH, a physician and botanist, was born at Coventry about the year 1628. He died in 1711.—Grew was educated at a foreign university, and after taking his degree, he settled in his native town as a physician. Here he commenced making observations upon the physiology of plants, and in 1760 he communicated to the Royal Society his first thoughts upon the subject in a paper entitled 'Idea of a Philosophical History of Plants.' His essay was so well received that he was invited to come to London, which he did in 1672. Upon the recommendation of Bishop Wilkins he was elected a fellow, and in 1677 he was appointed secretary to the Royal Society. His celebrated work, 'The Anatomy of Plants,' with an 'Idea of a Philosophical History of Plants,' was published in 1682, illustrated by many plates, and forms a perfect storehouse of facts upon vegetable anatomy, which has been freely made use of by succeeding botanists. His remarks upon vegetable secretions and their properties are very ingenious—his comparative examination of the various kinds of fruits and seeds abounds in originality—and he appears, from several passages in his works, to have discovered the doctrine of the sexes in plants, and the fecundating properties possessed by the dust of the anthers. Linnæus has named a genus of plants after him, *Grewia*. [W.B.]

GREY, CHARLES EARL, was born on 13th March, 1764. His father, Sir Charles, was ennobled for his military services in 1802, but the family was one of ancient renown, connected with early peerages, and there is no doubt that the rank and antiquity of his house exercised considerable influence in mitigating prejudices against a career so boldly and steadily directed in favor of popular influence and democratic institutions as that of Earl Grey. He studied at Eton and Cambridge, and made the usual continental tour. He entered parliament as member for Northumberland, in 1786, and two years afterwards was distinguished by being named one of the managers of the Hastings' impeachment. He became one of those whom personal attachment and political sympathy united under the standard of Fox; but as the French revolution went through its stages, the bold and ardent young man was inclined to follow it with a far closer sympathy than the leader, now a veteran in parliamentary tactics, was disposed to sanction. He was an active member of the dreaded Society of the Friends of the People; and in 1793 he brought forward a motion in favor of parliamentary reform, founded on a petition from the society, boldly exposing the defects of the existing system. But the policy of parliamentary reform had not only been deserted by Pitt and his friends, but was rather discountenanced than aided by the veteran members of the Whig party, and he was left in a minority of 41 to 282. He continued to be the bold and unhesitating denouncer, from

time to time, of every ministerial act savoring of corruption, extravagance, or a stretching of the arbitrary elements of the constitution; and in the extremely critical times in which he acted, there is no doubt not only that the zeal and firmness of the young orator were well tried, but that any man of less courage, rank, and capacity would have fallen a sacrifice to his zealous temerity. Holding the courtesy title of Lord Howick, he became first lord of the admiralty in the short Whig ministry of 1806. In November, 1807, his father's death sent him to the House of Lords, where he pursued his old policy unaltered, save by adaptation to the new sphere of exertion. He was the main object of the fruitless negotiations for a mixed ministry in 1812. His history as the leader of the Whig ministry of 1830, which carried the reform bill, has too large and important a place in the history of the age to afford materials for a satisfactory abridgment. It is well known that Earl Grey's courage and firmness, undiminished by the years which had enlarged his sagacity and matured his political capacity, were greatly instrumental at that trying epoch in saving the country from a civil war. He resigned office in July, 1834, and spent his declining years in respected retirement. He was a man of remarkably fine appearance and dignified manners; and though a friend of popular institutions, his habits were reserved, and were often characterized as haughty. He was married in 1784 to Elizabeth, the only daughter of Lord Ponsonby. He died at Howick on 17th July, 1845. [J.H.B.]

GREY, LADY JANE, whose tragical fate is well known to readers of English history, was the granddaughter of Mary Tudor, sister of Henry VIII., and of Charles Brandon, duke of Suffolk. This alliance was brought about by singular circumstances. The Princess Mary had been married to Louis XII., king of France, in pursuance of a treaty of peace and confederacy, in the year 1514, and about three months afterwards lost her husband, who was succeeded by his cousin Francis I. As the queen dowager had been of an amorous disposition, there were more reasons than one to fear the birth of a posthumous child. Francis, therefore, connived at a private marriage between the bashful widow and the duke of Suffolk, who was then at the French court, and probably interposed his good offices to reconcile Henry to the match. The issue of this union was a daughter, named Frances, who was married to Henry Grey, marquis of Dorset, and as a consequence gave birth to Lady Jane Grey, at the family seat in Leicestershire, 1537. Being educated as a protestant, and possessing talents which rendered her one of the prodigies of her sex, the duke of Northumberland easily prevailed on Edward VI. to name her his successor, thereby excluding his sisters Mary and Elizabeth; the one of doubtful religion and the other most certainly a bigoted catholic. Instead of an immediate competitor for the French crown, therefore, the amorous embraces of Mary Tudor, aided by a little management at the French court, raised up one for the English in the person of her innocent, talented, and beautiful grandchild. Having secured his purposes with the king, Northumberland married his son, Lord Guilford Dudley, to Lady Jane Grey, and they were both executed after a phantom royalty of nine days, on the 12th of February, 1554. Lady Jane was only in her seventeenth year, and was remarkable for her skill in the classical, Oriental, and modern languages, and for the sweetness of her disposition. [E.R.]

GREY, DR. RICHARD, a learned ecclesiastical and

religious writer, author of the 'State of Religion in England,' 'English Eccles. Law,' &c., 1693-1771.

GREY, ZACHARY, LL.D., a divine and miscellaneous writer editor of 'Hudibras,' author of an 'Examination of Neal's History of the Puritans,' &c., 1687-1766.

GRIESBACH, JOHN JAMES, an eminent German critic, distinguished for his attainments in theological, biblical, and ecclesiastical literature, especially for his edition of the Greek gospels, with a critical history of the printed text, and examination of various readings, born in Hesse Darmstadt 1745, died professor of divinity at the university of Jena, 1812.

GRIFFET, H., a French historian, 1698-1771.

GRIFFIER, JOHN, known as 'old Griffier,' a Flemish painter, 1658-1718. His son, ROBERT, called 'the Younger,' a landscape painter, b. about 1688.

GRIFFIN, the last king of Wales, died 1050.

GRIFFIN, CYRUS, president of Congress, was born in England. He was twice elected to Congress from Virginia in 1778 and 1787. In 1789 he was chosen judge of the district court. Died at Yorktown 1810, aged 62.

GRIFFIN, EDMUND D., an eminent writer, was born at Wyoming, Pennsylvania, September 10, 1804. At an early age he was placed under the tuition of David Graham of New York. Having gained the highest honors in this school, he was, at the age of 14, transferred to the establishment of Mr. Nelson an eminent blind scholar, and in 1823, was graduated at Columbia College. After employing himself in his father's law office for a few months, he commenced the study of theology at the Seminary of the Episcopal church, and in 1826 was admitted to Deacon's orders. In 1830 he delivered a course of lectures on literature. Two Volumes of his works, compiled by Francis Griffin, have been published, under the title of 'Remains of Edmund D. Griffin.' Died Sept. 1, 1830, aged 36.

GRIFFIN, EDWARD DORR, a distinguished divine, was born at East Haddam, Conn., 1770. He was pastor of New Hartford, Connecticut, and afterward at Newark, New Jersey. He was chosen professor of sacred rhetoric at Andover in 1809, and president of Williams College in 1821. Died 1837.

GROTIUS, or GROOT, HUGO, a jurist, divine, historian, and general scholar, was born at Delft, in Holland, on 10th April, 1583. When eleven years old, he was sent to the newly-established protestant university at Leyden, where he had the fortune to study under Joseph Scaliger. He was so precocious, not only in the acquisition of knowledge, but in the capacity of imparting his acquirements by literature, that at the age of fifteen he might be said to have a European reputation, and he was then received with distinction at the court of Henry the Great. Nor did his boyish attainments indicate a premature exhaustion of his powers; on the contrary, his mind seems to have grown with every year added to his age, and he was ever accumulating new intellectual riches and enlarging his capacities. In 1613 he obtained the important office of pensionary of Rotterdam. But it was unfortunate that one whose conquests in important studies were so valuable, should have had his time occupied, and his mind distracted by the wretched polemical conflict which then shook the Netherlands. He became one of the illustrious victims whose sufferings are a scandal to the otherwise magnanimous history of the Dutch during that period. He involved himself with his friend, the great pensionary Barneveldt, in the Arminian controversy, and in 1619 was condemned to perpetual imprisonment by the triumphant party. He was one of those whose prison hours have enriched the world, and the quantity of books which he kept passing to and fro in the end furnished the means of his escape. It was accomplished by his wife, Mary Reygensberg, a daughter of one of the great Dutch aristocratic families, who managed to have him removed from the prison in one of the book trunks. The works which he had hitherto published, scientific, critical, and poetical, are now comparatively obscure, but in prison he prepared his little treatise, *De Veritate Religionis Christianae*, which has been perhaps the most popular 'Evidences of Christianity' ever published, and has been translated into every civilized tongue. But it was when subsequently living in retirement in France that he published his *De Jure Belli et Pacis*, the foundation of the international law and European diplomacy of the seventeenth and eighteenth centuries. Though it consisted properly of speculations derived from the principles of Roman jurisprudence, it was accepted as if it were the authoritative enunciation of the law of nations. After having, in his advanced years, visited various countries, he died on the 28th of August, 1645. [J.H.B.]

GROTTO, LUIGI, an Italian poet, 1541-1583.

GROUCHY, EMANUEL, Count, a marshal of the French empire, born at Paris 1766, and known as a brave and successful soldier in the wars of Napoleon, is chiefly memorable for the fatuity which seemed to rule his conduct at the battle of Waterloo. With thirty-five thousand men, and eighty pieces of cannon under his orders, he remained immovable, either by the prayers or threats of the other generals, in a position which could only be justified by the strict letter of his instructions. It is not certain that he intended to betray the cause of Napoleon, but his culpable indecision certainly contributed to the disaster which befell the French arms. He was twice afterwards summoned before a council of war, but each time escaped judgment in consequence of the court's declaring itself incompetent. Grouchy was included in the special amnesty of 1819, and restored to his military rank on the accession of Louis Philippe. He died in 1847.

GROUCHY, N. DE, a French *savant*, died 1572.

GUIDO, D'AREZZO, an Ital. musician, 10th ct.

GUIDO RENI, was born at Bologna in 1575, and became one of the most distinguished pupils of the Carracci: he lived long in Rome, but settled finally, and died in his native place, 18th August, 1642. He painted in various styles, his earlier was somewhat in the forcible manner of Caravaggio, he afterwards cultivated the ideal, and adopted a rather silvery tone of color. Guido, though in the receipt of a princely income, from the enormous and constant demand for his pictures, died in debt: he was so embarrassed by his extravagant habits, that he used to sell his time at so much per hour to the dealers, who on some occasions, it seems, were so exacting as to stand by him, watch in hand, to see that he performed the stipulated amount of labor. There are eight pictures by Guido in the National Gallery. He formed a considerable school; the most celebrated of his scholars was Simone Cantarini, called il Pesarese, by whom there is a remarkable portrait of Guido in the Gallery of Bologna.—(Passeri, *Vite de' Pittori*, &c.; Malvasia, *Felsina Pittrice*, &c.) GUISE, the name of an illustrious French family, the founder of which was CLAUDE, son of Rene II., duke of Lorraine, who obtained letters of naturalization from Louis XII., in 1506, distinguished himself at the battle of Marignano 1515, was created duke of Guise in Picardy by Francis I. in 1527, and died in 1550. The duke of Guise having married into the royal family, one of his daughters espoused James V. of Scotland, and became the mother of Mary Stuart. His eldest son, FRANCIS, who succeeded to the dukedom, was one of the most remarkable men of the age, and was king of France in all but the name. He was the chief of the catholic 'League,' opposed to Condé and the Huguenots, and was assassinated 1563. The son and successor of the latter, HENRY DUKE OF GUISE, born 1550, inherited the power and ambition of his father, and was one of the chief actors in the massacre of St. Bartholomew. He was assassinated by order of the king 1588. The brother of Francis, and uncle of Henry duke of Guise, generally known as the CARDINAL OF LORRAINE, was the minister of Francis II. and Charles IX., and like the other members of his family, a cruel bigot and persecutor of the protestants, flourished 1525-1574. CHARLES, the fourth duke of Guise, eld. son of Henry the third duke, and Catherine of Cleves, became one of the chiefs of the League three years after the death of his father, and was governor of Provence, 1571-1640. HENRY OF LORRAINE, the fifth duke, who became generalissimo of the Neapolitan insurgents in the revolt against Spain, and afterwards grand-chamberlain of France, was born 1614, and died 1664. The sixth duke of Guise, known also as LOUIS JOSEPH OF LORRAINE, and prince de Joinville, a military officer under Louis XIV., flourished 1650-1671. The last of this house was a posthumous son of the latter, who died about four years afterwards.

GUSTAVUS. The kings of Sweden of this name are—GUSTANUS (VASA) I., born 1490, elected king by the states after defeating Christian of Denmark 1533, abolished the Roman Catholic religion 1529, demanded and obtained the succession in his family after subduing the revolt of the Dalecarlians 1555, died 1560. GUSTAVUS (ADOLPHUS) II. See next article. GUSTAVUS III., born 1746, succeeded 1771, shot by Ankarstroem while preparing to march against the French republic 1792. GUSTAVUS (ADOLPHUS) IV., son and successor of the latter, and like him, remarkable for his chivalrous spirit and obstinate enmity against the French; deposed and banished the country 1809, died in Switzerland, after wandering through the greater part of Europe under various names, and in the most straitened circumstances, 1837.

[Gustavus.]

GUSTAVUS ADOLPHUS, born December 9, 1594, succeeded his father, Charles IX., on the throne of Sweden, October 30, 1611. In the early part of his reign, the Poles and Russians attacked Sweden; but the young king, putting himself at the head of the Swedish army, made a noble resistance, and ultimately forced his enemies to accede to a peace (1629), by which Sweden gained important extension of her territory. At this time the emperor Ferdinand II. was engaged in a war of persecution against the protestants and the free states of Germany. Sweden was an intensely protestant country, and could not behold with indifference the rapid

strides which the Roman Catholic despot of Austria, aided by the pope and king of Spain, was making towards the extirpation of European civil and religious liberty. Austria had given special provocation to Gustavus by aiding his enemies against him during the Polish war, and he resolved to come forward as the champion of the protestant cause against her.—Gustavus Adolphus landed in Pomerania on 24th June, 1630, with only 8,000 men. He was reinforced by six English and Scottish regiments, under the duke of Hamilton; and, at the head of this little force, he essayed to rescue the German protestants from the powerful and long-victorious armies of Tilly, and the other imperialist generals. Gustavus advanced, and was splendidly successful, though he met death in less than three years from his first planting his foot on German ground. Napoleon has well said of him, that 'notwithstanding the shortness of his career, it is one of great recollections, in consequence of the boldness and rapidity of his movements, and the discipline and intrepidity of his troops. Gustavus Adolphus was animated by the principles of Alexander, Hannibal, and Cæsar.' Such is his praise, merely in a military point of view—his moral glory is still higher.—Gustavus, in 1630, conquered Rugen and Pomerania. In the following year he formed an alliance with the Saxons, and completely defeated the main Austrian army under Tilly at Leipzig. He gave them a second overthrow near the river Lech, in which Tilly was slain; and all Germany was now opened to the Swedish arms. The Austrian emperor now recalled his celebrated general Wallenstein to head the Roman Catholic troops; and the Swedish king fought his third great battle against the imperialists under Wallenstein's command at Lutzen, 1st November, 1632. Gustavus gave out Luther's hymn to his army before engaging; he led the

words himself; and then he led his cavalry into the critical part of the fight. He was shot dead early in the battle, but his army gained a complete victory.—Gustavus Adolphus was simple in his habits,

pure and just in all his dealings, and unfeignedly earnest in his religion. He was inadequately praised when he was named 'one of the best men that ever wore a crown.' [E.S.C.]

GUTTENBERG, C., a German engrav., 1741–90.

[Statue of Gutenberg at Mayence.]

GUTTENBERG, or GUTENBERG, JOHN, a native of Sulgeloeh, near Mentz in Germany, was born in 1400, and died on the 24th of February, 1468. He is supposed to have made his first experiments in the art of printing with movable types between 1434 and 1439, but it was in 1443 that he turned his invention to account, and brought upon himself the persecution of the priests and writers. There are some points not cleared up in the history of this invention, but it is now generally agreed that the honor belongs to John Gutenberg, and a society named after him meets yearly in his native city, where, also, a beautiful statue by Thorwaldsen has been erected to his memory.

GUTZIKOW, a Russian musician, 1806–1837.

GUTZLAFF, REV. CHARLES, the celebrated missionary to China, a German by birth, but encouraged by British favor; died at Hong Kong 1851, aged 48. He was the author of travels and of various accounts of the scenes of his labors in the East.

GUY, THOMAS, the founder of the hospital of that name, which he built and endowed at an expense of nearly a quarter of a million sterling, was born 1644, and accumulated his immense fortune, of nearly twice that amount, by stock-jobbing and the purchase of seamen's tickets. He was also the founder of alms-houses and a library at Tamworth, and a great benefactor of Christ's Hospital, and left a sum of £80,000 to be divided amongst his relations. He died in 1724.

GUYETANT, J. F., a French surgeon, known as a topographical and medical writer, 1742-1816.

GUYON, CLAUDE MARIE, a French historian, author of a 'History of Empires and Republics,' &c., 1699-1771.

GUYON. MADAME JEANNE MARIE ROUVIERS DE LA MOTHE GUION, or GUYON, was a French lady of good family, born at Montargis 1642, where also she was married at the age of fifteen, and in thirteen years afterwards left a widow with three children. Her marriage was not a happy one, in consequence of the tyranny of her husband and mother-in-law, who, acting under the advice of her confessors, endeavored to withdraw her from the inward prayer and retirement to which, at the age of twenty, she began to addict herself. On the death of her husband she sequestered the greater part of her fortune as a provision for the education of her children, and completely abandoned herself to the life of mystic piety, or 'perfect contemplation,' generally known as Quietism, and of which we shall give an account in the article MOLINOS. Her experiences are related with extraordinary candor and graphic simplicity in her 'Autobiography,' and are further illustrated in the 'Torrents,' written at Annecy, and contained in the 2 volumes of her 'Opuscules.' She was at Grenoble, on her way to Paris, when she found herself 'suddenly invested,' as she expresses herself, 'with the apostolic state,' and able to discern the condition of those that spake with her, so that, one sending another, she was occupied from six in the morning till eight at night speaking of divine things. 'There came,' she says, 'great numbers from all parts, far and near, friars, priests, men of all sorts, young women, married women, and widows; they all came one after the other, and God gave me that which satisfied them in a wonderful manner, without my thinking or caring at all about it. Nothing was hidden from me of their inward state and condition. \* \* \* I perceived and felt that what I spake came from the fountain-head, and that I was only the instrument of Him who made me speak.' On reaching Paris she was thrown into prison, loaded with the vilest calumnies, by the connivance of her friends the priests, and endured altogether not less than twenty years of persecution, confinement, and exile. The great enemy of Madame Guyon and the system of Quietism was Bossuet, while for her champion she had the noble-hearted, eloquent, and illustrious Fenelon. She was liberated from her last confinement, in the Bastille, in 1702, and passed the remainder of her life at Blois, where she died 1717. Her complete works were published by Poirer in 39 vols. 8vo., and they comprise, besides those mentioned above, 'The Song of Songs, Interpreted According to its Mystical Sense,' and several volumes of hymns remarkable for their graceful composition, and exquisite sensibility. Some of these were translated by Cowper.—The life of Madame Guyon is not only a religious study, but a psychological one of very considerable interest. It is the history of a soul, humbled and polluted in its own sight, journeying through the gates of the mystic death, hating its own freedom and its own intelligence, struggling through the unclean places through which it is forced to pass, and at last arriving in the presence of its Divine lover—stripped of all, even its virtues—as serene, as motionless as the eye of eternity. Though the system of Quietism is a protest against visions,

revelations, ecstasies, and transports of all kinds, whether sensual or spiritual, yet the experiences of Madame Guyon are really a love story, and one which she pursues in her writings with a fearlessness as remarkable in such a woman as the purity of her imagination. [E.R.]

HAHN, S. F., a German historian, 1692–1729.

HAHNEMANN, SAMUEL, the founder of homœopathy, was born of poor parents at Meissen, in Saxony, 1755, and received his diploma as doctor in physic at Heidelberg, in 1781. The same year he was appointed district physician at Gomehn, near Magdeburg, and continued his studies in chemistry and mineralogy with all the ardor of an enthusiast. In 1784, he removed to Dresden, and soon afterwards abandoned the practice of physic in disgust, and confined himself to his private researches in chemistry and literature. These studies began to acquire a fixed direction in 1790, and in 1796 he commenced the record of their results in the journal of his friend Hufeland, in an article entitled ‘Essay on a New Principle, &c.’ In 1805 he published his ‘Medicine of Experience,’ and in 1810 his ‘Organon of Rational Medicine,’ in which the new doctrine was reduced to a system, and methodically illustrated. In a second edition, published 1819, the title of this work was abbreviated, and became the ‘Organon of Medicine.’ A third edition appeared in 1824, and was translated into English nine years afterwards. It was followed by a fourth edition in 1829, and a fifth in 1833 (translated by Dr. Drudgeon), each of which embodied fresh results, and enlarged the field which this indefatigable experimentalist had undertaken to cultivate. While this

and the other works of the author mentioned below were making their way silently over Europe, Hahnemann himself was experiencing the usual fate of the world's benefactor. In 1813 he had removed from Dresden to Leipzig, where he was persecuted by the apothecaries as an empiric, and this had risen to such a height by 1820, that he was glad to avail himself of the protection offered to him by the duke of Anhalt Cothen. In the same year he published his 'Pure Medicine' in 6 vols. 8vo., and in 1829 his 'Theory of Chronic Maladies, and the Proper Medicines for them,' in 4 vols., which were enlarged to 6 vols. in a second edition, 1840. In the mean time, his domestic circumstances were changed for the better by his marriage in 1835 with a French lady, in whose company he removed from Cothen to Paris, at the age of eighty. Hahnemann remained in Paris till his death in 1843, and had the satisfaction to hear that homœopathy was about to have a chair at the university of Vienna, and that hospitals were proposed in London, in Berlin, and in many cities of Austria. The principles of his therapeutic reform—for such it undoubtedly is—may be described as a recognition of derangements in the vital or spiritual force of the body, whether occasioned or not by material influences, as the *primary causes* of disease; the cure of which is by the reaction of the vital force against the remedy. The application of this theory consists—1st, in the discovery; and 2d, in the preparation of specific remedies corresponding to every species of abnormal action, and such remedies are found both in theory and practice to be the *assimulates* of the disease—or medicines by which precisely the same symptoms would be produced. The reason of the cure is difficult to express in few words, and illustrations far below the refined philosophy on which it depends have been used by professional writers. According to the terms of the theory, the medicines may be considered as diffusing themselves with a gentle but irresistible force, like that of light, between the mortal corruption and the vital spirit in combat with it, and being more subtle than the disease, and yet like it, they engage the vital force in a quicker and more decisive conflict, and then gradually yielding before it, as their own virtue expires, the vital force is liberated, and, as a matter of course, resumes its normal action. This explanation, however, is only half the truth, for it is well known that fluids in effervescence are reduced to rest by the satisfaction of what may be called the hunger of one body for another, and something of this kind may take place when the assimilate is introduced to the disease. Be the explanation what it may, the discovery of the facts by years of patient and often painful experience, is the title of Hahnemann to the gratitude of society. He proved the virtue of an immense number of assimilates by testing their effects on himself and friends, and displayed equal art in the method of their refinement. His 'Organon of Medicine' not only raises the art of healing to the rank of an exact science, but renders it an elegant and philosophical study; while the facilities of its practical application have been carried to such perfection, especially by his followers in England, that many mothers of families have become expert homœopathic physicians, and rarely require the aid of a practitioner. Besides the works mentioned, Hahnemann is the author of some two hundred treatises on medical and physical science.

HAKLUYT, RICHARD, a geographer and naval historian, was born at Eyton in Herefordshire, in 1553, and educated at Westminster school and Christ Church, Oxford. In 1584 he was appointed chaplain to the English Embassy at Paris, and in his absence from England was made prebendary of Bristol. In 1605 he was transferred to a prebend of Westminster. He published Peter Martyr's 'History of the West Indies;' a collection of 'Voyages and Discoveries of the English Nation;' Virginia richly valued by the description of Florida; a translation of Leo's Geographical History of Africa, &c. Died 1616, and was buried in Westminster Abbey.

HALDANE, ROBERT, Esq., was the eldest son of James Haldane, Esq., of Airthrey in Stirling, and Catherine Duncan, sister of the hero of Camperdown. He was born in London, 28th February, 1764. Both of his parents having died at an early period, he and his brother were placed under the guardianship of their maternal uncles at Lundi. Thence they were removed to the High School, and subsequently studied for a few sessions at the university of Edinburgh. Although heir to a large property, Robert's active and enterprising mind pointed to the naval profession, and so passionate a desire had he conceived for a seafaring life, that his friends at length gave their consent, and he entered the Monarch as a midshipman under the command of his uncle. Subsequently he was connected with Sir John Jervis as an officer on board the Foudroyant, and both from his energy of character, and his familiar knowledge of the French language, was intrusted with many difficult and delicate commissions during the war. On the re-establishment of peace in 1783, Mr. Haldane transferred his services for a time to a commercial company, for whom he performed a voyage to Newfoundland, and a second to Lisbon; returning to Scotland, he relinquished the naval profession, and established himself at Airthrey, where for a period of ten years, he followed the pursuits of a country gentleman, his whole time being occupied in the improvement of his estate, or in the management of county and parochial affairs. Like many persons of an ardent temperament, he welcomed with enthusiasm the outbreak of the great French revolution, and in the excitement produced throughout this country by that political convulsion, roused against himself by the too open avowal of his opinions, the jealousy and suspicion of the ruling party. A subject of infinitely higher moment than politics, however, now began to engross his attention. Led to the serious study of religion, he conducted his inquiries with characteristic ardor and perseverance, till having at length attained to enlightened and mature views of Scriptural truth, he appeared before the world an evangelical Christian. His pursuits as well as his character were entirely changed, and he

resolved on dedicating his future life to diffuse, as a missionary in foreign lands, the gospel which had imparted so much peace and joy to himself. India was the chosen field of labor, and having secured the promised co-operation of Messrs. Innes, Ewing, and Bogue of Gosport, to whom he guaranteed adequate stipends while abroad, and the sum of £3,500 if compelled by bad health or other causes to return, he applied to the Indian government to sanction his enterprise. Missions being at that time scarcely known in the country, it was suspected that some sinister object was concealed under the name, and the court of the East India Company Directors, after much deliberation, resolved that the superstitions of Hindostan should not be disturbed. Disappointed in this bold and original scheme of Christian benevolence, Mr. Haldane determined to employ his resources in spreading the gospel at home, and in conjunction with Rowland Hill, Mr. Simeon of Cambridge, and others, he produced an extraordinary revival of religion throughout Scotland. Mr. Haldane now seceded from the Established Church, and at his own expense, erected places of worship under the name of Tabernacles in all the large towns, and educated 300 young men under Dr. Bogue and Mr. Ewing, as preachers to officiate in these meeting-houses. Another scheme which originated with him had for its object the evangelization of Africa. To commence this undertaking, he procured thirty young children to be brought from Sierra Leone to receive a Christian education at his expense, and gave a bond for £7,000 for their board and education, which, however, the friends of emancipation in London undertook to defray. Many other plans of Christian usefulness both at home and on the continent are traceable to the untiring zeal of this pious gentleman. His personal labors in awakening a religious spirit in the south of France, were successful beyond his own most sanguine expectations; and both at Geneva and Montauban, he sowed the seeds of truth which are bearing good fruit to this day in the protestant churches of France. Mr. Haldane took a prominent part in the management of the Continental Society and the Bible Society of Edinburgh; and in the painful controversy relative to the circulation of the Apocrypha by the British and Foreign Bible Society, which led to the establishment of the latter. He was the author of 'The Evidences of Christianity,' 'An Exposition of the Epistle to the Romans,' and various other religious works of minor importance. His character was highly esteemed during life, and his name will be transmitted to posterity in connection with the revival of evangelical religion in Scotland at the beginning of the present century. He died 12th December, 1842.

[R.J.]

HALDANE, JAMES ALEXANDER, ESQ., was brother of the preceding. He was born at Dundee, 14th July, 1768. Having imbibed the family passion for the sea, he was entered in his seventeenth year a midshipman in the Duke of Montrose, bound on a voyage to Bombay and China. He had made three other voyages to the same countries, when having proved his possession of the requisite qualifications, he was appointed captain of the Melville Castle. The vessel, however, did not sail for four months; and during that interval, a great change took place in Captain Haldane's character. He became serious and thoughtful on the subject of religion, and having determined to follow the example of his brother, who had already relinquished the seafaring life, he disposed of his command for £9,000, and his share in the property of the ship and stores

for £6,000 more. With this fortune of £15,000 he retired with his wife to Scotland in 1794, and gave himself up to those religious inquiries which now engrossed his chief concern. Several years elapsed before his views were established. But at length he attained to a knowledge of the truth as well as peace in believing; and the cases of both the brothers Haldane, whose minds retained a deep impression of their mother's piety and prayers, must be added to the long list of testimonies that might be adduced to show the advantages of an early religious education. Mr. James Haldane, having plenty of time at command, occupied himself with many plans of Christian usefulness; amongst which, the opening of Sabbath schools, and itinerant preaching, at first in the villages around Edinburgh, and afterwards in the other large towns of Scotland, were the chief. His principal coadjutor in these labors of love was John Campbell, the African traveller. In company with that zealous Christian, Mr. Haldane made successive tours throughout all Scotland as far as Orkney; and those who were awakened by their preaching, were, through the liberality of Mr. Robert Haldane, accommodated with suitable places of worship. Mr. James eventually accepted the office of stated pastor in the Tabernacle, Leith Walk, Edinburgh; and in that capacity he exercised, without any emolument, all the public and private duties of a minister with unbroken fidelity and zeal for a period of fifty years. Although he vacillated on some points of church government, he and his brother remained steadfast in their adherence to the general principles of the Scotch Baptists. He was the author of various fugitive pieces on the religious controversies of the time. But the memory of his name in the world, will be preserved chiefly by the 'living epistles,' which were the fruits of his evangelical labors. He died in Edinburgh, 8th February, 1851.

HALDE, JOHN BAPTIST DU. See DUHALDE.

HALE, JOHN, first minister of Beverly, Massachusetts, was born at Charlestown, 1636. After graduating in 1657, he was ordained in 1667, and in 1690 was appointed chaplain to the expedition to Canada. Died May 15, 1700, aged 63.

HALE, SIR MATTHEW, a judge and constitutional lawyer, was born in Gloucestershire on 1st November, 1609. Brought up among the puritans, while receiving an Oxford education, his early life seems to have vibrated between rigidity and excess. It was through the auspices of Serjeant Glynn that his attention was turned to the bar, and he entered at Lincoln's Inn in 1629. In the stormy times which followed, he held a more conspicuous place than one of his neutral and studious character generally obtains amid political convulsions. He was a hard student, and a thorough lawyer, both in the constitutional department and that of private rights and obligations. In 1653 he was made one of the judges of the Common Bench, as it was termed under the Commonwealth. His sound excuse for accepting this appointment, that the administration of justice is an honorable and useful occupation, whether the ruling power for the time be valid or not, has often been cited. His friends said less for his candor and honesty when they defended him, on the ground that he had evaded any formal announcement of allegiance to the Protectorate. He seemed to have misgivings of his own, for he at one time refused to act as a criminal judge while performing his civil functions, and he would not hold office under Richard Cromwell. Indeed, with all his capacity and his incorruptible honesty, a rare

quality on the bench in his day, it is shown by his superstitious cruelty on a celebrated witchcraft trial, and by other incidents, that his mind was subject to wayward caprices. He was made chief baron of the exchequer at the Restoration, and chief justice of the King's Bench in 1671. He died in 1676. [J.H.B.]

[Birthplace of Nathan Hale.]

HALE, NATHAN, an officer in the American army during the revolutionary war, graduated at Yale College in 1773. He held the rank of captain in Colonel Knowlton's regiment in the retreat from Long Island in 1776. Washington requiring an enterprising officer to obtain intelligence of the British movements, applied to Colonel Knowlton for that purpose, and Captain Hale was intrusted with the undertaking. Having disguised himself, he gained access to the British camp, but on his return, was arrested, and executed on the following morning as a spy.

HALEM, G. A., a German publicist, 1752-1819.

HALES, ALEXANDER, an English friar, distinguished as a scholastic divine and philosopher, 13th century.

HALES, JOHN, an able scholar and divine of the Church of England, remarkable for the freedom of his opinions, and for that reason classed among the latitudinarians. He was born at Bath in 1584, and educated at Oxford, where he became professor of Greek, and assisted Sir Henry Savile in editing his edition of the works of Chrysostom. After a life of considerable hardship, partly occasioned by the civil wars, and partly by his independence of thought, he died at Eton, in poor circumstances, 1656. The writings by which he was known were published after his decease, and entitled 'Golden Remains of the Ever Memorable Mr. John Hales of Eton College.' Among these papers is an interesting account of the Synod of Dort, at which Mr. Hales was present as an observer. At this synod the representatives of the English Church advocated the universality of the Redemption, and their arguments had the effect of turning Hales from his previously rigid Calvinism. There is a quaintness and vigor in his style of writing which gives a somewhat flavory quality to his 'Golden Remains,' and though he has been called a trimmer, he is often severe enough upon the formalists of his day. [E.R.]

HALES, or HAYLES, JOHN, a classical scholar, translator, and government employé, died 1572.

HALES, STEPHEN, an English natural philosopher, 1677-1761.

HALFORD, SIR HENRY, Baronet, an eminent

physician, whose paternal name was Vaughan, author of numerous professional works and essays, 1766-1844.

NALBED, NATHANIEL BRASSEY, an Oriental scholar, au. of a 'Bengalee Grammar,' 1751-1830.

HALI-BEIGH, a Polish captain, educated in Turkey, and distinguished as a linguist, died 1675.

HALIFAX, GEORGE SAVILLE, marquis of, a celebrated English statesman, promoter of the restoration, president of the council in the time of James II., and lord privy seal under William and Mary. He is the author of various small works, 'The Character of a Trimmer,' 'Advice to a Daughter,' 'The Anatomy of an Equivalent,' &c. Lord Halifax was also the author of 'Memoirs,' which were destroyed in MS., 1630-1695.

HALKET, LADY ANNE, an English lady, remarkable for her studies in theology and medicine, author of 'The Mother's Will,' &c., 1622-1699.

HALL, ANTHONY, a learned divine, 1679-1723.

HALL, CAPTAIN BASIL, a well-known writer of voyages and travels, descriptive of his adventures and the places visited, chiefly in the Indian seas, and the southern coasts of America. Born at Edinburgh 1788, died in confinement on account of insanity, 1844.

HALL, EDWARD, an English annalist, was born in London. Having studied law, he rose to the office of judge in the Sheriff's Court. His 'Chronicle,' completed by Grafton, is a curious work. Died 1547.

HALL, FREDERICK, an American naturalist; died 1843, aged 64.

HALL, GEORGE, son of Joseph Hall, and bishop of Chester, author of sermons, &c., 1612-1668.

HALL, GORDON, first American minister at Bombay, was born in Berkshire County, Massachusetts, and graduated at Williams College in 1808. Having studied theology, he offered himself as a missionary to the American Board of Missions, and was ordained at Salem in 1812, and immediately sailed for Calcutta. In 1813 he arrived at Bombay, where he remained for thirteen years in the laborious exercise of his mission, for which his qualifications were of no common order. Died 1826.

HALL, HENRY, a learned divine, 1716-1763.

HALL, SIR JAMES, baronet of Douglass, author of an 'Essay on Gothic Architecture,' &c., 1760-1832.

HALL, JOHN, an English poet, 1627-1656.

HALL, JOHN E., editor of the 'Portfolio'; also publisher of the 'American Law Journal' from 1808 to 1817. Died in Philadelphia, 1829.

HALL, JOSEPH, D.D., the pious bishop of Norwich, was born at Ashby-de-la-Zouch, in the county of Leicester. Directing his views towards the Church of England, he was entered a student of Emmanuel College, Cambridge, and in the course of time obtained a fellowship. It was during his residence in that seat of learning, he published his satires and many other poetical pieces, which spread his fame far and wide. But he abandoned the muses, having resolved to devote his chief attention to divinity, and in due time, being licensed to preach, was appointed rector of Halsted in Suffolk. In that rural retreat he composed his 'Contemplations,' which procured him the patronage of Prince Henry, and the rectory of Waltham. He was ere long called to mourn over the untimely death of that excellent prince and to preach his funeral sermon, which has been preserved in the collection of his published writings, and abounds with passages of touching pathos and fervent piety. Mr. Hall was a

man of very devotional habits, to fortify which he made a most rigid distribution of his time, having set hours for prayer, for reading divinity, for general literature and composition; and so intense was his ardor in the pursuit of intellectual and spiritual improvement, that for a time he observed the strictest abstemiousness, taking for a while only one meal a-day.—In 1616, he went to Paris as chaplain to the English ambassador. On his return he was appointed by King James to the deanery of Worcester, and in the following year he accompanied his royal master into Scotland, when that monarch made a progress into the northern part of his kingdom to prosecute his imprudent scheme of erecting episcopacy on the ruins of presbyterianism. None of the unpopularity, however, of that measure fell upon Hall, whose pious character and temperate principles secured him the esteem and respect of the most eminent Scotchmen of the day. From leaving Scotland, he was commanded to go over into Holland to attend the Synod of Dort, which was held in 1618. But the protracted meetings of that famous convocation made a sad inroad on his health, and after an assiduous attendance of two months, he returned with an impaired constitution to England. The prominent part he had taken in the councils of that body, may be judged of by the fact that a medal commemorative of the assembly, was by the unanimous vote of the members, awarded and sent to him. He had no small share in achieving by his arguments and eloquence the signal discomfiture of the Arminians, and the condemnation of their doctrines in that Synod.—Dr. Hall, for he had obtained the degree of D.D., being now a leading man in the Church of England, was marked out for promotion, and accordingly he was raised first to the see of Exeter, and afterwards, without any solicitation, to that of Norwich. Amid all the ecclesiastical tyranny of Laud, Bishop Hall preserved his moderation, and the clergy of his diocese were kept from the odium as well as the penalties of the Book of Sports. The bishop, however, had his season of trial. When the popular outcry ‘No Bishops’ was raised, and an armed mob marched against the House of Lords, Hall with eleven of the lords spiritual joined in protesting against the measures which were passed in their absence; and this document having been made a ground of impeachment, he with his protesting brethren were consigned to the Tower. On his liberation, he continued for a year to exercise his episcopal functions in Norwich; but the popular tide again set in strongly against his order, his house was attacked, his property sequestered, himself insulted, and in meek resignation he retired into a small lonely place in Norfolk, where he spent the remainder of his days in acts of piety and charity, and at length died 1656, in the eighty-second year of his age. [R.J.]

HALL, LYMAN, governor of Georgia, was born in Connecticut, and having graduated at Yale College in 1747, he studied physic and practised in Sunbury, Georgia. In May, 1775, he was chosen a member of Congress, and was one of the signers of the Declaration of Independence; and in 1783, he was elected governor. Died 1791, aged 66.

HALL, RICHARD, a Roman Catholic writer, died 1604.

HALL, ROBERT, a medical author, 1763–1824.

HALL, REV. ROBERT, the most eloquent preacher of modern times, was born at Arnsby, a village in the neighborhood of Leicester, in 1764. His father was a Baptist clergyman, and both his parents were distinguished for talents, prudence, and piety. Ro-

bert, the youngest of fourteen children, was of so feeble a constitution, that he could neither speak nor walk till near three years old. He learned to read by the inscriptions on the gravestones; and he showed at a very early age a passionate fondness for reading, and used to recline for hours with a book on the grass; a habit which is thought to have produced that excruciating pain in the back to which he was subject during life. Even while yet a boy, Edwards on the Will and Butler’s Analogy were his favorite books; and he would analyze as well as discuss them with great intelligence at the age of nine. His classical master dismissed him from school at eleven as already beyond the range of his own acquirements. He was in fact a young prodigy of genius and knowledge, and these precocious talents were combined with such genuine piety, that he was placed under the care of the Rev. John Ryland, tutor of the Baptist Academy, and at the age of sixteen, he was ‘set apart’ to the office of the ministry by his father in presence of the congregation at Arnsby. In pursuance of his ministerial views, he went to study at the University of Aberdeen, where he enjoyed the prelections of Beattie, Campbell, and Gerard, and where he made the private friendship of Mr. afterwards Sir James Mackintosh. He was noted among his fellow-students as much for his habitual piety as for his pre-eminent talents. On the completion of his college studies, Mr. Hall engaged himself as classical tutor in the Baptist Academy at Bristol, and at the same time acted as assistant to Dr. Evans in Broadmeadow chapel. At the end of five years he removed to Cambridge, where he became assistant, and afterwards successor to the Rev. Mr. Robinson in the Baptist church in that city. It was by his eloquent and elaborate discourses prepared for the meridian of that seat of learning, he rose to the foremost rank of British preachers. His public and occasional sermons were attended by crowds of the professors and young men, many of whom sought and valued his friendship, dissenter though he was, amongst whom was the celebrated Dr. Parr. In Cambridge some of his greatest works were composed and published. His ‘Christianity Consistent with the Love of Freedom’ in 1791, his ‘Apology for the Freedom of the Press’ in 1793, his far-famed sermon on ‘Modern Infidelity’ in 1799, his ‘Reflections on War’ in 1802, and his ‘Sentiments Suitable to the Present Crisis’ in the year following. These were politico-religious discourses, occasioned by the critical circumstances of the country at the beginning of this century, and they touched a chord in every patriotic heart. But while they evince the great powers of argument and eloquence that so greatly distinguished Mr. Hall, they must not be considered samples of the food with which he fed his people. His ordinary discourses, though always replete with genius and eloquence, were evangelical, calculated to edify his people both by enlarging their Scriptural knowledge, and stimulating their faith and piety.—In 1804, when he was at the very height of his reputation, the mind of this extraordinary man suffered a sad eclipse, and yet at intervals during the progress of his distressing malady, his genius shone forth by sparks of surpassing power and brilliancy. His congregation showed their strong attachment and sympathy by raising an amount of £100, and another of equal amount to be given to his family in the event of his death. Although he recovered, yet partial symptoms of the disorder discovering themselves, his connection with the congregation in Cambridge was dissolved, and he was placed

by his friends in the private establishment of Dr. Arnold of Leicester, by whose skilful and judicious treatment, his health was soon re-established, and he resumed his preaching by itinerating through the villages around Leicester. He became settled pastor of a church in Leicester, the same chapel in which the celebrated Dr. Carey had once officiated, and there by the splendor of his public ministrations, his fame as a public orator was extended more widely than ever. — But Mr. Hall was not allowed to continue in that comparatively limited sphere. On the death of Dr. Ryland, he was urged to undertake the pastorate of the large and flourishing Baptist congregation in Bristol, and to that city he accordingly removed, all classes hailing his arrival with enthusiastic joy. After laboring five years in that important sphere with unrivalled success, his health gave way. A spasmodic affection in the chest, added to his old constitutional complaint in the back, rendered him unfit for public duty. The unfavorable symptoms continued to increase in spite of all the medical skill that was enlisted in his behalf, and after a brief illness of ten days, this splendid orator and eminent servant of Christ, died in February, 1831, in the sixty-seventh year of his age. HALL, THOMAS, a learned nonconf., 1610–1665.

HALLE, CLAUDE GUY, a French painter and director of the Academy, 1652–1736. His son, NOEL, a painter and superintendent of the Gobelins, 1711–1781. The son of the latter, JOHN NOEL, a physician and medical writer, 1754–1822.

HALLE, PETER, a French *savant*, 1611–1689.

HALLENBERG, JONAS, a Swedish historian and naturalist, au. of a history of Swed., 1748–1834.

HALLER, ALBERT, M.D., a learned and eminent anatomist and physiologist of last century, was born at Berne, in Switzerland on the 18th October, 1708. He was the son of Nicholas de Haller, an advocate, and chancellor of the county of Baden, and exhibited in early life very precocious powers, particularly in the acquisition of languages; having at the age of nine composed for his own use a Chaldaic Grammar, a Hebrew and Greek Lexicon, and an Historical Dictionary containing upwards of 2,000 articles. He was originally destined for the church, but subsequently turned his attention to medicine, which he studied under Camerarius and Duverney at Tubingen, and afterwards at Leyden under Boerhaave, where he was the associate of Albinus and Ruysch, and where also he graduated as a doctor. After visiting England and France, he returned to Berne in 1730, and in 1734 was appointed teacher of anatomy in that city; but his reputation having greatly extended, he was nominated Professor of Anatomy, Surgery, and Botany, in the university of Göttingen by George II. of England in 1736. Here he remained for seventeen years, and here his great work, 'Disputationes Anatomicæ Selectæ,' by which he is chiefly known, was composed. He refused the chair of botany in Oxford, and he declined solicitations from the king of Prussia, the states of Hlland, and the empress of Russia. George II., in consideration of his great merits, obtained for him a brevet as a noble of the empire, and he is often spoken of as Baron Haller; but he never used this title in his native country. He left Göttingen for Berne in the year 1753, and spent the rest of his life in honorable but active retirement in Switzerland. He died at Berne on the 12th of December, 1777, in his seventieth year. HALLET, Jos., a learned dissenting minister, auth. of 'Discourses on the Miracles,' 1692–1744.

[Halley's Tomb.]

HALLEY, EDMUND, a celebrated astronomer, was born in London on the 8th November, 1656. His father, who was a soap-boiler, sent him to St. Paul's school, where he acquired such a taste for astronomy that before he left school he made observations on the variation of the needle. In 1673 he entered Queen's College, Oxford, and while there devoted himself almost exclusively to mathematics and astronomy. In 1676 he published his first paper in the Philosophical Transactions on the orbits of the primary planets, and such was the reputation it acquired him, that he was soon after sent by Charles II. to St. Helena to make a catalogue of the stars of the southern hemisphere. In the course of two years he completed this arduous task, and in 1679 he published his 'Catalogue of the Southern Stars.' In 1678 Halley was elected a fellow of the Royal Society, and in the following year he went to Dantzic to settle the controversy between Hooke and Hevelius respecting the use of telescopic sights in astronomical observations. After performing the tour of Europe in 1686 with his friend Mr. Nelson, the author of 'Fasts and Festivals,' during which he made observations on the great comet in the observatory of Paris with Cassini, he returned to England and married the daughter of Mr. Tooke, auditor of the exchequer, with whom he lived happily for fifty-five years. In the Philosophical Transactions for 1683 he published his 'Theory of the Variation of the Magnetical Compass,' in which he considers our terrestrial globe as one great magnet, with four magnetic poles near the north and south poles of the earth, the needle being always governed by the nearest of these poles.—In consequence of the bankruptcy of his father, our author's pursuits were for some time interrupted; but he soon returned to his studies, and was led in 1685 to examine Kepler's laws of the planetary motions, from which he drew the inference that the centripetal force must vary inversely as the square of the distance. Being unable to prove this geometrically, he applied to Dr. Hooke and Sir Christopher Wren for assistance; but having failed to obtain it, he set out for Cambridge in August, 1683, to consult Mr. Newton, who had by this time made great progress in establishing the doctrines of the Principia. Halley was delighted with his reception, and the good news that Newton

had brought the demonstration of the laws of the celestial motions to perfection. Newton, however, could not lay his hands upon the papers, but wrought them over again, and sent them in November to Halley by Mr. Paget, in the form of four theorems and seven problems. Upon receiving them Halley took another journey to Cambridge in order to confer with their author on the subject, and we find him on the 10th December giving an account to the Royal Society of the curious treatise 'De Motu,' which Newton had shown him, to be entered upon their register. At a later period Halley prevailed upon Newton to complete his 'Principia,' the first book of which was exhibited to the Royal Society on the 20th April, 1686. It was put into the hands of Halley, then clerk to the Society, to report upon it; and at a subsequent meeting on the 2d of June, Halley undertook the task of correcting the press, and of printing it at his own expense.—In 1686 our author published an account of the trade winds and monsoons on the seas near and between the tropics, which was followed by several other chemicometeorological papers, in one of which, 'On the Circulation of the Watery Vapors of the Sea, and the Origin of Springs,' published in 1691, he first pointed out that beautiful provision, in consequence of which, a constant circulation of water is kept up between the atmosphere and the ocean. In 1691 he published a paper on the conjunction of the superior planets, in which he showed, as James Gregory had done long before, the utility of observing these conjunctions in order to determine the sun's parallax and distance from the earth. In the year 1691 Halley became a candidate for the Savilian chair of astronomy at Oxford, and was opposed by David Gregory, who was the successful competitor. His failure on this occasion arose, according to Whiston, from his maintaining infidel opinions, and being generally regarded as a sceptic and a 'banterer of religion.' The same charge was preferred against him by Flamsteed, and Newton is said to have often reproved him for his infidelity. There is reason, however, to believe that the charge of infidelity was founded on his having persisted in maintaining, as every philosopher and intelligent divine does now, that there was a pre-adamite earth, out of the ruins of which the present earth was made; and that he only labored under imputations which have been often made since his day upon every distinguished individual who maintains great truths that appear to be inconsistent with the literal interpretation of Scripture.—In 1692 Halley published his Hypothesis Relative to the Change in the Variation of the Needle, in which he supposes an interior globe with magnetic poles to move within our earth, and to produce the variation by the change in the relative position of the external and internal poles.—In order to put this theory to the test of observation, he conceived the design of obtaining measures of the variation of the needle in different parts of the world. For the purpose King William appointed him captain of the *Paramour Pink*, in which he set sail on the 20th October, 1698, but after sailing along the coasts of Africa and America, a spirit of mutiny arose among his officers, and he returned to England in July, 1699. Having resumed his voyage, and finished his experiments, he returned on the 7th September, 1700, and was rewarded with the title of captain of the navy, and with half-pay during life.—On the recommendation of Queen Anne, the emperor of Germany consulted him on the formation of a harbor on the coast of Dalmatia, and he went twice to the Adriatic on that errand. The emperor

when he saw him at Vienna presented him with a rich diamond ring, taken from his finger, and wrote a letter in his own hand recommending him to Queen Anne.—On the death of Dr. Wallis in 1703, Halley was appointed Savilian professor of geometry at Oxford, and forgetting, or rather perhaps having discovered the falsehood of the charge of infidelity which had formerly been made against him, the university conferred upon him the honorary title of Doctor of Laws. In furtherance of the plan recommended by Sir Henry Saville, he began, in conjunction with Dr. Gregory, to publish the works of the ancient geometers, and several of the writings of Apollonius and Serenus, translated and edited by them, appeared in 1706 and 1710.—Upon the death of Sir Hans Sloane in 1713, he was elected secretary of the Royal Society, and while he held this office he made a number of interesting experiments on the diving bell at great depths in the sea, which were described in the *Phil. Trans.* for 1716, under the quaint title of 'The Art of Living under Water.' When the important office of astronomer royal became vacant in 1719, by the death of Flamsteed, Halley was appointed his successor, and though he had now reached the sixty-fourth year of his age he continued for twenty years without the aid of an assistant to carry on the operations of the observatory with the most unremitting assiduity. In 1731 he published his 'Proposal for Finding the Longitude at Sea within a Degree,' a method which he had suggested so early as 1683, in an appendix to the second edition of Street's 'Caroline Tables.' In 1725 he drew up his tables for computing the places of the planets, but he delayed their publication till he was enabled by new observations to make them more perfect. They did not, however, appear till 1749, after his death; but they were long regarded as the most complete and accurate till they were superseded by others founded on newer and more accurate observations. In 1729 Halley was elected a foreign member of the Academy of Science in Paris. In 1737, when he was eighty-one years of age, he was struck with paralysis in his right hand, but he still continued to attend the Royal Society Club at its weekly meetings. The disease now gained ground upon him, and he gradually lost his strength. He was sustained chiefly by the cordials given him by Dr. Mead, and one day being tired of taking them, he asked for a glass of wine, and as soon as he had drunk it he expired in his chair without a groan, on the 14th January, 1742, in the eighty-sixth year of his age. He was buried in the churchyard of Lee, and as he had himself requested, in the same spot with his wife, whom he had lost a few years before. His eldest daughter was buried in the same place in 1743. Besides this daughter he had other two, and several children who died in infancy. One of his sons, who lived to manhood, died long before his father. His two surviving daughters erected over his remains a handsome tomb of Portland stone. M. Mairan, who wrote the eulogium upon Halley, which was read to the Academy of Sciences in 1742, concluded with the following just appreciation of the universality of his acquirements:—'While we thought the eulogium of an astronomer, a naturalist, a scholar, and a philosopher, comprehended our whole subject, we have been insensibly surprised with the history of an excellent mariner, an illustrious traveller, an able engineer, and almost a statesman.' Notwithstanding the copious details regarding the life of Halley given in the 'Biographia Britannica,' a good life of that distinguished individual is greatly to be desired, and we trust that the Rev. M. Rigaud of Ipswich will find leisure to fulfil the

intentions which his distinguished father had so much at heart. [D.B.]

HALLIDAY, SIR ANDREW, a physician and traveller, celeb. as a miscellaneous writer, d. 1840.

HALLIER, F., a Fr. controver. wr., 1595-1659.

HALLIFAX, S., a learned prelate, 1733-1790.

HALLOCK, JEREMIAH, minister of Canton, Connecticut, distinguished for his piety, was born on Long Island in 1758, and died 1826, aged 68.

HALLOIX, P., a French *savant*, 1572-1656.

HALLORAN, SYLVESTER O', an Irish antiquarian, au. of a 'Hist. of Ireland,' &c, 1728-1807.

HALMA, F., a Flemish lexicographer, last cent.

HALMA, N., a French archæologist, 1755-1828.

HALS, FRANCIS, a distinguished portrait painter, was born at Mechlin in 1584, died 1666.

HALSTED, CAROLINE AMELIA, an English writer, author of various works, of which the best known is a 'Life of Richard III.' Died 1851.

HALTAUS, C. T., a German hist., 1702-1758.

HALYBURTON, THOMAS, a Scotch divine, author of 'Natural Religion Insufficient,' 1674-1712.

HAMAD, fndr. of a dynasty in Algeria, d. 1027.

HAMADANI, an Arabian *savant*, 968-1007.

HAMAKER, H. A., a Dutch Orientalist, 1789-1835.

HAMANN, J. G., a German philoso., 1730-88.

HAMAZASB, an Armenian prince, died 658.

HAMILCAR, a general of Carthage, k. B.C. 229.

HAMILTON, a distinguished Scotch family, the principal members of which are—JAMES, *first* earl of Arran, d. 1519. JAMES, the *second* earl of Arran, duke of Chatelherault and regent of Scotland, died 1576. PATRICK, the *first* Scotch reformer, was born in 1503, and educated at St. Andrews. He was appointed abbot of Ferne in Rosshire, where having disseminated Lutheran doctrines he incurred the wrath of the Archbishop Beaton and clergy, and after a tedious trial he was declared contumacious and burnt at the stake 1527. JAMES, *first* duke of Hamilton, beheaded as a royalist after the battle of Preston, 1649. WILLIAM, duke of Hamilton, died after the battle of Worcester, 1652. ANTHONY, Count, a poet, author of 'Memoirs of Count Grammont,' was born in Ireland in 1646, but of Scotch descent. He was appointed governor of Limerick by James the second, but on the ruin of that monarch, he accompanied him to France, where he remained till his death. Died 1720.

HAMILTON, ALEXANDER, distinguished as a statesman, jurist, soldier, and financier, was born in the West Indies in 1757. At the age of seventeen, while yet a student in college, he attracted attention by the uncommon ability displayed in certain essays on the rights of the American Colonies. A short time after he was eighteen he joined the American army as a captain of artillery, and when he was twenty he belonged to the military family of Gen. Washington as one of his aids, with the rank of lieutenant-colonel. He remained in the army during the war, always attached to the staff of the commander-in-chief, and possessed of his affection and confidence. Indeed Washington was in the habit of consulting him on all important occasions. When the war was terminated he devoted himself to the study of the law, and soon rose to the first rank in the profession. In 1782 he was a member of Congress from New York. Here he attained high distinction, and possessed great influence. In concert with Jay and Madison he wrote the 'Federalist' and contributed very largely to the measures which led to the adoption of the Constitution of the United

States. Washington, the first President, placed him in 1789 at the head of the Treasury, where he soon brought order out of chaos, and by his financial ability placed the credit of the government on a solid basis. In 1798, when troubles with France appeared probable, he was commissioned as a General, and when Washington died in 1799, his rank made him commander-in-chief. After the troubles were over, he returned to his profession, and held a position as a jurist second to none in the country. In 1804, he was challenged by Aaron Burr, and a duel was the consequence, in which he fell, mortally wounded, at the age of 47. He was unquestionably one of the ablest men our country has ever produced.

HAMILTON, CHARLES, an East Indian officer and writer on Oriental subjects, died 1792.

HAMILTON, ELIZABETH, daughter of General Schuyler, and wife of Alexander. She survived her husband for the long period of fifty years, ever faithful to his memory, and ended a long life of usefulness, piety and benevolence, in 1854 at the advanced age of 96.

HAMILTON, ELIZABETH, an Irish lady of considerable note as an essayist, 1758-1816.

HAMILTON, GAVIN, an historical painter, was born at Lanark, Scotland. He studied painting in Italy under Augustine Massuchi. One of his greatest works was his 'Homer,' representing scenes from the Iliad. Died 1796.

HAMILTON, ANDREW, an eminent lawyer of Philadelphia, particularly distinguished himself at the trial of Peter Zeuger in New York. He held several appointments, in which he discharged the various duties with honor and integrity. He resigned his office of speaker of the House of Assembly, in consequence of his age. Died August 4, 1741.

HAMILTON, GEO., earl of Orkney, distinguished at the battle of the Boyne, and in consequent actions under William III. and the duke of Marlborough, died 1737.

HAMILTON, HUGH, an Irish prelate, mathematical writer, and professor of natural philosophy, 1729-1805.

HAMILTON, JAMES, inventor of the Hamiltonian system of instruction. Died 1829.

HAMILTON, SIR JOHN, a British officer, disting. in the East Indies and the peninsula, 1755-1835.

HAMILTON, PAUL, Governor of South Carolina from 1804 to 1806, and secretary of the navy of the United States from 1809 to 1813. Died June 30, 1816.

HAMILTON, R., a medical writer, 1729-1793.

HAMILTON, R., a Scotch mathematician and writer on public questions, 1742-1829.

HAMILTON, CAPT. THOMAS, a miscellaneous writer, author of 'Cyril Thornton,' 'Travels in America,' &c., died 1842.

HAMILTON, WILLIAM, an artist, was born in Scotland in 1750, and studied at Rome under the painter Zucchi, and on his return to England he was admitted a student at the Royal Academy. Died 1801.

HAMILTON, WILLIAM, a poet, born in Bangour, Ayrshire, in 1704. Having espoused the cause of the pretender, he had a narrow escape of being made prisoner at Culloden. Died 1754.

HAMILTON, SIR WILLIAM, Bart., the present Professor of Logic in the university of Edinburgh. It is not without feeling that an apology is therefore due to the distinguished person who is the subject of this article, that we introduce a notice of him into a list which, with one other exception, is made up of the names of men whose lives have closed, and

whose deeds may be summed. But notwithstanding that Sir William survives, and that the scientific world would be loath to accept what he has accomplished, as the whole riches he will bequeath, he yet seems to occupy so large a place in the domain of Scottish thought, and his labors have a bearing so peculiar on the existing attitude of Metaphysical Inquiry in Europe, that we have ventured to include a brief appreciation of his remarkable powers among these rapid sketches. It is now long years since Hamilton had achieved a name for Encyclopædical Learning in every thing related, however remotely, to the history and condition of Mental Science; and certainly no other, in modern times, could readily be specified, with attainments of this description at all equivalent to his: nevertheless—at least until recently—it was known only by the few, that to acquisitions so various and vast, he adds the power to marshal and command them all; and that his learning, however immense, is used by him simply as an instrument whereby to rear and consolidate a great and symmetrical body of Thought. Rarely indeed has the thirst unquenchable for what in common speech is termed *à posteriori* knowledge, been combined with so signal a development of *à priori* power; it seems the pre-eminent characteristic of our philosopher's mind, that these two *factors* of all Science, exist in it together—in full and symmetric integrity. No problem is resolved in his view, or even rightly *laid* for explication, until, in the first place, a complete scheme has been constructed of all its possible solutions, and the contributions of every former thinker arranged under due heads, and made to bring out their partial light: a step, preliminary indeed, but which can never be accomplished until the problem has passed through the mind, under the chief forms in which History presents it, and its fundamental conditions in all their purity and breadth been discerned. Few exercises are more pleasing than to follow Hamilton, as with eager and scrupulous conscientiousness he gathers together the scattered hints of his predecessors, assigns them their place, and marks them with their value: his intense Love of Truth rises into the forms of Justice; great popular names never pass with him as badges of desert; nor is any one so obscure—to whom a fragment of truth has in any form ever appeared—that he may not be surrounded with his regard. A character so thorough, and, in the highest sense, *veracious*, must have at its root—assuredly as its concomitant—a clear and energetic moral nature; nevertheless, the source of its strength, in this instance, is manifestly what we have stated—an earnest and unflinching love of truth, and faculties harmonized to discern it. Regarding Philosophy as man's highest intellectual attainment, must not all true workers appear as one brotherhood? Believing the conquest of august problems concerning Knowledge and Being, to be the Olympic prize of our Human Reason, shall the Runner not welcome every aid to his strength, or shall he expect that any thing but *strength* can help towards the goal? Fortunate, if at a time when languor and dissolution threaten Philosophy once more, and reputations are sought and won through picking up and vending its mere *flotsam* and *jetsam*—our Youth might haply attain skill in Method, increase in Sincerity, and learn the dignity of intellectual toil, through the example of Hamilton!—Let us briefly glance at the leading provinces occupied by our Philosopher. 1. It is not unknown how important a share of modern speculation has been devoted to the subject of *Perception*, since the times of Reid. Not in Great Britain alone—

not even especially in that country; for some *critique* of the Act of Knowing, is at the basis of all recent German Systems. As customary with him, not confining his regard to modern times, but surveying philosophical history from Plato downwards, Sir William, in his remarkable papers on *Presentation* and *Representation*, appears for the first time to have *laid* or constructed the full problem, and to have resolved it. The solution was, amongst his own countrymen peculiarly opportune, arriving to discredit and destroy the confusion threatened by the rash but imposing ignorance of Brown; nor was it less opportune abroad, inasmuch as it once more restored '*Natural Dualism*' to its sovereignty in Thought, and revealed the form of the gratuitous hypothesis that from earliest times had impelled men in vain search of schemes of *Unity* and the *Absolute*. Despotically, as the maxim of the immobility of the earth ruled in Astronomy until the time of Copernicus, and equally unquestioned—the maxim that '*like only can know like*,' seems to have governed all theories of perception; exerting more extensive influence than any other principle in the History of Philosophy. Under its sway the problem of perception became this—how do Mind and Matter *seem* to meet? *Meet* they cannot, being unlike: is then Mind an illusion, or Matter an illusion; or is there a certain *medium* partaking of both, through which they come together? The maxim repudiated, and replaced by the simple assertion of consciousness, this immense fabric of speculation fell prone and helpless: and Hamilton's will ever be recognized as the hand that dealt the irrecoverable blow. Vindicating it, in name of Consciousness, as an undeniable fact, that the Ego and Non-Ego, as two distinct objects, are at the same moment, and with equal verity, present to the mind, he protested against all Unitarian Schemes, as insurrections, defying a primal Law; and it is not too much to say that the energy and directness of his protest, upheld by his searching dissection of all untrue or partially true opposing systems, ancient and modern, marks the beginning of a sounder period in Mental Science.—2. It is needless to recall the amount of attention given by him to the subject of LOGIC, or the fame that has hence accrued to him. The grounds of Knowledge ascertained, and the veracity of Perception vindicated, next in order stands the Inquiry, what are the primary laws of thinking, or according to what forms does the mind operate on the matter of its thoughts? A large, although purely notional Science; its foundation laid by Aristotle, and its domain surveyed; portions of it minutely explored by Lord Bacon; but in danger of being all lost sight of, as a Science, in Great Britain, or absorbed by its lowest and empirical part. Thoroughly has Hamilton revived the Stagyrte, and interpreted him to our compeers. Acknowledging to the full the merits of Lord Bacon, he has passed beyond him to the higher position of the Greek; and presented logic again, as it appeared to that penetrating and all-grasping intellect. Few will miss remarking that the fulness of his sympathy with Aristotle has its root in a corresponding universality of character: no form or mode of speculation is *foreign* to Hamilton, as none were so to his predecessor. Of special contributions to the doctrine of the syllogism we can say nothing here.—3. Logic we have termed a *notional* science, as it exclusively is. But it is conversant with laws obeyed by the Mind in thinking, and with primary notions that control, and are involved in these. What are these primary notions? Our notion of Causality, for instance, is it a mere notion, or does it belong to

*Existence* also? *Space* and *Time* are forms, apart from which we can perceive nothing,—are they likewise external realities, or issuings from external realities? Questions these, peopling the vast and difficult heights of *Metaphysics*; occupying intensely the greatest Inquirers of former times, and all Teutonic thinkers in our own; but, until Hamilton spoke, wholly neglected in G. Britain, where the mind rested content amid the low levels of elementary Psychology. No more startling proof could be given of the inertness as to metaphysical research properly so called, than the criticisms on Kant, &c., one finds in Mr. Stewart's dissertations—dissertations, notwithstanding that Hamilton has written, still presented as an adequate account of Philosophy! With corresponding knowledge and power, our distinguished Thinker has passed into this field: and his speculations concerning the 'Law of the Conditioned'—concerning the principle of Causality—his adventures into the still more rugged sphere of Ontology, establish before every one who can think or judge—whatever the fate of his special conclusions—that an Inquirer is here, who need bow his head before no Greek or Teuton of them all.—May health empower him to carry out his announced and cherished designs! Events, indeed, are not in the hands of man; but the 'Edition of Reid,' and the 'Discussions of Philosophy,' are possessions; and with gratitude the long Future will receive them.—What, then, is the probable issue of a life and labors like these? Shall Hamilton succeed in reviving a taste for Metaphysics? Is it likely that many who profess to admire him will imitate his independence? Shall he be the founder of a new and purified, a profound and fearless Scottish school? If such a result were possible, Hamilton's achievements and example would secure it: but for two reasons, its advent seems, to the writer of this notice, more than doubtful. First, There are abroad many indications, that when a new School in Philosophy shall be formed, its Method must take greater account than has yet been done, of the issues of physiological research, and of the position of Humanity in the great Hierarchy of Organization. It is most true, as laid down by Des Cartes, that the reality of mental phenomena needs no attestation beyond consciousness; but although physiology must not absorb psychology, the two ought not, and ultimately will not stand apart: the methods and science of the latter will assuredly be found to repose upon the former. But another cause adverse to the immediate reconstruction of any worthy and upright Mental Science, has sprung out of circumstances whose unravelling is probably still more remote. Changes in the social and political relations of the different classes in Great Britain—however fertile otherwise of good fruits—have recently elevated into preponderance and power, those unsystematic views on mind and speculative subjects, which alone can be expected among busy multitudes; a condition not favorable, now nor at any period, to the existence of an independent philosophic class. In a country like that, so practical, and where men are so fond of political station, the tendency natural to such an epoch will unquestionably be, rather to desire and furnish support—logical merely in *form*—to systems in vogue and popular, than daringly, and with single eye, to follow out Truth. For a season, therefore, Philosophy may descend into subservience. It remains to be ascertained by what instrumentality, in the course of Providence, sufficient esteem and freedom shall become assured to the Truth-Seeker; the Multitudes discerning, that in Truth alone, the prize

of sternest quest, and not in heaps of Opinion, *rudis indigestaque moles*—abide Safety and Honor.

HAMILTON, SIR WILLIAM, the friend of Nelson, known as a diplomatist and connoisseur in the arts, and in natural history, 1730–1803. His second wife, EMMA, LADY HAMILTON, married to him, after a long course of licentiousness, in 1791, was a woman of extraordinary beauty, and still more remarkable for her powers of fascination. She became the mistress of Nelson, and his political agent at the court of Naples, and died at Calais in the most abject distress, 1816.

HAMILTON, WILLIAM GERARD, a Scotch lawyer and statesman, remarkable for the eloquence of the only two speeches he was known to make in the House of Commons, 1729–1796.

HAMMOND, ANTHONY, a miscellaneous writer, was born in Huntingdonshire, in 1668. After receiving his education at St. John's College, Cambridge, he was elected a member of parliament, where his fluency of language gained him the appellation of 'Silver Tongue.' He held the appointment of commissioner of the navy. Died in 1738.

HAMMOND, H., a learned divine, 1605–1660.

HAMMOND, J., au. of 'Love Elegies,' 1710–41.

HAMON, JOHN, a French Jansenist, 1618–87.

HAMPDEN, JOHN, was born at London in 1594. There is little to be commemorated of his life save what belongs to the history of the period, and all his connection with it is on the surface, for his acts were open and public, and whatever his coadjutors may have been, he was ever free of secret machinations to serve private ends. He belonged, like nearly all the leaders of the parliamentary party, to one of the worshipful and ancient country families. He was widely ramified among the English gentry, and he counted Cromwell, with other opponents of the court, among his connections. In 1619 becoming married to Elizabeth Symeon, to whom he was ten-

derly attached, he led the life of a country squire, amid a numerous offspring. He represented Gram-pound, and afterwards Wendover, in the earlier parliaments of Charles I.'s reign, but he took little concern in public business until the Long Parliament, when he had gradually prepared himself to suffer or to strike, as occasion might require, in support of what he deemed the fundamental principles of the constitution. He was imprisoned in the gatehouse for refusing to participate in one of the exacted loans, but this effort at coercion was abandoned. His resistance to the imposition of a tax without authority of parliament, under the obsolete name of ship-money, came to its conclusion in 1637, when the question was solemnly tried in the Exchequer Chamber. The decision was against him, and satisfied

him that armed resistance to the prerogative was necessary. He threw himself with entire devotion into the business of the Long Parliament, and much of the successful dexterity with which it was conducted was due to his skill and courage. He commanded a troop in the parliamentary army. He was mortally wounded in an affair with Prince Rupert on 18th June, 1643, and thus left the struggle while yet it seemed on the side of the parliament one of fair defence and self-protection, and before long-sustained animosity or projects of aggrandizement had mixed themselves with the views and conduct of the parliamentary leaders. HAMPER, W., a miscellaneous writer, d. 1831.

HAMPTON, J., a classical translator, d. 1778.

HAMPTON, WADE, a distinguished citizen of South Carolina, one of the largest and wealthiest landed and slave proprietors in the United States. He was distinguished in the revolutionary war, and partisan warfare of his own State. Died 1834.

HAMZA, the first prophet or high priest of the Druses, author of 'The Book of Testimonies to the Mysteries of the Unity,' 11th century.

HAMZEH, a shah of Persia, killed 1585.

HANBAL, a mussulman sectarian, 786-855.

HANCKINS, M. a Ger. philologist, 1633-1709.

[Residence of John Hancock, Boston.]

HANCOCK, JOHN, LL.D., governor of Massachusetts, and one of the signers of the Declaration of Independence, was born at Quincy, Mass., about the year 1737, and graduated at Harvard College, in 1754. On the death of his uncle Thomas Hancock, he became possessed of considerable property, and engaged in commercial pursuits. In 1766 he was chosen a member of the House of Representatives for Boston, in which office he soon distinguished himself. In 1774 he was appointed president of the Provincial Congress of Massachusetts, and in the following year president of the Continental Congress. In 1780 he was elected governor of Massachusetts, which office he held for four years, and in 1787 he was again chosen to that station. Died 1793, aged 56.

HANCOCK, JOHN, minister of Lexington, Massachusetts, was born in 1670. He graduated at Harvard College, in 1689, and was ordained November 2, 1698. Died 1752.

HANCOCK, JOHN, minister of Braintree, Massachusetts, was the son of Rev. John Hancock, minister of Lexington, Mass., was graduated at Harvard College, in 1719, and ordained in 1726. Died May 7, 1744, aged 41.

HANCOCK, THOMAS, a patron of Harvard Col-

lege, to which institution he bequeathed £1,000 for the foundation of a professorship of the Hebrew and other Oriental languages. He also left £1,000 to the Society for propagating the Gospel among the Indians, and £600 to the town of Boston for the establishment of a hospital for insane patients. Died August 1, 1764.

HANDCOCK, RICHARD BUTLER, a British army officer, served in Egypt under Sir Ralph Abercrombie, and was distinguished for his spirited defence of La Colle Mile. Died in the American war of 1812.

HANDEL, GEORGE FREDERICK, the son of an eminent surgeon and physician, was born at Halle in Saxony, on the 24th of February, 1684. His father had designed that he should follow the profession of the civil law, but his love for, and early progress in music, soon proved, as in many other instances, that the parental plans had to be given up. He was then placed under the tuition of Frederick Zachau, organist of the cathedral of Halle, where he made such rapid progress, that at nine years old he was able to officiate on the organ for his master, and had begun the study of composition. When only nineteen he went to Hamburg, where he became director of the operas, and such was his ability and talent, that it excited the jealousy of a rival musician, John Matheson. These professors had been on terms of the closest intimacy and friendship for nearly six years, when a quarrel arose upon a point of professional etiquette which ended in a duel. They fought with swords, but luckily the point of Matheson's sword broke against a metal button on Handel's coat, which put an end to the combat. This encounter took place on the 5th of December, 1704. Matheson and Handel soon again became good friends, for we are informed by Matheson, that on the 30th of the same month he accompanied the young composer Handel to the rehearsal of his first opera 'Almeria,' and at the theatre performed the principal character in it. Next year Handel brought out his 'Florinda,' and in the year following 'Nerone,' both of which were favorably received. In 1708 he composed his 'Dafne,' up to which time he had written harpsichord pieces, songs, and cantatas innumerable. Having become possessed of some wealth, he went to Italy, and he composed in Florence the opera 'Rodrigo.' From Florence he went to Venice, where in 1709 he produced his 'Agrippina' which was received with acclamation, and in which horns and other wind instruments were first used to accompany the voice in Italy. Here Handel met with Dominico, Scarlatti, Gasparini, Lotti, and other great masters of musical art. He next went to Rome, where he met Alessandro Scarlatti, and had an opportunity of hearing music of the highest class. Here he composed 'Il Trionfo del Tempo' and gained the friendship of Cardinals Ottobeni and Pamfili, the latter of whom wrote the libretto for a sacred work named 'La Resurrezione.' After visiting Naples he returned to Germany in 1710, where he received the situation of Maestro di Capella to the elector of Hanover, afterwards George I. of England. Having obtained permission, he came to England in the latter end of the year 1710, between which year and 1720, he composed his opera of 'Rinaldi,' his 'Te Deum,' and 'Jubilate,' the 'Water Music,' his operas 'Amadis,' 'Fesco,' and 'Il Pastor Fido,' his 'Acis and Galatea,' 'Esther,' and other minor works. While he was in England, Queen Anne awarded him a pension of £200 per annum, and when the elector became king of England, this allowance was doubled. Not many years after this, Handel having been appointed

to teach the princes royal, an additional pension of £200 was added to the former grants by Queen Caroline. The busiest, but not the most fortunate period of Handel's life had now arrived, and that which forms the most splendid era in the musical annals of Britain. It was resolved that the king's theatre should be converted into an academy of music, and Handel was engaged as manager. During his management he produced fifteen new operas, but his troubles were so great that in 1726 he retired from his managerial duties with a loss of £10,000, and a constitution much damaged by incessant labor and turmoil. He then made an attempt to give operas at Covent Garden Theatre, but was equally unsuccessful. He next commenced giving oratorios, which he continued to nearly the last day of his life, deriving considerable pecuniary advantage from them. It is an historical fact that the 'Messiah' was, during a long period, annually performed at the Foundling Hospital, and alone added £10,300 to the funds of that institution. Late in life, Handel lost his eyesight, but this affliction could not burden or obscure his fine intellect, for he continued to play concertos and voluntaries between the parts of his oratorios, in the same masterly style which had distinguished his touch in the prime of his life. He died on the 13th of April, 1759, and was buried in Westminster Abbey, where a monument by Roubilliac is erected to his memory. In 1784, a grand musical festival, the Commemoration of Handel (being the centenary of his birth), was held in Westminster Abbey, when nearly £13,000 was received for five days' performances.—In the Queen's Library are the original MSS. of nearly all Handel's works, filling 82 large folio volumes. These include 32 Italian operas, 23 oratorios, 8 volumes of anthems, 4 of cantatas, 3 of Te Deums and a Jubilate, together with concertos, sonatas, &c. Not in the royal collection are, 11 volumes consisting of operas, harpsichord lessons, fugues, organ concertos, water-music, &c. Of the oratorios, 'Esther' was first performed in 1732; 'Deborah and Athalia' in 1733; 'Acis and Galatea' in 1735; 'Ode, St. Cecilia's Day' in 1736; 'Israel in Egypt' in 1738; 'L'Allegro ed il Penseroso,' 1739; 'Saul,' 1740; 'Messiah,' 1741; 'Samson,' 1742; 'Semele,' 'Belshazzar,' and 'Susanna,' 1743; 'Hercules,' 1744; 'Choice of Hercules,' and 'Occasional Oratorio' in 1745; 'Joseph' and 'Judas Maccabæus' in 1746; 'Alexander Balus and Joshua' in 1747; 'Solomon' in 1749; 'Theodora' in 1750; 'Jephthah,' and 'Time and Truth' in 1751.—Handel was great in every style of music. In sacred music, especially of the choral kind, he not only throws at an immeasurable distance all who preceded and followed him, but reached that sublimity to which the art is so capable of attaining. In manners, Handel was impetuous yet dignified and benevolent. In person he was large and bulky, but with pleasing and regular features. [J.M.]

HANNEMAN, A., a Dutch painter, 1611–80.

HANNIBAL, one of the most illustrious generals of antiquity, was born B.C. 247, the same year in which his father Hamilcar was appointed to the command of the Carthaginian army in Spain. At the age of nine he accompanied his father to the scene of war, having, before leaving Carthage, taken a solemn oath at the altar, in presence of his father, pledging himself to eternal hostility to Rome—a

pledge to the fulfilment of which his whole future life was devoted. He was present in the battle in which his father perished, B.C. 229; and though only eighteen years old, his bravery and genius for war were already so conspicuous, that Hasdrubal, his father's successor, intrusted to him the chief command of nearly all the military enterprises which he planned. On the assassination of Hasdrubal, B.C. 221, the soldiers unanimously proclaimed him commander-in-chief, a choice which was speedily ratified by the government at Carthage. Being now invested with the entire conduct of the war, he quickly reduced to subjection the Spanish tribes which had not been conquered by Hasdrubal. In the spring of B.C. 219, he laid siege to Saguntum, a city in alliance with the Romans, though warned that an attack upon it would be held as a declaration of war, and took it after a blockade of eight months, thus setting at defiance the mighty power of Rome. Such was the commencement of the second Punic war. After passing the winter in making the necessary preparations for the invasion of Italy, he crossed the Ebro in the following spring, passed the Pyrenees with an army of 50,000 foot and 9,000 horse, and, marching through Gaul, reached the Rhone without interruption. Crossing the Rhone he ascended the left bank of that river till its confluence with the Isère, then struck off to the right, and surmounting the many and most formidable difficulties which obstructed his passage, reached the summit of the Alps, on the ninth day after leaving the plains of Dauphiné. When he reached the plains of northern Italy, his army was reduced to 20,000 infantry and 6,000 cavalry, so that his march must have cost him 33,000 men. After recruiting the strength of his troops, he entered upon a career of unexampled success. He attacked and defeated the consul P. Scipio on the banks of the Ticinus, B.C. 218, and Tib. Sempronius at the Trebia, B.C. 218, thus making himself master of the whole of northern Italy; and proceeding still southward, gained a signal victory over the consul Flaminius at the Trasimene lake, B.C. 217. The Romans now collected a fresh army, which was placed under the command of Fabius Maximus as dictator; and a defensive system of warfare was adopted till the end of the year. In the spring of B.C. 216, the Romans raised an army of nearly 90,000 men, which, led by the consuls L. Æmilius Paulus and C. Terentius Varro, advanced to Cannæ, in Apulia, where the Carthaginian army was encamped. In the battle which ensued, the Roman army was annihilated, and the consul Æmilius Paulus slain. The whole of lower Italy was thereby placed in the power of Hannibal, and the fidelity of some of the Roman allies, who had hitherto been steadfast, began to give way. But the dauntless spirit of the Romans remained unshaken, although Hannibal was not the only enemy with whom they had to contend. They now adopted strictly the defensive system, counteracted the enemy's movements in every direction, and rendered it impossible for him to prosecute extensively a system of active aggression. Hannibal, notwithstanding, maintained his army in Italy for the next twelve years, having, in B.C. 207, sustained an irreparable loss by the destruction of the army under his brother Hasdrubal, who was marching to his assistance. In B.C. 204, P. Cornelius Scipio, who had completed the conquest of Spain, passed over into Africa, and, with the assistance of Masinissa, a Numidian prince, gained two victories over the Carthaginians. The war being thus carried into the enemy's country, Hannibal was

recalled from Italy, and, landing at Leptis, advanced to Zama, a city five days' journey west from Carthage. Here he was entirely defeated by Scipio B.C. 202, and the Carthaginians were obliged to sue for peace. Here ended the second Punic war, B.C. 201. After the conclusion of the war, Hannibal applied himself to the correction of the abuses which existed in the Carthaginian government; but was interrupted in his course by an embassy sent from Rome to demand his punishment as a disturber of the public peace. Making his escape from Carthage, he fled to the court of Antiochus at Ephesus, and assisted in fixing his determination to make war against the Romans. When peace was concluded between Antiochus and the Romans, Hannibal took refuge with Prusias, king of Bithynia, with whom he remained about five years. But the Romans could not rest so long as their once formidable enemy was alive, and Prusias agreed to put him into their hands. Hannibal, finding that escape was now impossible, destroyed himself by poison at Nicomedia, in Bithynia, B.C. 183, in the sixty-fifth year of his age.

HARLES, T. CHR., a Ger. *savant*, 1738-1814.

HARLESS, — a German medical writer, d. 1853, aged 80.

HARLEY, ROBERT, earl of Oxford and Mortimer, disting. as a statesman in the reign of Queen Anne, and in conjunction with the celebrated Bolingbroke, was born 1661. He became speaker of the House of Commons in 1700, privy councillor and secretary of state 1704, chancellor 1710, and lord high treasurer, after his elevation to the peerage, from 1711 to 1715, when he received his dismissal. The principal event of his administration was the peace of Utrecht concluded 1713, and he took no share in public business after his retirement. He was a great patron

of literature, and author of some political pamphlets, but deficient in nearly all the qualities of statesmanship. From 1715 to 1717 he was confined in the Tower with an impeachment over his head, but was finally acquitted. He died in 1724. [E.R.]

HARLOW, G. H., an Eng. painter, 1787-1819.

HARMAR, JAMES, an attorney, London alderman and sheriff, well-known as the proprietor of the 'London Dispatch;' died 1853.

HARMAR, JOHN, a class. trans., 1594-1670.

HARMAR, JOSIAH, brigadier general in the American army. In 1784, he was sent from this country to France with the ratification of the definitive treaty, and in 1785, he was appointed colonel and commander of the forces on the north-western frontier. In 1790 he marched with an army of over 1,400 men against the Indians, and after several engagements, he was defeated with the loss of nearly 200 men. Died August, 1813.

HARMENOPULUS, CONSTANTINE, a German juriconsult, grand chancellor of Constantinople in the reign of John Palæologus, 1320-1383.

HARMER, THOMAS, a dissenting minister, author of 'Observations on the Scriptures,' 1715-1788.

HARMON, JOHNSON, colonel, was born in York. He was with Colonel Westbrook in the expedition to the upper falls of Androscoggin in 1723; and with Colonel Walton at Arouis in the same year. In 1724, he and Colonel Moulton attacked the Indian village of Norridgewock, and after killing father Ralle, they put the Indians to flight. Died at Harpswell.

HARO, DON LUIS DE, a Spanish statesman, the minister and favorite of Philip IV., 1598-1661.

HAROLD, the *first* of the name king of England, succeeded his father Canute the Great 1035, died 1039; the *second* of the name, son of Godwin, earl of Kent, usurped the throne 1066, and was vanquished the same year by William the Conqueror, and killed at the battle of Hastings.

HAROUN-AL-RASCHID, in English 'Aaron the Just,' a renowned caliph of Bagdad, contemporary with Charlemagne, and the empress Irene, was born in Media, 765, and succeeded his elder brother as fifth caliph of the Abasside dynasty in 786. He had already acquired immense popularity by his victories over the Greeks, and had made Irene a tributary of the caliphate. He now raised the empire of the Arabs to its highest pitch of grandeur, uniting the talents of a philosopher to those of a conqueror, and, like Charlemagne in the West, making his court the centre of arts and letters, and the refuge of men of learning from all parts of the Eastern empire. The Arabs never tire of their eulogiums upon the magnificence, generosity, and wisdom of this prince, as all the world has read in the 'Arabian Nights' Entertainments.' His reign was the Augustan era of Arabian dominion, and his imaginative subjects have celebrated it as the age of enchantment and miracle. After the death of Irene, Haroun-Al-Raschid humbled her successor, the Emperor Nicephorus, still more deeply, made immense conquests among the Turks and other tribes of Asia, and subjugated the sect of Ali in his hereditary dominions. He died in 809, leaving his vast possessions divided under his three sons, which prepared the way for endless jealousies, and produced many civil commotions in after years. Haroun not only promoted learning and the arts in his dominions, but he was himself a poet, and was easily moved to tears by the recital of poetry. Yet he was often cruel, because, like a true child of the East, he was impulsive, and severe because politic. [E.R.]

HARPALUS, a Greek astronomer, 5th cent. B.C. HARPALUS, the Greek governor of Babylon, appointed by Alexander the Great, killed 325 B.C.

HARPE, JOHN FR. DE LA. See LAHARPE.

HARPER, ROBERT GOODLOE, major general, was born of poor parents at Fredericksburg, Virginia, in 1765. He graduated at Princeton College in 1785, and immediately removed to Charleston, South Carolina, where, through the assistance of a friend, he was enabled to study law. Having removed into the interior of the country, he first distinguished himself as a political writer, and was soon elected to the state legislature, and afterwards to Congress, where he joined the federal party and became one of Washington's staunchest supporters. In 1797, he published a pamphlet, entitled, 'Observations on the dispute between the United States and France.' In 1801, on the accession of Mr. Jefferson, he resigned his seat in Congress, and resumed the practice of law at Baltimore. In his speeches in the defence of Judge Chase, he displayed great eloquence. When the federal party regained the ascendancy, in Maryland, he was elected senator from that State. Died January 15, 1825, aged 60.

HARPHIUS, H., a Flemish mystic, died 1478.

HARPSFELD, JOHN, an English prelate and religious wr., died 1578. His brother, NICHOLAS, a Greek scholar and ecclesiast. historian, d. 1533.

HARRIMAN, J., an Engl. botanist, 1760-1831.

HARRINGTON, H., a phy. and poet, 1729-1816.

HARRINGTON, JAMES, a political writer, was born in 1611, in Northampton. He was the author of a political work, entitled 'Oceana,' which was considered his principal production. In 1661, he was arrested on a charge of treason, and committed to the Tower, but afterward released. Died 1677.

HARRINGTON, J., a lawyer and scholar, author of the life of Dr. Stradling, 1664-1693.

HARRINGTON, SIR J., an English poet, author of 'Epigrams and Letters,' 1561-1612.

HARRINGTON, JOHN, Lord, guardian of Elizabeth, daughter of James I., and the friend and correspondent of Henry, prince of Wales, 1591-1613.

HARRIOT, TH., an astronomer, 1560-1621.

HARRIS, G., a philological writer, died 1796.

HARRIS, GENERAL LORD GEORGE, a British officer, dist. in the Amer. war and India, 1759-1829.

HARRIS, J., a Gr. scholar and philos., known as a writer on art and the philosophy of language, 1709-1780. His son, of the same name, first earl of Malmesbury, a diplomat. and hist. wr., 1746-1820.

HARRIS, JOHN, a divine and mathematician, well known as the first projector and editor of a cyclopædia or dictionary of the sciences, died 1719.

HARRIS, SAMUEL, a baptist minister, called the apostle of Virginia, was born in Hanover County, January 12, 1724. He was baptized in 1758, and immediately commenced preaching, but was not ordained until 1769. Having removed to Pittsylvania County, he was appointed colonel of the militia, captain of Mayo fort, and commissioner for the fort and army.

HARRIS, THADDEUS MASON, an Am. congregational divine of Mass., author of 'Natural History of the Bible,' 'Memorials of Oglethorpe, founder of Georgia,' &c. Died, 1842, aged 73.

HARRIS, TUCKER, M.D., a physician of Charleston, South Carolina, and served in that capacity in the revolutionary war, was born in that city in 1747, and graduated at the University of Edinburgh. Died July 6, 1821, aged 73.

HARRIS, WALTER, a medical writer, born 1647,

HARRIS, W., author of sermons, died 1740.

HARRIS, W., a biographical writer, died 1770.

HARRISON, BENJAMIN, was born in Virginia, died 1818, aged 44. He was remarkable for his height, being over seven feet.

HARRISON, BENJAMIN, governor of Virginia from 1782 to 1784, graduated at the college of William and Mary. He was one of the signers of the declaration of independence. In 1764, he became a member of the legislature, and from 1774 to 1777 he was a delegate to Congress. He was also a member of the convention for adopting the constitution of the United States. Died April, 1791.

HARRISON, J., inventor of the sea chronometer, for which he received a government premium of £20,000, 1693-1776.

HARRISON, JOHN, a general of the parliamentary army executed after the restoration, 1670.

HARRISON, ROBERT HANSON, governor of Maryland, and chief justice of the general court of the state, in which offices he displayed great talents. In 1789, he declined the appointment of judge of the supreme court of the United States. Died April 2, 1790, aged 45.

HARRISON, T., a dist. architect, 1744-1829.

[President Harrison.]

HARRISON, WILLIAM HENRY, president of the United States of America, was born in Virginia in 1773. He was educated at Hampden Sydney College, and then studied medicine, but afterward joined the army as an ensign in the artillery. In 1811, he marched with a militia force against the Indians under Tecumseh on the North-western frontiers. In this expedition he was eminently successful, and was deputed by Mr. Madison to open a negotiation with the enemy. In 1828 he was sent as minister to Colombia; and in 1840, he was elected president of the United States, which office he held only one month. Died April 4, 1841.

HART, G. V., a British officer, 1752-1832.

HART, JOHN, a patriot of the revolution, and one of the signers of the declaration of independence for N. Jersey. In 1774, he was sent to Congress.

HART, LEVI, D.D., minister of Preston, Connecticut, was graduated at Yale College in 1760. Having studied theology, he was settled in the ministry of the second church in Preston 1762. Died October, 27, 1808.

HART, WILLIAM, minister of Saybrook, Connecticut. After graduating at Yale College, in 1732, he was ordained in 1736. He was opposed to certain doctrines, which he termed Hopkintonian, after Dr. Hopkins who replied to his argument.

HARTE, WALTER, a poet and essayist, author of a history of Gustavus Adolphus, died 1773.

HARTLEY, DAVID, an English metaphysician of some note; born 1705 at Armley in Yorkshire; died in Bath 1757. Hartley's well-known, or rather, much-heard-of, work, entitled 'Observations on Man, his Frame, his Duty, and his Expectations,' occupies 3 volumes 8vo. It consists of three distinct parts. Adopting the sensational theory of the origin of human knowledge to its fullest extent—resolving Mr. Locke's 'Reflection' into a modification of sensation,—he endeavors first to explain all sensations and ideas, by material agency, viz., hypothetical vibrations of a hypothetical fluid, connected with the nervous system. It is not improbable that Hartley esteemed this theory of vibrations his most important speculation: happily for the permanence of his repute he contributed to Psychology something much more valuable than one of those countless fancies, bubbling up in every age, but which attain no place in the History of Science. It is probably indisputable that since Aristotle's time the Law of Association, and its sway over the succession of mental phenomena, had not been so thoroughly studied or fully exposed as in the second division of Hartley's treatise. Hobbes and Locke had done little more than assert this great Law; but Hartley unfolded it with a clearness which left little to be desired. The last portion of the 'Observations' is occupied with discourses on human duty and virtue, on our relation to God, and hopes of a future life. Carried out logically, the materialistic views of the writer, on the fundamental problem as to the origin of Ideas, can never fail to issue in a scheme of simple negations on all these momentous theories; fortunately, however, Hartley's 'instincts' prevailed over his logic, and he has bequeathed much that is excellent and true. It cannot be denied however, that his book as a whole is rather a set of dissertations, than a compact treatise: its scientific value being confined to its illustration of the Law already referred to.—Hartley's life and character were beyond reproach. He was cheerful, placid, and actively benevolent. The Heart is often a trusty safeguard of the head, amid the perils of Speculation. [J.P.N.]

HARTLEY, DAVID, son of the celebrated philosopher, distinguished as a practical man of science, 1729-1813.

HARTLEY, THOMAS, rector of Winwick in Northamptonshire, known as a pious and learned divine, author of 'A Discourse on the Kinds of Enthusiasm and Religious Experiences,' 'An Account of the Mystic Writers,' 'Paradise Regained,' 'Sermons,' &c. In the latter part of his life he became the personal friend of Swedenborg, and the first translator of many of his works, 1707-1784.

HARTSOEKER, NICHOLAS, a Dutch physician and experimental philosopher, 1656-1725.

HARTUNGUS, JOHN, a Ger. translator, d. 1579.

HARTZHEIM, JOSEPH, a German *savant*, 1694-1763.

HARVARD, JOHN, the founder of Harvard College, was a native of England, where he had been a minister. On his arrival in America, he preached for a short time in Charlestown, and soon after died in 1638. He bequeathed nearly £800 to the school at Newton, or Cambridge, and in the following year the general court constituted it a college. A monu-

ment was erected to his memory September 26, 1828, about 190 years after his death, on the summit of the burial ground in Charlestown. Died 1688.

HARVEST, G., author of sermons, died 1776.

HARVEY, SIR ELIAB, a British admiral, descended from the illustrious William Harvey, died 1830.

HARVEY, GABRIEL, a lawyer and poet, about 1545–1630. His brothers, JOHN and RICHARD, known as writers on judicial astrology, &c.

HARVEY, GIDEON, a physician, died 1700.

HARVEY, WILLIAM, M.D., the discoverer of the circulation of the blood, was born at Folkestone, Kent, A.D. 1578, and died in London, A.D., 1657, aged seventy-nine years.—This remarkable man, whose name is indissolubly associated with one of the most important discoveries ever made in physiological science, was educated first at the grammar school of Canterbury, and subsequently at Caius College, Cambridge, where he spent five years. He afterwards travelled through Germany and France, and proceeding thence to Italy, he fixed himself at Padua, the medical school of which city had at that time a high reputation, and there he became the pupil of Fabricius ab Aquapendente, the most distinguished anatomist of his age, from whom he acquired a knowledge of the valvular structure of the veins, which laid the foundation of his future fame. In 1602 he returned to England, and began to practise as a physician in London; and in 1615 he was appointed professor of anatomy and surgery to the Royal College of Physicians. There can be no doubt that his particular opinions on the mechanism of the circulation were formed long before, but they were first publicly announced from the chair of the college to which he was now attached in the year 1616. We cannot enter into anatomical and physiological details in this place, and it must suffice to say, that Harvey for the first time demonstrated the double function of the heart in sending out blood from the left side, through the arteries, over the whole body, and in receiving it back by the veins to the right side, whence it is propelled into the lungs, where it loses its impurities, and is again rendered fit for use. This elementary truth, which is so familiar to us, was new in those days, and as it was opposed to the prevailing ideas upon the subject, it was regarded by his contemporaries as an audacious novelty; and for upwards of twenty years the propounder of this doctrine was assailed by every species

of detraction and calumny. He had the good fortune, however, to survive these attacks, and to see his views universally adopted before his death; nor would it be easier to find a better instance of the application of the principles of the inductive philosophy to the investigation of natural phenomena, than that supplied by the use which Harvey made of his knowledge of the internal structure of the veins, which, even in the hands of his master Fabricius had been wholly unproductive. The veins have a feeble and imperceptible contractile power, if they have any at all, and Harvey at once saw that the valves were placed in these vessels to prevent the reflux of the blood in its progress back to the heart, and out of this conclusion mainly arose the discovery of the true theory of the circulation, with all its important consequences. Of this there can be no doubt, for there still exists in the museum of the College of Physicians six tabular views, as large as life, showing this peculiar structure of the veins, which were executed by him or to his order, and which were presented to that learned body by his collateral descendant, the earl of Winchelsea.—His right to the merit of this great discovery is incontestable, yet there have been those in modern times who have disputed it, and who have asserted that he was anticipated in his conclusions by several of the anatomists of the ancient world, and by some of his more immediate predecessors. The passages collected from the writings of antiquity by the diligence of such authors as Dutens, go for nothing in an inquiry into the existence of a great physical fact, and touch Harvey's claims to the smallest possible extent; but one name deserves to be mentioned in connection with this subject, to wit, that of the celebrated and unfortunate Michael Servetus, the Spanish physician, whom Calvin and his consistory burnt for heresy at Geneva. In the year 1553, a quarter of a century before Harvey was born, Servetus published a theological treatise, in which some singular passages occur on the functions of the heart and lungs, which, though vague, would seem to indicate that he had an obscure idea of the pulmonic circulation and its uses; but such loose speculations as Servetus indulged in cannot for a moment be compared to the severe methods and rigid deductions of Harvey, who took nothing for granted that could be experimentally proved. One of his rules was, that 'Nature herself is the most faithful interpreter of her own secrets,' (*De Generatione Animalium*). He consulted her oracles and discovered the truth.—Harvey was physician successively to James I. and to his son, Charles I. In the train of the latter he visited Scotland in 1633, and he has left an account of an excursion which he made on that occasion to the Bass Rock, in the Frith of Forth; and having adhered to the fortunes of his patron, he was present, though not as a combatant, but as the guardian of the two young princes, Charles and James, at the battle of Edgehill, in 1642. During the fight he employed himself by reading a book under a hedge, but a large cannon ball grazing the ground close to him while he was so occupied, he removed with his charge to a distance from the scene of action. In 1651 his residence at Whitehall was plundered, and his manuscripts destroyed, a loss which he ever after deplored, as they contained the results of the experiments of a life. His works are not numerous, but they are valuable; and his treatise on the Generation of Animals is still a standard book. He died worth £20,000, which he bequeathed to his brother, Mr. Eliab Harvey, with the exception

of a yearly sum of £56 for the annual delivery of an oration at the College of Physicians, which is still known as the Harveian oration. He was diminutive in stature, with a small, round, but expressive black eye. His temper was naturally choleric, and was rendered perhaps more so by severe attacks of the gout; and in his philosophical sentiments he is believed to have inclined to the opinions of his friend Hobbes, to whom he left a legacy of £10. There is a tradition that he destroyed himself by an over-dose of opium, to avoid the pain of a fit of his habitual malady; but this story is now discredited, as it has been ascertained that he died of a slight shock of paralysis, which his aged and feeble frame could not withstand. HASTED, EDW., historian of Kent, 1732-1812.

HASTING, a Danish adventurer, died 890.

HASTINGS, LADY ELIZA., daughter of the earl of Huntingdon, founder of schools, &c., 1682-1739.

HASTINGS, FRANCIS RAWDON, son of the earl of Moira, born 1754, distinguished as a British officer in the American war, in Holland, and the East Indies, and governor-general of India from 1812 to 1822, governor of Malta 1824, died marquis of Hastings 1826.

HASTINGS, WARREN, was born in 1733. He was the son of obscure parents, but he claimed an ancient and renowned descent, and from his early childhood it was his ambition to win back the domains of his ancestors. He was educated at Westminster School, and in 1750 was appointed a writer in the service of the East India Company. In the emergency through which the ability and valor of Clive saved the British possessions, his capacity was seen while the obscure clerk carried a musket as a volunteer, and he was chosen diplomatic agent at the Durbar. After having remained fourteen years in India he returned to Britain, still comparatively obscure; but his talents were remembered, and after being named second in council in Madras, he was, in 1774, appointed to the newly-created dignity of governor-general of Bengal. The bold measures which he took to defend the British interests from Hyder Ally is one of the great epochs in the history of the British Eastern Empire. By its audacious and somewhat unscrupulous character, his career

startled and alarmed British statesmen on the morality of the policy which guided the British system in the Eastern Peninsula, and he was recalled to meet the celebrated impeachment moved by Burke on 4th April, 1786. The trial was begun on 13th February, 1788, when, according to Mr. Macaulay, 'The high court of Parliament was to sit according to forms handed down from the days of the Plantagenets, on an Englishman accused of exercising tyranny over the lord of the holy city of Benares, and the ladies of the princely house of Oude.' Political events turned public attention into other channels during the impeachment, and when it had been almost forgotten, it ended in an acquittal in April, 1795. He spent his old age in retirement; the injury which his fortune received by the expense of his defence being but partially remedied by the gratitude of the East India Company. He had a taste for letters, and wrote some secondary works now forgotten. He died on 22d August, 1818. [J.H.B.]

HAUY, RENE JUST, a celebrated mineralogist, was born at Saint Just in 1743. He died in 1822. —Sprung from poor parents who were not able to give him an education, his excellent behavior while a child, attracted the notice of some benevolent individuals in his native town, who induced his mother to take him to Paris. After some little time his kind friends obtained him a bursary at the College of Navarre. When he had completed his education there he became a teacher in the establishment, and continued in that humble capacity for several years. Affection for a friend induced him to study botany; and accident led him to the lecture-room of M. Daubenton, at that time professor of mineralogy. He was charmed with the lecture, and found the study of minerals more suited to his taste than that of plants. He was now thirty-eight years of age. For some time his mind had been occupied with ideas relative to the contrast between the forms

of the vegetable and mineral kingdoms, when one day examining a fine specimen of calcareous spar crystallized in prisms, he accidentally let it fall. Upon examining one of the broken prisms, he found that the fracture showed as smooth a face as the original, but that the form of the crystal was changed into that of a rhomb. He repeated the experiment upon many other minerals, and always found the same result; the component parts of each mineral were found to have the same geometrical figure, and a nucleus always similar to itself; while the variety of external forms which the masses assume arose from the manner in which the smaller crystals composing it are arranged. Continuing his researches and experiments, he soon succeeded in establishing the true law of crystallization. This he has explained at full length in his 'Traité de Mineralogie,' a work which has procured for him an immense reputation. In 1792 M. Haüy was imprisoned along with many other ecclesiastics. By the assistance of his pupil Geoffroy St. Hilaire, he was, however, soon after released, and remained for the future untouched and unmolested. In 1802 he was elected professor of mineralogy at the Garden of Plants. Napoleon treated him with much respect; made him a canon of Notre Dame, and an officer of the Legion of Honor; but at the restoration he was treated with cruel neglect by the government, and died in comparative poverty. HAWES, WILLIAM, a physician of London, founder of the Humane Society, and author of miscellaneous writings, 1736-1808.

HAWKE, EDWARD, Vice-Admiral Lord, celebrated for his victories over the French in the middle of last century, died 1781.

HAWKER, COL. PETER, an English writer on field sports. Died 1853, age 67.

HAWKER, DR. ROBERT, a well-known evangelical div., au. of 'Commentaries,' &c., 1753-1827.

HAWKESWORTH, JOHN, L.L.D., an essayist and miscellaneous writer of the age of Johnson, editor of 'The Adventurer,' 1715-1773.

HAWKINS, BENJAMIN, Colonel. He was an agent for the transaction of Indian affairs, and made himself very useful. He wrote a narrative of the Creeks, which was published in 1801. Died 1816.

HAWKINS, SIR JOHN, a London magistrate, known as a miscellaneous writer, 1719-1789.

HAWKINS, SIR JOHN, a British admiral, distinguished against the Spaniards in the reign of Elizabeth, the first to begin the slave trade, 1520-1595. His son, SIR RICHARD, a naval commander and writer, 1582-1622.

HAWKINS, JOHN, an Indian chief, Sagamore of Pennacook, was named Hancamagus, but called by the English, Hawkins or Hagkins. He murdered Major Waldron and his family.

HAWKSMOOR, NICHOLAS, the pupil and successor of Sir Christopher Wren, as surveyor and architect of the new churches in London, 1666-1736.

HAWKWOOD, SIR JOHN, an English general, distinguished in the wars of Edward III., d. 1393.

HAWLES, JOHN, a writer on law, 1645-1716.

HAWLEY, GIDEON, a missionary to the Indians for several years, having commenced his labors in 1752. He was born in Connecticut, and graduated at Yale College in 1749. When the commissioners for Indian affairs in Boston determined on establishing a mission in the country of the six nations, Mr. Hawley, accompanied by Timothy Woodbridge, a gentleman of much influence among the Indians, proceeded to Onohoghwage or Onghguanaga upon the Susquehanna river, where he was well received by the Indians. In the following year he was ordained at Boston, and returned to his mission, where he remained until 1756, when the French war compelled him to leave. In 1758 he entered on a mission to the Indians at Marshpee where he remained during the remainder of his life. Died October 3, 1807, aged 80 years.

HAWLEY, JOSEPH, an eminent statesman and patriot, was a native of Northampton, Massachusetts, and was graduated at Yale College in 1742. Having studied law, he became distinguished in his profession. He was one of the most strenuous supporters of American liberty during the disputes between Great Britain and this country. Died March 10, 1788, aged 64.

HAWORTH, A. H., an Eng. naturalist, d. 1833.

HAXO, F. B., Baron, a Fr. officer, 1774-1838.

HAY, JAMES, the first Scotchman raised to the English Peerage, created by James I., Lord Hay, Viscount Doncaster, and Earl Carlisle, died 1636.

HAY, WILLIAM, an English essayist, d. 1755.

HAY, GEORGE, judge of the United States court for the eastern district of Virginia, also a distinguished legislator. He was for several years United States attorney. Died 1830.

HAYDN, FRANCIS JOSEPH, was born at Rohrau, a small town about fifteen leagues from Vienna, in March, 1732, of very humble parents, his father being a wheelwright and parish sexton, and his mother, before her marriage, having been cook at the chateau of a neighboring nobleman. Haydn seems to have inherited a taste for music from his father, who had a fine tenor voice, and had made some progress as a performer upon the organ, and could accompany himself and his wife upon the harp. While yet quite a child he showed great predilection for music, and a cousin of his father who was schoolmaster at Heimburch, taught him to perform upon the violin and sing with taste. This relation also taught him Latin, which qualified him to sing in the choir of St. Stephen's at Vienna, and where he soon attracted the attention of Reuter the chapel master. Haydn pursued his musical studies with great earnestness, and under circumstances of great privation. Such was his industry, however, that while he was under Reuter, no single day passed without his

having devoted sixteen and sometimes eighteen hours to his music lessons. Having commenced to study composition, he at thirteen years old, began to write a mass. He gained his livelihood from singing till the age of seventeen, when his soprano voice left him. After this period, being unable to pay for lessons in counterpoint and harmony, he procured an old work on the art, and in spite of the pedantic rules of the old book he had to study from, he soon became well informed in the science of music. About this time he became acquainted with Porpora and Metastasio, with whom he spent some of his time very agreeably, but nothing of importance occurred in his life up to the year 1771, with the exception of an unhappy marriage, which he contracted with Anne Keller, a prudish damsel, who, in addition to a tiresome parade of virtue, had, as his biographer informs us, 'a mania for priests and monks.' In the year named above, he was appointed chapel master to Prince Esterhazy, which appointment put an end for ever to his pecuniary embarrassments. In the service of this prince in the palace at Eisenstadt, Haydn produced many of his great works, and under advantages which few composers ever possessed—he had a full and excellent band, living under the same roof with him, at his command every hour of the day. Thus passed the life of Haydn till the year 1791, when he arrived in England to fulfil an engagement with M. Salomons, who was then giving concerts in the Hanover Square Rooms. During this engagement he produced six of his 'Twelve Grand Symphonies,' and also published many canzonets, quartetts, sonatas, &c. In 1794, he again visited London under an engagement to Gallini, then manager of the King's theatre, Haymarket, and at which period he produced the remaining six of his 'Grand Symphonies.' While in London, the greatness of his genius, and the amiability of his manners, brought him many friends, and rendered his success quite triumphant. At the close of this engagement Haydn returned to Vienna, and never afterwards left it. In 1795, Haydn commenced the composition of his 'Creation,' and was two whole years employed upon it. On one occasion, when asked why the Oratorio was not finished, Haydn answered with the utmost tranquillity 'I am long about it, because I wish it to last long.' This wish was a prophecy, his 'Creation' will last for ever. The 'Creation' was brought out in 1798, and two years afterwards he gave to the world his 'Seasons.' The last great work upon which this genius exerted himself, was two sets of quartetts. In his latter years he employed himself in setting accompaniments to some Scotch airs for the late Mr. George Thomson of Edinburgh. In 1805, he, by the advice of his physician, gave up all study, and from this time he never left his villa at Gumpendorff. The closing scene of this great composer's life was not less remarkable than his career was illustrious. The last time he appeared in public was at the performance of the 'Creation,' which was honored by the presence of more than 1,500 people, amongst whom were many of the nobles and princes of Austria. 'Surrounded by the nobility of Vienna and his friends, by artists, by lovely women, whose eyes were fixed upon him, listening to the praises of God, which he himself had imagined, Haydn bid a glorious adieu to the world.' Soon after this, war broke out between France and Austria; this intelligence vexed him and exhausted the last remains of his strength. 'The French armies advanced rapidly, and on the 10th of May, 1809, having reached Schonbrunn about half a league distant from Haydn's villa, they fired next morning

hundreds of cannon shot upon Vienna, that city so much beloved by him. Four bombs having fallen close to his house, his two servants, with terror depicted in their countenances, ran to him; the old man, by an effort, rose from his arm-chair, and with a dignified air, cried, 'Why such alarm! know that, where Haydn is, no evil can happen.' But this exertion was beyond his strength; a convulsive shivering prevented him adding more, and he was immediately conveyed to bed. On the 26th of May, he was almost completely exhausted; notwithstanding, he had his piano moved towards him, and sung three times with a voice as loud as he could, 'God save the Emperor.' These were his last words. At his piano he became insensible, and he expired on the morning of the 31st. Haydn was very religious. The commencement of all his scores are inscribed with one of the following mottoes, '*In Nomine Domini*,' or '*Soli Deo Gloria*,' and at the end of them all '*Laus Deo*.' His works are exceedingly numerous in all classes. Among them are 116 symphonies, 83 violin quartetts, 60 pianoforte sonatas, 15 masses, 4 oratorios, a grand 'Te Deum,' a 'Stabat Mater,' 14 Italian and German operas, 42 duets and canzonets, and 20 divertimentos for particular instruments. HAYDON, BENJAMIN ROBERT, was born at Plymouth, 23d January, 1786; his father was a bookseller, and he was educated in early youth at Plympton Grammar School, where Sir Joshua Reynolds had been brought up. Haydon determined upon becoming a painter, contrary to the wishes of his parents. His father, however, assisted him for several years in the metropolis; he visited London in 1804, and became a pupil of the Royal Academy in 1805. He had the advantage of the acquaintance of Northcote, Opie, and Fuseli, as advisers, and of Jackson and Wilkie as fellow-pupils. His ambitious views of art were early developed: in 1807 he exhibited a picture of the 'Flight into Egypt,' purchased by Mr. Hope, which procured him a commission from Lord Mulgrave for 'Dentatus,' a picture which, from the dissatisfaction he felt of its being placed in the ante-room in the Royal Academy Exhibition of 1809, appears to have been the first cause of most of his subsequent trouble, for not imagining that others might not think so highly of the picture as he did himself, he made the supposed injustice a cause of quarrel with the Academy, and the notion of injustice, or rather owing to his inordinate vanity, a conspiracy to suppress him, developed itself into a monomania, and possessed his mind the whole of his life. Dentatus has been admirably engraved in wood by his pupil Harvey.—The encouragement, however, which Haydon got from Lord Mulgrave, both social and professional, gave a great impulse to his exertions, and Dentatus was succeeded by a considerable series of great works.—He now, to make up some deficiencies of execution, devoted himself for half a year to the practice of portrait painting at Plymouth, and after his return to London he became an enthusiastic student of the Elgin Marbles, then recently brought from Greece; the excellence of which he professes to have been the first to point out to the British public, rather naively overlooking the claims of Lord Elgin himself, who had spent £52,000 in securing them and bringing them to England.—The following are Haydon's principal works in the order of their production:—In 1812 'Macbeth,' for Sir George Beaumont; in 1814 the 'Judgment of Solomon,' for which he was voted the freedom of his native town, and in this year he visited Paris; in 1820 'Christ's Entry into Jerusa-

lem,' (now in America), which produced him nearly £3,000 by its exhibition alone, in London, Edinburgh, and Glasgow; in 1821 'Christ's Agony in the Garden,' (in this year he was married); in 1823 'The Raising of Lazarus' (now at the Pantheon), in this year he was arrested for debt, and passed through the Insolvent Court; in 1826 'Pharaoh Dismissing the Israelites,' and 'Venus and Anchises,' in 1827 'Alexander and Bucephalus,' for Lord Egremont, and 'Eucles,' in 1828 'The Mock Election in the King's Bench,' purchased by George IV.; in 1830 'Napoleon at St. Helena,' for Sir Robert Peel, a picture he afterwards repeated in small nearly thirty times; in 1832 'Xenophon's First sight of the Sea,' in the retreat with the 10,000; in 1834 'The Reform Banquet,' for Lord Grey, 'Cassandra,' and 'Waiting for the Times,' in 1835 'Achilles at the Court of Lycomedes Discovering his Sex,' in 1836 'Samson and Delilah' (this year he passed a second time through the Insolvent Court); in 1838 'Christ Blessing Little Children,' for Liverpool; in 1839 'The Duke at Waterloo,' also for Liverpool; in 1840 he lectured (gratis) at the Ashmolean Museum, Oxford, and henceforth his time was divided between lecturing and painting; he found the former the more profitable pursuit, his lectures are published: in 1841 'The Anti-Slavery Convention,' and 'The Maid of Saragossa,' in 1842 'Curtius Leaping into the Gulf,' in 1843 the cartoon of the 'Entry of the Black Prince in London,' with King John of France prisoner; this was in competition for Westminster Hall, in which Haydon failed, a failure which some of his friends supposed to have been fatal to him; in 1844 'Alexander Killing the Lion,' and a large repetition of 'Napoleon at St. Helena,' which was purchased by the king of Hanover; in 1845 'Uriel and Satan,' and lastly, in 1846 the 'Banishment of Aristides,' and 'Nero Watching the Burning of Rome,' representing the evils both of democracy and of despotism: these last were two of a series of six which he had designed years ago, for the illustration of the old House of Lords.—These pictures Haydon exhibited as usual, but he was unusually unsuccessful with them. He had often lost by his exhibitions, but sometimes had gained large sums, as in the case of 'Christ's Entry into Jerusalem,' in this last exhibition he lost £111 11s. 5d., and this loss at a time when he was penniless, added to his deep disappointment at not being employed in the decoration of the Houses, at last overcame his all but indomitable energy, and he destroyed himself on the 22d of June of this year, 1846. One of the latest entries in his diary is:—'Tom Thumb had 12,000 people last week, B. R. Haydon, 133½ (the ½ a little girl). Exquisite taste of the English people.'—It may be supposed by some that Haydon was a martyr to his love of what is termed *High Art*: the facts of his life show any thing but this. He began his career with almost unexampled encouragement, and appears even at all times to have found friends, who gave and lent him considerable sums of money, from £50 to £1,000, and his professional receipts were by no means small; from the years 1831 to 1836 inclusive, he received from this source alone £4,617 2s. 3d., an average of £750 per annum; yet he was always in difficulties sufficient to have harassed most men to death in as many months as Haydon endured them years: his debts amounted to about £3,000 at his death. The cause of common justice renders these details imperative, both from the extraordinary circumstances of Haydon's death, and his habitual accusations against the Academy for its jealous tyranny, and the people for their hope-

less want of taste. Haydon had no other enemy than himself; he appears to have been wholly wanting in common sense; his ambition was so excessive that it destroyed his judgment, and his extraordinary energy wanted that counterbalancing ability to insure a real artistic success: he was impulsive and desultory, mistook the will for the deed, and neglected the commonest elements of excellence in execution; he was extremely mannered, with the exception of a large style of design (indicated, not executed), and a warm and powerful coloring, we miss every other requisite of a fine picture: yet such was his extraordinary vanity, that he identified the fate of the art of his country with that of his own efforts, and assumed all progress to have proceeded from himself, while perhaps no individual artist ever had less influence on the taste of his time, or even that of his own pupils, who do not retain a single trace of his style; indeed, Sir Charles Eastlake, Sir Edwin Landseer, and Lance, the fruit painter, Haydon's principal scholars, illustrate three as opposed paths, as the whole province of painting could possibly display.—See *Memoirs of B. R. Haydon from his Journals*. Longman, 1853. [R.N.W.]

HAYER, J. N. H., a Fr. relig. writer, 1718–80.

HAYES, H. C., an Eng. mathematic., 1678–1760.

HAYES, W., a musical composer, 1708–1777.

HAYGARTH, J., a medical author, d. 1813.

HAYLEY, WILLIAM, an English poet, was born in Chichester in 1745. He received his education at Trinity College, Cambridge, and afterward applied himself principally to literary pursuits. Died 1820.

HAYM, N. F., an Ital. numismatist, 1670–1730.

HAYMAN, F., an English painter, 1708–1776.

HAYMO, a German commentator, died 853.

HAYNAU, JULES DE, an Austrian general, noted for his cruelty to the Hungarians in 1849, 1786–1853.

HAYNE, F. G., a German botanist, 1763–1832.

HAYNE, ISAAC, a native of South Carolina, was a senator of the legislature. He held the rank of captain of artillery in the Revolutionary War, but resigned his commission and served as a private soldier at the siege of Charleston, where he was taken prisoner at the surrender of that place in 1780. He subscribed a declaration of allegiance to the King of Great Britain, on conditions that he might not be obliged to take arms against his country. In 1781, in violation of this agreement, he was ordered to join the British standard, which command he refused to obey, and immediately repaired to the American camp. He was shortly after taken prisoner, and ordered by Lord Rawdon to be hanged, which sentence was carried into execution, August 4, 1781.

HAYNE, ROBERT Y., a distinguished American lawyer and statesman, was born near Charleston, November 10, 1791. His early education was limited, but he made up for its deficiencies, by his subsequent self-directed efforts, and succeeded in being admitted to the bar at the age of 21. He soon rose to the highest distinction as a lawyer, and on entering political life rapidly reached the chief office of the State. From 1822 to 1832 he was senator of the United States, and in 1830 had his celebrated conflict with Daniel Webster, when he eloquently defended Southern principles of policy. Died 1839, aged 48.

HAYNE, TH., a learned divine, 16th century.

HAYNES, JOHN, governor of Massachusetts, and afterward of Connecticut, was born in Essex, England, and accompanied Mr. Hooker to America in

1633. In 1635 he was appointed governor, and in the following year he removed to Connecticut, and was one of the founders of that colony. In 1639 he was chosen governor, and every alternate year after until his death in 1654. He applied both his talents and property to the benefit of this colony.

HAYTON, the *first* of the name, k. of Armenia, 1224-1268; the *second*, 1289-1308.

HAYTON, an Armenian historian, died 1310.

HAYWARD, SIR J., an Eng. historian, died 1627.

HAYWARD, LEMUEL, M.D., an eminent physician of Boston, was a native of Braintree, and educated at Harvard College, in 1768. In 1775 he obtained the appointment of surgeon in the general hospital of the army. In 1783 he removed to Boston. Died 1821, aged 72.

HAYWOOD, ELIZABETH, a miscellaneous writer, author of 'The Female Spectator,' &c., 1693-1756.

HAYWOOD, HENRY, minister to the Socinian Baptists in Charleston, South Carolina, was a native of England, and emigrated to America in 1739. Died in 1755.

HAZAEEL, a king of Syria, 9th century B.C.

HAZARD, EBENEZER, postmaster-general of the United States, in succession to Mr. Bache, from 1782 until the adoption of the constitution in 1789. He published a work entitled 'Historical Collections,' 1792-1794, having reference to American history. Died 1817.

HAZLITT, WILLIAM, a well-known essayist and critic of art and poetry, was the son of a Unitarian minister, and was born at Maidstone, 1778. He was in early life an artist, but not satisfied with his attainments in this profession, he came to London, and commenced the career of an author in 1803, from which time till his death in 1830, he was constantly before the public as a journalist and miscellaneous writer. His largest work is the 'Life of Napoleon,' in 4 vols., but he is most esteemed for the philosophical spirit of his criticisms. His literary remains, with a biographical memoir, were published by his son shortly after his death.

HEADLEY, H., an English poet, 1766-1788.

HEAPY, T., a water-color painter, 1775-1835.

HEARNE, S., an English navigator, 1735-92.

HEARNE, T., an Eng. antiquarian, 1680-1735.

HEARNE, T., an archit. engraver, 1744-1817.

HEATH, BENJ., a learned writer, last century.

HEATH, JAMES, an historical writer, 1629-64.

HEATH, JAMES, a distinguished engraver, 1756-1834. His son, CHARLES, also an eminent engraver, 1784-1848.

HEATH, NICHOLAS, archbishop of York and chancellor of England in the reign of Queen Mary. Died 1560.

HEATH, UPTON S., an American judge of the U. S. District Court of Maryland. Died 1852.

HEATH, WILLIAM, a major-general in the American army during the Revolutionary War, was born at Roxbury, Massachusetts, in 1735, and bred to the business of a farmer. In 1776 he was appointed major-general, and in the following year commanded the eastern department near Boston. In 1779 he got the command of the troops on the Hudson, where he remained until the termination of the war. In 1793 he was made judge of probate for the county of Norfolk. Died 1814.

HEATHCOTE, RALPH, a miscellaneous writer, and a clergyman of the Church of England, known as the projector of the 'General Biographical Dictionary.' Died 1795.

HEBEL, J. P., a German poet, 1760-1818.

HEBER, or EBER, a patriarch of Syria, from

whom it is supposed the Hebrews derive their name (Genesis x. 24.)

[Heber's Parish Church.]

HEBER, REGINALD, a learned clergyman of the Church of England, 1728-1804. His son, of the same name, the well-known bishop of Calcutta, distinguished as a poet and essayist, 1783-1826. RICHARD, half-brother of Bishop Heber, known as a learned editor, 1773-1833.

HEBERDEN, WILLIAM, M.D., F.R.S., a learned and distinguished English physician, was born at London 1710. After the usual preliminary education at the Grammar School of St. Saviour, which he entered at the early age of seven, and where he remained till 1724, he was transferred to St. John's College, Cambridge. Here he graduated as B.A. in 1728, and as A.M. in 1732; and having resolved to follow medicine as a profession, he obtained his degree as M.D. in that university in 1739. He practised as a physician at Cambridge, giving lectures on *materia medica* at the same time in the university till the year 1746, when he removed to London, where he speedily attained to great eminence, and where he continued to reside ever afterwards. He died in Pall Mall, on the 17th of May, 1801, in the ninety-first year of his age. Dr. Heberden was one of the best classical scholars of his time, and one of the most perfectly instructed medical men England has ever possessed. It was to a suggestion of his that the 'Medical Transactions' owe their origin, and he contributed to the first three volumes of that valuable publication many important papers; he is best known, however, by his 'Commentaries on the History and Cure of Disease,' a posthumous work, published by his son in 1802. [J.M'C.]

HEBERT, a French writer, 13th century.

HEBERT, JAMES RENE, one of the Jacobin leaders of the French revolution, commonly called 'Père Duchesne,' from the name of his journal, was born at Alençon towards 1755, and executed with his accomplices Chaumette, Anacharsis Cloots, and others, on the 24th of March, 1794. He was the most brutal journalist of the period, and played a leading part in every conspiracy against the establishment of law and order, and in the detestable massacres of September, 1792. On the 10th of August preceding he had been installed among the magistrates of the people at the Hotel de Ville, and from this period he labored to exalt the municipal authority

above that of the convention. The Girondins were sacrificed in the struggle which ensued, but Robespierre and the Committee of Public Safety only awaited a proper opportunity, and arrested the party of Hébert, at the very moment they were threatening a new insurrection. The followers of Hébert and Chaumette, generally called 'Hébertists,' were atheists, and their leaders were as obscene and cruel in outward conduct as they were irreligious in heart. The charge on which they were executed was that of endeavoring to destroy the republic by immorality.

HECART, G. A. J., a Fr. philologist, 1755-1838.

HECHT, CHRISTIAN, a Ger. divine, 1696-1748.

HECHT, GODFREY, a learned writer, d. 1721.

HECKEL, J. F., a Ger. philologist, died 1715.

HECKEWELDER, JOHN, a Moravian missionary, was born in Bedford, England, in 1743, and emigrated with his father to America in 1754. He settled in Pennsylvania, and was bred to the business of a cooper. In 1771 he entered on the duties of a missionary to the Indians, and after applying himself for many years to this benevolent work, he returned to Bethlehem, Penn., in 1786. Being conversant with Indian affairs, and having a perfect knowledge of the language of the Delawares, he was frequently employed by Washington on amicable missions to the Indians. Died 1823, aged 80.

HECQUET, P., a French medical author, 1661-1737.

HEDERIC, BENJAMIN, a German philologist, author of a well-known Greek Lexicon, 1675-1748.

HEENE, LUCAS DE, a Flem. paint., 1534-84.

HEEREN, ARNOLD HERMANN LUDWIG, a learned professor and historian of Germany, 1760-1842.

HEERKENS, G. N., a Germ. poet, 1728-1801.

HEGEL, GEORGE WILLIAM FREDERICK, born at Stuttgart 1770, died at Berlin, in the flush of his fame, November 14, 1831. A philosopher whose power and renown remind one of traditions concerning a Pythagoras; he created a school not only numbering in its ranks his most distinguished contemporaries, but exciting a whole people: the influence of Hegel diffused itself through the politics and religion, as well as through all the speculation of Germany. The principles on which this remarkable thinker constructed his system are two-fold. *First*, his discovery, or alleged discovery, of a universal law according to which Thought unfolds itself—the fundamental and sole law of *Dialectics*. Every thing or notion, says Hegel, exists to the mind, because it has, or is seen to have, a *contradiction*: in other words, there is some other thing or notion standing outright against it, and by opposi-

tion marking it off, or *defining* it. A notion and its opposite, or *contradictory*, are two elements essential to every act of thinking; and as soon as these are realized, a *third* act or movement supervenes—viz., the effort to *reconcile the two contradictories*, or to find some third, and of course higher notion, in which they unite or blend. Three elements, therefore,—a notion, its contradictory, and the solution of the contradiction,—a *thesis*, its *anti-thesis*, and the *synthesis* of the two—represent a complete act of logic, or one movement of dialectic; and on the type of this movement Hegel undertook to explain the entire course and action of Thought in its efforts to comprehend the Universe. It were not easy to overestimate the surprising skill with which a task so novel and arduous has been executed: in this respect indeed the '*Encyclopædia of Philosophical Sciences*' will ever be a marvel. Thought is presented to the astonished reader, rising up from its barest expression through a gigantic scheme of ascending *triplets*, until, having comprehended every form and sphere of possible knowledge, it reaches the Absolute and the Infinite. The attempt has indeed failed: its failure was as necessary and has been as signal as that of Babel; nevertheless, in making it, Hegel had successes that might have achieved station for many minds instead of one: he has thrown light on the methods and relationships of several departments of knowledge, that will abide connected with his name, as a rare and beneficent contribution to philosophy. *Secondly*, Hegel's next principle,—yet more distinctive, is also more unusual. Schelling before him had spoken of the *Absolute* as the necessarily existing *Unity*—blending together the whole variety of thought and things; but this Absolute he deemed an *Essence*, not irreconcilable with the notion of God. Hegel resolved that nothing unintelligible—no obscure residuum—should remain in philosophy. What, he asked, is *Reality*? What is the thing truly known, in the *Cogito* of Des Cartes? Is it other than *Thought*? I *know* myself or my existence, because I *think* myself. As to the *external world*, as men term it, Fichte demonstrated it a mere modification of the thinking principle:—what is it too, then, save a modification of *Thought*? What need in such a case of *Essences* and *Substances*? *Thought* is at once *Knowledge* and *Existence*; the *Ideal* is the true and only *Real*. And so disappear for ever, unknown quantities or substances from philosophy; and science at last is *adequate*! Singular as this principle, taken by itself, must look to the English reader, the consequences of its union with Hegel's *first* assumption, are still more astounding. If the knowledge of Things can be expressed or referred to one universal movement of dialectic, are not Things themselves—all the reality we can reach—simply the evolution of Thought, according to this movement? In other words, does not Dialectic represent, nay *create* by its movements, all that we call the Universe? At this point Hegel starts farthest away from Schelling. Schelling's *Absolute* was *primary*, the great first and ultimate principles necessary to harmonize the variety of existence: according to Hegel the Absolute is *evolved*—*created* as well as *risen to*, by Thought;—God, in short, is not the *discovery*, but the *issue* of dialectic; and exists nowhere nor in any manner, apart from our human consciousness! It is needful in candor to warn the student, that he must not judge of the verisimilitude of a scheme so extraordinary, by this barest outline. No remarkable system of thought, can fairly be separated from its details, inasmuch as *these* are the bridge by which

alone we can pass over from ordinary modes of contemplation; and it will not be concluded that the high genius of Hegel failed to provide the strong semblance of such a bridge, seeing that multitudes of the keenest thinkers in Germany not only became passionate adherents of his doctrine, but put their sincerity to the test, by accepting all its practical conclusions. It were evidently out of the question to attempt here a formal criticism of Hegelianism: nevertheless there are a few general remarks on the whole set of these 'Philosophies of the Absolute,' which, from the British point of view, it may not be unfitting to venture, as the conclusion of this article. (See art. SCHELLING.) 1. There is one meaning and application of the term *Absolute*, legitimized and accepted in Great Britain, which must be carefully distinguished from the common significance of the same term in Germany. Truths fundamental to, and inseparable from our human nature, are in English phraseology, *absolute*, to that Nature: in other words, we must accept these as ultimate and inevitable conditions of human thought—expressive, so to speak, of the *structure* of that physical and psychical fabric, which is the composite being, *Man*. A transcendental philosophy of the Absolute, on the other hand, is not a philosophy aspiring to discern and rest on truths of the nature of the foregoing; but one which aims at grasping, defining, and unfolding the absolute principle of the whole universe: not a reverential philosophy aspiring to discern the existence of a Primal Cause, a substratum and providence; but to apprehend the whole structure of that prime efficiency, to *formalize* it, and deduce from it the necessity of all that has been, that is, and that shall unfold. To Man, such a philosophy is simply unattainable. On the vexed question, whether it is possible to effect the transition from Metaphysics to Ontology—to infer from the existence of necessary truths, the existence of corresponding realities—one may hold by the affirmative with all tenacity, and yet repeat the assertion that a philosophy with such aims is utterly unattainable. From the intellectual and moral constitution of Humanity it may be legitimate to conclude something concerning the attributes of the Primal Cause: but to fathom the nature of the Cause, is beyond reach of all those faculties that belong to us. Humanity is but one force among myriads—one solitary, though rich and potent *Monad*—and it cannot encircle or comprehend the Infinite. Nay, this is manifested, by the very progressiveness of our own nature. What is absolute to us, we reach by Intuition; and there is no part of humanity so *educable* as the Intuitive faculty. In the growth of this power lies the secret of the growth of *civilization*: and evidence abounds, that what we now discern of absolute or intuitive truth, is far from the measure of what may one day be *accessible*, without any transcendence of the sphere of Humanity. How vain then, how vainly audacious the attempt, through our present or realized insight, to reach the ultimate depths of Being! 2. To whatever extent we can discern the Absolute or Infinite, it clearly must be through reliance *in the first place* on those ultimate elements or constituents of human thought: and as well in logic, as in masonry, it were fatal to remove the foundation scaffolding, simply because we have ascended several stages above it. But, these philosophies of the absolute, destroy the foundation on which alone they can rest: the logical scheme of Hegel obliterates as entirely, human liberty, human personality, human morality in every one of its directest consequences, as the lowest materialistic systems. It is thus a

practical paralogism, and issues in a defiance of that very *Cogito* of Des Cartes, to which at the outset it professes unquestioning allegiance. These irreparable defects inhere in most of our recent transcendental systems; which are liable, besides, to equally fatal specific objections. It is gratifying to know, that in Germany itself, they seem to have run their course; and that modern thinkers, with aspirations humbler, but more real, are now working out the various invaluable hints which their founders have thrown, on themes sufficiently promising, such as the Philosophy of History. Hegel's works have been collected and published in a great many volumes by the most eminent of his disciples. [J.P.N.]

HELMONT, JEAN BAPTIST VAN, generally numbered among the alchymists, was a native of Brus-

sels, and was born 1577. He was a public lecturer on medicine when only seventeen years of age, and at twenty-two received his diploma as a physician. Being rendered independent by his marriage with a lady of property in 1609, he displayed his benevolence by practising his profession gratuitously, and devoted his leisure to the studies of which his name has become such a famous representative. It is admitted that he was a great pioneer in chemical discovery, but there is also a fund of valuable truth under the obscure terms which are generally regarded as the mere conceits of his imagination. The *archeus*, for example, which makes a conspicuous figure in his works, is the mover of all the functions in the animal economy, and may be regarded as the vital aura which is the subject of so much popular curiosity, and the ridicule of so many learned professors, at the present day. It was from the *archeus* that Barthez derived his idea of a vital principle, and operated a revolution in physiology. The same element, or spiritual essence of life, is recognized by nearly all the old philosophers under different names, and there is now every prospect of its coming within the pale of experimental philosophy. Of course, it is not pretended to deny that Helmont's works abound in crude notions, and wild fantastic theories, but even in these cases the imaginative may often find the road to some true, and now forgotten principle, from which the author wandered away in the fire-mists with which he surrounded himself. Apart from all this, he was a perfect master of his art, and there is evidence of the astonishing cures he performed as a physician. He died in 1644, and in 1648 his collected works were published, according to his dying request, by his son, FRANCIS MERCURY VAN HELMONT, who was also a speculative writer, and lived 1618-1699. HELVETIUS. The physicians and philosophers of this name are sprung from a family of the Palatinate, the first founders of which fled to Holland to avoid persecution at the period of the reformation.—

1. JEAN FREDERIC (SCHWEIZER), who bears the reputation of an alchymist, was first physician to the armies of the republic, and had several medals struck in honor of the services rendered by him, flourished 1625-1709.—2. JEAN ADRIAN, who carried the family name to Paris, by going there in his youth, was the son of the preceding, and was known in the city of his adoption as the Dutch physician. He was ennobled by Louis XIV. for his services, having been successively equerry, counselor of the king, and inspector-general of hospitals. He is the author of several medical works, especially on fevers, on the plague, and on the extirpation of cancer, and is the discoverer of the curative virtues of *ipëcacuhana*. Some of his works went through several editions during his lifetime and afterwards; lived 1661-1727.—One of his sons, 3. JEAN CLAUDE ADRIAN, became councillor of state and first physician to the queen, and was a member of most of the learned societies of Europe. His works are, '*Idée Générale de l'Economie Animale, et Observations sur la Petite Vérole*,' and '*Principia Physica-Medica*,' in which he attributes all diseases to the fermentation of the blood, and its irruption into the lymphatic vessels. Like the other members of his

family, he was of an original and speculative turn, and his hypotheses generally provoked controversy. His son, the fourth and most famous of the name, is the subject of the following notice. [E.R.]

HELVETIUS, CLAUDE ADRIAN, born in Paris 1715, died December, 1771. The celebrity at one time enjoyed by Helvetius, rests on his work *De l'Esprit*—a treatise on theoretical and practical morality. Starting from the ground that man is a being simply and purely *sensible*, he rapidly infers that morality signifies the search after pleasure and effort to avoid pain. Nevertheless, as remarked in the article EPICURUS, granting the postulate, the inquiry remains, how can one best attain pleasure and avoid pain? And Helvetius desired to raise men to the pursuit of large objects. He contrasts with this view, the mean morality of the purely self-seeking and vulgar-minded, with the higher but still narrow morality of sects and coteries, and this last with the generous and unfettered action and serene enjoyments of the man whose sympathies are co-extensive with his race. It has to be said, in justice to one whose merits as a thinker are not great, but often unduly abused and depreciated, that *action* according to his precepts, would, by no means frequently, be found in jar with the results of a better system. Helvetius was a good and keen observer: hence the saying of Madame du Deffand, 'C'est un homme qui a dit le secret de tout le monde.'—Besides his *Esprit*, he wrote a treatise *De l'Homme*. They are loose and wearisome in the main: and before recommending their perusal even to a student with fullest leisure, it would be fair to say that every thing good in them may be obtained at a much cheaper rate. [J.P.N.]

HELVETIUS, J., a Dutch poet, last century.

HELVICUS, C., a German *savant*, 1581-1617.

HELVIG, AMELIA VON, a German lady, distinguished as a poetess and for her great learning, 1776-1832.

HELVIG, G. A., a Prussian natur., 1666-1748.

HELVIG, JOHN OTTO, a German medical writer and collector of natural curiosities, 1654-98. His brother, CHRISTOPHER, a botanist, 1663-1721.

HELYOT, PETER, a French ecclesiastic of British extraction, author of a '*History of Monastic Orders, Religious and Military*,' 1660-1716.

[Rhyllon, Residence of Mrs. Hemans, in Wales.]

HEMANS, FELICIA, the daughter of a Liverpool merchant, was born in that town in 1794. Miss Browne wrote verses from her childhood, and published a poetical volume in her fourteenth year. Her second volume, containing poems on 'The Do-

mestic Affections,' which appeared in 1812, marked her as already successful in the school of Campbell. In the same year she married Captain Hemans, who, after some years, went to reside on the continent, Mrs. Hemans remaining at home with her five sons. Always devoted to study and composition, she now became more so than ever; but it was matter of much regret, to the poetess as well as to the admirers of her verses, that she felt herself compelled, by the expenses attending the education of her children, to spend her powers in an almost uninterrupted succession of small pieces, which usually made their first appearance in the periodicals of the day. It is hardly, indeed, to be believed, that, even with more favorable opportunities, she would have succeeded much better than she did in narrative or dramatic poetry. The character of her genius was decidedly lyrical and reflective. But leisurely composition would doubtless have checked the verbosity and mannerism which are the besetting faults even of her latest and best poems. As it is, there are not a few of her small pieces which are alike fine in feeling and in diction; and the very marked manner which she gradually formed for herself has found a host of imitators. Her poems are admirable for purity of sentiment and gentle pathos; and her personal character was amiable, modest, and exemplary. After several changes of residence, she died in Dublin in 1835. [W.S.]

HEMELAR, J., a Dutch antiquarian, died 1640.

HEMME LINCK, or HEMMLING, J., a painter of Bruges, considered one of the first masters of the Flemish school, born 1450.

HEMMENWAY, MOSES, D.D., minister of Wells, Maine, was a native of Framingham. He was educated at Harvard College in 1755, and ordained in 1759. After a faithful discharge of his duties for 51 years, he died in 1824, aged 84.

HEMSEN, J., a Flemish painter, 16th cent.

HEMSKERCK, E., a Dutch painter, 1645-1704.

HEMSTERHUY, or HEMSTERHUSIUS, TRIBERIUS, a learned Dutch critic and Orientalist, 1685-1756. His son, FRANCIS, a writer on arts and philosophy, and an able statesman, died 1790.

HENAS, G. DE, a Spanish theolog., 1611-1704.

HENAULT, CHARLES JOHN FRANCIS, a distinguished French poet, and president of the parliament of Paris, was born in that city in 1685. In 1713, he published the tragedy of 'Cornelia.' In 1723 he obtained an appointment in the French Academy, and in 1744 he produced a chronological history of France. Died 1770.

HENAULT, JOHN D., a French poet, 17th cent.

HENCKEL, J., a Ger. mineralogist, 1679-1744.

HENDERSON, A., a Scotch divine, 17th cent.

HENDERSON, JOHN, an Oxford scholar and master of the occult sciences, 1757-1788.

HENDERSON, JOHN, an actor who acquired a great reputation in Falstaff, in which character he is said never to have been equalled, was born in London 1747, and was apprenticed to a silversmith. He made his *début* as a performer at Bath; after which he appeared in *Shylock* at the Haymarket theatre. He died suddenly of a brain fever in 1785. [J.A.H.]

HENDERSON, DOUGLAS MERCER, a British officer distinguished in the Peninsular campaign and at Waterloo; died 1854.

HENGIST, the first Saxon chief who established himself in England, king of Kent, 458-488.

HENICHIUS, J., a German divine, 1616-1671.

HENING, WILLIAM, presiding judge of the Court

of Appeals of Virginia, and a patriot of the revolution. Died 1824, aged 89.

HENISCH, G., a Hungarian *savant*, 1549-1618.

HENKE, HENRY PHILIP CONRAD, a German professor of theology, author of an 'Ecclesiastical History,' 1752-1809.

HENKEL, J. F., a German chemist, 1679-1744.

HENKEL, J. F., a Ger. surgical wr., 1712-1779.

HENLEY, ANTHONY, a fugitive writer and member of parliament, died 1711. His second son, ROBERT, born 1708, created Lord Northampton 1760, chancellor 1757-1766, died 1772.

HENLEY, JOHN, a celebrated lecturer, generally known as 'Orator Henley,' author of 'Esther,' a poem, and editor of 'The Hyp Doctor,' 1692-1756.

HENLEY, SAMUEL, a divine of the Church of England, known as a classical writer, died 1813.

HENNEPIN, LOUIS, a French missionary, was born in 1640, and emigrated to Quebec in 1675. He travelled through Canada and Louisiana for some years, and in 1683 published 'Description de la Louisiane,' and in 1711 'Nouveau voyage dans l'Amerique.'

HENNET, A. J. U., a Fr. economist., 1758-1821.

HENOUL, J. B., a French historian, 1755-1821.

HENRIET, ISRAEL, a Fr. engraver, 1608-1661.

HENRIETTA ANNE, daughter of Charles I. and Henrietta Maria, 1644, married to the duke of Orleans, died 1660.

HENRIETTA MARIA, daughter of Henry IV. and Marie de Medicis, born 1609, married to Charles I. of England, 1625, escaped with her infant to France, 1644. Died 1669.

HENRION, D., a Fr. mathematician, died 1640.

HENRION, F., a Fr. antiquarian, 1663-1720.

HENRIOT, FRANÇOIS. This audacious and bad man, who rose to be military commander of Paris during the reign of terror, was born in the precincts of the capital in 1761, and was released from prison, where he had been confined for theft, in the midst of the anarchy of 1792. He was a principal in the terrible scenes of August and September in that year, and headed the armed force of the sansculottes, or sections of Paris, in the insurrection of May in the year following, when the Girondins were overthrown. The triumph of Marat raised Henriot from this position to that of generalissimo of the national guard, yet he was utterly destitute of the talents necessary for command, as shown by his conduct on the 9th Thermidor, when Robespierre and his party were arrested by Barras. On this occasion he set the example of a retreat, and returning to the Hotel de Ville, in a half-drunken condition, he was hurled from a window, with imprecations, by one of his colleagues. The fall, however, did not kill him, and he was executed with Robespierre and the others on the day following, 28th July, 1794. [E.R.]

HENRIQUEZ, H., a Portug. miss., 1520-1600.

HENRY. The kings of England of this name are—HENRY I., third son of William the Conqueror, born 1068, usurped the throne on the death of William Rufus, 1100, died 1135. HENRY II., son of Geoffrey Plantagenet, earl of Anjou, by the empress Matilda, daughter of Henry I., born 1133; earl of Anjou, Touraine, and Maine 1151; married Eleanor, the queen widow of France, and countess in her own right of Poitou and Aquitaine, 1152; succeeded Stephen as king of England, 1153; died 1189. HENRY III., eldest son of King John and Isabella of Angouleme, born 1206, succeeded 1216, died 1272. HENRY IV., eldest son of John of Gaunt, duke of Lancaster, fourth son of Edward III., and the Lady

Blanche, born 1366, usurped the throne 1399, died 1413. HENRY V., son of the preceding, and Mary de Bohun, daughter of the earl of Hereford, born 1388, succeeded 1413, invaded France and fought the battle of Agincourt 1415, died 1422. HENRY VI., son and successor of the preceding, when only ten months old, 1422, crowned at Paris 1430, imprisoned by the faction of York, and killed in the Tower, 1471. HENRY VII., son of Edmund Tudor, earl of Richmond, and Margaret, a descendant of John of Gaunt, born 1456, defeated Richard III., and proclaimed king 1485, married to Elizabeth the heiress of the house of York, 1486, died 1509. HENRY VIII., second son of Henry VII. and Elizabeth, born 1491; succeeded his father, and married to Catherine of Arragon 1509; defeated the French army at the battle of Spurs, and the Scotch at Flodden, 1513; interview with Francis I. on the field of the cloth of gold, 1520; war with France 1522; treaty of peace 1526; married to Anne Boleyn 1533; to Jane Seymour after the execution of Anne 1536; to Anne of Cleves after the death of Jane Seymour, and to Catherine Howard after the divorce of the latter, 1540; to Catherine Parr 1543; invasion of France 1544; peace with France and Scotland 1546; died 1547.

HENRY. The emperors of Germany of this name are—HENRY I., son of Otho, duke of Saxony and Thuringia, born 876, reigned 919–936. HENRY II., great grandson of the preceding, born 972, king of Bavaria 995, succeeded Otho III. on the throne of Germany 1002, crowned emperor at Rome 1014, died 1024. HENRY III., brother and successor of Conrad II., reigned 1039–1056. HENRY IV., son of Henry III., born 1050, succeeded his father 1056, commenced the great war of investiture 1077, deposed by the diet of Mayence and died miserably 1106. HENRY V., son of the preceding, born 1081, reigned 1111–1125. HENRY VI., born 1165, succeeded his father, Frederic Barbarossa, 1190, died of poison 1197. HENRY VII., duke of Luxemburg, elected 1308, died 1313. Another HENRY, landgrave of Thuringia, was proclaimed emperor on the deposition of Frederick II. 1246, and died the following year.

HENRY, emperor of Constantinople, reigned 1174–1216.

HENRY. The kings of France of this name are—HENRY I., born 1005, succeeded his father Robert, 1031, died 1060. HENRY II., born 1518, married to Catherine de Medicis 1533, succeeded his father Francis I. 1547, died of a wound received at a tournament 1559. Henry III., third son of Henry II. and Catherine de Medicis, born 1551, elected king of Poland 1573, succeeded his brother Charles IX. 1574, assassinated 1589. For HENRY IV., called 'the Great,' see NAVARRE.

HENRY. The kings of Castile of this name are—HENRY I., born 1205, reigned 1214–1217. HENRY II., count de Transtamare, born 1333, maintained a contest for the throne, which he obtained 1366–1368, died 1379. HENRY III., reigned 1390–1406. HENRY IV., born 1423, succeeded his father John II. 1454, died, and was succeeded by his sister, Isabella of Castile, 1474.

HENRY, count of Portugal, killed 1112.

HENRY, king of Portugal, reigned 1578–1580.

HENRY, fourth son of John I. of Portugal and Philippine, sister of Henry IV. of England, known as Henry of Portugal, or the duke of Viseu, and distinguished as a promoter of discovery, 1394–1463.

HENRY, king of Jerusalem, reigned 1150–97.

HENRY, the first of the name king of Cyprus, reigned 1218–1253; the second, 1285–1324.

HENRY, prince of Prussia, third son of Frederic William I., distinguished in the seven years' war, and as a diplomatist, 1726–1802.

HENRY OF BLOIS, bishop of Winchester, nephew of William Rufus, and brother of king Stephen, founder of the Hospital of St. Cross, died 1171.

HENRY OF GHENT, a scholastic philosopher, died 1293.

HENRY OF HESSE, a Germ. philosopher, d. 1397.

HENRY OF HUNTINGDON, an ancient chronologist, author of a 'History of England to A. D. 1154,' died 1168.

HENRY, ALEXANDER, a traveller, was born in New Jersey in 1739. In 1760 he joined Amherst's expedition, and was at the reduction of Point Levi and capitulation of Montreal. After the conquest of Canada, he engaged in the fur trade, and travelled for some years through the north-western parts of America. He published a work entitled, 'Travels in Canada and the Indian Territories between 1760 and 1766.'

HENRY, CHAS., M.D., a chemist, 1775–1836.

HENRY, DAVID, a Scotch printer, 1710–1792.

HENRY, F., a French mathematician, 1615–85.

HENRY, JOHN JOSEPH, presiding judge of the second district of Pennsylvania, was born 1758. In 1775, he accompanied Arnold to Quebec, and was wounded at the attack on that city. He commenced the practice of law in 1787, and in 1793, he was appointed judge. Died 1810, aged 52. His father was the inventor of the screw augur.

[Matthew Henry's Church, Chester.]

HENRY, MATTHEW, the celebrated commentator on the Bible, was a native of Flintshire, where he was born at the farm-house of Broad Oak, the dwelling of his maternal grandfather, in 1662. His parents had retired to that place in consequence of his father, Rev. Philip Henry, having been ejected from his parish in the neighborhood by the tyrannical act of uniformity. He was of a very weakly and delicate constitution in his childhood. But his mental faculties were remarkable for their precocious development and vigor; and as an evidence of this, it is said that he could read the Bible distinctly in his third year, and the Greek New Testament in his ninth. At a very early age he received deep and lasting impressions of religion; insomuch that when he removed to a public academy at Islington, he was distinguished among his school-fellows not more by the superiority of his classical and general learning, than by his settled piety. In 1685, he entered Gray's Inn as a student of law, not with any view to the legal profession, but according to the fashion of the time, which considered law a branch of lib-

eral education, and an excellent discipline for the youthful mind. But the bent of Henry's inclinations had been all along towards the ministry, and by a prudent economy of his time, he pursued his theological studies, while resident at that school of law. He began to preach at first in a room which his father had fitted up for public worship, and to which the people in the neighborhood were in the habit of repairing. After a few of these private trials, he went on a visit to a friend at Nantwich, where he preached with great acceptance; and the fame of his discourses having spread, he was invited to Chester, where he preached in the house of a merchant to a small audience which formed the nucleus of his future congregation. Such privacy was necessary at a period when the law imposed great restriction on the freedom of preaching. But in 1687, prudence or necessity led the government to adopt a more liberal policy, and license was granted to dissenters to preach. Mr. Henry, having accepted a call to undertake the functions of the ministerial office in Chester, he was privately ordained, for the dissenters wisely avoided in those days all ostentatious display; and he had not been long settled in that town, when he drew around him a large and flourishing congregation. The duties of a minister were much more onerous then than they are now; and yet Mr. Henry found no difficulty in accomplishing all that was required: two long services on Sabbath, a discourse in the neighboring villages almost every evening in the week, besides visits to the sick of his congregation, as well as to the poor prisoners in Chester jail. He continued twenty-five years pastor of that place, and during this period, he went through the Bible more than once in the course of expository lectures.—In 1712, he was translated to Hackney, London, and in that new sphere of ministerial labor, he determined to pursue the same course of exposition he had adopted in Chester. At the commencement of his ministry, therefore, he began with the first chapter of Genesis in the forenoon, and the first chapter of Matthew in the afternoon. Thus gradually and steadily grew his 'Exposition' of the Bible. A large portion of it consists of his public lectures, while many of the quaint sayings and pithy remarks with which it abounds, and which give so great a charm of raciness to its pages, were the familiar extempore observations of his father at family worship, and noted down by Matthew in his boyhood.—Worn out by his excessive labors both in the pulpit and the study, the constitution of Henry began to give way. On returning from a visit to his friends at Chester, the fatigue of travelling, increased by his corpulency, brought on an attack of paralysis, which laid him up at Nantwich, and in the triumphant exercise of faith and hope, this great and good man was removed from the world and the church below on 22d June, 1714, in the fifty-second year of his age.

HENRY, PATRICK, one of the most extraordinary natural orators, was born in Virginia in 1736, and, with a very limited and imperfect education, commenced life as an agriculturist, and then tried trade. He was unsuccessful in both. He then read law for a very short time, and was admitted to the Virginia bar. It was not, however, until several years of poverty and suffering had passed, that his astonishing powers burst upon his countrymen. There was a controversy, in which the clergy were a party, touching

the emoluments to which they were entitled under the law of the established church of England in Virginia. He appeared against the claim of the clergy, and electrified the court, and indeed the whole country around by his eloquence. He henceforth was a man of note. In 1765 he was elected member of the House of Burgesses of Virginia purposely to oppose the stamp act. In 1774, when the first Congress of the colonies was held to concert measures of united defence in opposition to the

crown, Henry was a delegate, and, by his bold and eloquent denunciations, strengthened the spirit of resistance. In 1776, he was elected governor of his native state under the constitution she had just formed, and to this office, he was repeatedly re-elected. When a convention was held in Philadelphia, in 1786, for the purpose of revising the Federal Constitution, he was sent from Virginia as one of her representatives. In 1788, he opposed the adoption of the Federal Constitution by Virginia, as submitted to the States. In 1794, he left public life, and died in 1799. The latter years of his life were eminently pious, and probably no American has ever excelled him in his wonderful powers as an orator.

HENRY, ROBERT, a Scotch minister, and author of 'The History of Great Britain,' was born near Stirling in 1718, d. 1790.

HENRY, S. E., a Fr. pharmacop., 1769–1832.

HENRY, T. CHARLTON, D.D., pastor of the second Presbyterian church at Charleston, South Carolina, was graduated at Middleburg College in 1814. He was a useful and zealous minister. Died in 1827, aged 37.

HENSHAW, DAVID, an American democratic politician, appointed secretary of the navy by President Tyler in 1843, but was not confirmed by the senate. He was collector of Boston under Jackson; died 1852, aged 62.

HENSHAW, JOHN PRENTIS KEWLEY, bishop of the Protestant Episcopal Church in Rhode Island, was born at Middletown, Connecticut, and was for many years the esteemed and useful rector of St. Peter's Church, Baltimore. From that station he was called to take charge of the diocese of Rhode Island, having been elected the first bishop after the separation of that State from what was known as 'The Eastern Diocese.' Consecrated in 1843, died in 1832.

HERACLIDES, a Grk. philosopher, 4th cent. B.C.

HERACLITUS, a celebrated Greek philosopher of Ephesus, lived in the 69th Olympiad, about 500 B.C. The principle of his theory is the recognition of the fire of life, and the ethereal element of wisdom, as the ground of all visible existences. Only fragments of his works have been preserved, which are written in the symbolic or transcendental style of the Pythagoreans. [E.R.]

HERACLIUS, the *first* of the name emperor of the East, reigned 610-641; the *second*, HERACLIUS-CONSTANTINE, son of the preceding, survived him only three months.

HERACLIUS, or EREKLI, king of Georgia, succeeded by right when an infant, on the death of his father, 1648, obtained the government about thirty years subsequently; died 1708. HERACLIUS II., his grandson, b. about 1720, began his political career 1747, and died after a long reign, 1798.

HERAULD, DIDIER, a Fr. scholar, 1579-1649.

HERAULT-DE-SECHELLES, MARIE JEAN, the friend of Danton, was born at Paris, of a noble family, in 1760, and when the revolution broke out had arrived at the post of advocate-general in the parliament of the capital. Notwithstanding the favor he enjoyed at court, Hérault de Séchelles did not hesitate to join the popular party in the debates preceding 1789, and was present at the taking of the Bastille. In September, 1791, he was returned to the legislative assembly (the first biennial parliament) by the electors of Paris, and the year following represented the department of the Seine and Oise in the national convention. In each of these bodies he exercised great influence upon the direction of affairs, and when the constitution was accepted, he was made president of the national fête. For this post he was equally fitted by his eloquence as an orator, and the elegance of his person, for he was considered the handsomest man in Paris, but it was also the well-earned reward of his political honesty and patriotism. As events proceeded, the Committee of Public Safety was erected, and Hérault became a member of it, in which capacity he received a letter from Lavater, who had been acquainted with him, expressing the surprise of the philosopher 'That a man placed so high by his birth, his education, his talents, the goodness of his character, and the sweetness of his manners, should become the accomplice of scoundrels, so gross, so ignorant, and so stupid as his colleagues.' Hérault de Séchelles received this letter in committee, and smiling as he read it, observed to one of his companions, 'These people do not understand our situation!' On the division of parties, Hérault sided with his friend Danton, with whom he was guillotined, 5th April, 1794; his affianced bride, a young lady of high birth, and remarkable for her beauty, vainly endeavoring to move the heart of Robespierre. On the scaffold, Hérault de Séchelles stepped forward to embrace Danton, but the executioner prevented him, which gave occasion to the last words uttered by the great chief: 'Miserable! tu n'empêcheras pas nos têtes de se baisir dans le panier' (wretch! you cannot hinder our heads from kissing in the basket). Hérault de Séchelles is the author of several works, among others, of the 'Theory of Ambition,' published after his death, and of a work entitled 'Thoughts and Anecdotes.' [E.R.]

HERBELOW, BARTHOLOMEW D', professor of Syriac in the College of France, and author of 'Bibliothèque Orientale,' 4 vols. 4to, 1625-1695.

HERBERT, EDWARD, Lord Herbert of Cherbury, a distinguished writer on natural religion, and the last of his age to embody the principle of deism in the language of a refined philosophy, was born of an ancient family at Montgomery castle in Wales 1581, and died in London 1648. He was one of the most accomplished gentlemen at the court of James I., and distinguished himself by his romantic bravery in the service of the prince of Orange, and at a later period in the parliamentary army. His greatest work, 'De Veritate,' was published at Paris, where he was resident ambassador, 1624, and for a time he hesitated whether to give it to the world. 'Being thus doubtful in my chamber,' he writes in his 'Memoirs,' 'one fair day in summer, my casement being opened to the south, the sun shining clear, and no wind stirring, I took my book, *De Veritate*, in my hand, and kneeling on my knees, devoutly said these words:—O thou Eternal God, author of the light which now shines upon me, and giver of all inward illuminations, I do beseech thee, of thy infinite goodness, to pardon a greater request than a sinner ought to make. I am not satisfied enough whether I shall publish this book *De Veritate*. If it be for thy glory, I beseech thee give me some sign from heaven; if not, I shall suppress it. I had no sooner spoken these words, but a loud, though yet gentle noise came from the heavens (for it was like nothing on earth), which did so comfort and cheer me, that I took my petition as granted, and that I had the sign I demanded, whereupon also I resolved to print my book.' 'This,' he adds, 'how strange soever it may seem, I protest, before Eternal God, is true; neither am I in any way superstitiously deceived herein, since I did not only clearly hear the noise, but in the serenest sky that ever I saw, being all without cloud, did, to my thinking, see the place from whence it came.' Some writers have accused Lord Herbert of hypocrisy, and others of vanity and self-delusion on this point, but, however extraordinary in a writer whose work was directed against belief in a revelation to a part of the world only, it is, to our mind, the highest proof of his sincerity. Besides this work, which was replied to by Gassendi, Lord Herbert is the author of Latin poems of great beauty, and of an Inquiry into the Errors of Paganism—'De Religione Gentilium, &c.' He was a general favorite, both at the English and French courts, and perhaps indulged in an excusable vanity on that account, but his frankness, generosity, and bravery, besides his great literary abilities, are acknowledged by all parties. [E.R.]

HERBERT, GEORGE, a younger brother of the preceding, is remarkable for the contrast exhibited by his life and character when compared with that of Lord Edward, in whose refinement of nature he shared most liberally. The tastes of George inclined him to the public life of a courtier, but he was educated for the church, and became rector of Bemerton, near Salisbury, where he settled down with a firm resolve to consecrate all his learning and all his abilities to advance the glory of that God which gave them; 'knowing,' he said, 'that I can never do too much for him that hath done so much for me as to make me a Christian.' George Herbert is remembered for the singular purity and beneficence of his secluded existence, and chiefly as the author of poems, often quoted for their earnest delineations of the soul's experience, and for the spirit of love and gentleness

breathed into them. These simple, yet beautiful compositions are contained in his 'Remains,' together with 'The Country Parson's Character,' which exhibits his own rule of life, and is a picture of continued benevolence, and unwearied devotion to the service of others. He was born in 1593, and died of consumption in 1632. [E.R.]

HERDER, JOHANN GOTTFRIED VON, was born in 1744, in East Prussia. Younger than Lessing, and older than Göthe, and Schiller, he became intimately connected with all of these distinguished men; and he shares with them the honor of having created the literature of Germany. Herder is one of the most eloquent writers of modern Europe; his works have the fervor of oratory, with a brilliancy of fancy which almost becomes poetical; and he is one of the few men who have united impressiveness and skill of composition, various and exact erudition, and originality and comprehensiveness of philosophic thought. His father, a schoolmaster, was both too poor and too ignorant to give facilities for the development of his son's genius: his early studies were prosecuted by stealth. The kindness of a Russian surgeon carried him to Königsberg, where he studied under Kant and others, and was able to obtain a subordinate appointment as a teacher. Abandoning his study of medicine, he entered the church; and in 1764, at Riga, holding an appointment as a preacher, along with a mastership in the cathedral school, he gained celebrity by the dignity and earnestness of his pulpit oratory. He soon became an author, and published some of the best of his critical treatises on literature and art. After making one or two changes of place, he spent four or five years as court-preacher at Bückeburg in the principality of Schaumburg-Lippe. This period produced several of his principal theological works. In 1775, he was appointed to a theological professorship at Göttingen; but the government, before confirming the nomination, insisted on investigation as to the professor's orthodoxy, to which he hesitated to submit. The difficulty was removed by the duke of Saxe-Weimar, who, less scrupulous in his theology than George, king of England, and aiming at gathering about him all the finer spirits of his country, nominated him his court-preacher and general superintendent of the ecclesiastical consistory. In 1776, Herder came to Weimar; and in that little capital, then celebrated as the Athens of Germany, he spent the remainder of his life, respected as a preacher, and as an active promoter of education and other public improvements, and laboring unweariedly in his multifarious literary pursuits. He died in 1803. His voluminous works fall into three sections: theology; philosophy and history; and literature and the fine arts. The third section is that in which he displays most decisively his felicitous combination of dissimilar powers. Notice is especially due to his 'Spirit of Hebrew Poetry;' to the 'Kritische Wälder,' which is a treatise on the beautiful as exhibited in art; and to those ballads, founded on the Spanish romances of 'The Cid,' which showed how very little was wanting to make Herder an illustrious poet. HERMAS, ST., author of a book entitled 'The Pastor,' and supposed to be the same mentioned in Rom. xvi. 14. The 'Pastor' of Hermas was highly esteemed by many of the earlier fathers, and Origen expresses his belief that it was divinely inspired. It contains an account of the visions of Hermas, really seen by him in a state of ecstasy, and to be understood in a symbolic sense: to which are added some excellent precepts of morality and piety, and ten 'Similitudes' or figures of truth. In the ninth of these similitudes an ancient white stone of immense magnitude is described, which had a new gate opened in it; and in the 'visions' Hermas relates that he saw six young men or angels building a tower of square white stones, symbolic of the Christian Church. This book is further interesting as affording evidence that the early Christians believed in the ministration of angels around men. [E.R.]

HERMES, or MERCURIUS, TRISMEGISTUS, a supposed priest and philosopher of Egypt, who is mentioned by Sanconiatho as the secretary and adviser of Cronus, and as the original author of his 'Cosmogony.' Although it creates some inconsistencies, he is supposed to be the same as Athothis, the second king of Egypt, who, Manetho says, 'built the palaces at Memphis, and left the anatomical books, for he was a physician.' This supposition is founded on a passage in Sanconiatho's 'Generations,' where we read, 'From Misor (Mizrain) descended Taatus (or Athothis), who invented the writing of the first letters; him the Egyptians call Thoor, the Alexandrians Thoyth, and the Greeks Hermes.' These points may be examined in the fragments of Cory. The works extant under the name of Hermes are, 'Poemander, or the Power and Wisdom of God;' 'Asclepius, a Dialogue on the Deity, Man-kind, and the World,' and some others supposed to be of less antiquity than these, and all alike regarded as supposititious. Their value, however, will be found very great in any attempt to determine the history of philosophy. In all likelihood the

name belongs to two distinct persons, the later of whom was an Egyptian philosopher and legislator, and the earlier a deification of all the ancient philosophy and instruction of that mysterious country,

[Herodotus, from an Antique Bust.]

**HERODOTUS.** Very few facts connected with the biography of the 'Father of History' have come down to us. With the exception of the few data incidentally and indirectly supplied by himself, the notices of his life rest on comparatively recent or questionable authority. Herodotus was a native of Halicarnassus, a Dorian city in Asia Minor, was born B.C. 484, and was perhaps alive in the beginning of the following century. According to Suidas, his father was called Lyxas, and his mother Dryo, both descended from noble Halicarnassian families. Disgusted with the government of Lygdamis, the grandson of Artemisia, who was tyrant of his native city, he retired for a time to the island of Samos, whence he acquired the Ionic dialect, in which he afterwards composed his history. To collect the necessary materials for his great work, he entered, in early

manhood, upon that course of patient and observant travel which was destined to render his name illustrious in all future ages. During his wanderings he visited almost every part of Greece and its dependencies, and many other countries, the affairs of which are treated in his work; investigating minutely the history, manners, and customs of the people. The shores of the Hellespont, Scythia, and the Euxine Sea; Syria, Palestine, Colchis, the northern parts of Africa, Ecbatana, and even Babylon, were the objects of his unwearied search. On his return from his travels he took a prominent part in delivering his country from the tyranny of Lygdamis. But the expulsion of the tyrant did not bring tranquillity to Halicarnassus; and Herodotus having himself become an object of dislike, again quitted his native city, and settled along with a colony from Athens, at Thurii, in the south of Italy, B.C. 443. Here he spent the remainder of his life, and here he wrote the work which has immortalized his name. The time and place of his death are matters of dispute. According to some he died at Thurii, and was buried in the market-place; while others assert that he died at Pella, in Macedonia. His history consists of nine books, which bear the names of the nine Muses. 'Next to the Iliad and Odyssey,' says Colonel Mure, 'the history of Herodotus is the greatest effort of Greek literary genius. The one is the perfection of epic poetry, the other the perfection of epic prose. Were it not for the influence which the prior existence of so noble a model, even in a different branch of composition, has evidently exercised on the historian, his title to the palm of original invention might rival that of his poetical predecessor. In the complexity of the plan (of his history), as compared with the simplicity of its execution; in the multiplicity and heterogeneous nature of its materials, and in the harmony of their combination; in the grandeur of its historical masses, and the minuteness, often triviality, of its illustrative details; it remains not only without equal, but without rival or parallel in the literature of Greece or of Europe.' HERRICK, HEARICK, or HIRECK, ROBERT, an English clergyman and poet, descended from Eric, a Danish chief subdued by Alfred the Great, and settled with his people in East Anglia, and intermediately from a well-known family in Leicestershire, was born 24th August, 1591. His uncle, Sir W. Heyrick, undertook the charge of his education at Cambridge, and having friends at court, he was presented to the living of Dean Prior in Devonshire, 1629. In 1648, he was deprived by Cromwell, and coming to London, assumed the lay habit, and in the course of the same year published his poems under the title of 'Hesperides, or the works, both Humane and Divine, of Robert Herrick, Esq.,' another collection in the same volume being styled

'His Noble Numbers, or his pious pieces, wherein (amongst other things), he sings the Birth of his Christ; and Sighes for his Saviour's Suffering on the Crosse.' The poems of Herrick were well received at the time, but were almost forgotten again till the time of Dr. Drake. They are now recognized as genuine effusions of the English muse, and the best of them are unsurpassed in melody, sweetness, and variety of rhythm, by any similar compositions in the English language. They afford admirable illustrations of old English manners, English feelings, and English scenery, and a noble strain of piety breathes through the whole volume, notwithstanding its frequent licentiousness. Herrick himself was painfully conscious of these blemishes, but the poor royalist, wanting his 'fifths,' and cast upon the streets of London, should not be too harshly censured for a fault to which Shakspeare himself was not superior. Being a bachelor, he had no home in the metropolis, and his best hours were given to the wits and courtiers of the period. Selden, Ben Jonson, Denham, Cotton, and Endymen Porter were among his friends. The date of his death is not known, but it was probably soon after 1660, when he was restored to his living by Charles II. 'A Genealogical Register of the name and family of Herrick,' was published by Jedediah Herrick, at Bangor, Maine, in 1846, and is a curious example of the pride of birth, and of their English ancestry remaining with the republican descendants of this ancient family. HERRMANSEN, DR., a German naturalist, died 1854.

HERMOGENES, a Greek rhetorician, was born in Cilicia, in the 2d century. He was remarkable for the early exhibition and rapid decay of his talents.

HERSCHEL, WILLIAM, a distinguished astronomer, was born at Hanover on the 15th November, 1738. He was the second of five sons, who were all educated as musicians, following the same profession as their father. At the early age of fourteen William was placed in the band of the Hanoverian foot guards; but seeing that there was little prospect of promotion in his native country, he resolved to try his fortune in England, where he arrived about the end of 1757. After experiencing the difficulties to which early genius is frequently exposed, he was engaged by the earl of Darlington to instruct a military band which was then forming in the county of Durham. When he had fulfilled this engagement, he established himself as a teacher of music in the vicinity of Leeds, Pontefract, and Doncaster, and conducted the public concerts and oratorios in these towns. In 1766 he obtained the situation of organist at Halifax, and soon afterwards a more lucrative appointment in the Octagon chapel in Bath, where he was very successful as a teacher of music, and a director of the public concerts. During his residence at Halifax he acquired a considerable knowledge of mathematics, and having studied astronomy in the popular writings of James Ferguson, he was anxious to see with his own eyes the wonderful celestial phenomena disclosed by the telescope. Fortunately for science he was unable to purchase an instrument for this purpose, and he therefore resolved to construct one with his own hands. After surmounting the difficulties which attend the practice of grinding and polishing specula, he completed in 1774 a five feet Newtonian reflector, with which he could see the satellites of Jupiter and the ring of Saturn. Not

contented with this instrument he made for himself several two feet, five feet, seven feet, eighteen feet, and twenty feet, Newtonian telescopes, besides Gregorian ones eight inches, one foot, two feet, three feet, and ten feet in focal length, and in order to get a good speculum he ground and polished a large number upon the same tool, and selected the one which happened to have the best figure. In this way he made no fewer than 200 seven feet, 150 ten feet, and about 80 twenty feet telescopes. His mechanical amusements were carried on along with his optical ones, and he invented and executed a number of stands of different forms for these instruments.—His first regular observations with the telescope were made in 1776, and subsequent years. They were published in the Philosophical Transactions for 1780, and related to the periodical star in the neck of the whale, and the height of the lunar mountains. In 1781 he discovered what he at first thought a comet, but it turned out to be a new planet, which he called the Georgium Sidus, but which has now received the name of Uranus, from its being next to Saturn. After this discovery, which extended his reputation over Europe, George III. munificently enabled him, by the grant of a salary, to devote the whole of his time to astronomy. He therefore took up his residence at Datchet, near Windsor, where he made many discoveries on double and triple stars, on the proper motion of the sun and solar system, the spots at the pole of Mars, and the nebulae and cluster of stars observed by Messier and Mechain. On the 11th January, 1787, he discovered a second and fourth satellite of the Georgium Sidus, and in 1790 and 1799, other five satellites, viz., the first, third, fifth, and sixth, all of which move in a retrograde direction, in orbits almost perpendicular to the plane of the ecliptic.—Thus successful as an observer, he began in 1781 to construct

[Herschel's Tomb in Upton Church.]

a thirty feet reflector, but the mirror, which was no less than three feet in diameter, cracked in the cooling, and frustrated his plan. This disappointment induced him to seek for extraneous assistance in carrying out his views; and on the recommendation of Sir Joseph Banks, George III. offered to defray the expense of a forty feet telescope, with a mirror four feet in diameter, three and a half inches thick, and weighing 2,118 pounds. With this magnificent instrument he discovered the sixth and seventh satellites of Saturn, and also the spots, belts, and flattening, at the poles of that planet. Till the year 1820

Sir William Herschel communicated almost every year important papers to the Royal Society on nebulae, clusters of stars, the construction of the heavens, the motion of the solar system, on double stars, and on the four new planets between Mars and Jupiter. We owe to him also the discovery of invisible heating rays beyond the red extremity of the spectrum. Sir William Herschel was elected an honorary member of most of the scientific institutions in Europe and America. In 1786 he received the honorary degree of Doctor of Laws, and in 1816 he was presented with the decorations of the Guelphic order. In 1820 he was elected the first president of the Astronomical Society, and published the first volume of its transactions, a paper on 145 new double stars. He had now reached that age when the mind as well as the body requires a cessation from labor. His health had begun to decline, and on the 25th August, 1822, he died in the eighty-fourth year of his age. In the year 1788 Sir William married the widow of John Pitt, Esq., and left behind him only one child, the present Sir John Herschel. [D.B.]

HERVAS, L., a Spanish *savant*, 1735-1809.

HERVAY, NOEL, a scholastic philosopher, died 1323.

HERVET, G., a French *savant*, 1499-1584.

[Hervey's Birthplace.]

HERVEY, JAMES, a pious clergyman of the Church of England, author of 'Meditations and

Contemplations,' 'Theron and Aspasia,' &c., 1714-58.

HERVEY, JOHN, Lord Hervey of Ickworth, a poet and political writer, author of 'Memoirs of George II.,' only recently published, 1694-1743.

HERVEY, T. K., an English journalist, editor of London Athenæum, and miscellaneous writer of prose and verse, born 1814, died 1854.

HERY, THIERRY DE, a medical author, died 1599.

HESHUSIUS, T., a German divine, 1526-1588.

HESIOD, an ancient Greek poet of uncertain date, whose works are chiefly valuable so far as they illustrate the Orphic philosophy and the mythology of the ancients. The ascertained fragments of his writings are the 'Theogony,' or generation of the gods, and the 'Works and Days.' The latter is a kind of rude pastoral or calendar of agriculture, with occasional reflections. The fragment of another poem attributed to him, entitled 'The Shield of Hercules,' and containing an account of the most celebrated heroines of antiquity, is considered doubtful. [E.R.]

HESNAULT, J., a French poet, 17th century.

HESS, J. J., a Swiss theologian, 1761-1828.

HEUMAN, CHR. A., a German theologian, 1681-1764.

HEUN, CHARLES, a Prussian novelist, known by the assumed name of Clauren, died 1854, at an advanced age.

HEUSINGER, J. M., a German critic and philologist, 1690-1751. His nephew, JAS. FREDERIC, a philologist and classical scholar, 1717-1778.

HEVELIUS, JOHN, a celebrated astronomer of Dantzic, author of 'Machina Cœlestis,' 1611-1687.

HEVIN, P., a French juriconsult, 1621-1692.

HEYDEN, J. VANDER, a Dutch painter, 1637-1712.

HEWATT, ALEXANDER, the publisher of an Historical Account of South Carolina and Georgia, 1779.

HEWES, JOSEPH, one of the signers of the declaration of independence in 1776, and a patriot of the Revolution, was born in New Jersey in 1730, but at the age of thirty he removed to Edenton, North Carolina, and commenced the business of a merchant. In 1774, he was chosen a delegate to Congress. Died 1779, aged 49.

HEWSON, WILLIAM, a distinguished physiologist and anatomist, was born at Hexham, Northumberland, in 1739. He was a fellow of the Royal Society. Died 1774.

HEYLEN, PETER, an English historian and divine, was born in Oxfordshire in 1600. He wrote the 'Life of Charles I.,' 'History of St. George,' &c. Died 1662.

HEYM, J., a German lexicographer, 1759-1821.

HEYNE, CHRISTIAN GOTTLÖB, was born in 1729, at Chemnitz, in Saxony, where his father was a poor linen-weaver. His education was gained through struggles as severe and protracted as any that have ever been undergone by men of letters; and it was in the midst of great poverty that he was able, in 1755, to publish his edition of 'Tibullus,' the first work that made him known as a classical scholar. So obscure was his position long after this, that, when he was appointed to the professorship of eloquence at Gottingen on the recommendation of Ruhnken, it cost some trouble to discover where he was. Entering on his duties at Gottingen in 1763, he passed nearly fifty years in that university, with unwearied industry, distinguished and varied usefulness, and brilliant and increasing reputation. In

classical studies, his own peculiar department, he was especially noted for the fine spirit which he breathed into criticism, and for the richness of illustration which he threw on the ancient masterpieces of poetry from history and topography, and from the existing monuments of the fine arts. His 'Opuscula Academica' contains many admirable treatises; and there is a great value in the critical apparatus embodied in his editions of Virgil, Pindar, Homer, and Apollodorus. Heyne died in 1812. [W.S.]

HEYWARD, THOMAS, judge, one of the signers of the declaration of independence and a patriot of the Revolution, was born at St. Luke's, South Carolina, in 1746. Having studied law at the Temple in London, he practised that profession on his return to America. In 1775 he was chosen a delegate to Congress, and in 1778 he was appointed judge of the civil and criminal courts. In 1780, when Charleston fell into the hands of the British, he was taken prisoner, and sent to St. Augustine. In 1798 he retired from public life, and died in 1809, aged 63.

HEYWOOD, ELIZA, a novelist, 1693-1756.

HEYWOOD, JOHN, a dramatic poet of the age of Henry VIII., author of an apologue in verse, entitled 'The Parable of the Spider and the Fly,' and of some plays and epigrams, died 1565.

HEYWOOD, OLIVER, a nonconformist divine, 1629-1702.

HEYWOOD, THOMAS, an English actor and dramatist, author of 'A Woman Killed with Kindness,' and a great number of plays, of which the most part are lost, beginning of the 17th century.

HLERNE, URBAN, a Swedish natural philosopher, 1641-1724.

HIBBERT, GEORGE, a merchant of London, distinguished for his public spirit as one of the founders of the West India Docks, and as a public speaker and member of Parliament, 1757-1837.

HICKERINGILL, E., a military officer, afterwards in holy orders, known as a pamphleteer, 1630-1708.

HICKES, DR. GEORGE, a Saxon scholar and antiquarian writer, 1642-1715. JOHN, his brother, a nonconformist minister, executed as a traitor, 1685.

HICKS, FR., a classical editor, 1566-1630.

HICKS, W., a fifth monarchy man, 1620-1650.

HIDALGO, J. G., a Spanish artist, born 1656.

HIDALGO Y CASTILLA, DON MIGUEL, an ecclesiastic celebrated for his exertions in promoting the revolution in Mexico in 1809. Having much influence over the Creoles and Indians, and being joined by a body of the disaffected, he placed himself at their head, and for some time was successful, but at length being taken prisoner by the royalists, he was executed in 1811.

HIEROCLES, an eclectic philosopher, 5th cent.

HIEROCLES, a topographical writer, 6th cent.

HIEROCLES, a Greek grammarian, 7th century.

HIEROCLES OF BITHYNIA, governor of Alexandria, a writer against Christianity, and a great persecutor of the Christians in the time of Diocletian, 4th century.

HIERON, the *first* of the name, king or tyrant of Syracuse, 478-467 B.C.; the *second*, 269-215 B.C.

HIERONYMUS, grandson and successor of the preceding, murdered after reigning ten months, 214 B.C.

HIERONYMUS, ST. See JEROME.

HIFFERNAN, P., an Irish author, 1719-1777.

HIGDON, RALPH, an Eng. historian, died 1363.

HIGGINS, G., an antiquarian writer, 1771-1833.

HIGGINS, J., an editor and divine, 16th cent.

HIGGINSON, FRANCIS, first minister of Salem, Massachusetts, was a native of England, graduated at Emanuel College, Cambridge, and was appointed minister of a church in Leicester. After some time he became a nonconformist to the rites of the English Church, and thereby rendered himself amenable to ecclesiastical law. Fortunately for him about this time he received letters from the governor and company of Massachusetts inviting him to proceed with them to New England. He accordingly sailed in 1629, and on his arrival at Salem, he was appointed teacher, but in the following year he died, aged 42. He wrote a work entitled 'New England Plantation, or a Short and True Description of the Commodities and Discommodities of that country,' 1630.

HIGGONS, SIR THOMAS, an English ambassador and man of letters, 1624-1691. His younger son, BEVIL, a dramatist and historian, died 1735.

HIGGS, G., an English theologian, 1589-1659.

HIGHMORE, J., an English painter, 1692-1780.

HIGHMORE, NATHANIEL, a celebrated English anatomist and physiologist, 1613-1684.

HIGUERA, J. R., a Spanish Jesuit, 1538-1611.

HILARION, ST. a monastic founder, 292-372.

HILARY, a pope of Rome, suc. 461, died 467.

HILARY, ST., a bishop of Arles, 401-449.

HILARY, ST. (HILARIUS PICTAVIENSIS), was born at Poitiers in France, and became bishop of his native town about the year 350. Though he had been trained in paganism, and did not embrace Christianity till he had arrived at manhood, yet his convictions were founded on enlarged intelligence, and his life was spent in earnest, powerful, and successful support of Trinitarian orthodoxy against the innovations of Arianism. At the synod of Bessieres, 356, he so provoked the Arian deputies, that on their application to the emperor, Constantius, he was banished into Phrygia. Here he remained in exile about four years, and composed his principal works. But his uncompromising opposition to Asiatic Arianism so enraged his opponents, that they petitioned for his recall, and the champion returned in triumph to Poitiers, where he died in 367. Four years before his death he had impeached Auxentius, bishop of Milan, but the accused unexpectedly proved his orthodoxy face to face with his accuser before the emperor Valentinian, and Hilary was expelled from Milan as an enemy to the peace of the church. His principal works are—Twelve Books 'De Trinitate,' a 'Tract upon Synods,' and 'Two Addresses to Constantius,' one a petition, and the other a coarse invective. In his commentaries on the gospel of Matthew, and on the Psalms, the chief portion is taken from Origen. Jerome compares his style to the Rhone, not for its copiousness, but for its quickness. But it is rugged, verbose, elaborate, and occasionally obscure. The best edition is the Benedictine, improved by Maffei, Verona, 1730, 2 vols. folio. [J.E.]

HILDEBERT, an archbishop of Tours, 1057-1134.

HILDEBRAND, the proper name of Pope Gregory VII. See GREGORY.

HILDEBRAND, a Lombard king, 736-744.

HILDEBRAND, G. F., a German physician, 1754-1816.

HILDEBRAND, J., a Ger. theol., 1623-1691.

HILDEGARDE, SAINT, a German visionary, ab. of St. Rupert's Mt., on the Rhine, 1098-1130.

HILDERIC, a king of the Vandals, 523-530.

HILDERSHAM, a puritan divine, 1563-1631.

HILDIBALD, king of the Ostrogoths, 540-42.

HILKIAH, a high priest of the Jews, 7th c. B.C.

HILL, AARON, an English poet, 1685-1750.

HILL, ABRAHAM, an Eng. scholar, 1633-1721.

HILL, GEORGE, a Scottish divine, 1748-1820.

HILL, ISAAC, an American journalist, and active political partisan of the democratic party, was born in Cambridge, Massachusetts, but resided in New Hampshire. Died 1851, aged 63.

HILL, SIR JOHN, a miscellaneous writer, was born at Petersborough in 1716. Among his works are 'A System of Botany,' also 'Essays on Natural Philosophy,' &c. Died 1775.

HILL, JOSEPH, a lexicographer and antiquarian, 1625-1707.

HILL, SIR RICHARD, Bart., eldest brother of the celebrated Rowland Hill, known as a polemical writer, 1733-1808.

HILL, ROBERT, a self-taught Oriental scholar and critic, author of 'Remarks on Berkeley's Essay on Spirit,' &c., 1699-1777.

HILL, REV. ROWLAND, A.M., a popular and pious, though eccentric minister, was born at Hawkstone, Shropshire, in the year 1745. He was the sixth son of Sir Rowland Hill, Bart., of Hawkstone, in the parish of Hodnet. His views were early directed towards the ministry in connection with the Church of England; not, however, as a profession, but as affording him the best and most influential means of communicating to others those saving truths he felt of such vital interest and importance to his own soul. He was a very pious youth; and his strong impressions of religion were all the more remarkable that the higher classes generally in England at that time, were either indifferent to religion, or held most false and defective views as to the leading principles of Christianity. Sir Rowland's family were distinguished for the regard they cherished and exhibited for genuine piety. Richard, the eldest son, in particular, had early received serious impressions; and it was through his influence and correspondence that his younger brother, even while a scholar at Eton, was brought to attend to the one thing needful. From Eton, Rowland removed to Cambridge, and the principles which had been sown in his mind in Eton, acquired greater power and vitality during his residence at the university. He was a devoted and successful student, for his intense application to his studies appeared at his examination for his degree of bachelor of arts, and he carried off the palm over all his competitors by his superior acquirements in physical science, particularly in optics, mechanics, and astronomy. But his mind at the same time was ardently bent towards the ministry; and he began to exercise the sacred functions during his collegiate career, by not only holding meetings with some young friends of congenial views for prayer and mutual improvement, but even forming plans of Christian usefulness beyond the walls of the university. They visited, exhorted, and prayed in various parts of the town of Cambridge, particularly in the hovels of the poor and sick, and with the prisoners in the jail. Conduct, so much at variance with the propriety of established academic rules, drew down upon him and his friends, the indignation of the college authorities. Six of the young preachers, amongst whom were Whitfield and Beveridge, received sentence of expulsion from the university, and Hill was saved from a similar fate only by the weight of his family influence.—Rowland loved to itinerate, and he retained the same fondness for open-air preaching after he was ordained.

He was appointed to the parish of Kingston, Somersetshire, in 1773, and there in accordance with his favorite habits, he was instant in preaching almost every day in the week. The freshness and originality of his addresses attracted crowds to hear him. Nor was he admired by a vulgar and uneducated class only. Sheridan used to say, 'I often go to hear Rowland Hill, because his ideas come red-hot from the heart:' and Dean Milner, the church historian, was so affected by hearing one of his sermons, that he went to the vestry on the conclusion of the service and said, 'Mr. Hill, I felt to-day—'tis this *slapdash* preaching, say what they will, that does all the good.' Mr. Hill had a country house in Wales, where he erected a chapel, and was constantly engaged preaching throughout the neighborhood during his summer residence. His wife kept a note of his various engagements; and when announcing them from the pulpit, he used to look to her on naming every place to see if he was correct. And so much was he accustomed to confide in her accuracy, that he used to say at the breakfast table, 'Where do I preach to-day?' Many persons of rank and fortune having become his stated hearers, Surrey chapel was built for him in 1782, and in that chapel a vast congregation assembled every Sabbath. His eccentricities of manner, his quaintness of expression, his anecdotes, and even witticisms in the pulpit, were quite forgotten and overlooked by the regular frequenters of this place of worship in the rich vein of sterling piety and spiritual instruction that ran through the service. In 1798, Mr. Hill came to Scotland on the invitation of Robert Haldane, and preached to crowds in Edinburgh in the Circus and on the Calton Hill, as well as in various parts of the country. In 1824, he made another 'Gospel Tour,' as he called it, in Scotland, and after a brief stay, returned to his labors in Surrey chapel. He was a truly evangelical preacher, and he used to say, 'Were I to live my life over again, I would preach just the same.' He closed his life and labors on 11th April, 1833. [R.J.]

HILL, ROWLAND, Lord, a British general, distinguished in the late war, particularly in the peninsula, and at the battle of Waterloo, born 1772, appointed commander-in-chief 1828, created a viscount, and died 1842. Lord Hill was the son of Sir John Hill, who succeeded to the title of Sir Richard Hill, Bart., elder brother of him and of the celebrated minister of Surrey chapel.

HILL, SIR TH. NOEL, a younger brother of Lord Hill, known as a peninsular officer, 1784-1832.

HILLHOUSE, JAMES, an American lawyer and Revolutionist, was born in Conn., 1754. He fought in the Revolutionary battles, and shared in the Revolutionary councils. Died 1832.

HILLHOUSE, JAMES ABRAHAM, an eminent lawyer, was born in New London in 1729, graduated at Yale College in 1749, and was tutor from 1750 to 1756. Having afterward studied law, he practised in New Haven. Died 1775, aged 46.

HILLHOUSE, JAMES A., distinguished as a poet and miscellaneous writer, was a native of New Haven, Connecticut. Died 1619.

HILLHOUSE, WILLIAM, judge, was born in 1727, and was for fifty years a member of the legislature. He held the office of judge of the court of common pleas, and also judge of probate for forty years. He was one of the council of safety during the Revolutionary war. Died Jan., 1816, aged 87.

HILLEL, called 'the Elder' to distinguish him from the subject of the following notice, is regarded by Jewish writers as the most eminent among their ancient rabbis. He was born at Babylon, commence-

ment of the first century B.C., and when about 40 years of age removed to Jerusalem, where he became chief of the Sanhedrim, and lived to the extraordinary age of 120 years. He was the first to classify the oral or traditional laws, subsequently embodied in the Mishna, or first part of the Talmud, and the transmission of which is verified in the work itself, at the commencement of the treatise *Aboth* or 'Ethics of the Fathers.' The other portion of the Talmud, called 'The Gemara,' contains expositions of the Mishna; the latter, therefore, is really the text-book of rabbinical lore, and hence the importance of its arrangement in a comprehensive digest. Hillel is always spoken of with respect for his humanity and patience, as well as his profound wisdom as a moralist. See SHAMMAI. [E.R.]

HILLEL, 'the Younger,' lived in the time of Origen, who is said to have been acquainted with him, about the middle of the 3d century. He was a great reformer of the Jewish calendar, his arrangement of which was nearer by far to astronomical exactness than that of Julian, which remained in use among Christians until its reform by Pope Gregory. Hillel has the reputation, also, of reforming the equinoctial and solstitial periods, and leaving behind him a correct text of the Bible, which he wrote with his own hand, besides contributing to the Talmud. He bears the title of *Nasi*, or prince of the captivity, and there is a tradition that he was privately baptized before his death by the bishop of Tiberias. [E.R.]

HILLER, M., a Ger. Orientalist, 1647-1725.

HILLIARD, NICHOLAS, portrait painter and goldsmith to Queen Elizabeth. His best works are portraits of Her Majesty and Mary, Queen of Scots. Died 1619.

HILLIARD, TIMOTHY, minister of Cambridge, Mass., was born in New Hampshire in 1746, and graduated at Harvard College in 1764. In 1771 he was ordained minister of Barnstable, but was dismissed in 1783 at his own request, and installed minister at Cambridge. Died 1790.

HILPART, JOHN, a German divine, born 1627.

HILTON, WALTER, a monk of the Carthusian order in the 15th century, author of the 'Scale and Ladder of Perfection.'

HILTON, WILLIAM, R. A., an English historical painter, distinguished for his refined taste in design, and a harmonious and rich style of coloring, was born at Lincoln, 3d June, 1786, and died in London 30th December, 1839. He succeeded Fuseli in 1825 as keeper of the Royal Academy. Owing to the too great quantity, or bad quality of his vehicle, his pictures are already going to pieces. 'Serena,' and 'The Red Cross Knight,' presented to the National Gallery in 1841, is in too bad a condition to be exhibited. The morbid search after nostrums and glazing media, has been one of the most fatal obstructions to the establishment of a great school of painting in England.—(*Art Union Journal*, 1840.) [R.N.W.]

HILTZ, JOHN, a German architect, 15th century.

HIMERIUS, a Greek sophist, 4th century.

HIMLY, C., a German physician, 1772-1837.

HIMMEL, F. H., a Ger. musician, 1765-1804.

HINCHCLIFFE, JOHN, the son of a stable-keeper, rose to be bishop of Peterborough, 1731-94.

HINCKLEY, JOHN, an English theol., 1617-95.

HINCKLEY, THOMAS, the last governor of Plymouth, N. E., which office he was appointed to in 1680, and held, except when interrupted by Andros, till 1692, when the old colony was united to Massachusetts, was born in 1630, died in 1705, aged 75.

HINCMAR, archbishop of Rheims, known as a controversial and learned writer, 9th century.

HINDE, — M.D., physician to General Wolfe, and was present with him when he received his mortal wound on the Plains of Abraham, Sept. 13, 1759. He afterward removed to Virginia and practised extensively both in that State and Kentucky. Died 1829, aged 92.

HINDMARSH, ROBERT, a minister and controversial writer of the 'New Church,' author of 'A Seal on the Lips of Unitarians,' &c., died 1835.

HIPPARCHUS, a tyrant of Athens, 528-514 B.C.

HIPPARCHUS, the greatest astronomer of antiquity; or rather the founder of Astronomical Science. The dates of the birth and death of Hipparchus are lost; Ptolemy speaks of him as alive between 160 and 125 B.C.: neither do any of his writings remain, excepting the Commentary on Aratus,—a production of his youth. It has often been asserted that he observed at Alexandria; but the careful criticism of Delambre leaves no ground for such a supposition: he labored most probably in Bithynia; certainly at Rhodes. It is to Ptolemy that we owe our knowledge of Hipparchus, who in the fulness of his admiration applies to him the epithet—*φιλόπυρος καὶ φιλαλήθης* (the lover of labor and truth); nor do we think that his successor has ever done him injustice, or sought, as Delambre would insinuate, to absorb a part of his glory into his own. As a pure observer, Hipparchus was probably never surpassed. Of course he wrought with rude instruments, affected by large errors; but all that the observer himself had to do, was achieved with highest probity and sagacity, and shaped by a rare philosophic spirit. To collect and describe facts *exactly*, is a service always valuable to Science; more especially when Inquiry is in its infancy: but Hipparchus added the loftier faculty of knowing the precise description of facts, which ought to be observed—the facts pregnant with laws; and he succeeded, therefore, in laying the sure foundation of Astronomical Theory. The Ancients, it is well known, imagined the Earth motionless, and that all celestial bodies move *uniformly* in *circles* around it; but, as motions had been detected in the sky which are not uniform, it became the question, how, on the ground of these suppositions, can the observed irregularities be explained? A very fertile idea had been started by Plato and Eudoxus, that a heavenly body moving uniformly on a small circle, might be carried round the earth by a larger circle; and that apparent irregularities, would issue from the combination of these uniform motions, (See article PTOLEMY).—Hipparchus appropriated the idea, and *realized* it; *i. e.* he laid down the actual machinery which would account for the precise irregularities observed. In this way he constructed a theory of the Sun and Moon; and originated that refined scheme which endured until the period of Copernicus. Knowing where to stop as well as how far to venture, he only collected materials for the Planetary Theory,—afterwards completed by Ptolemy. We owe besides, to this great Observer the discovery of the *Precession of the Equinoxes*—a fact essential to a knowledge of the motions of the Fixed Stars: he may be said to have invented Trigonometry, plane and spherical: and to have originated our graphical Geography. The reign of Induction in Physical Science properly began with Hipparchus. [J.P.N.]

HIPPASUS, a Pythagorean philos., 5th c. B.C.

HIPPIAS, an Athenian prince, killed 490 B.C.

HIPPIAS OF ELIS, a sophist, 5th century B.C.

HIPPISLEY, SIR J. C., a magistr., 1765-1825.

HIPPO, a Pythagorean philoso., 5th century B.C.

HIPPOCRATES, a Gr. geometrician, 500 B.C.

HIPPOCRATES. A name common to at least four physicians of antiquity, but generally reserved for Hippocrates the 2d, who was in many respects the most celebrated physician of ancient or modern times, and to whom the title of 'Father of Medicine' has been applied. He was the son of Heraclides, a physician of Cos, in which island he was born, in the year 460 B.C. His mother's name was Phænarete, by race a Heracleid, while his father belonged to the Asclepiadæ, as the descendants of Esculapius were called. His ancestors for generations had resided in Cos, where they all seem to have practised the healing art; but little is known that can be relied upon of the incidents of his own life, and what we have to say of him must be therefore scanty and unsatisfactory.—Hippocrates received his elementary medical education from his father, and subsequently studied under Herodicus, a physician of Selymbria in Thrace, who was one of the first persons to apply gymnastic exercises to the cure and prevention of diseases; and obtained his instructions in general science and philosophy from Gorgias of Leontini, in Sicily, a distinguished sophist and orator of those times, who would appear to have been the brother of Herodicus. The period at which he lived was also favorable to the development of his powers, for he was the contemporary of Socrates, Plato, Pericles, Herodotus, and Thucydides; and we may perhaps attribute to this circumstance, as well as to the complete general and professional education he had received, the purity and elegance of his style. On the death of his father he left Cos, and travelled for twelve years through Greece and Asia Minor, passing much of his time in Macedonia, Thrace, and Thessaly; but as dates are wholly wanting, it is impossible to say in what years of his life these travels were performed. The same uncertainty attaches itself to all the subsequent movements of his life, nor is it possible to determine whether he lived permanently in Cos, the medical school of which he raised to the highest pitch of eminence, or whether he selected some city of extra-Peloponnesian Greece as his fixed place of abode. He died at Larissa, in Thessaly, though in what year is unknown, as his age at the time of his death has been variously stated at eighty-five, ninety, one hundred and four, and one hundred and nine years. He left two sons, Thessalus and Dracon, both of whom were medical men; and a daughter whose name has not been preserved, but who married Polybus, also a medical man.—An account of the medical system of Hippocrates would be unsuited to a work of this kind, but we may state generally that he was a diligent and sagacious observer of nature, and that his practice was regulated very much by the indications which a disease presented; hence he has been considered the founder of the dogmatists, or rationalists, in medicine, a sect of great antiquity, and which is not perhaps wholly extinct at this day. That the humoral pathology, which maintained its ascendancy in Europe for twenty centuries, was originally derived from his theory of the living fluids, which he divided into blood, phlegm, black bile, and yellow bile, is certain; and there can be no doubt that many of his opinions on climate, diet, individual temperament, and the constitution of the atmosphere in the four different seasons of the year, influenced the belief of the medical world down even to the age of Sydenham. He knew little or nothing of anatomy, and was not only unacquainted with the circulation of the blood, but with the distinction

between arteries and veins, which he arranges in the same class with nerves and tendons; but in spite of this his fame was great, and numerous stories were invented after his death to illustrate his extraordinary celebrity. Thus he was said to have stayed the plague of Athens, though Thucydides, who has described it, and was himself a sufferer from it, makes no mention of him whatever. It has been also recorded that he was solicited by the inhabitants of Abdera to visit their city and to cure Democritus the philosopher of insanity, and there is extant a letter which is urged as a proof of this, though it be a manifest forgery; and that nothing might be wanting to impress upon posterity a sense of his universal authority, it is related of him that he refused an invitation from Artaxerxes Longimanus, king of Persia, to visit that country, together with a large sum of money, but that he declined both because Artaxerxes was the enemy of Greece. These and similar stories are now disregarded, and are looked upon as the fictions of a subsequent age.—Hippocrates wrote in the Ionic dialect of the Greek, and is considered by modern scholars a classical authority in that tongue. His works are generally published in two folio volumes with Latin translations; but there is considerable difference of opinion among critics as to what properly belongs to him in the Hippocratic collection, and what should be assigned to others, probably members of his own family. Those treatises which are received as the genuine compositions of Hippocrates are—1. The 1st and 3d Books of the Epidemics; II. The Prognostics; III. The Aphorisms; IV. The 1st and 2d Books of the Predictions; V. The Treatise on Air, Water, and Places; VI. The Regimen in Acute Diseases; VII. The Treatise on Wounds of the Head. [J.M.C.]

HIPPOLYTUS. Our space does not suffice to recount the numerous and contradictory theories which have been formed regarding this remarkable man. Eusebius, Jerome, Gelasius, and Photius, in earlier times, have referred to him, but with an indistinct and inaccurate knowledge of him; the Benedictine monks could not dispel the obscurity which hung over him, and the hypotheses of Baronius, Tillemont, Fabricius, Le Moyne, Basnage, Cave, and others, still left the subject in mist and confusion. A very common opinion prevailed that he was a bishop in the East, and specially in some part of Arabia. It is now ascertained that he was a disciple of Irenæus, was a bishop of Portus Romanus—the harbor of Rome, after the reign of Trajan; and suffered martyrdom under Maximus about the year 236. His statue was accidentally dug up in 1551, and on its sides were inscribed a list of his works and the Paschal Cycle. All this is confirmatory of the description given of him by the Christian poet Prudentius. His works, so called, were published by Fabricius, in 2 vols. folio, and by Gallandi in the second volume of his *Bibliotheca Patrum*. Hippolytus, as attested by all antiquity, was a voluminous writer on a vast variety of subjects, the majority of which were of a polemical character. A list of his polemical, doctrinal, historical, and exegetical works, the greater part of which are lost, will be found in the first volume of 'Bunsen's Hippolytus and his Age.' A MS. was brought from Mount Athos in 1842, which was called a treatise 'On all Heresies,' and was deposited in the royal library in Paris. In 1846, M. Millar having looked into the book, considered it to be a lost work of Origen, and had it printed in 1851 by the Oxford University Press, under the title of 'Origen Philosophumena.' The Chevalier Bunsen eagerly read the publication, and brought to

bear upon it the peculiar sageness and tact of his critical erudition. The result is, that he has proved that the treatise belonged not to Origen as its author but to Hippolytus. In the course of his discussions he has thrown great light on the times and creed of Hippolytus, as well as upon the theology and government of the Roman Church in the times of Severus and Commodus. Hippolytus was more a man of labor than of original thought; rather an honest and learned compiler than a writer of independent vigor. [J.E.]

HITCHCOCK, ENOS, D.D., minister of Providence, Rhode Island, was born in Springfield, Mass., graduated at Harvard College in 1767, and was ordained a colleague of Mr. Chipman, pastor of the second church of Beverly, 1771. In 1780, at his own request, he was dismissed from this charge, and became chaplain in the American army. In 1783, he was chosen minister of Providence. He bequeathed at his death \$2,500 for the establishment of a fund for the support of the ministry in his society. Died 1803, aged 58.

HJELM, P. J., a Swed. mineralog., 1746-1813.

HOADLEY, BENJAMIN, a prelate of the English Church, and a chief of the party whose principles were brought into fashion by the revolution of 1688, and the accession of the house of Hanover, was born at Westerham, in Kent, in 1676, and died at his palace in Chelsea, 1761. His ability as a controversialist, and his love of civil and religious liberty, became conspicuous in the strife of parties at the beginning of the last century, when he entered the field against Bishop Atterbury, and the High Church party. His share in this debate, and its intimate connection with the settlement of the new dynasty and the liberties of the country, was recognized by the House of Commons, who addressed the queen in his favor, and thus paved the way for his rapid promotion to the sees of Bangor, Hereford, Salisbury, and Winchester, which he held in succession. In 1717, while bishop of Bangor, he preached the sermon before the king which gave rise to the famous Bangorian controversy, in which Hoadley was assailed by the chiefs of the non-jurors, and with most effect by William Law, the doughty champion of authority, both in church and state. This controversy was brought to a close about 1720, without conciliating either the high church party, on the one hand, or the dissenters on the other, and without adding much to Hoadley's character for consistency. With a fine intellect, he was constitutionally compliant and easy, and seems to have been wanting in fidelity to his conscientious convictions. In a word, it is most difficult to justify the career of such a man on any other principles than those of a worldly policy, and of that preference for the good and the true which may often be indulged in as a kind of luxury. Besides his numerous controversial publications, Hoadley was author of 'An Account of the Life, Writings, and Character of Dr. Samuel Clarke,' prefixed to the posthumous works of the latter, published 1732: 'A Plain Account of the Nature and End of

the Sacrament of the Lord's Supper,' 1735; and a 'Letter' Addressed to Clement Chevalier, in 1756. [E.R.]

HOADLEY, BENJAMIN, eldest son of the preceding, was a physician and philosophical writer. He assisted Hogarth in composing his 'Analysis of Beauty,' and is well known as the author of a comedy entitled 'The Suspicious Husband,' 1706-1757.

HOADLEY, JOHN, the youngest son of Bishop Hoadley, was educated for the law, but finally entered the church, and enjoyed several valuable preferments. He is the author of several dramatic works and poems, 1711-1776.

HOAI-TSONG, an emperor of China, 1627-44.

HOAR, LEONARD, M.D., president of Harvard College, was educated at that Seminary in 1650, completed his studies at the University of Cambridge, where he took the degree of M.D. He afterward became minister of Wensted in Sussex, but was dismissed in 1662 as a nonconformist. In 1672 he returned to America, and was shortly after appointed president of Harvard College. Died November 28, 1675, aged 45 years.

HOARE, P., F.S.A., a dram. au., 1764-1834.

HOARE, SIR RICHARD COLT, a distinguished topographer, was born in 1758. He wrote a work entitled 'Ancient and Modern History of Wiltshire,' which entitles him to rank among the first local historians. Died 1838.

HOBART, JOHN SLOSS, judge of the district court of New York, was the son of the Rev. Noah Hobart of Connecticut. He held some responsible situations in New York during the revolutionary war, and was one of the first three judges of the supreme court appointed at its termination. He held this office for many years. In 1798 he was chosen a United States senator. Died 1805, aged 66.

HOBART, JOHN HENRY, D.D., bishop of New York, and professor of theology and eloquence in the theological seminary, was born in 1776, and having graduated at Princeton College in 1793, he was appointed tutor in 1796. He was ordained in 1798, and was settled at Perkiomen near Philadelphia, but soon removed to Christ Church, New Brunswick. After remaining here for some months, he was chosen assistant minister of Trinity Church, New York, and in 1811 was elected assistant bishop, and in 1816 became diocesan of that state. Died at Auburn, September 12, 1820, aged 54.

HOBBAMOC, an Indian, was chief captain of Massasoit. He removed to Plymouth in 1621, and lived in friendship with the settlers. When Captain Standish marched against Corbitant at Namasket, in 1623, Hobbamoc was his guide, and fought gallantly against the enemy.

HOBBEMA, M., a Dutch painter, 1611-1699.

HOBBES, THOMAS, born at Malmesbury on the 5th April, 1588, died on 4th December, 1679:—'a great name in philosophy, on account both of the value of what he taught and the extraordinary impulse which he communicated to the spirit of free inquiry in Europe.' Criticism of Hobbes's speculations is here beyond our reach: the statement of a few facts regarding him will enable the student to judge whether the high eulogy just quoted, probably surpasses his deserts. So soon as Hobbes left Magdalen Hall, Oxford, we find those connections beginning which bound him, during a long life, in amity and confidence with the best families of England. Tutor to Lord Cavendish heir of the princely house of Devonshire, he travelled with him through France and

Italy. Death struck the pupil only two years after the demise of his father the earl of Devonshire. Hobbes, stung with grief, travelled again; but returned in 1631, at the entreaties of the dowager countess, to teach the young earl, then only thirteen. An inmate of this noble house, which he virtually continued until his own decease, he mingled with all their extensive and distinguished circle; and lived in intercourse with the most celebrated literary men of his own and other nations. Kennet in his 'Memoirs of the Cavendish Family' offers an interesting glimpse of the philosopher's daily life. He dedicated the morning to exercise; the afternoon to study. Having climbed a hill and breakfasted, he went his rounds in the family, waiting also on distinguished strangers, and conversing on the themes which occupied him. At twelve o'clock he dined unceremoniously alone, and then returned to his study, where, with the companionship of his pipe, he devoted the hours to meditation and writing. The subjects occupying him were the most solemn that engage the human mind; and for the first time had they engrossed the thoughts of a great man in England. Loving truth, in the sense of coveting the grounds of it—not in that of accepting without grounds, and averring without understanding—he sought in an analysis of the human Intellect and Affections, the basis of man's duties, personal, social, and political; in other words, he longed to discern his place in the Universe as a reasonable being, and like a brave and conscientious man to assert it. The enterprise was novel, bold, and hazardous: novel, for in psychology he had not one predecessor: hazardous, because no mind, save one of the first order, would have preserved the necessary freedom, under pressure of the enthroned and inveterate Ignorance amid which he lived, and of influences insidious and therefore more alarming, springing from his social attachments. But Hobbes surmounted all dangers. It can be said of him with perfect truth, that neither in his life nor writings, did he fail in integrity: of effect on him of circumstances we discern not a trace: he thought as a freeman, irrespective of seductions or frowns; nay,—the chances of life having given him Charles II. as a temporary pupil—he perilled the royal favor, as if he made no sacrifice; to the honor of Charles be it recorded, that the philosopher's uprightness did not cost him the monarch's regard. It is easy to see that a long life of such a kind, thrown into the midst of those ages, could be no welcome apparition; nor need Cromwell himself have dreaded a more unjust contemporary appreciation than Hobbes: but it is our grief and shame, that contemporary slander has its voices still; that men in modern times who never read one page of this illustrious thinker, but who desire their criticisms to be palatable, persist in making him a bugbear. Surely something more than evil lay at the root of his extraordinary power. No man ever excited a wider and more lasting commotion. Clarendon, Cudworth, Bramhall, Tennison, Harrington, Henry More,—nay, in the words of Warburton—'every young Churchman Militant, would try his arms in thundering on Hobbes's steel cap.' Now as then, men will repudiate many of his opinions: that searcher for Truth had no helps, and he erred like others. Few thoughts are pure—unaffected by much that will perish; but beneath all, abides the Thinker,—a veritable force of Nature, formidable, incorruptible, fresh still after all these centuries, gnarled it may be like an English oak, but also with roots profound—holding by the Earth, while slighter generations fall and disappear.

Hobbes's style is a model of the didactic; clear and deep as the pen of an engraver. Hallam says truly, that one could no more change a word or expression in it, than in the exactest mathematic formula. It does its duty in distinctly expressing distinct thought; and duty alone is its aim. No more acceptable present has recently been made to the student of English philosophy and literature, than the superb edition of Hobbes's works in 16 volumes 8vo. which we owe to Sir William Molesworth.

HOCLEVE, THOMAS, an English poet, 15th ct.

HOCHE. LAZARE HOCHÉ was born in 1768 at Montreuil, near Versailles, where his father was keeper of the royal stag-hounds. Hoche entered the army at the age of sixteen, and studied the military sciences with great diligence. He was a zealous supporter of the republican principles which the French revolution called into activity, and he rose rapidly into distinction in the wars against the allied sovereigns. He behaved with peculiar skill and courage at the siege of Dunkirk in 1793, and materially aided General Sonham in defending that city from the English army under the duke of York. He then received the command of the army of the Moselle, and on the 26th and 27th December, 1793, gained an important victory at Weissenburg. He now fell under the suspicion of Robespierre and St. Just. He was recalled from his command and sent to prison. The overthrow of Robespierre on the 9th Thermidor, saved Hoche from the guillotine; and he was placed at the head of one of the armies of the Convention, that acted against the Vendéans in the sanguinary civil war by which the west of France was desolated. Hoche here displayed the qualities of a statesman, as well as those of a general. He reorganized his own army, which had become under his predecessors as disorderly as it was ferocious. He practised, and he made his troops practise, humanity and good faith towards the peasantry. He won the confidence of the Vendean priests; and by these means, and by acting with the greatest skill and energy against such royalist bands as held out against him, Hoche accomplished the pacification of La Vendée and Brittany; an achievement more difficult, and more truly glorious than the most showy successes of the other French generals of the revolutionary wars. In 1795 Hoche defeated at Quiberon an attempt made by the French emigrants, with the aid of the English, to renew the war in Brittany; and in 1796 he was placed at the head of the expedition by which the French directory designed to drive the English from Ireland, and make her a sister republic of France. Hoche sailed on the 15th December, 1796, from Brest with a fleet of forty-three sail, and an army nearly 15,000 strong; but this noble armament was shattered by storms, and the frigate on board of which Hoche himself had embarked, was separated from the rest of the squadron, and with difficulty regained the French coast. In 1797 Hoche received the command of the army of the Sambre and the Meuse, and prepared to invade Germany, and to strike as deep blows against Austria

in her western provinces, as Buonaparte was then dealing to her in the south. Hoche defeated the Austrians at Heffendorf, and was on the point of capturing his opponent, General Kray, and the whole army of the imperialists, when he was checked in the mid career of success by the news of the pacification which Buonaparte and the Archduke Charles had agreed on at Lioben.—Hoche died in 1797 after a short illness, at the early age of thirty-three. Many attributed his death to poison, but there seems to have been no ground for these suspicions. He was not only one of the bravest soldiers and most skilful generals that the French revolution brought forward, but he was also an accomplished statesman, a sincere patriot, and a man of honor, generosity, and integrity. Napoleon, in speaking of him at St. Helena, truly said,—‘Had Hoche lived, I must have subdued him, or he would have subdued me.’ Unfortunately for France the chance of her being saved by Hoche from Napoleon’s despotism, was taken from her by the premature death of the best of the heroes of the republic. HOER, ANDREW, was chief of the Tyrolese in their heroic war against the French and Bavarians in 1809. The Tyrol had been ceded to Bavaria by Austria at the peace of Presburg. But the Bavarians and the French allies had treated with insult and injury the ancient rights and usages of the Tyrolese, which their Austrian sovereign had always respected. Hence the feeling of loyalty to the Austrian emperor was fervent in the Tyrol; and when Austria renewed war with France in 1809, the Tyrolese rose almost to a man in her cause. These brave mountaineers chose Hofer as their generalissimo. Hofer was at this time about forty-two years of age, and kept an inn in the village of Passayer. He showed himself well worthy of his countrymen’s confidence. Under his command the Tyrolese gave the French and Bavarian troops repeated and severe defeats, and for a time expelled them from the whole of the Tyrol. Hofer now acted as viceroy for the Austrian emperor; and throughout his career he was as eminent for moderation and humanity, as for intelligence and valor. When Austria capitulated to Napoleon by the treaty of Schönbrun, in October, 1809, she again ceded the Tyrol to Bavaria; and the Tyrolese were ordered to submit to their beaten and bitterest enemies as their lawful masters. They resisted gallantly; and it was only after repeated battles that the overwhelming armies

of French, Saxons, and Bavarians, which were now poured into the Tyrol, succeeded in quelling the brave mountaineers. Hofer for some time escaped the pursuit of his enemies, but he was at last captured on the 27th January, 1810. He was immediately sent to Mantua for trial before one of Napoleon’s military tribunals. He was condemned to death, and ordered to be shot within twenty-four hours. He met his fate as a good Christian and a brave soldier. The spot on the bastion at Mantua, where he fell, is still visited as a holy place by his countrymen, who cherish with just pride the memory of their hero-martyr. [E.S.C.]

HOFLAND, MRS. This popular authoress was the daughter of Mr. Robert Wreaks, a manufacturer of Sheffield, where she was born in 1770, and where, at the age of twenty-six, she was married to her first husband, Mr. Hoole. That gentleman dying two years afterwards, left her in embarrassed circumstances, and she published a volume of poems by subscription, with the proceeds of which she opened a school at Harrowgate, where she commenced the series of works which have rendered her name so popular, and effected so much good among young people. In 1808, she was married to Mr. Hofland, an admired landscape painter, and the year following she removed to London with him. In a few years, the fame of Mrs. Hofland was so well established that Queen Charlotte became her unsolicited patroness, and 'The Son a Genius,' published in 1813, was translated into several of the continental languages. The works of Mrs. Hofland are chiefly in the form of novels, or of contributions to the magazines and annuals, but they are all marked by her desire to promote the improvement and elevation of character, and we have the testimony of Mr. and Miss Edgeworth, that no other book in their time had effected so much good in Ireland, as the novel just mentioned. Mrs. Hofland died in 1844, as justly esteemed for her domestic virtues, her happy temper, and her conversational powers, as for the talents which have rendered her name familiar to the readers of English literature. HOFLAND, THOMAS CHRISTOPHER, a distinguished landscape painter, famous for his lake scenery and classic subjects, 1777–1843.

HOGARTH, WILLIAM, was born in London 10th December, 1697; he was apprenticed at an early age to Gamble, a silversmith, but at the expiration of his term in 1718, he took to engraving in copper for the booksellers. In 1730 he married the only daughter of Sir James Thornhill, against her father's consent, and set up as a portrait painter with considerable success. He now commenced his remarkable series of satirical paintings reflecting on the social abuses of his time:—The 'Harlot's Progress' in

[Hogarth's House.]

1734; the 'Rake's Progress' in 1735; and the 'Marriage à la Mode' in 1745, now in the National Gallery. In 1753 he appeared as an author in his 'Analysis of Beauty, written with a View of Fixing the Fluctuating Ideas of Taste.' In 1757 he was appointed serjeant painter to the king: he died in London, 26th October, 1764, and was buried at Chiswick. Hogarth was a good painter as well as a great satirist.—(Nichols, *Biographical Anecdotes*, &c., 1781–1782; Ireland, *Hogarth Illustrated*, Boydell, 1791.)

HOGGE, MOSES, D.D., president of Hampden Sidney College, Virginia, died in 1820, aged 60. His son, SAUMEL DAVIES HOGGE, was professor of natural sciences at the Ohio University; died 1826.

HOGENDORP, G. C. VON, a Dutch statesman, who greatly promoted the return of the prince of Orange by the insurrection which he excited, 1814. His brother, THIERRY, a general and minister of war under Louis Buonaparte, 1761–1830.

[Birth-place of James Hogg.]

HOGG, JAMES, the Ettrick Shepherd, claimed—erroneously it is said—to have been born on the 25th of January (Burns's birth-day), 1772. He belonged to the vale of Ettrick, in Selkirkshire, where he followed the pastoral occupation of his ancestors. His first published song, 'Donald Macdonald,' acquired extensive popularity. After several successful literary efforts, the most considerable of which was a volume of ballads called 'The Mountain Minstrel,' Hogg, who had failed in sundry sheep-farming speculations, removed to Edinburgh in 1810, with the view of living by his wits. He there published a volume of songs, 'The Forest Minstrel,' and conducted a periodical called 'The Spy,' which existed for about a year. It was not, however, until the appearance of 'The Queen's Wake,' in 1813, that he became greatly distinguished as an author. Besides 'The Pilgrims of the Sun,' 'Queen Hynde,' and other poetical works, Hogg wrote numerous tales and novels, few of which are now much read. He was on terms of friendship with Scott, Wilson, and other literary magnates of Edinburgh, and the manner in which he was made to figure in the celebrated 'Noctes' of Blackwood—although sometimes complained of by himself—contributed not a little to his fame. With less masculine sense than Burns, and far inferior in tender and passionate earnestness, he yet possessed a higher creative fancy; and many of his pieces, such as 'Bonny Kilmeny,' are marked by a certain wild and dreamy fascination, unlike anything else with which we are acquainted. Hogg spent his latter years at Altrive, on the Yarrow, where he died on the 21st November, 1835. [J.H.]

HOHENLOHE, ALEXANDER LEOPOLD, prince of, and bishop of Sardica, celebrated for the surprising cures effected by him, was born in the principality in Hohenlohe 1794, and died at Crosswaradin in Hungary 1849. The mother of the young prince was a woman of remarkable piety, and being left a widow when he was only two years of age, she had the entire control of his education. The religious habits induced upon him at home were confirmed by his attachment to the Jesuits when he went to Rome to complete his studies, and he at length embraced

the ecclesiastical profession with the enthusiasm of a saint of the middle ages. He commenced his duties at Bamberg and Munich 1817, and his preaching, it is said, drew tears from the most insensible, and brought the most hardened to repentance. In 1821 the rumors of his miraculous power of healing began to spread abroad, and it is remarkable that his cures were chiefly effected by prayer, and that many of them are said to have been performed at a distance with as much effect as under his own hand. Space is not afforded us to recite particular instances, but he gave sight to the blind, hearing to the deaf, speech to the dumb, and caused the lame to walk. The derision which marks the recital of these facts by biographers who cannot dispute them, only proves their own want of that living faith and fervid charity which was the secret of the success of Prince Hohenlohe. The flippant explanation of such phenomena by the sudden tension of the spirit, the 'force of imagination,' or by other kinds of mental impressions, is mere verbiage, unless it be understood that the spirit is also *substance*, as implied by Lord Bacon, who writes: 'There is the possibility of an action of one person upon another by the force of the imagination of one of those two persons; because as one body receives the action of another body, so, one spirit is adapted to receive the action of another spirit;' which agrees with what Dr. Heylin declares of touching for the scrofula, that he has 'Seen children brought before the king—some hanging at their mothers' breasts, and others in the arms of their nurses, all touched and cured.' There is every reason to believe that the cures of Prince Hohenlohe were magnetic healings, rendered doubly powerful by the religious spirit associated with them; and that the substantive operation is the same in ordinary magnetism and in the cure of disease by faith, with a distinction which is more clearly traced in the article MESMER. It is no disparagement of the mere facts in this case, that they were eagerly promulgated, and in some particular instances, perhaps, exaggerated by the Jesuits, whose re-establishment was greatly aided by them. Whether this 'new Xavier' lost his power, or chose to exercise it in private after the attacks that were made upon him by the sceptics is not known, but the fame of his performances had died away many years before his death. Prince Hohenlohe is the author of several devotional treatises published between 1820–30.

HOHENLOHE, L. C. F. LEOPOLD, prince of, one of the most ardent enemies of the French revolution, in whose principality the emigrant nobles were permitted to organize their armies, and who furnished them with two auxiliary regiments, 1731–99. His son, E. ALOYS JOACHIM, distinguished in the same line of policy, and a marshal of France under Louis XVIII., died 1829.

HOHENLOHE-INGELFINGEN, FREDER'K LOU., prince of, a distinguished general in the wars of the French revolution, and commander of the Prussian and Saxon army defeated at Jena, 1746–1818.

HOHENLOHE-KIRCHBERG, prince of, a general of artillery in the service of Austria, died commanding the army on the Rhine, 1796.

HOLBACH, PAUL THIERRY, Baron Von, an eminent mineralogist and natural philosopher, was born at Heidelberg in the Palatinate in 1723. He resided in Paris, and was a contributor to the *Encyclopédie*. Died 1789.

HOLBEIN, HANS, or JOHANNES, was born at Augsburg in 1498, his father and grandfather of the same names, being also natives of that city; the

father, however, when Hans was about seventeen or eighteen years old only, settled in Basle in Switzerland, apparently in 1519. The celebrated Erasmus is said to have been one of the first to appreciate young Holbein, and an unauthenticated story is told that the earl of Arundel, passing through Basle, recommended him to try his fortune in England. He, however, finally made the visit to England to escape the ill-temper of his wife: he came to London in 1526, bringing letters from Erasmus to Sir Thomas More, who ultimately introduced Holbein to Henry VIII., and he became that king's favorite painter, and is not the least glory of his reign. He revisited Basle in 1538, and the municipality of the town awarded him an annuity of fifty florins for two years, with the hope apparently of retaining him there, but he returned to London, where he died in 1554.—Holbein's genuine works are doubtless very numerous, but, as Walpole says, 'as always happens to a real genius, he has been complimented with a thousand wretched performances that were unworthy of him.' His style is manly and correct, but hard and formal; the character, however, and individuality of many of his portraits, are evidently exact and masterly. He painted some religious and historical pieces; his masterpiece is perhaps the 'Family of the Burgomaster, Meyer, now in the Gallery of Dresden: the father and sons on one side, and the mother and daughters on the other, are kneeling before the Virgin, who holds a dead or sick child in her arms, apparently one of the family. Holbein is also the author of a very celebrated series of designs, known as the 'Triumph of Death,' cut in wood and first published at Lyons in 1538; afterwards copied by Hollar and others.—(Walpole, *Anecdotes of Painting*, &c., ed. Wornum; Hegner, *Hans Holbein der Jungere*, Berlin, 1827; Passavant, *Kunstblatt*, 1846. Nos. 45, 46.) [R.N.W.]

HOLBERG, LOUIS or LUDWIG, Baron de, a dramatic writer, was born at Bergen, Norway, in 1684. He travelled through several countries of Europe, and on his return to his native land, raised himself to affluence by his literary productions. He wrote 'An Universal History;' 'Parallel Lives of Illustrious Men and Women.' Died 1754.

HOLBOURNE, SIR R., a writer on law, d. 1647.

HOLBROOK, ABIAH, a schoolmaster of Boston, celebrated for his perfection in penmanship, a specimen of which is to be seen at the library of Harvard College. Died 1769, aged 50.

HOLCROFT, THOMAS, a miscellaneous writer and translator, best known for his dramatic works and translations from the French, 1744–1809.

HOLDEN, H., a Roman Catholic divine, 1596–1662.

HOLDEN, SAMUEL, a benefactor of the province of Massachusetts, having given nearly £5,000 for promoting the gospel and other charities. Died in London in 1740. His widow contributed largely for similar purposes.

HOLDER, W., a learned divine of the Church of England, known also as a writer on music, and one of the teachers of Sir Christopher Wren, died 1697.

HOLDERLIN, F., a German poet, 1770–1836.

HOLDSWORTH, E., a class. trans., 1688–1746.

HOLDSWORTH, OLDSWORTH, or OLDISWORTH, RICHARD, a learned divine, and adherent of King Charles, whose execution is thought to have hastened his death, 1590–1649.

HOLE, RICHARD, an English poet, 1802.

HOLINSHEAD, or HOLLYNSHEAD, RAPHAEL, author of the famous *Chronicles* known by his name, which comprises a history and description of

England, Scotland, and Ireland, first published in 1577, and continued after his death by Stowe. Very little is known of his history, but he is supposed to have been Steward to an English gentleman. He died about 1580.

**HOLKAR.** Three Mahratta princes of this name have acquired a distinguished place in the history of India. 1. **MOLHAN RAOU HOLKAR**, distinguished in Portuguese and Affghan warfare, died 1765. 2. **TAKOUDJY**, or **TUCKAGEE**, **HOLKAR**, the successor of the preceding, distinguished in many wars with the English, and for the introduction of the European discipline into his army, died 1797. 3. **DJESWANT RAOU**, or **JESWUNT RAO HOLKAR**, third son of Takoudjy, who maintained a war with the Marquis Wellesley in 1804, and died, after having been insane three years, in 1811. The latter was succeeded by his son, **MULKAR RAO**, and in 1818 the Mahratta power was finally overthrown.

**HOLL**, **FR. XAVIER**, a Germ. canon., 1720–1784.

**HOLLAND**, **HENRY**, first Lord. See Fox.

**HOLLAND**, **HENRY RICHARD VASSAL FOX**, Lord, a British statesman, was born on 21st November, 1773. His claim to remembrance depends more on the respect and affection of his party and his personal friends than on public fame. As the son of an influential statesman, and the nephew of Charles Fox, he had an early opportunity of practically knowing political life, and mingling in public business. A considerable portion of his youth was spent abroad, and acquiring a partiality for Spain, he was mainly instrumental, by translations and other efforts, in exciting a taste for Spanish literature in Britain. He took his place in the House of Lords two years before the commencement of the present century. Save for the short period of the ministry of 1806 connected with his uncle's name, he was in the opposition until the formation of the reform ministry of 1830. He was a stanch Whig, sometimes standing almost alone, and recording frequent protests against overwhelming majorities,—for the great body of his political associates were in the House of Commons. He was as steady in his personal as in his political attachments, and was almost worshipped by a wide social circle of the first men of his age. In his classic mansion of Holland House, his easy and munificent hospitality was of great moment in uniting and strengthening his party. He joined the cabinet of 1830 as chancellor of the duchy of Lancaster. He died on 22d October, 1840. [J.H.B.]

**HOLLAND**, **SIR N.**, a painter, died 1811.

**HOLLAND**, **PHILEMON**, a classical translator, 1551–1636. His son, **HENRY**, a bookseller and editor, date unknown.

**HOLLAR**, or **HOLLAND**, **WENCESLAUS**, a Bohemian engraver, celebrated for his portraits of women and of animals, &c., 1607–1677.

**HOLLENBACK**, **MATTHIAS**, judge, was born in 1755. He served as a lieutenant in the American army during the Revolution, and afterwards practised law. Died 1829, aged 76.

**HOLLES**, **DENZIL**, Lord, an English diplomatist and member of the Long Parliament, in which he distinguished himself by his opposition to the arbitrary measures of the government. He was one of the five demanded by the king on a charge of high treason in 1641, but was subsequently known as a royalist, and promoted the Restoration, 1597–1680.

**HOLLEY**, **HORACE**, LL.D., president of Transylvania University, Kentucky, was born in Salisbury, Connecticut, in 1781. He graduated at Yale College in 1803, was ordained minister of Greenfield Hill, Fairfield, in 1805, and installed minister of

Hollis street, Boston, in 1809. In 1818 he was appointed president of the Transylvania University, Kentucky, which office he resigned in 1827. Died in the same year.

**HOLLEY**, **MARY AUSTIN**, the widow of Rev. Dr. Holley, emigrated to Texas and wrote a history of that country, died 1846.

**HOLLIS**, **THOMAS**, an English gentleman, known for his republican principles, author of 'Memoirs,' printed shortly after his death, 1720–1774.

**HOLLIS**, **TH. PELHAM**, known as a statesman as Baron Pelham and duke of Newcastle, d. 1768.

**HOLLIS**, **THOMAS**, a liberal benefactor of Harvard College, was a native of England. Having accumulated a large fortune in commercial pursuits, he expended a great portion of his wealth in charitable and other useful purposes. He founded two professorships in Harvard College, viz., of Divinity and Mathematics. Died 1731, aged 72.

**HOLLMANN**, **S. G.**, a German philosopher, 1696–1787.

**HOLLOWAY**, **T.**, a celeb. engraver, 1748–1827.

**HOLMAN**, **JOSEPH GEORGE**, a dramatic author, and an actor, was born in London, and educated for the church; but preferring the life of an actor, he made his first appearance at Covent Garden Theatre in 1784. Having afterwards emigrated to America, he became manager of the theatre in Charleston, South Carolina. Died 1817.

**HOLMES**, **ABIEL**, pastor of a congregational church at Midway, Georgia, and an author, was born in Woodstock, Connecticut, in 1768, and graduated at Yale College 1783. In 1792 he was transferred to the first church in Cambridge, Massachusetts. He wrote a very valuable work entitled 'The Annals of America.' Died 1837.

**HOLMES**, **GEORGE**, an antiquarian, 1662–1749.

**HOLMES**, **JOHN**, an assistant keeper of MSS. in the British Museum, and periodical writer. Died 1854, aged 54.

**HOLMES**, **NATHANIEL**, a learned div., d. 1678.

**HOLMES**, **ROBERT**, D.D., a learned divine and poet, best known for his collated edition of the Septuagint, of which 73 MS. volumes are deposited in the Bodleian library. He was appointed professor of poetry on the death of Warton, and became dean of Winchester, 1749–1805.

**HOLMSTIOLD**, **THEODORE DE**, a Danish physician and botanist, died 1793.

**HOLMSTROEM**, **ISRAEL**, a Swedish poet, known also as secretary of Charles XII., d. 1708.

**HOLOFERNES**, a general of Nebuchadnezzar, king of Assyria, killed by Judith, probably in the middle of the 7th century B.C.

**HOLROYD**, **JOHN BAKER**, earl of Sheffield, editor of the posthum. works of Gibbon, 1741–1821.

**HOLSTEIN**, **C.**, a Dutch painter, 1653–1691.

**HOLSTEIN**, **J. L. DE**, count of Lethraburg, a Danish statesman, one of the founders of the Academy of Sciences at Copenhagen, 1694–1763.

**HOLSTEIN GOTTORP**, **CHARLES FREDERICK**, duke of, a nephew of Charles XII., and son-in-law to Peter the Great, 1700–1739.

**HOLSTEIN**, **H. V., DE COUDRAY**, a distinguished French officer under Buonaparte, who emigrated to the U. S., and died 1839.

**HOLSTENIUS**, **L.**, a Ger. *savant*, 1596–1661.

**HOLT**, **FRANCIS LUDLOW**, a barrister and writer on law, many years editor of Bell's New Weekly Messenger, author of dramas, died 1844.

**HOLT**, **JOHN**, a miscellaneous writer, 1742–1801.

**HOLT**, **SIR JOHN**, a famous English judge, celebrated for his patriotic opposition to the measures of

James II., and for his acquaintance with the constitutional law of England, was born at Thame, in Oxfordshire, 1612; and on the king's accession 1685, had risen by his professional eminence as an advocate, to the office of Recorder of London. He had occupied the post about a year and a half, when he was compelled to retire in consequence of his opposition to the court, and though he was afterwards made serjeant at law, he devoted himself so entirely to the popular cause, that he was rewarded on the accession of King William with the appointment of Lord Chief Justice of the King's Bench, and with a place in the privy council. In 1700 he declined the chancellorship which was offered to him on the removal of Lord Somers, and remained in the office of judge, which he graced with his firmness, patience, and impartiality, until his death in 1709. Many anecdotes are related of him, illustrating his vigorous opposition to the least exercise of a power superior to the law. On one occasion he was solicited to support with his officers a party of the military sent to suppress a riot occasioned by the practice of decoying young men for the plantations. 'Suppose,' said the judge to the messenger, 'the populace should not disperse at your appearance, what are you to do then?' 'Sir,' replied the officer, 'we have orders to fire on them.' 'Have you, sir?' said the judge; 'then take notice of this; if there be one man killed, and you are tried before me, I will take care that you, and every soldier of your party shall be hanged. Sir,' he added, 'go back to those who sent you, and tell them that no officer of mine shall attend soldiers; and let them know at the same time, that the laws of this kingdom are not to be executed by the sword; these matters belong to the civil power, and you have nothing to do with them.' It is proper to add, that when the officer had retired, Sir John himself repaired to the spot with a party of constables, and dispersed the mob without bloodshed; also that this incident occurred after the accession of William, which is a still greater proof of Holt's inflexible integrity. His professional remains consist of 'A Report of Divers Cases in Pleas of the Crown in the reign of Charles II.,' published 1708.

[E.R.]

HOLT, JOHN, a printer in New York, was born in Virginia. He followed the business of a merchant in Williamsburgh, and was elected mayor of that place. Being unfortunate in business, he removed to New York in 1760, and commenced the publication of the 'New York Gazette and Postboy.' In 1766 he published the 'New York Journal.' Died 1784, aged 64.

HOLTE, JOHN, a Latin grammarian, 15th cent.

HOLTEN, SAMUEL, president of Congress, was a native of Danvers, Massachusetts, where he practised medicine. He was a member of Congress from 1778 to 1783, and again elected in 1793. In 1796 he was appointed judge of probate for the county of Essex, which office he held till 1815. Died January 2, 1816, aged 77, having held public appointments for 47 years.

HOME, SIR EVERARD, a Scotch surgeon, author of 'Lectures on Comparative Anatomy,' &c., 1756-1832.

HOME, HENRY, a Scotch judge, best known as Lord Kames, and distinguished as a writer of great metaphysical acumen. Besides professional works, elucidating the law of Scotland, he is the author of 'Essays upon British Antiquities,' 'Essays on the Principles of Morality and Natural Religion,' 'Introduction to the Art of Thinking,' 'Elements of Criticism,' 'Sketches of the History of Man,' 'Hints upon Education,' and 'The Gentleman Farmer,' a work addressed to the improvement of agriculture, 1696-1782.

HOME, or HUME, JOHN, a minister of the Scotch Kirk, author of the well-known tragedy of 'Douglas,' and other works 1724-1808.

[Homer.]

HOMER. The personal existence, the birth-place, and the era of the 'Father of Song,' have proved fertile subjects of discussion to literary antiquaries. Some of these have maintained that the Iliad and Odyssey are composed of a variety of legendary ballads, commemorative of incidents connected with the siege of Troy, which were the production of different authors, and were revised and skilfully interwoven in the age of Pisistratus; and that the name Homer was merely the impersonation of the genius of epic poetry. Seven cities at least claimed the honor of having given birth to the poet; and each of them seems to have had some tradition to allege in justification of its claim. The discrepancies of statement respecting the date of his existence are not less remarkable; for of the eight different epochs assigned to him the oldest differs from the most recent by a period of 460 years. Ac-

cording to the theory which carries along with it the greatest amount of probability, Homer flourished in the second century after the taking of Troy, from about B.C. 1019 to B.C. 984, or from 165 to 200 years after the Trojan era, having been born about B.C. 1044. He appears to have been an Asiatic Greek, and a native of Smyrna, an Ionian city on the coast of Asia Minor; and from the circumstance of having been brought forth on the banks of the Meles, a river which ran beside the city, is said to have obtained the name Melisigenes. It is impossible, however, to come to any satisfactory conclusion on subjects which history has given us such scanty materials to determine. On one point all traditions agree, that he was afflicted with blindness; and his descriptions of external nature warrant the conclusion that this misfortune arose from accident or disease, and not from the operation of nature at his birth. The writers of antiquity unanimously considered the Iliad and Odyssey as the productions of a certain individual called Homer: and there is no evidence that the question of divided authorship was ever entertained by them. The existence of wandering minstrels is recognized in the early literature of Greece; and it has accordingly been inferred that the minute and accurate geographical knowledge which is displayed in his works, was acquired by the poet as he wandered from court to court, delighting his auditors with the 'Tale of Troy Divine.' 'Homer,' says Bentley, 'wrote a sequel of songs and rhapsodies, to be sung by himself for small earnings and good cheer, at festivals and other days of merriment; the Iliad he made for the men, and the Odysseis for the other sex.' Such, it is probable, was the state of the Homeric poems till the time of Pisistratus, who, aided by certain literary men, made a collection of the poet's works, superior in extent and accuracy to all that had preceded it, and thus preserved to future generations the noblest monuments of Greek genius. The poems attributed to Homer are the Iliad and Odyssey, to which some have added the Homeric Hymns. The Iliad stands first as the oldest, and also the most complete specimen of a national heroic poem. Its subject is the revenge taken by Achilles on Agamemnon for depriving him of his mistress, Briseis, during the siege of Troy, and the evils which in consequence befell the Greeks. The poem is divided into twenty-four books, which detail the movements of the besiegers during the period of Achilles' wrath, and end with the death and burial of Hector. The Odyssey, which is likewise divided into twenty-four books, contains the adventures of Ulysses when on his return from Troy to his native island Ithaca. The hymns, epigrams, &c., which are ascribed to Homer, are of very doubtful origin. 'In conception and portraiture of character,' says Colonel Mure, 'and the deeper vein of tragic pathos, Homer may be equalled, if not surpassed, by Shakspeare; in moral dignity of thought and expression by Milton; in the grace and delicacy of his lighter pictures by Petrarch and Ariosto; and in the gloomy grandeur of his supernatural imagery by Æschylus or Dante. But no one of these poets has combined, in a similar degree, those various elements of excellence in each of which they may separately claim to compete with him.

HOMER, H., a classical editor, 1752-1791.

HOMES, WILLIAM, minister of Martha's Vineyard, was a native of Ireland, was ordained in that country, in 1692. He emigrated to America in 1714. Died 1746, aged 83.

HOMILIUS, G. A., a Ger. composer, 1714-85.

HOMMEL, C. F., a German jurist, 1722-1781.

HONAIN, ABOU-YEZID, an Arabian physician and translator of learned works, 9th century.

HONDEKOETER, GILES, a Dutch landscape painter, born 1583. GYSBRECHT, his son and pupil, celebrated for the representation of poultry, born 1613. MELCHIOR, son of Gysbrecht, and his superior in the same line of art, 1636-1695.

HONDIUS, or DE HONDT, a Flemish family, the first of whom, JOST or JODICUS, is distinguished as an engraver, especially of maps, 1546-1611. His son, HENRY, called the Elder, for portraits and landscapes, 1573-1610; the younger HENRY for his portraits of the reformers, &c., 1588-1644. WILLIAM, son of the preceding, a portrait engraver, born 1601. ABRAHAM, a supposed grandson of the first Hondius, distinguished as a painter of hunting pieces, 1638-1695.

HONE, N., an Irish enamel painter, d. 1784.

HONE, PHILIP, a merchant of New York, and civic dignitary, having been alderman and mayor 1825-26. He has the credit of founding the Mercantile Library Association. Died 1851, aged 70.

HONE, WILLIAM, a miscellaneous writer and political satirist, whose 'Every-day Book' is a work of acknowledged value; though prosecuted in the earlier part of his career for a parody on the Liturgy, he latterly became sub-editor of the Patriot newspaper, 1780-1842.

HONEYWOOD, ST. JOHN, a poet, was born at Leicester, Massachusetts, in 1764, and graduated at Yale College, in 1782. He studied law at Albany, and commenced practice at Salem, New York. His writings were published in 1801. Died 1798, aged 33.

HONORATUS. There are two saints of this name in the Romish calendar; the *first*, bishop of Arles and founder of the monastery of Lerius, died 429. The *second*, bishop of Marseilles, and a religious writer, born about 420 or 425.

HONORE-DE-SAINTE-MARIE, BLAISE VANZELLE, called the faithful, a French theologian, 1651-1729.

HONORIUS, son of Theodosius the Great, born 384, became emperor of the West, and his brother, Arcadius, emperor of the East, on the death of Theodosius 395; died, after being shamefully subjugated by the Goths under Alaric, 423.

HONORIUS, the *first* of the name, pope of Rome, 626-638; the *second*, 1124-1130; the *third*, distinguished for his political activity, and for confirming the order of St. Dominic and St. Francis of Assise, 1216-1227; the *fourth*, 1285-1287.

HONORIUS OF AUTUN, professor at that place of theology and metaphysics, died 1140.

HONTHEIM, JOHN NICHOLAS DE, a German Catholic theologian, author of works designed to effect a union among Christians, and opposed to the political system of the Vatican, 1700-1790.

HONTHORST, GERARD DE, a Flemish painter, known in Italy as Gerardo della Notte, 1592-1662. His brother, WILLIAM, also a painter, 1604-1683.

HONYMAN, ROBERT, M.D., a physician, was born in Scotland, and was for some years a surgeon in the British navy. He emigrated to America in 1774, and commenced practice in Louisa, Virginia. Died in 1824.

HOOD, P. DE, a Flemish painter, 1643-1708.

HOOD, ROBIN, a chivalrous outlaw of the reign of Richard I., whose exploits in Sherwood Forest are the subjects of many admired ballads. All the popular legends celebrate his generosity, and skill in archery. The principal incidents of his history are to be found in Stowe, and a complete collection of

[Robin Hood's Grave.]

the ancient poems, songs, and ballads relating to him, was published by Ritson in 1795.

HOOD, SAMUEL, Viscount, an English commander, distinguished in several actions at the commencement of the last war, particularly at the bombardment of Havre; the defeat of Admiral De Grasse under Rodney; the siege of Toulon; and the capture of Corsica; after which he was named Governor of Greenwich Hospital, and promoted to the rank of admiral. Born at Farncombe in Devonshire, 1724, died 1816.

HOOD, SIR SAMUEL, a cousin and companion-in-arms of the preceding, died in the chief command of the East Indian fleet, 1814.

HOOD, THOMAS, the son of a bookseller in London, was born there in 1798. After receiving a miscellaneous education, he was placed, in his fifteenth year, in the counting-house of a Russian merchant; but, after an interval of repose on account of ill-health, he learned the art of engraving. In 1821, having already contributed fugitive papers to periodicals, he became sub-editor of the *London Magazine*; and for all the rest of his life he was an author by profession, though he also frequently amused himself and his readers by inserting in his works humorous illustrations designed and etched by himself. His career was that of an honorable, kindly, and industrious man, who was never able to raise himself above the necessity of toiling for a livelihood; and who, long suffering under ill-health, continued bravely, even to his death-bed, his efforts to provide for his wife and children. Hood's genius was of an extremely singular cast. It united in an unusual degree, intensely serious passion with strength of comic humor; and perhaps his chief defect lay in his incapacity of either blending these elements harmoniously, or giving scope to either without the other. As a punster he was inimitable; yet even here his most humorous flights bear with them a burden of thoughtful meaning which is hurtful to their comic effect. His two novels, 'Tynney Hall,' and the uncompleted story called 'Our Family,' are the least successful of his attempts. The chief collections of his witticisms are the 'Whims and Oddities,' and 'The Comic Annual.' In a volume containing 'The Plea of the Midsummer Fairies,' and other poems, he indicated the power of rising into a high sphere of poetry. 'Eugene Aram's Dream' is very striking; and yet more pathetic is his well-known 'Song of the Shirt.' This wild and vigorous piece was written shortly before his death, which took place in 1845.

HOOFT, CORNELIUS VAN, an eminent Dutch poet and historian, 1581-1647.

HOOGE, P. DE, a Dutch painter, died 1708.

HOOGE, R. DE, a Dutch engineer, about 1638-1720.

HOOGEVEEN, H. a Dutch Hellenist, 1712-91.

HOOGSTRAATEN, DAVID VON, a Latin poet, au. of a Dutch and Latin Dictionary, 1658-1724.

HOOGSTRAATEN, JAMES VAN, a Dutch friar, one of the first opponents of the reform., died 1527.

HOOGSTRAATEN, THIERRY VAN, a landscape painter of Antwerp, 1596-1640. His son, SAMUEL, a painter and poet, 1627-1678.

HOOGVLIET, ARNOLD, a Dutch poet, was born in 1687. His poem, entitled 'Abraham the Patriarch,' is much admired. Died 1763.

HOOK, JAMES, a composer of operas, melodramas and songs, distinguished for his amazing industry, 1746-1827. His son of the same name, dean of Worcester, author of some dramatic writings, but more celebrated as a controversial divine and political pamphleteer, died 1828.

HOOK, THEODORE EDWARD, born in London in 1788, was the son of a musical composer. Educated flimsily, he became, in his teens, a writer of operas and farces (some of them successful); while he was yet more famous for audacious practical jokes. He found his way into gay and aristocratic society through his ready wit and inexhaustible fertility of puns, his musical accomplishments, and his extraordinary feats of extemporaneous rhyming. In 1812, the liking which the Prince Regent had formed for him made him treasurer of the Mauritius, without either knowledge of business or common prudence. In 1818, he was sent home under a guard, being accused of peculation; and, though the criminal charge was dropped, he was held a debtor of government in a very large amount, which he never made any endeavors to discharge. He attempted, however, not unsuccessfully, to serve the ministry of the day, by establishing, in 1820, the 'John Bull' newspaper; and in it appeared his best witticisms, which indeed do not rise above the level of newspaper jesting. He wrote novels, the earlier of which, particularly 'Sayings and Doings,' were once fashionable. But for not a few years his career was both discreditable and really unhappy. He was tasking his mind in authorship, while the greater part of his time was engrossed by the gay society in which his wit made him so acceptable; his affairs were falling into irretrievable disorder through thoughtless extravagance; and his health was giving way under increasing habits of intoxication. He died in 1841.

HOOKE, NATHANIEL, a native of Ireland, known as a zealous catholic and historian of Rome, and as the assistant of Sarah, duchess of Marlborough, when compiling her memoirs, died 1763.

HOOKE, ROBERT, a mathematician and experimental philosopher, distinguished for his numerous mechanical inventions and discoveries in science, 1635-1703.

HOOKER, JOHN, a learned historian and antiquarian, born about 1524, died 1601.

HOOKER, RICHARD, the famous author of the 'Ecclesiastical Polity,' was born about 1553, at the village of Heavitree, near Exeter. His own parents were in narrow circumstances, but the family had given several mayors to that city, and Richard was the nephew of John Hooker, the historian, by whom he was introduced to Bishop Jewel. The latter provided for his education by sending him as clerk to Corpus Christi College, Oxford, and settling a pen-

sion upon him. In 1577 he was received Master of Arts, and two years later appointed professor of Hebrew. Having taken holy orders in 1584, he was presented to the rectory of Drayton-Beauchamp, in Buckinghamshire, and about a year afterwards became master of the Temple in London, where, at that time, Walter Travers, a zealous puritan, was afternoon lecturer. The opposition between the doctrines taught by Hooker, a stanch episcopalian, in the morning, and those of the presbyterian in the afternoon, soon grew to an open controversy. Travers was at length put to silence by the court of High Commission, and published his appeal to the Privy Council, the answer to which, by Hooker, was the germ of the work on which his celebrity now rests. The extensive learning and eloquent command of the resources of the English tongue displayed in that work have been the admiration of some of the greatest names in literature. It is hardly necessary to state that its principles are a defence of the English establishment, but it is remarkable at the same time for its anticipation of the political doctrines of the Whigs, deriving all government from the implied consent of the people, or the free choice and judgment of the governed. The 'Ecclesiastical Polity' is to this day the armory of the Anglican Church. Its author died in the rectory of Bishopsbourne, Kent, 1600. His life was written by Isaac Walton, and published with the second edition of Hooker's works in 1666, and has since been frequently reprinted with them.

[Residence of Rev. Thomas Hooker, Hartford.]

HOOKE, THOMAS, the first minister of Cambridge, Massachusetts, and one of the founders of the colony of Connecticut, was a native of Leicestershire, England, and graduated at Emanuel College, Cambridge. In 1633, he emigrated to New England with Mr. Cotton, and settled at Cambridge, where he was ordained. In 1636 he removed with some others to the Connecticut river, and settled where the city of Hartford now stands. Died 1647, aged 61.

HOOLE, CHARLES, a schoolmaster, author of several introductory works in Latin, 1610-1666.

HOOLE, JOHN, a celebrated dramatic writer, translator of Ariosto and Tasso, &c., 1727-1803.

HOOPER, GEORGE, bishop of Bath and Wells, distinguished as an Oriental scholar and ecclesiastical antiquarian, 1640-1727.

HOOPER, HOPER, or HOUPER, JOHN, bishop of Gloucester under Edward VI., author of many pious works, burnt in the time of Qu. Mary, 1555.

HOOPER, WILLIAM, a patriot of the Revolution, was graduated at Harvard College in 1760, studied law and practised at Wilmington, North Carolina. In 1774 he was sent to Congress, and in the following year framed the address to the inhabitants of Jamaica. He was one of the signers of the Declaration of Independence. Died 1790, aged 48.

HOORNBECK, J., a Dutch divine, 1617-66.

Horace.

HORACE, QUINTUS HORATIUS FLACCUS, was born near Venusia (now Venosa), a town on the confines of Apulia and Lucania, in the south of Italy, on the 8th of December, B.C. 65. The materials for his life are derived almost entirely from his own works. His father, who was a respectable freedman, exercised the profession of a collector of payments at auction; and having, by this apparently humble calling, realized a competency, which he invested in the purchase of a house and farm in the neighborhood of Venusia, there settled as a small farmer. In this house the poet was born, and here he spent the years of his boyhood. When he was about twelve years of age, his father, not satisfied with the provincial school of Venusia, had him removed to Rome, and placed under the care of Orbilius, an old military man, whose academy was for a long period one of the first in Rome. Though by no means rich, he had a tender regard for the feelings of his son who was now to mix with boys of the highest class; and he accordingly provided him with the requisite dress and attendance of slaves,

he himself watching over his morals with gentle severity. At the school of Orbilius, Horace was instructed in grammar, and in the Latin and Greek languages; Livius Andronicus being the class-book in the former and Homer in the latter. Athens was at this time regarded as the university of the world; and thither Horace, in accordance with the prevailing practice, repaired in his eighteenth year, B.C. 46, to complete his education by a course of philosophy and science, under Greek masters. The advantages which he derived from his residence there are evinced by his familiarity with the whole range of Greek poetry, and especially with the terse and pointed language of the Comedians. But the civil wars which followed the death of Julius Cæsar, B.C. 44, interrupted him in his studious and peaceful retirement. The arrival of Brutus at Athens, roused the patriotic feelings of the youthful Romans, and along with others Horace ardently embraced the cause of the Republic. Though entirely inexperienced in war, he was promoted to the rank of military tribune, with the command of a legion, and in this character shared in the defeat at Philippi, B.C. 42. After the battle, having now forfeited his estate, he returned to Rome, where his poverty perhaps saved him from proscription: and by acting as a clerk in the quæstor's office, and practising the strictest economy, he contrived to live till he found means of making himself known to the poets Varius and Virgil, by whom his name was first mentioned to Mæcenæ. The first interview with his future patron and friend seems not to have been satisfactory; for it was not till after nine months had elapsed that Mæcenæ requested him to repeat his visit. This apparently unpropitious beginning, however, was soon followed by a friendship which speedily ripened into intimacy; and which introduced the poet into the highest and most refined society in Rome. The friend of the prime minister found easy access to the emperor; Horace was soon on terms of familiarity with Augustus, and enjoyed his friendship and patronage during the remainder of his life. But the friendship of Mæcenæ brought something more substantial to Horace than the mere increase of acquaintance in the higher circles—his patron made him independent for life by the gift of an estate in the Sabine territory, about thirty-four miles from Rome. The estate was not large, but it was prettily situated, and entirely suited to the tastes and wants of the poet. His admiration of the beautiful scenery in the neighborhood of Tibur (Tivoli), induced him to hire or purchase a cottage in that romantic town; and all the later years of his life were passed between these two country residences and Rome. Horace died on the 19th of November, B.C. 8, at the age of fifty-seven—a few months after the death of his friend and patron Mæcenæ. His works consist of two books of Satires, a book of Epodes, four books of Odes, two books of Epistles, and a treatise on the Art of Poetry. Want of space prevents us from offering a sketch of Horace's character as a man and as a poet. Though living on terms of intimacy with the great, he retained through life his cherished independence, and complimented his powerful patrons without the servility of flattery. His works have commanded the admiration of all succeeding ages; and though deficient, perhaps, in some of the highest elements of poetry, will continue to be read and studied as models of simplicity and cultivated taste. HORMISDAS, pope of Rome, reigned 514-523.

HORMISDAS, the *first* of the name, king of Persia, reigned 271-272; the *second*, 303-311; the *third*, usurped the throne, 457-460; the *fourth*, son and successor of the great Chosroes, 579-592.

HORN, the name of a distinguished family in Sweden, the best known of whom are GUSTAVE, count Horn, one of the lieutenants of Gustave Adolphe, and field-marshal and constable of Sweden in the reign of Christina, born 1592. ARVID BERNARD, Count Horn, of the same family, principal instigator of the revolution of 1719, and chief of the English party, 1664-1742. FREDERICK HORN, a general in the service of France, afterwards counselor to Adolphus Frederick and Gustave III., 1715-1796. The son of the latter, COUNT HORN, a man of letters, banished for his complicity with Anckærstroem, died 1823.

HORN, CHARLES EDWARD, a ballad and opera composer, author of 'Cherry Ripe,' 'I've been Roaming,' and similar songs, 1786-1849.

HORNE, GEORGE, a learned English prelate, well known as the author of 'Commentary on the Book of Psalms,' was born 1730, and was early distinguished as a diligent Hebrew scholar, and a partisan of John Hutchinson. His first publication was an ironical attack on Newton, in 1751, entitled 'The Theology and Philosophy in Cicero's Somnium Scipionis Explained; or a Brief Attempt to Demonstrate that the Newtonian System is agreeable to the Notions of the Wisest Ancients, and that mathematical principles are the only sure ones.' This was followed by several works of a similar character in the course of the next ten years, including attacks on Dr. Shuckford, and Dr. Kennicott, with the latter of whom, the young scholar, at a later period, became intimately acquainted. Horne took orders in 1753, was successively president of Magdalen College 1768, chaplain to the king 1771, vice-chancellor of the university of Oxford 1776, dean of Canterbury 1781, and bishop of Norwich 1790. He died in 1792, and was buried at Elham, in Kent. There can be no hesitation in pronouncing that Bishop Horne was a great biblical scholar, but too much inclined perhaps to write on subjects of which he had no true understanding. In proof of this it is enough to say, that the same hand which wrote in support of John Hutchinson, wrote against William Law. He is the author of many works besides the 'Commentary,' on which he bestowed nearly twenty years' labor, and the latter must always hold a distinguished place in biblical literature. [E.R.]

HORTA, GARCIA AB., a Portuguese herbalist, 16th century.

HORTENSE EUGENIE DE BEAUHARNAIS, daughter of Josephine, the consort of Napoleon Buonaparte, and of the Vicomte De Beauharnais, her first husband, was born at Paris 1783, and married to Louis Buonaparte, the brother of Napoleon, in 1802. The match had been desired by the consul for political reasons, and it proved a most unhappy one. In 1806, Hortense became queen consort of Holland, and about a year afterwards was separated from her husband after giving birth to three sons:— 1. NAPOLEON CHARLES, who died in infancy, and whose intended adoption by Napoleon was refused by Louis. 2. NAPOLEON LOUIS, who was baptized by the pope Pius VII., and instead of attaining the high destiny proposed for him, was killed in an insurrection at Romagna 1832; and 3. LOUIS NAPOLEON, the present emperor of the French. On the divorce of her mother, Josephine, Queen Hortense joined her in her retirement at Malmaison, and after her death in 1814, so soon followed by the fall of Napoleon, became an unprotected and calumniated wanderer, until her residence was fixed at Augsburg by the king of Bavaria. She died October 5th, 1837. Her disposition was modest and retiring: her influence at the court of Napoleon was generously exercised in favor of the distressed, and her affectionate solicitude for the emperor was fully manifested after the disaster of Waterloo. Hortense was duchess of St. Leu in virtue of a settlement made by the allies between the first fall of Napoleon and the hundred days. [E.R.]

HOVEY, IVORY, minister of Plymouth, Massachusetts, was born at Topsfield, 1714. He graduated at Harvard College in 1735, and was ordained minister of Metapoiset, the second parish of Rochester, in 1740. Having also studied medicine, he became the principal physician at Metapoiset, where he practised till his dismissal, in 1765. In 1770 he was

appointed minister at Monument Ponds in Plymouth. Died 1803.

HOW, WILLIAM, a botanist, 1619-1656.

HOWARD. The Howards are well known as one of the noblest families of England, and many of them have arrived at distinction. The principal are—THOMAS HOWARD, earl of Surrey, and third duke of Norfolk, an eminent statesman and naval and military commander, distinguished at the battle of Flodden, 1488-1554. EDWARD, a younger brother of the preceding, and admiral of England, killed in action with the French, 1512. HENRY, earl of Surrey, eldest son of Thomas, an accomplished chevalier, and the first polite writer of love verses in the English tongue, beheaded on a trumpery charge of high treason, 1516-1546. HENRY, second son of the poet, and earl of Northampton, known as a trimmer at court and as a man of letters, implicated in the murder of Overbury, 1539-1614. CHARLES, known as Lord Effingham and earl of Nottingham, and grandson of the duke of Norfolk, commander of the channel fleet on the invasion of England by the Spanish Armada, 1536-1624. THOMAS, earl of Arundel, and earl marshal in the reign of Charles I., known as a diplomatist and antiquarian, died 1646. HENRY, his second son, and sixth duke of Norfolk, by whom the Arundelian marbles, collected by his father, were presented to the university of Oxford, about 1668. CHARLES, eleventh duke of Norfolk, and formerly earl of Surrey, known as a statesman in opposition to Lord North and Pitt, 1746-1815.

HOWARD, CATHERINE, daughter of Lord Edmund Howard, third son of Thomas duke of Norfolk, married to Henry VIII. on his divorce from Anne of Cleves, 1540, beheaded 1549.

HOWARD, EDWARD, a lieutenant in the royal navy, author of 'Rattlin the Reefer,' 'Jack Ashore,' and other marine novels, died 1842.

HOWARD, FREDERIC, earl of Carlisle, son of Henry the fourth earl, and grandson of William fourth Lord Byron, known as a poet and a partisan of the government, 1748-1825.

HOWARD, GEORGE EDWARD, a poet, architect, and political writer, died 1786.

HOWARD H., a miscellaneous writer, author of 'Memorials of the Howard Family,' 1757-1842.

HOWARD, JOHN, the philanthropist, was born at Hackney, London, in 1726. His father left an immense fortune, but in his will, expressly prohibited his getting the control of it till he had reached his twenty-fifth year. His guardians bound him an apprentice to a grocer. But having purchased his indentures, he left the business in disgust, and set out on a continental tour. On his return to London, he married his landlady, a widow considerably older than himself, out of pure gratitude for her attentions to him during a lingering sickness. But she dying soon after, he again resolved to travel, and went to Portugal with a view to examine the ruins of Lisbon after the earthquake. The vessel in which he sailed was attacked by a French privateer, and all on board made prisoners. Besides the loss of his liberty, he was subjected to various and severe privations in his place of confinement; and it was the recollection of his personal sufferings that awakened his sympathies for the inmates of prisons. Being released on an exchange of prisoners, he returned, and his first and earnest efforts were made to bring the subject before the public and the parliament of Britain. He now married a second time, but his wife died in a few years after, leaving him with an only child. For a time

he resided on his estate at Cardington, Bedford, dividing his attention between the management of his property, and the domestic education of his son. But this son, becoming the subject of a hopeless derangement, was obliged to be placed in an asylum; and having no ties at home, he sought occupation in the pursuit of his favorite schemes of benevolence, the amelioration of prisons. With this view, he visited, in 1777, every prison in the United Kingdom, and published the result of his inquiries. The same course of investigations he resolved to pursue in foreign countries; and accordingly, in 1778 and the four following years he inspected all the public prisons of France, Switzerland, Germany, and Holland, afterwards extending his tour into the southern countries of Europe. He now entered on a new and different course of philanthropic pursuits, an inquiry into the causes and cure of the plague. His attention was now directed to those countries most subject to the ravages of that dreaded pestilence, the countries of the Levant. On his return to England, he published an account of the chief Lazarettos in Europe, and his object was so far gained by the attention of skilful and scientific men, as well as the general public being powerfully excited by his details. Commencing a second tour of inquiry, he resolved to travel through the eastern part of Europe with Egypt and Asia Minor. Leaving the shores of Britain in 1789, he hurried through Holland and Germany, anxious to reach Petersburg, Moscow, and the shores of the Black Sea in the proper season. In his progress through the south of Prussia he had reached Kherson, when he was seized with malignant fever, which after a few days' illness, terminated his extraordinary career on 20th January, 1790. He was buried in a spot marked by himself about eight miles from Kherson, and a rude obelisk is erected over his grave, bearing the brief Latin inscription, 'Vixit propter alios,'—he lived for the good of others. His benevolence was not merely the effect of a warm and feeling heart, which sympathized deeply with the sufferings of humanity, it was based on Christian principles, for he lived and died strong in the faith of the gospel. [R.J.]

[Birth-place of Colonel John Eager Howard.]

HOWARD, JOHN EAGER, governor of Maryland, was born in Baltimore county, Maryland. In 1796, he joined Colonel Hall's regiment as a captain, and was soon promoted to the command of the 2d Maryland regiment. He distinguished himself on several occasions. In 1788, he was chosen governor of

Maryland, and from 1796 to 1803, he was a senator of the United States. Died 1827, aged 75.

HOWARD, SIR R., an English historian, 1626–1698.

HOWARD, S., a composer of ballads, died 1783.

HOWARD, SIR W., a distinguished lawyer, 13th century.

HOWDEN, JOHN FRANCIS CARADOC, Baron, a native of Ireland, distinguished in the army, 1762–1832.

HOWE, CHARLES, a religious writer, 1661–1745.

HOWE, GEORGE, Lord Viscount, eldest son of Sir E. Scope, second Viscount Howe in Ireland. He commanded the British troops at Halifax in 1757. When Abercrombie proceeded against Ticonderoga, Lord Howe was killed in an attack on the advanced guard of the French, in 1778.

HOWE, JOHN, a distinguished nonconformist divine, was born in 1630 at Loughborough. He was deprived of his living at Torrington in Devonshire, and for several years officiated as a Presbyterian minister in London. Died 1705.

HOWE, JOHN, a noted politician of the reign of William III. and Queen Anne, in office under the latter, and succeeded by Walpole on the accession of George I., died 1721.

HOWE. ADMIRAL EARL HOWE was born in 1725, and was the second son of Lord Viscount Howe. He entered the navy at fourteen, and distinguished himself for courage and seamanship as he rose through the various ranks of the service to that of post-captain. In 1758 he succeeded (by his elder brother's death) to the family estates and honors; but he was true to the sea, and was in constant active employment to the end of the Seven Years' War. When France took part against England in the American war, Lord Howe was admiral of the English fleet off the American coast, and gained great credit by successfully keeping the French admiral D'Estaing in check throughout 1778, though Howe's fleet was far inferior to that of his adversary. At the end of that year Howe returned to Europe, and performed the important service of relieving Gibraltar. In 1788 he was made an earl. At the commencement of the war against France in 1793, Howe took the command of the western channel fleet at the king's earnest and personal request. In the next year he succeeded in bringing the main French republican fleet to action, and gained the great victory of 'THE GLORIOUS FIRST OF JUNE.' Lord Howe was now seventy years of age, but he lived to do his country more good service; and it was he who won back, by judicious kindness, many of our seamen to their duty in the alarming mutinies at the Nore and Spithead. Earl Howe died 4th August, 1799. [E.S.C.]

HOWE, SIR WILLIAM, brother of the famous admiral, and successor of General Gage in the command of the British forces in America, died 1814.

HOWEL, LAWRENCE, one of the non-juring divines, celebrated for his great learning, died 1720.

HOWEL-THE-GOOD, or HYWEL DDA, a famous legislator and king of all Wales, 10th century.

HOWELL, DAVID, LL.D., judge, was born in New Jersey in 1747, and graduated at Princeton College in 1766. Having removed to Providence, Rhode Island, he practised law, and was appointed judge of the Supreme Court, and in 1812 was chosen district judge for the Island. He was also a member of the old Congress. Died 1824, aged 77.

HOWELL, JAMES, an English historian, was born at Abernant in Caermarthenshire, in 1595, was educated at Oxford. He was afterwards employed by the proprietors of a glass manufactory

just then established in England, to procure workmen on the continent. He was subsequently returned to parliament, became secretary to the British ambassador in Denmark and clerk of the council. He was the author of many works, among which is 'Epistolæ Howellianæ, or Familiar Letters, Domestic and Foreign.' Died 1666.

HOWELL, RICHARD, governor of New Jersey, was a lawyer, born in Delaware. In 1776 he had command of a regiment of New Jersey, but in 1779 he returned to the practice of the law. In 1788 he was appointed clerk of the Supreme Court, and in 1793 he was chosen governor, to which office he was elected eight successive years. Died in 1802, aged 47.

HOWELL, W., a celebrated historian, d. 1683.

HOWLEY, W., archbishop of Canterbury, 1765-1848.

HOWSON, JOHN, a learned prelate, 1556-1631.

HOYLE, E., a writer on whist, &c., 1672-1769.

HUARTE, JOHN, a Spanish philosopher, author of a curious and valuable work, translated into English by Carew and Bellamy, and entitled 'The Trial of Wits,' and first publisher of the alleged letter of Lentulus concerning the Saviour, born 1520.

HUBBARD, WILLIAM, minister of Ipswich, Massachusetts, was the author of a valuable history of New England, which was published in the Massachusetts historical collections, was born in 1621, graduated at Harvard College in 1642, died 1704.

HUBER, FRANÇOIS, an eminent naturalist, was born at Geneva in 1750. He died in 1831.—Very early in life Huber manifested a great love for the pursuit of natural history. A cataract, however, showed itself in his eyes while he was still a youth, and before he arrived at manhood he had become totally blind. Before his eyesight failed he had his attention drawn to the examination of bees. Having read the works of Reaumur and Bonnet, he believed that many of the statements made by those authors with regard to their history, were at variance with what he had himself observed; and to ascertain the correctness of his opinion became the object of his life. Huber was fortunate in finding an affectionate wife and an attached servant, who devoted their lives to him with the greatest tenderness and assiduity. Not being able to see himself, he made use of their eyes; and under his directions, and assisted by the invention of several kinds of glass hives, Madame Huber and the faithful Burnens were enabled to carry on their observations undisturbed and at leisure. By these means he succeeded in collecting together an immense number of facts with regard to the economy of bees which were before that time unknown. These he published at various times, and his different memoirs were collected by him and published in 1814. This rendered his name famous throughout Europe; a fame which was increased by the knowledge of the fact, that these accurate observations had been made by a man totally blind from his youth. M. De Candolle has named a genus of plants after him, *Huberia*. [W.B.]

HUBER, J., father of the preceding, author of 'Observations on the Flight of Birds,' 1722-1750.

HUBER, JOHN, a native of Geneva, known as an artist in paper and writer on balloons, 1722-1790.

HUBER, JOHN JAMES, a native of Basle, celebrated for his works in anatomy and botany, 1707-1778.

HUBER, JOHN RUDOLPH, a distinguished painter, called the Tintoret of Switzerland, 1668-1748.

HUBER, MARY, a Swiss philosophical writer, 1694-1759.

HUBER, MICHAEL, a native of Bavaria, translator of Gellert, Gesner, and Winckelmann into French, 1727-1804. LOUIS FERDINAND, his son, a journalist, 1764-1804. THERESE, a daughter of Heyne, and wife of the preceding, distinguished as a novelist, 1764-1829.

HUBER, SAMUEL, a Swiss divine, 16th century.

HUBER, ULRIC, a Dutch *savant*, 1636-1694. His son, ZACHARIAS, also a learned writer, 1669-1732.

HUBERT DE L'ESPINE, a French traveller in Tartary, author of 'Description des admirables régions de Tartarie,' published at Paris, 1558.

HUBERT, F., a French engraver, 1744-1809.

HUBERT, M., a French preacher and author, 1640-1717.

HUBERT, ST., the apostle of Ardennes, 7th cent.

HUBNER, JOHN, a German geographer and historian, 1668-1731. His son, of the same name, known as a man of letters, died 1758.

HUBNER, MARTIN, a Danish publicist, 1725-95.

HUDDART, J., a distinguished navigator, 1741-1816.

HUDDE, JOHN, a Dutch mathematician, 1640-1704.

HUDDSFORD, G., a burlesque poet, last cent.

HUDDSFORD, W., a naturalist of last century.

HUDDLESTONE, ROBERT, a Scottish antiquarian, editor of a new edition of 'Toland's History of the Druids,' 1776-1827.

HUDSON, HENRY, an able English navigator, to whom we owe many important discoveries in the northern regions. Nothing is known respecting him till 1607, when he was sent out by a company of London merchants to seek a passage to India directly across the pole, many previous expeditions having failed to discover either a north-east or a north-west passage. Leaving the Thames on the 1st of May, in a small vessel, with only ten men and a boy, he sailed for Greenland, which he reached in lat. 70°. Before he was stopped by ice, he had succeeded in advancing along the E. coast beyond the 80th parallel, considerably to the north of Spitzbergen, and returned by Nova Zembla and the North Cape. He made several other voyages in pursuit of the same object, during one of which he was in the service of the Dutch, and discovered the North American river which bears his name. In his last voyage, undertaken April 1610, he had discovered the large gulf or inland sea named after him, and which, three years later, was carefully examined by Sir Thomas Button. Hudson was obliged to pass the winter in the southern part of it, so that on the return of summer his provisions were nearly exhausted, and he and his men were exposed to great hardships, being obliged to subsist upon moss and frogs. The men became mutinous, and resolved to turn the master and those faithful to him adrift, that the limited stock of provisions might last the longer. The ringleader was a young man named Green, of respectable connections, who had been benevolently brought out by Hudson in order to separate him from vicious companions, with whom he was leading a profligate life. The conspiracy broke out on the 21st of June; the captain was seized and bound, and with eight others, his stanchest friends, most of whom were sick or lame, was turned adrift amid floating ice, in the strait which bears his name. Some meal, and an iron pot, a fowling-piece, and ammunition, were the only means allowed them of preserving their lives; and there can be no doubt that they soon perished miserably. Among the fourteen who remained on board were Robert Bylot and Habbakuk Pricket, to the latter of whom we

owe the only account there exists of the latter part of Hudson's voyage. The wretch Green was killed soon after in an affray with the natives; Robert Ivet, the next most guilty after Green, died of starvation. Most of the rest reached the west coast of Ireland, after dreadful sufferings. [J.B.]

HUDSON, W. E., an Irish antiquarian, d. 1853.

HUDSON, DR. JOHN, a critical author, 1662-1719.

HUDSON, TH., a portrait painter, 1701-1779.

HUDSON, W., a distinguished botanist, 1730-1793.

HUE, FRANCIS, a valet of Louis XVI., author of a narrative of his last years, 1757-1819.

HUERTA, VICENTE GARCIA DE LA, a Spanish tragedian, editor of a critical edition of the best Spanish plays, 1729-1797.

HUET, PETER DANIEL, an eminent French prelate and classical scholar, and appointed bishop of Avranches in 1689, was born at Caen in Normandy in 1630, and received his education in Jesuits' College. He was the author of many works of great merit, among others '*Demonstratio Evangelica*,' being written in defence of Christianity. Died 1721.

HUFELAND, CHRISTIAN WILLIAM, an eminent physician, also Prussian counsellor of state, was born at Langensalza in 1762, and settled as a physician at Weimar. He was chosen professor at Jena in 1793, and appointed physician to the King of Prussia. Died 1836.

HUFNAGEL, G., a Flemish poet and naturalist, skilled as a painter of animals, 1545-1600.

HUGFORD, IGNAZIO, a painter, 1703-1778.

HUGH, or HUGUES, the name of several princes of the middle ages, the most distinguished of whom are—HUGH THE GREAT, son and successor of Robert as *count of Paris*, and father of Hugh Capet, died 956. HUGH CAPET, son of the preceding, and founder of the third dynasty of the kings of France, born 939, crowned at Rheims, 987, died 996. HUGH OF PROVENCE, *king of Italy*, died 947. HUGH I., *duke of Burgundy*, reigned 1075-1078, died 1093. HUGH II., reigned 1102-1142. HUGH III., a distinguished warrior and crusader, succeeded 1162, died in Asia 1193. HUGH IV., a crusader and companion-in-arms of St. Louis, 1218-1272. HUGH V., the last of the dukes of Burgundy of this name, reigned 1308-1315. Besides these, four *kings of Cyprus* are mentioned:—HUGH I., reigned 1205-1218. HUGH II., 1253-1267. HUGH III., called '*The Great*,' 1267-1276. HUGH IV., king of Cyprus and Jerusalem, suc. Henry II. 1324, abdicated 1361.

HUGH, SAINT. The earliest saint of this name is a French prelate who administered the dioceses of Paris and Bayeux, died 730. Next in order of time is HUGH OF CLUNY, abbot of the monastery of that name, flourished 1023-1109. The third SAINT HUGH, a bishop of Grenoble, disting. for having located Bruno and his companions in the Grande Chartreuse, lived 1053-1132.

HUGH OF AMIENS, a native of that place, afterwards prior of Cluny, kn. as a theologian, d. 1164.

HUGH OF BREGI, a bard of the 13th century.

HUGH OF FLAVIGNY, abbot of that place in 1097, and author of the '*Chronicle of Verdun*.'

HUGH OF FLEURY, abbot of that place, and author of '*De La Puissance Royale*,' &c., 11th century.

HUGH OF POITIERS, a chronicler, 12th cent.

HUGH OF ST. CHER, a learned monk and cardinal, au. of a Bible Concordance, died 1263.

HUGH OF ST. VICTOR, a theologian, died 1140.

HUGHES, JOHN, a poet and miscellaneous writer,

translator of Fontenelle's '*Dialogues of the Dead*, &c., 1677-1720. JABEZ, his brother, a classical translator, and miscel. writer, 1685-1731.

HUGHES, JOHN, a learned editor, 1682-1710.

HUGHES, GRIFFITH, a naturalist, last century.

HUGO, HERMAN, a German Jesuit, 1588-1629.

HUGONET, W., a Fr. statesman, exec. 1477.

HUGTENBURGH, JAMES VAN, a Dutch landscape painter, born 1639. JOHN, his brother, distinguished as a painter of battle-pieces, 1646-1733.

HUGUES, VICTOR, French governor of Guadeloupe during the first revolution, 1770-1826.

HUGUET, M. A., a Fr. prelate, executed 1796.

HUIT, or HEWETT, EPHRAIM, minister of Windsor, Conn., was a native of England, emigrated to America, and was settled as colleague with Mr. Wareham in 1639. He possessed superior talents. Died 1644.

HULDRICH, JOHN, a Swiss divine, 1683-1737.

HULL, ISAAC, born in Derby near New Haven, Connecticut, in the year 1775. He made his first voyage when only twelve years of age, on board a prize taken during the Revolution, by his father.—Before he entered the navy he had made eighteen voyages to different parts of Europe and the West Indies. He entered the navy as lieutenant on the 9th of March, 1798. His first active service was in the war with the French Republic, during the administration of John Adams. Hull was then the lieutenant of the frigate *Constitution* under Commodore Talbot, but he was intrusted with the capture of the *Sandwich*, a French letter-of-marque. He succeeded in capturing the vessel, spiking the guns of a battery on shore, and getting the prize safely out of harbor without the loss of a man. In return for this service, which he achieved in a very brilliant manner, he received a separate command. In the Tripolitan war, Hull's services were most important. In the commencement of the war of 1812, Hull, having been advanced to the rank of captain, was placed in command of the *Constitution*. His first exploit was getting this frigate safely out of a British squadron in which it was entangled. Shortly afterwards he achieved a brilliant victory over the British frigate *Guerriere*, commanded by Captain Da-

cres. In the action the *Constitution* had seven killed and seven wounded, the *Guerriere* had fifteen killed and sixty-two wounded (including the captain

and several officers), and twenty-four missing. After the war of 1812, Commodore Hull commanded in the Pacific and Mediterranean, and on the shore stations in the United States. He died in Philadelphia on the 13th of February, 1843.

HULL, THOMAS, a dramatic writer and actor, founder of the Theatrical Fund, 1728-1808.

HULL, WILLIAM, General, governor of Michigan territory from 1805 until 1814. At the commencement of the war he commanded the north-western army, and in 1812, surrendered with a force of 2,000 men to General Brock. In 1814 he was tried by court martial on several charges, and condemned to be shot, but in consideration of his services, the sentence was not carried into execution. Died 1825, aged 72.

HULLIN DE BOISCHEVALIER, L. J., a French writer, author of 'Repertoire Historique de la Révolution,' and 'De l'Empire,' 1742-1808.

HULLIN, P. A. a French general, 1758-1841.

HULLOCK, SIR JOHN, a distinguished lawyer and judge, author of the 'Law of Costs,' 1764-1829.

HULME, NATHANIEL, a med. wr., 1732-1807.

HULSE, SIR S., an English officer, died 1837.

HULSEMANN, J., a German divine, 1602-1661.

HULSIUS, ANTHONY, an Oriental scholar and theologian of Holland, 1615-1685. HENRY, his son, a learned divine and professor, 1654-1723.

HULST, P. VANDER, a Dutch painter, famous for his flowers and insects, 1652-1708.

HULSWIT, J., a Dutch painter, 1766-1822.

HUMANN, J. G., a French minister of finance, member of several cabinets, 1780-1842.

HUMAYUN-NESIR-ED-DEENY MOHAMMED, second Mogul emp. of Hindostan, 1508-56.

HUMBERT, the first French cardinal, 11th ct.

HUMBERT, J. A., a French general, 1767-1823.

HUMBOLDT, WILLIAM VON, the brother of the illustrious author of 'Cosmos,' was born in Potsdam 1767, when his father was chamberlain to the Princess Elizabeth of Russia. In his youth—like all the young people of Germany at this period—he was influenced by the sentimental enthusiasm of which Goethe's 'Werther' still remains the literary monument; and besides entering into friendly alliances with his fellow-students, he cultivated an intimacy with the most distinguished women of the age. Of the latter amiable sentiment, his 'Letters to a Female Friend'—translations of which have appeared in English—are a pleasing memorial. It is as the philosopher and statesman, however, that the name of William Humboldt has acquired an European reputation. The intimate friend of Schiller and Goëthe, his name is imperishably associated with the revival of philosophy and letters in Germany; and, as a statesman, with the political history of the court of Berlin. In 1800, two years after publishing his æsthetic essays under the title of 'Hermann and Dorothea,' he was appointed Prussian minister at Rome; and during the eight years that he resided there, acquired a wide reputation as an archæologist, and a master of historical philology. On returning home, he was appointed councillor of state, and minister of worship and education, and at once applied himself to the reform of existing institutions, and the organization of the university of Berlin,—a task of no slight consequence in the chaos of philosophical speculation with which he found himself surrounded. The wishes of the king being accomplished in this respect, Humboldt resumed his diplomatic career as ambassador to Vienna; and from 1810 to the congress of Aix-la-Chapelle in 1818, his name is associated with every important transaction in the politics of Europe.

In 1819 his connection with the court of Prussia was broken off, in consequence of his attachment to constitutional principles, and his opposition to the decrees of Carlsbad, which introduced the censorship of the press, and certain measures controlling the universities. The agent in these transactions was the chancellor Hardenberg, who had become the tool of Metternich; and Humboldt having been dismissed from the ministry, henceforth devoted his whole time to literature. The remainder of his days were passed at his seat near Berlin, where he died on the 8th of April, 1835, deeply regretted by the whole German nation. His works, which are of a miscellaneous character, generally bearing on history, archæology, and philology, including the remains of Eastern civilization, have been published at intervals since his death by his brother, Alexander von Humboldt, who is still the honored friend and counsellor of the king of Prussia, and is revered as the patriarch of philosophy throughout Europe. William von Humboldt may justly be taken as a pattern of the depth and diversity of the German mind, and as the promise of a richer future for the German nation.—He stands like the representative of the change from spirit to life, from idea to reality, in which the German mind is engaged; for he was one of the first and ablest who took this step. He adhered to the past, advanced boldly forward, and put his trust in humanity and his country.—(*Lives of the Brothers Humboldt from the German of Klencke and Schlesier.*)

HUME, SIR A., a naval officer, 1748-1838.

HUME, DAVID, born in Edinburgh, 26th April, 1711; died there on 25th August, 1776: unquestionably the most remarkable personage of the Augustan era of Scotland. Referring for the external details of Hume's life to his charming Autobiography, we shall require more than our usual space to characterize, however succinctly, the Philosopher, the Historian, and the Man. I. The place and functions of the metaphysical speculations of this great Thinker, are not only peculiar but unique in the History of Modern Philosophy. At the period in question, Mental Science had fallen into the lowest possible state, not in Britain merely, but over Europe—that, viz., of a conscious inconsistency: principles were accepted and conclusions evaded; beliefs timidly relied on, betwixt which, and all grounds of certainty then acknowledged, lay an impassable hiatus. The sensational philosophy—always agreeable to the practical tendencies of the English mind, had just reached its culmination under guidance of the genius and earnestness of John Locke; and we were undergoing its consequences in the dwarfing of systematic morals, and the gradual impoverishment of religion; saving ourselves as to the mere form of Faith, by refuge in tradition, or, what is worst of all, willing subjection to gross paralogisms. When Science exists only through paltering with Reason, when it accepts as its function, the office, not of discerning Truth, but of finding excuses for Beliefs, it is Science no longer, but a corruption and hypocrisy; and however it may come, its destruction is a blessing. Hume appeared as the Destroyer. Gifted with an intellect clear and fearless, he carried principles remorselessly to their consequences; and proved beyond question, that on the grounds of the existing philosophy, all Belief must disappear. If he reached Universal Scepticism, it may be said that he yet had a faith sounder than any in the Philosophy he destroyed; he trusted in the only ground of human certainty, viz., in our Human Reason; and had the rare courage to follow where it seemed to lead. It is not

easy to conceive the degree of consternation spread through every region of existing speculation, by the 'Essay on the Idea of Necessary Connexion,' the 'Enquiry Concerning the Principles of Morals,' the 'Natural History of Religion,' and their other companions. Hume had divested himself by this time of the scholastic rudeness of the author of the 'Treatise on Human Nature,' and become one of the most pleasing and accomplished writers of any period. His blows resounded accordingly through all cultivated society: it was heard every where with amazement, that by a Logic apparently invincible, the basis of all certainty respecting Man, Nature, and God had been destroyed, and that doubt irremediable was the sole inheritance of our Race! It is needless to say that the resting-place of Humanity was saved; but not by invalidating the *reasoning* of the trenchant Scotchman. Hume's triumph was complete; only, it was the *existing Philosophy* that he laid in ruins. His logical demolition of the Idea of Cause, awoke in the spirit of the illustrious KANT that train of thought which has illumined Germany until now; and DR. REID, moved by the same influence, wrought less systematically, but in a corresponding direction, towards the foundation of the School which has played so wholesome a part in the re-edification of Mental Science. In something of this light will History regard the Metaphysician Hume.—II. The clearness of Intellect and peculiar sagacity that distinguished Hume, shine out nowhere more brightly than in his political and historical writings; although we discern here, perhaps more palpably, those defects which fitted him for his task as Destroyer. Eager to generalize, skilful as sagacious, and incapable of being influenced by surrounding opinions, we find him in his political essays steadily surveying and defining most of those great truths regarding commerce which Adam Smith afterwards elaborated in the 'Wealth of Nations,' and which the civilized world at length accepts as its guide: nor will a time ever come when the general reflections strewn through every page of the 'History of England' will cease to instruct and elevate the Statesman. The enduring position of the 'History' indeed, is that of a rich philosophical treatise; not that of a *History* in the true significance of that term: nor can any thing be imagined more incongruous than its usual connection on the book-shelf, with a set of continuations and chronicles, more or less accurate in dates, but dry in wisdom as in style. When Hume wrote, a History as a critical science was not known as it is now; and unfortunately he had not the industry, accuracy, nor the general impartiality of his compatriot Gibbon. Still worse, he had no sympathy with the most powerful of the springs of action moving the times he depicts: had he comprehended these, his name would not have been known in Philosophy merely as the name of a Destroyer. His narrative of the reigns of the Stuarts and of the struggles which freed England, is simply fictitious, and should be read as such: try his picture of Cromwell by the documents recently brought under light of the sun by Thomas Carlyle.—III. The character of this distinguished person has been misunderstood and misrepresented alike by friends and foes. His nature was a great one, but not developed in some most vital directions. No man of his time had a stronger understanding, larger intellectual capacity, finer tastes, higher courage, or more rooted love of independence. His temperament, too, was greatly enviable: he had no violent passions, so that he was tried by few temptations; he was delicate, and modest; he had no malignity; he was candid and kindly.

Still, it is impossible to concur with Adam Smith, 'that he approached as nearly to the idea of a perfectly wise and virtuous man as perhaps the nature of human frailty will permit.' His fatal deficiency has been already adverted to,—he had no sympathy with the largest, the profoundest portion of our Human Nature. He treated the Puritans as he did, not through malignity, but because he could not appreciate them: he knew nothing of the value of sacrifice to the Unseen: the morals he understood were simply calculations of visible consequences.—In many respects Hume was a wise man; but we must not set down his dislike of Enthusiasm to the repose and tranquillity of Wisdom. The highest wisdom is, indeed, seldom enthusiastic, because it has discerned the meaning of the *Law of Limitations*—that in this various and complex Universe, no principle acts singly, or ought to enjoy absolute rule: Hume had not this wisdom; he merely disliked enthusiasm because he had no part or parcel with the principle which sustained those enthusiasts, as with their life-blood they purchased the liberties of England.—See *Mr. Burton's* excellent volumes on Hume. His philosophical works are out of print: the last and best edition, in 4 volumes, was published by Mr. Black of Edinburgh. [J.P.N.]

[Tomb of Hume—Edinburgh.]

HUME, DAVID, a nephew of the great historian, and a writer on the Scotch criminal law, 1756–1838.

HUME, JOSEPH, an English statesman and reformer, was born in Scotland in 1777. His father was the master of a trading vessel. He began his career as a surgeon, and in 1789 was appointed assistant surgeon to the India army. Having while in India devoted himself to the study of the native languages, he was selected as an interpreter, and afterwards appointed to various offices in the government, from which he returned to England in 1808, with a handsome fortune. In 1812 he entered parliament, and sat at various times for Malcombe Regis, Middlesex and Merton, of which latter, his native place, he was the representative when he died. He was always an earnest advocate for economy in national expenditure, and was remarkable for financial ability. Died February 20, 1855.

HUME, J. D., a disting. financier, 1774–1842.

HUMMEL, JOHN NEPOMUK, a celebrated musician and composer, was born at Presburg in 1778. Exhibiting an extraordinary taste for music, he was placed under the tuition of Mozart at an early age. After remaining with him for a couple of years, he travelled with his father through several parts of

Europe. His performance as a pianist was highly applauded. Died 1837.

HUMMELIUS, J., a Ger. mathematician, 1518-1562.

HUMMING BIRD, GENERAL, a Choctaw chief and friend to the Americans. He commanded a party of Choctaws in the expedition of Wayne in 1794, against the Shawnees and Delawares, and in the late war distinguished himself fighting against the English. Died 1827, aged 75.

HUMPHREY, LAURENCE, a learned divine, author of a 'Life of Bishop Jewel,' &c., 1527-1590.

HUMPHREY, OSIAS, a celebrated miniature painter, was born at Honiton, Devonshire, in 1743, and studied at the Royal Academy. He afterwards went to India, and was made a member of the Asiatic Society. Died 1810.

[Col. David Humphreys' Monument, New Haven.]

HUMPHREYS, DAVID, minister of the United States to the Court of Spain, was born in 1753, and graduated at Yale College in 1771. Shortly after the commencement of the war he entered the army as a captain. In 1778 he was appointed aide-de-camp to General Putnam. Afterwards he was selected by Washington for that duty, and rose to the rank of colonel. In 1784 he was appointed secretary of legation to Paris, afterwards ambassador to the court of Lisbon, and in 1797 minister to Spain. Died 1818.

HUMPHREYS, JAMES, a distinguished lawyer and jurist, was born in Montgomeryshire, Wales. He was the author of 'Observations on the English Law of Real Property,' &c. Died 1830.

HUNAUD, F. J., a Fr. anatomist, 1701-1742.

HUND, W., a Bavarian historian, 1514-1588.

HUNERIC, a king of the Vandals, 477-485.

HUNNIAD, JOHN CORVINUS, vaivode of Transylvania, and general of the Hungarian armies, distinguished against the Turks, died 1456.

HUNNIS, W., a poet, age of Elizabeth.

HUNNIUS, GILLS, a German divine, 1550-1603. His son, NICHOLAS, also a distinguished theologian, 1585-1643.

HUNNOLD, FR., a German Jesuit, last century.

HUNT, HENRY, an active English politician, was born about the year 1773. His name was one of great notoriety during the first quarter of the nineteenth century, but little will probably be remembered of him at its end. Yet he had some qualities of a peculiarly English and sterling character. His name is associated with the mob and vulgarity, but he had

considerable ancestral claims, and one of the few of his remembered sayings is his retort on Sir Robert Peel as the first of a family of tradesmen who became a gentleman, while he himself was the first of a race of gentlemen who had become a tradesman. In early life he was a high Tory, but during the greater part of his public career he expressed extreme Radical doctrines. Whatever he did, whether in selling his incomparable blacking and his roasted corn, invented as a substitute for coffee, or offering his services to represent a county, he spread his doings before the world with liberal profuseness, and was pleased with any kind of notoriety, provided it were abundant. In 1830 he succeeded in entering parliament, where he remained for a short time as member for Preston. If not attended to in parliament, he always made himself heard. His voice possessed a peculiar shrillness which made it audible amidst all other ordinary sounds, and it was remarked that over all the shuffling and coughing of an impatient House, his speaking was as clearly heard as the ringing of a factory bell through the murmurs of a crowd. He died in 1835. [J.H.B.]

HUNT, JEREMIAH, a dissenting divine, au. of 'An Essay towards expl. the History and Revelations of Scripture in their several Periods,' 1678-1744.

HUNT, TH., a learned Hebraist, 1696-1774.

HUNTER, ALEX., a Scotch phys., 1729-1809.

HUNTER, ANNE, wife of John Hunter the celebrated anatomist, distinguished as a writer of lyrical poetry, 1742-1821.

HUNTER, CHR., an antiquarian, 1675-1757.

HUNTER, HENRY, a Scotch divine, author of 'Sacred Biography,' a translation of Lavater's Physiognomy, 'Lectures on the Evidences of Christianity,' &c., 1741-1802.

HUNTER, JOHN, a Scotch classic, 1747-1837.

HUNTER, JOHN, a Scotch commander and vice-admiral, distin. under Lord Howe, 1738-1821.

HUNTER, JOHN, the youngest brother of William Hunter, and one of the most remarkable men of his own or any other age. He was born at Calderwood on the 13th of February, 1728, and lost his father when he was ten years of age. He seems never to have exhibited any aptitude for scholastic learning, and there can be no doubt that his early education was greatly neglected, and that much of the obscurity of his style in after life was attributable to that cause. How he spent the first twenty years of his life is not ascertained, but there is a very general belief, amounting to something like a tradition, that he was apprenticed at the age of seventeen to a Mr. Buchanan, a cabinetmaker in Glasgow, who had married his sister Janet. If so, he must have been engaged in this mechanical occupation for three years, for it was not till the year 1748 that his brother William, now firmly established as a lecturer on anatomy, sent for him to London, and placed him in his anatomical theatre, where he soon became an expert dissector, and a complete anatomist. He studied surgery under the celebrated Cheselden; in 1751 he became a pupil in St. Bartholomew's; and in 1756 he was appointed house surgeon to St. George's Hospital. Notwithstanding the defects of his general education he rapidly surmounted all the difficulties that lay in his way, and by his extraordinary genius and great assiduity had acquired by the year 1761, a fixed position and an established reputation in the anatomical and surgical worlds. But his health began to suffer, and in that year he was appointed to the medical staff of the army, in which capacity he served for three

years in France and Portugal, when he returned to London with renovated strength, and began that series of observations and experiments on the inferior animals, which laid the foundation of his fame as a comparative anatomist. He died suddenly on the 16th of October, 1793, in one of the apartments of St. George's Hospital, in the sixty-fifth year of his age. Of John Hunter's contributions to science during the last twenty years of his life it is impossible to give even an outline in this place, but they were numerous and of the highest value; nor is it too much to say that this remarkable man, by the vigor of his own talents, laid the foundation of all those improvements in surgery, physiology, and comparative anatomy, which have been made since his time. After his death, his museum, which had cost him £70,000, was bought by the government from his widow for £15,000, and by it was presented to the Royal College of Surgeons. John Hunter died childless, and as his brother William never married, the direct race of two men possessed of the highest genius is extinct. [J.M.C.]

HUNTER, ROBERT, author of the famous *Letter on Enthusiasm*, which has been attributed both to Swift and Shaftesbury, appointed governor of Jamaica, 1728, and died 1734.

[William Hunter, Hunterian Museum.]

HUNTER, WILLIAM, a distinguished anatomist, physiologist, and physician, was born at Long Calderwood, in the parish of East Kilbride, in the county of Lanark, Scotland, on the 23d of May, 1717. He was the seventh of ten children, and being destined for the church was sent to the University of Glasgow at the age of fourteen, where he remained for five years. He now resolved to abandon the study of theology and to apply himself to medicine, and with this view became the private pupil of Dr. Cullen at Hamilton, with whom he remained for three years. He then proceeded to Edinburgh with the design of qualifying himself to become the partner of Cullen; but, in 1741, he repaired to London in search of fame and fortune, and found both. After studying under various masters of acknowledged ability he commenced as a lecturer on anatomy in 1746. In 1747, he became a member of the corporation of surgeons; in 1750, he graduated as a doctor of medicine at the University of Glasgow; and in 1756, he became a licentiate of the College of Physicians. He was afterwards successively elected physician to the Lying-in-Hospital; fellow of the Royal and Antiquarian Societies; professor of anatomy to the Royal Academy; physician extraordinary to the queen: and in 1781, president of the

College of Physicians. He died on the 30th of March, 1783, in the sixty-fifth year of his age. In the course of a long and laborious life, devoted to the highest objects of science and humanity, Dr. Hunter had collected a magnificent anatomical museum, a valuable library of rare and curious books, and a considerable number of paintings and coins, all of which he bequeathed to the University of Glasgow, with a sum of £8,000 to support and augment the collection. This fine museum was transferred to Glasgow in 1807, where a very elegant building from a design by Stark had been erected for its reception at a cost of £12,000. Dr. Hunter was an active and zealous contributor to the medical literature of his time, and was engaged in some sharp controversies with several of his contemporaries on disputed points in anatomy and physiology; but the work by which he will be chiefly remembered is, '*The Anatomy of the Human Gravid Uterus*,' one of the most splendid publications that ever issued from the press, and in collecting the materials for which he spent thirty years. It consists of thirty-four plates engraved by the most eminent artists of the day, with explanations in English and Latin, and appeared in 1775; but the treatise illustrative of it he did not live to publish. That duty was undertaken by his nephew, Dr. Baillie, who published in 1794 '*An Anatomical Description of the Human Gravid Uterus and its Contents*,' compiled chiefly from the MSS. of his uncle. [J.M.C.]

HUNTER, WILLIAM, a Scotch physician, and wr. on subjects connected with Hindostan, d. 1815.

HUNTER, WILLIAM, M.D., a physician of Newport, Rhode Island, was born in Scotland, and emigrated to America about the year 1752. He was the first medical man who ever lectured on anatomy in New England. Died 1777.

HUNTER, WILLIAM L., a citizen of Rhode Island, was a senator in Congress from 1811 to 1821, and in 1844 was appointed minister to Brazil. Born in 1774, died 1849.

HUNTINGDON, HENRY OF, author of a *General History of England from the Earliest Account to the Death of Stephen*, 12th century.

HUNTINGDON, SELINA, countess of, a famous name in the history of Calvinistic Methodism, was the second daughter of Washington, earl Ferrers. She was born in 1707, and left a widow by Theophilus Hastings, earl of Huntingdon, in 1746. Previous to her husband's death, she had received deep impressions of religion, and attached herself to the ministry of Whitfield—whom she appointed her chaplain. The ample jointure of which she became possessed was almost wholly devoted to the cause of religion in connection with the Methodist Christians. She founded the college of Treveeka in Wales, in which young ministers were trained, studded destitute localities with new chapels, and maintained a band of itinerant preachers to supply them in rotation, carrying on all the correspondence herself. On the Methodist body splitting into two, she espoused the Calvinistic party under Whitfield. On the lease of Treveeka expiring, she erected a more extensive college at Cheshunt, Hertfordshire. The name of Lady Huntingdon is inseparably identified with the great revival of evangelical religion in this country during the eighteenth century, and it is scarcely possible to estimate her services too highly. For although some of her peculiar opinions may be disputed, yet her zeal and piety were unquestionable, and many parts in England to this day are reaping the fruits of her Christian liberality and devotedness to the cause of evangelical missions. She died at

the advanced age of eighty-four, at her mansion-house in Spafeld, and her remains were deposited in the family vault, Ashby-de-la-Zouch, Leicestershire.

HUNTINGFORD, GEORGE ISAAC, successively bishop of Gloucester and Hereford, distinguished as a Greek scholar and theologian, 1748-1832.

HUNTINGFORD, WILLIAM, a sectarian preacher of the party of Calvinistic Methodists, author of many controversial works, 1744-1813.

HUNTINGTON, EBENEZER, a citizen of Connecticut, graduated at Yale College, 1775, and the same year joined the army as a volunteer. He was soon promoted to a lieutenancy, and in 1776 he held the rank of captain, was also deputy adjutant general, and in 1779 lieutenant colonel. In 1799, when a war with France was apprehended, he was promoted to the rank of brigadier general at the recommendation of Washington. Died 1834.

HUNTINGTON, JEDEDIAH, general, was born in Norwich, Connecticut, in 1743, and graduated at Harvard College in 1763. In 1775, he was appointed to the command of a regiment, and in 1777 was promoted to the rank of brigadier general. After the war he was sheriff of the county and treasurer of the State, and in 1789 he was appointed collector of the port of New London. Died 1818, aged 75.

HUNTINGTON, R., a learned div., 1636-1701.

HUNTINGTON, SAMUEL, governor of Ohio, was born in 1765, and graduated at Yale College in 1785. In 1801 he was appointed chief justice, and in 1808 was elected governor. Died 1817, aged 49.

HUNTINGTON, SAMUEL, governor of Connecticut, was born in 1732. Having acquired a knowledge of the law, he soon became eminent in that profession in Norwich. In 1764 he was a representative in the general assembly, and in 1765 was appointed king's attorney. In 1774 he got the office of assistant judge of the superior court, and in the following year he was elected into the council, and also chosen member of Congress. In 1784 he was appointed chief justice, and in 1786 governor, to which office he was annually elected until his death in 1796. He was one of the signers of the declaration of independence.

HUNTON, PHILIP, a political writer, provost of the new college erected by Cromwell, died 1682.

HUPAZOLI, FRANCIS, a native of Sardinia, remarkable for his great age, 1587-1702.

HUQUIER, J. G., a Fr. engraver, 1695-1772.

HURD, RICHARD, best known as the author of 'Dialogues, Moral and Political,' and of 'Letters on Chivalry and Romance,' which were published in a collected edition of 3 vols. 8vo., 1765, was the son of a farmer, and was born at Congreve, in Staffordshire, 1720. As early as 1742, he obtained a fellowship in Emmanuel College, and in 1757 was appointed rector of Thurcaston, in Leicestershire. After this he was successively preacher to the society at Lincoln's Inn, 1765; archdeacon of Gloucester, 1767; bishop of Lichfield and Coventry, 1775; preceptor to the prince of Wales and the duke of York, 1776; and bishop of Worcester, 1781. In 1783 he declined the primacy offered to him by George III., and lived contented with the honors already showered upon him till 1808, when he expired in his sleep, after a few days' confinement to his bed. Hurd was a clever satirist, and a great proficient in polite literature. His Dialogues were a covert attack upon the 'big wigs,' and the principles of arbitrary government; but he seems to have outlived the discontented vanity, or the earnestness in the cause of freedom which dictated them,

and to have subsided into the man of learned leisure, and the polite scholar. He was the friend and biographer of Bishop Warburton. A complete edition of his works which he had himself prepared for the press, was published in 1810, in 8 vols. 8vo. Much interesting information concerning the life, character, and works of Bishop Hurd will be found in vol. VI. of Nichol's Literary Anecdotes. [E.R.]

HURDIS, JAMES, an English poet, 1763-1801.

HURE, CHARLES, a French theologian of the Jansenists, au. of a 'Dict. of the Bible,' 1639-1717.

HURET, G., a French engraver, 1610-1670.

HURLBUT, JAMES, a skilful physician of Wethersfield, was born in Berlin, Connecticut, in 1717, and died in 1794, aged 77.

HUSCUSKE, E. T., a Ger. philoso., 1761-1828.

[Statue of Huskisson at Liverpool, by Mr. Gibson.]

HUSKISSON, WILLIAM, a British statesman, was born on the 11th of March, 1770. He was the son of a country gentleman, and succeeded to some landed property. In spending a few of his early years in France, he not only saw many of the striking events of the revolution, such as the capture of the Bastille, but had a personal intimacy with several of the actors in them, and joined the body called the 'Société de 1789.' Though this was one of the clubs of the moderate party, his connection with it brought on Huskisson a taunt of Jacobinism, at a time when French principles, as they were termed, were received with intense horror by the upper and middle classes in Britain. He showed an early soundness of opinion in economic matters, by offering a warning against the creation of fictitious paper-money by assignats. He returned to England in 1792, and in 1796 entered parliament as member for Morpeth. He filled several subordinate ministerial appointments, and made himself valuable by his sagacity and business capacity. He was one of the first practical statesmen, since Pitt had changed his views, whose conduct was influenced by the doctrines of free trade, and though his opinions are far behind those which have prevailed in the legislation of the present generation, he was viewed in his own day as a dangerous man, who had treacherous designs on the interests of his country. In 1821 he showed himself favorable to the modification of the corn laws, and in 1823 he carried the relaxation of the navigation act, which sanctioned reciprocity treaties. In 1827 he took the office of secretary to the

colonies, and continued to hold it under the duke of Wellington. Having, on a point of etiquette, to offer his resignation, it was so readily accepted that the duke evidently desired to be rid of him. At the opening of the Liverpool and Manchester Railway on 15th September, 1830, he stumbled in hastily crossing before a train, which passed over him, and so wounded him that he only survived a few hours.

HUSS, JOHN, was born about 1370 at Hussinatz, a village in Bohemia. Though sprung of humble parents, he was sent to the university of Prague, and on completing his studies was admitted to priest's orders in 1400. The opinions of the English reformer Wycliffe having reached Bohemia, Huss, on mature consideration, was led to adopt them, and as a professor and preacher in Prague, he exposed with vehemence the abuses and vices of the Romish Church and clergy. The patronage of the queen Sophia protected him for a season, if not from molestation, at least from personal injury. But the archbishop of Prague was terribly provoked, and so were many of the clergy, by the intrepidity of Huss, and by his opposition in the university to Pope Gregory XII. In some fierce discussions which took place as to the balance of elective power among the youth of various nations attending the university, Huss, urged by his Realistic and national partialities, took the part of the Bohemians so effectively, that the German students, to the number of some thousands, withdrew, retired to Leipzig and founded its university in the year 1409. The reforming energy and perseverance of Huss so enraged his ecclesiastical superiors, that the archbishop of Prague ordered the Bohemian translation of the books of Wycliffe to be burned, and suspended Huss, while Pope John XXIII. solemnly excommunicated him. But the ardent spirit of the reformer did not quail, and both in his native village and at Prague he continued his denunciations of purgatory, indulgences, and clerical corruptions. Having at length opposed a papal bull which had been fulminated against Ladislaus, king of Naples, he excited such tumults that he was summoned to the famous Council of Constance, and though a 'safe conduct' had been granted him by the emperor Sigismund, he was nevertheless impeached, arrested, and cast into prison, and on his refusal to confess his guilt or retract, he was condemned as a heretic, and burnt on the 6th of July, 1415. The causes of this severe and unjustifiable treatment of Huss, may be found in his bold and unflinching honesty of purpose, in the sacerdotal enmity which his sermons and literary labors had stirred up against him, and especially in his avowed Realism, and his hatred of the German Nominalists, some of whom, such as Gerson, were his principal judges. His labors, history, and martyrdom, were not without abundant fruit in the succeeding century. [J.E.]

HUSSEIN-PACHA, a Turkish admiral, surnamed 'the Little,' fav. of Selim II., 1750-1803.

HUSSEIN-PACHA, the last king of Algiers, born 1773, proclaimed dey 1818, dethroned by the French under Marshal Bourmont, 1830.

HUSSEY, GILES, a painter of great skill, was born at Marnhull in Dorsetshire in 1710, and learned his profession in France and Italy. Died 1788.

HUSSEY, SIR RICHARD, a British admiral employed in reducing the Ionian Islands, 1776-1842.

HUTCHESON, FRANCIS, born in Ireland 8th August, 1694, died in Glasgow, 1747. To Hutcheson must be awarded the honor of reviving speculative philosophy in Scotland. In 1729 he obtained the chair of Moral Philosophy in the university of

Glasgow; and he certainly started that line of thinking in Psychological questions which Reid afterwards, with so great success, followed out. Besides manuals for the use of his class, he published during his lifetime the 'Inquiry into the Origin of our Ideas of Beauty and Virtue,' and an essay 'On the Nature and Conduct of the Passions and Affections.' His 'System of Moral Philosophy,' in 2 volumes 4to, appeared after his death. He energetically asserted the existence of Moral Sense, or a power to discern good in itself, and claimed for our Idea of the Beautiful, the character of originality and independence. Hutcheson's intellect was vigorous, and he evinced in all his writings singular freedom and freshness. There is an excellent life of him by Principal Leechman.

HUTCHINS, JOHN, an Engl. divine, au. of the 'Hist. and Antiquities of Dorsetshire,' 1696-1773.

HUTCHINS, THOMAS, geographer-general of the United States, was a native of Monmouth county, New Jersey. He joined the army at an early age, and served against the Indians in Florida. At the commencement of the war, he was in England, and in 1779 was imprisoned there on suspicion of corresponding with Franklin, who was then American agent in France. He afterward joined the American army under General Green, and was soon appointed geographer-general. Died 1789.

HUTCHINSON, ANN, a religious enthusiast of New England, banished from the colony by an ecclesiastical synod, and killed, with fourteen others of her family, by the Indians, 1643.

HUTCHINSON, JOHN, was an English gentleman whose name became famous as a speculative philosopher and interpreter of the Bible in the early part of last century, and is now generally mentioned with disparagement. The publication of Sir Isaac Newton's Principia in 1687, in which the philosopher supposed the planets to move through a vacuum, provoked Mr. Hutchinson, who was a great student of antiquity, and of the Hebrew Scriptures, to publish his work entitled '*Moses' Principia*,' which appeared in two parts, 1724 and 1727. The design of Mr. Hutchinson was to demonstrate that a celestial matter pervades the whole creation, spiritual and natural, whereby Jehovah is master of the material worlds, whereas the theory of Sir Isaac Newton supposed a universe without a God, or a God who acts by arbitrary power. This philosophical doctrine, which is supported by the recent discovery of an interplanetary ether, was, in the work of Hutchinson, a pure deduction from the Scriptures, his principle being that the Hebrew language is perfectly formed, so as to convey perfect ideas, without the redundancy or deficiency of letters common to other languages; hence, that it was perfectly adapted to be the medium of a revelation, and that religion and philosophy were united in the system of Moses. Hutchinson attacked Dr. Woodward, author of a 'Natural History of the Earth,' as well as Sir Isaac Newton. He wielded his pen with the hand of a master, and with little respect for the feelings of his opponents. Among his adherents were Bishop Horne, Jones of Nayland, Julius Bate, Drs. Hodges and Wetherall, Parkhurst, Romaine, and Dr. Samuel Clarke. He was born at Springthorn in Yorkshire 1674, and died 1737. [E.R.]

HUTCHINSON, JOHN HELY, an Irish lawyer and statesman of distinguished talents, but remarkable selfishness, 1715-1794. His son, of the same name, a distinguished military officer, and successor of his brother as earl of Donoughmore, 1757-1832.

HUTCHINSON, THOMAS, the historian of the

colony of Massachusetts, born 1711, chief justice of that province, 1760, lieutenant-governor 1758-1770, governor to 1774, died 1780.

HUTCHINSON, W., a county hist., 1732-1814.

HUTTEN, JACOB, the founder of the 'Moravian Brethren,' whose successors are supposed to have been the adherents of Zinzendorf, 16th century.

HUTTEN, ULRIC VON, a German poet and miscellaneous writer, best known as a champion of the reformation, 1488-1523.

HUTTER, ELIAS, a German divine, author of a Polyglott of the New Testament in twelve languages, and of a version of the Hebrew Bible, distinguished by many peculiarities, in which the cxvii. Psalm is given in thirty languages, 1554-1603.

HUTTER, LEONARD, a German theologian and polemical writer of the reformation, 1563-1616.

HUTTICH, J., a German archæologist and numismatist, au. of 'Antiq. of Mayence,' 1480-1544.

HUTTON, CHARLES, LL.D., a very laborious cultivator of Mathematical Science, and a deserving writer; born at Newcastle-on-Tyne 1737 died 1823. We owe to Dr. Hutton many valuable works on elementary mathematics, especially his 'Course designed for Cadets in the Royal Military Academy,' in 3 vols. 8vo; but his important contributions to scientific literature are his 'Dictionary of Mathematics,' in two large 4to volumes; and in another direction, his abridgment of the Philosophical Transactions in 18 vols. 4to. Dr. Hutton seems to have been a very successful teacher; and accordingly he was beloved by his pupils. His manners were simple, his temper equable and mild, and his attachments warm and unalterable.

HUTTON, DR. JAMES, born at Edinburgh 1726, died 1797: one of those Inquirers of genius who have power to seize the opportunity of effecting a revolution in Science. Hutton's mind was capable of earning distinction in any department of physical research; and we owe him various important hints,—for instance, he was the founder of Psychometry: but it is in Geology that his name stands as the mark of an epoch. During Hutton's early career, geology had not shaken itself free from cosmology; and existing theories regarding the formation of the Earth, were modelled on the ideas of his compatriot Werner; who, misled by a limited experience, considered all rocks as stratified, or produced by the subsidence of matter first diffused through water. Hutton's important achievement consisted in the discovery, through facts, that a large class of rocks are igneous; and that the existing forms of the surface of our planet result from two opposing forces constantly in play, and of whose efficiency we know neither the beginning nor the end. The phenomenon that established the truth of these views, was, after anxious research, discovered by Hutton in Glen Tilt—viz.: a fine instance of granite branching out in *veins* at its junction with the sedimentary rocks; manifesting thereby indisputable evidence of its igneous origin. Hutton's work on the Theory of the Earth, abounds with philosophical views on many points of geological theory of the kind entitled to the name of *predictions*: to him, first of all, the significance became apparent of the previously well-known facts of *unconformable stratification*. On an occasion, which has become classical, he took his favorite pupils, Professor Playfair and Sir James Hall, to the cliffs near St. Abb's Head, where the schists of the Lammer muir are undermined by the sea; and Playfair has left on record, how, interpreted by his sagacity, the simple, and till then barren visible fact of one rock lying on the edges of another, be-

came witness to enormous intervals and successive epochs, until 'the mind grew giddy by looking so far into the abyss of time,' and the awed listeners became sensible 'how much farther reason may sometimes go than imagination can venture to follow!'—Sustained by phenomena at once palpable, numerous, and conclusive, Hutton's important views rapidly made way among men of science: and, notwithstanding their novelty, and the stupendousness of the vista they open into the past, the popular belief has now accommodated itself to them, and revolts no more at the notion of the unfathomed Antiquity of the Earth, than at the august thought that the myriads of lustres in the Firmament, are worlds. This consummation came not without a struggle, but thanks to the 'press,' which could not aid Copernicus, the struggle in this case was neither severe nor prolonged. Hutton may be said to have revealed the second of the two dimensions of the Material Universe—the dimension, *Time*.—The student who has not read the affectionate biography of this philosopher by Professor Playfair, has still a rare treat in store. HUXHAM, JOHN, a medical writer, died 1768.

HUYGHENS, CHRISTIAN, born at the Hague 14th April, 1629; died 8th June, 1695: a very successful and celebrated cultivator of the Mathematical and Physical Sciences. It requires a long narrative to sum up Huyghens' contributions and discoveries; to appreciate them in their relation to history and his time, is wholly incompatible with our space. In pure geometry he gave theorems for the quadrature of the Hyperbola, the Ellipsis, and the Circle; in Mechanics, he laid down the theory of the Pendulum, and its application to the Clock; he discerned the synchronism of the Cycloid, invented the theory of Involutives and Evolutives of Curves, and explored the doctrine of Centres of Oscillation: most important of all he announced the law of the motion of the bodies revolving in circles, thereby *grazing* the law of gravitation. In Astronomy, we owe him the memorable discovery of Saturn's ring, at that time a most sagacious solution of very puzzling appearances. In Optics he laid the foundation of the theory of Undulations, explaining by means of it phenomena which by the theory of Emanation Newton could not touch.—Few cultivators of Abstract Science had a clearer or more correct intellect than Huyghens; he showed this, more especially in his ready appreciation and powerful grasp of the Doctrine of Gravitation: he adopted the new view at the sacrifice of his previous attachment to the Vortices of Des Cartes, and this at a period of life when men have rarely freshness enough to alter their opinions. His works are collected in four 4to volumes. [J.P.N.]

HYPATIA, daughter of Theon of Alexandria, celebrated for her beauty, illustrious in her genius, and hallowed through all time by her mournful death. She was torn to pieces by the mob of Alexandria, in her earliest prime, in the year 415. Hypatia was a neo-platonist. Charmed by the reflection therein, of the noblest intellect of Greece, and attracted by its mysticism, she professed that philosophy in public lectures; and her purity and elevation of soul enhanced the fame accruing from her eloquence. The period of her teaching was that of the first conflicts of Christianity with Paganism: the religion of brotherly love was then too often a symbol of insurrection to the ignorant and the poor,—insurrection against culture as well as false worship, against intelligence as well as aristocracy and pride. Cyril, of Alexandria, a man of courage, but not averse from turbulence and tyranny on his own side, was Bishop; and he did not enough repress passions certainly not approved in his Evangel. He accounted Hypatia his personal foe; and probably did not regret that with the temples of her deities, a martyr fell. The character of this brilliant victim is traced with genuine sympathy by Mr. Kingsley in his recent romance—one of those fictions which are truer than most histories. [J.P.N.]

IBRAHIM-MANSOUR-EFFENDI, a German adventurer, who embraced Mahommedanism, and introduced the discipline of Europe into the Turkish armies; after serving Ali-Pasha as engineer, he wrote a 'Memoir of Greece and Albania' under his government; he at length shot himself in Paris, on account of destitution, 1826.

IBRAHIM-MOLLAH, a T. vizier, stran. 1713.

[Ibrahim Pasha.]

IBRAHIM PASHA, the son and successor of Mehemet Ali in the government of Egypt, was also the chief instrument in establishing his dynasty, and deserves to rank with his father among the founders of empires. He was born at Cavetta in Roumelia 1789, and enjoyed his first military triumph at Cairo

in 1819, after subjugating the Wahabees, and wresting from their hands the holy towns of Mecca and Medina. In 1824 the sultan, as suzerain, demanded the aid of an Egyptian armament to suppress the Greeks, and the glory of Ibrahim, whose name had become famous throughout the East, and who had introduced the European discipline into his armies, pointed him out as the commander of the expedition. For nearly four years he overran the Morea, which became one extended field of ruin and bloodshed, but he was at length compelled to retire by the victory gained at Navarino by the combined fleets of England, France, and Russia, on the 20th of October, 1827. In 1831 he was sent by his father, at the head of 24,000 infantry, four regiments of cavalry, and forty pieces of artillery, to the conquest of Syria, which he effected so completely as to arrive within one hundred and fifty miles of Constantinople, at which juncture a Russian army marched to intercept him, and he concluded a treaty of peace by which several provinces were added to his father's government. In 1839, the Porte endeavored to recover Syria, and on the 24th of June, Ibrahim gained the battle of Nezib, by which the road was again opened to Constantinople; but the combined forces of England, Austria, Russia, and Prussia, were drawn up between him and his prize, and Acre being reduced by bombardment, the affairs of Egypt and the Porte were settled by their joint masters. After the evacuation of Syria, Ibrahim applied himself to the arts of peace in Egypt, and when Mehemet Ali became incapable of continuing the government, he was made viceroy according to the terms of succession granted in the firman of the sultan in 1841. He enjoyed this dignity only two months and ten days, and died in November, 1848, when he was succeeded by his nephew, Abbas Pasha. Ibrahim Pasha was a man of debauched habits, but a great soldier and sagacious statesman. As may be supposed, in a country like Egypt, just emerging from the barbarism of ages, and in a family which had fought its way out of obscurity, he was quite unlettered, but nevertheless, well acquainted with the courtesies of European society. [E.R.]

INCHBALD, ELIZABETH, the daughter of a Suffolk farmer, was born in 1753. At the age of sixteen, she eloped from home, with no more blameable design than the foolish one of seeking her fortune. Miss Simpson very soon became the wife of Mr. Inchbald, a respectable London actor, by whom she was brought on the stage, and played for a good many years. After 1784, she wrote plays, amounting to nineteen, several of which were very successful: her comedy of 'Wives as they Were and Maids as they Are,' is still acted. She edited three collections of plays. Her best literary works were her two novels: 'A Simple Story,' 1791; and 'Nature and Art,' 1796. She lived prudently and

irreproachably, and accumulated several thousand pounds, which she bequeathed chiefly to the Roman Catholic poor. She died at Kensington in 1821.

IRENAEUS, ST., was a native of Asia Minor, and a disciple of Polycarp. He is supposed, when still a young man, to have come to Gaul along with Pothinus, by whose instrumentality several churches were formed, the most famous of which were those of Lyons and Vienne. On the death of Pothinus, in A.D. 177, he succeeded him as bishop of Lugdunum (Lyons). This high office he continued to hold till his death about the end of the century. His ministry was a series of active, zealous, and devoted personal labors, and he struggled nobly for the purity and the enlargement of the church. The current controversies, such as that about the proper time of keeping Easter, attracted his attention, and in the name of the Gallic churches, he resisted with vigor the incipient encroachments of the bishop of Rome. His great literary work is his refutation of the Valentinian form of the Gnostic heresy, and is usually named *Adversus Haereses*. The original Greek, with the exception of a few fragments preserved by succeeding writers, has been lost, and the remainder of the work is in a barbarous Latin version. He is also supposed to have written the graphic and pathetic account of the persecution endured by the churches of Lyons and Vienne, which is still extant in the form of a letter. The character of Irenaeus was that of an honest, ardent, and amiable Christian pastor—possessed of a well-instructed mind—versant in the various phases of theological error, but often seduced into puerility by the allegorical methods of interpretation then so prevalent and bewitching. The common idea, that Irenaeus was a martyr, rests on no good foundation. None of the writers of his own age, or that immediately after it, ever allude to such an event. The editio princeps of his works was, under the charge of Erasmus, published at Basle, 1526, 8vo.—the excellent edition of Grabe appeared at Oxford in 1702, folio, and in Paris in 1710, under the care of Benedictine Massuet. There are also editions by Grynaeus, Basle, 1571; Gallasius, Paris, 1570; and Feuardentius, Cologne, 1596. But the best and most recent edition, is in 2 vols. 8vo, Leipzig, 1853, edited by Stieren, and supplied with the prefaces of the preceding editions, and with ample notes and prologomena. [J.E.]

IRENE, empress of the East, like Mary queen of Scots and some of the Medici, is one of those marked characters in whom the reader of history becomes personally interested to a degree far exceeding his sense of justice in the case, and whose powers of fascination not unfrequently charm the pen of the historian at the distance of ages. Born at Athens of a private family about 752, she was raised to the throne of Constantine by her marriage with Leo IV., who succeeded his father six years after the celebration of their nuptials, in 775. In 780, in consequence of the death of Leo, she became regent of the empire for her son Constantine, then in the tenth year of his age, and the court of Constantinople was soon a perpetual scene of intrigue and counterplot, which led to the most ruthless crimes. In this struggle, the uncles of the young emperor, fired with as much ambition, and endowed with infinitely less personal grace and love of art than the beautiful Athenian, were ranged on one

side with the iconoclasts, and Irene on the other supported the worship of images, and had the address and firmness of purpose to carry her point, which was finally decreed in a council held at Nice, 787. In the mean time, the education of her son, whom she never meant to exercise the supreme power, was totally neglected; and when he arrived at maturity, and was put in forcible possession of his father's authority by the troops, he not only proved incapable, but most unscrupulous and cruel in the exercise of his authority. With a reckless and ambitious woman like Irene on the watch for her opportunity, and his subjects alienated in disgust, it is not surprising that her emissaries were at last able to seize on the person of the emperor, and having done so, they put out his eyes, and proclaimed Irene—the only person that had shown any capability of sustaining the weight of government. She had reigned five years sole empress, and was negotiating a marriage with Charlemagne, which would have united the Eastern and Western empires, when Nicephorus, the grand treasurer, became leader of a revolt, and having brought over some of her eunuchs to his party, succeeded in dethroning her. A few months afterwards, she died in exile, at the isle of Lesbos, A.D. 803, still in the vigor of her years, and in all likelihood broken-hearted by her fall. We ought to have mentioned that Irene obtained some advantages over the Saracens during her regency, and concluded a treaty of peace with Haroun-al-Raschid. [E.R.]

[Ireton.]

IRETON, HENRY, son-in-law of Cromwell, distinguished as a parliamentary general in the civil war, and lord deputy of Ireland after the establishment of the commonwealth. He was one of those who signed the warrant for the king's death. Born 1610, died at Limerick, 1651.

IRVIN, EYLES, was born in Calcutta in 1748, and educated in England. In 1767 he obtained a civil appointment in the East, and returned to that country. In 1792 he was sent to China as superin-

tendent of the company's affairs. Died in England in 1817.

IRVIN, JARED, general, was appointed governor of Georgia in 1796, and again in 1806. Was a member of the convention which adopted the constitution of 1789. He was a soldier of the Revolutionary War. Died 1818, aged 68.

IRVINE, WILLIAM, major-general, a native of Ireland, was a surgeon in the British Navy in 1754, and in 1763, settled at Carlisle, Pennsylvania. Was a member of the State Convention in 1774. In 1776 he served in Canada, but was taken prisoner at Three Rivers, in June 1776, and detained until 1778, when an exchange took place. He was afterwards appointed to the command of the 2d Pennsylvania Regiment. In 1781, when the North-Western frontier was threatened by the British and Indians, he was intrusted with the defence of it. At the termination of the war, he was chosen to Congress. Died 1804.

IRVING, REV. EDWARD, was a native of Dumfriesshire, having been born at Annan on 15th August, 1792, of respectable parentage. His eccentricities began to display themselves at school, for even in boyhood he was singular in his dress, manner, and phraseology. Of all the branches of education, he excelled in arithmetic and mathematics, and his superiority in these departments appeared so decidedly during his curriculum at the college of Edinburgh, that as the foremost of all competitors, he was appointed mathematical teacher in the burgh school of Haddington, and the year following in the school of Kirkaldy. The latter situation he held seven years, when having become a licentiate in the Church of Scotland, and going on a visit to Edinburgh, he happened to preach in St. George's church. One of his hearers on that occasion was Dr. Chalmers, who engaged him to be assistant-minister in the parish of St. John's, Glasgow. Although he was not esteemed there a popular preacher, his great talents and peculiar eloquence were appreciated by a select, but devoted band of admirers, who sounded his praises far and wide, till his fame reached London. In 1822, Mr. Irving was invited to preach in the church of the Caledonian Asylum in London, then vacant, and soon after elected minister of the chapel, Dr. Chalmers introducing him to his new charge in August of that year. London is so immense a field, that a preacher even of moderate talents can reckon almost with certainty on obtaining an audience. Much more a preacher like Irving, who, to high and undoubted talent, united great eccentricity in sentiment and manner. An eloquent speaker, he yet indulged in a quaint style formed on the model of the Elizabethan age; delivered his discourses with prodigious energy; and made fearless indiscriminate attacks on every thing—civil as well as ecclesiastical—he considered wrong or faulty. Such a preacher was soon surrounded by multitudes. It became 'the fashion' to attend Mr. Irving's church. People of all ranks and characters, literary men, philosophers, statesmen, commons, and noblemen of the highest name and influence, flocked to his church. Within a year after his settlement in the metropolis, he published a volume of discourses, which he entitled 'For the Oracles of God, four orations: For Judgment to Come, an argument in nine parts.' So extraordinary was the demand for this volume, that three large editions were sold within six months. From his great popularity Mr. Irving was called frequently to plead the cause of many charitable and Christian institutions. In 1824 he preached the annual sermon for the London Mis-

sionary Society; and on that occasion, as he had acquired the habit of protracting the services to an unusual length, he exhausted himself so much, that he was obliged to pause twice to rest himself. The discourse was afterwards published under the title: 'For Missionaries after the Apostolic Schools,' a series of orations in four parts, and dedicated to his friend Coleridge. In the following year he preached the annual sermon for the Continental Society, and on that occasion, too, disgusted many, even of his friends and admirers, by extending the services to more than four hours' duration. He wished to train his own mind to habitual occupation with religious thoughts, and as he thought others should do so too, he refused to abridge his discourses.—Mr. Irving, through the influence of Coleridge, became strongly inclined to mysticism, and, having commenced the study of unfulfilled prophecy, which he preposterously held out as the key to the right interpretation of the Bible, he gradually plunged into a sea of the grossest absurdities. Attaching himself to what was called 'The Albury School of Prophets,' he not only adopted Millenarian views respecting the personal reign of Christ on the earth, but began to entertain some singular opinions of the model Christian church. These opinions leading him to conceive that it was want of faith that prevented the miraculous gifts of the primitive age from being enjoyed by the church in modern times, he with his flock, being true believers, laid claim to the power of working miracles, and speaking with unknown tongues. These wild extravagances, together with the sad errors in doctrine into which Mr. Irving fell, compelled the courts of the Church of Scotland to interfere. He was at length declared no longer belonging to her communion, and he with his deluded flock, who followed blindly in all his vagaries, withdrew from Regent Square church to a new chapel that was built for his reception. Exhausted by anxiety and incessant labors, Mr. Irving's iron constitution gave way, and, while on a tour through his native country, undertaken for his health, he died in Glasgow, in the Cathedral of which his remains were interred. The Irvingites still form a considerable body, and a scheme is at present being carried out for building churches in all the large towns of the United Kingdom in connection with this sect. Towards the completion of this scheme it is reported that Henry Drummond, Esq., the eminent London banker, has given the munificent donation of £100,000.

IRVING, MATTHEW, a patriot in the Revolutionary War, was an eminent physician and scholar. Died 1827.

IRVING, WILLIAM, a member of Congress from New York city in 1812, also a member of the committee of manufactures and commerce. He was brother to the author of the Sketch Book. Died November 9, 1821.

ITTIGIUS, TH., a Ger. theologian, 1644–1710.

ITURBIDE, or YTURBIDE, DON AUGUSTUS, a Mexican officer, born of a distinguished family in 1784, is remarkable for his sudden elevation to the supreme power as emperor of Mexico, and for his tragical fate after he had played his part in the drama of Mexican independence. When the yoke of Spain was shaken off by some of the American provinces in 1816, Iturbide was in command of the royal army of the north, occupying Guanajuato and Valladolid, and a false charge of disloyalty being preferred against him, he retired from active service, in reality, as it appears, to watch events, and to find means in the ruin of the Spaniards for the gratification of his ambition. His plans being matured, and a command offered to him, he declared for the independence of the Mexican people, and having freed his country of the common enemy, he outwitted the republicans, and was proclaimed emperor by a *coup d'état*, May 18th, 1822. Unable to maintain his authority in a state of anarchy, which only a real king of men could have controlled, he tendered his abdication in the March following, and being handsomely provided for, covenanted to reside in Italy. From Italy, notwithstanding, in the beginning of 1824, he removed to England, and encouraged by the division of parties in Mexico, addressed a letter to the congress, offering his services as a private officer, to restore order—not waiting an answer, however, he embarked for the seat of empire with a magnificent imperial mantle, proclamations, crosses, uniforms, and insignia of all kinds, with which to caparison and dazzle the poor Mexicans. The message of Iturbide was received and read in congress on the 28th of April, and its writer instantly proclaimed an outlaw; who, ignorant of the fact, arrived in person on the 12th of July, only to be shot on the 19th, and thrown into an un-

honored grave, without coffin or shroud, like a dog. It is evident there was no national feeling in favor of this adventurer, as was indeed hardly possible in such a country and under such circumstances, yet the event might have been very different had he returned earlier. The rich and populous state of Guadalupe, where the military command was in the hands of Bustamente, was in favor of Iturbide, and in revolt against the supreme government, but was subjugated by congress about a month before his arrival. One last chance was thrown in his way by La Garza, under color of making him prisoner, but Iturbide had neither the nerve nor the address to profit by it, and the soldiers he might have commanded, had he been a Napoleon, led him to execution. [E.R.]

[President Jackson.]

JACKSON, ANDREW, president of the United States, was born in North Carolina, just within its southern border, in Mecklenburg County, on the 15th of March, 1767. His father, a settler of Scottish descent, died five days after his birth, leaving him, with two older brothers, to the care of their widowed mother. He early showed a hardy, self-relying nature, and when but a boy he shouldered a musket in the war of independence. With the versatility of employment peculiar to the progressive character of the new republican empire, he became a lawyer as well as a soldier. This latter was the character in which he was to reap his great renown. In 1790, he fixed his residence in Nashville and married. In 1795, he assisted in forming the Con-

stitution of Tennessee, and was sent to Congress as the first representative from the new State. In 1797, he took his seat as a senator of the United States. He soon after left the senate, and was appointed a judge of the Supreme Court of Tennessee. In 1804, he resigned that office and retired to 'the Hermitage,' his residence near Nashville. In 1812, when war with Great Britain was proclaimed, Jackson commanded the militia of his district. In 1814 he was made a major-general, and in 1815 obtained the victory of New Orleans. Three years later, in 1818, he made a successful campaign against the Southern Indians. In 1821 he was appointed, by the President, governor of Florida (then a territory), and in 1823, the place of minister to Mexico was tendered to him; this he declined, but again entered the national legislature as a senator from Tennessee. In 1824 he was voted for by many as President, but was not elected. In 1828 he was called to that high office by a very large majority; and was re-elected in 1832. In the spring of 1837 he withdrew from public life, and spent the residue of his days at 'the Hermitage,' where he died on the 8th of June, 1845, at the age of 78.

JACKSON, JAMES, governor of Georgia, and major-general of militia, was born in England in 1758, and emigrated to America in 1772. Having joined the army at the commencement of the war, he was chosen major of brigade in 1778, and in 1781 was given the command of the Georgia legionary corps. After peace was established, he practised law successfully. In 1789 he was sent to congress, and in 1801 chosen a United States senator. He killed lieutenant-governor Wells in a duel in 1780, and was himself shot through both knees; he was also wounded in a duel with Colonel R. Watkins in 1802. Died 1806.

JACKSON, JOHN, a celebrated English portrait painter, was born at Lasingham, in Yorkshire, in 1778. He served an apprenticeship to his father, who was a tailor; but exhibiting a taste for painting, he was sent to London, and through the influence of Sir George Beaumont, was allowed to study at the Royal Academy. He made painting in oil his chief forte. Died 1831.

JACOBI, A. R., a Germ. juriscn., 1746-1825.

JACOBI, FREDERICK HENRY, born at Dusseldorf, 25th January, 1743; died at Munich, where he was President of the Academy of Sciences, 10th March, 1819. Jacobi, distinguished pre-eminently as a writer—no German in modern times having attained a style of greater lucidity and beauty—led the reaction which followed on the various scepticisms arising in the speculations of Kant, and explained in our article on that philosopher. The scepticisms chiefly related to the question—how far are we entitled to infer the existence of an external reality from the existence of a primary conception? Jacobi opposed to them an imperturbable dogmatism,—asserting with unshrinking confidence, the legitimacy and sufficiency of such conclusions as the following:—'I think, or have an idea of the Supreme Being—therefore he exists.' It cannot be doubted that this *faith-philosophy*, as it was designated, had considerable, and a very salutary influence in recalling to logicians the authority of our Intuitions; but Jacobi forgot that a true and philosophic faith is not synonymous with blind confidence in whatever may be found in the mind; it is confidence justified by reflection, and defensible on grounds capable of being plead and vindicated. He exceeded in this direction even the excesses of the Scottish school; although his expositions are every where distinguished by acuteness, and adorned by so remarkable a grace, that his disciples have named him a modern Plato. The correspondence of this celebrated writer is perhaps the most interesting of any recently left us. Goethe declared that it represents and sums up a whole century. Jacobi may be considered the founder of a School, and to have had no slight influence in moulding the illustrious Schleiermacher. [J.P.N.]

JACOBI, JOHN GEO., brother of the preceding, a distinguished professor and writer of polite literature, 1740-1814.

JAMBlicus, a Syrian novelist, 2d century.

JAMBlicus, a Platonic philosopher, 4th cent.

JAMBlicus, or IAMBlicus, the famous Neo-platonist and pupil of Porphyry, was born at Chalcis, and died about the year 333. His Platonism was far from pure, for it was adulterated with many orientalisms, and degraded by numerous superstitions. Yet his contemporaries were lavish in their praises of his genius. His treatise on Pythagoras contains a life of that philosopher, full of ridiculous puerilities and portents, and has also several chapters on ethics and geometry. The book 'On the Mysteries,' is an attempt to prove the divine origin and perfection of the Egyptian worship, with its theosophic doctrines and mystic ceremonies. Many of his other works, such as his Commentaries on some of Plato's Dialogues, are lost. His treatise on the Mysteries was published by Gale, Oxford, 1678, folio. This Jamblichus is often confounded with other two persons of the same name. [J.E.]

JAMESON, G., a Scotch painter, 1586-1644.

JAMESON, ROBERT, an eminent naturalist of Scotland, was born at Leith, 11th July, 1774. He had early a desire for travelling, and was anxious to adopt the life of a sailor, but was prevailed upon by his friends to enter upon the study of medicine, which he accordingly did, and became in the course of time a surgeon's assistant. After a short occupation of professional duty he devoted himself to his favorite study of natural history, and began to explore the rich stores of the natural history of his native Scotland. In 1800 he went to Freyberg, and became an enthusiastic pupil of the celebrated

Werner. In 1805 his reputation as a naturalist had risen so high, that he was elected professor of natural history in the University of Edinburgh, in which position he continued until his death on the 19th April, 1854. During his long career of 49 years as professor, his enthusiasm for his science never abated, and in his old age, which was a singularly vigorous one, as in youth, he was ever an active promoter of the study of natural history. He established the Edinburgh Philosophical Journal in 1819, and continued to edit it until his death. He was the author of the articles, mineralogy, geology and organic remains in the *Encyclopædia Britannica*, and of various ones in the *Edinburgh Encyclopædia*. He was also the author of a number of works on the different branches of natural history.

JANSENIUS, CORNELIUS, bishop of Ghent, author of a 'Harmony of the Gospel,' 1510-1576.

JANSENIUS, JAMES, professor of divinity at Louvain, author of *Scripture Comment*, 1547-1625.

JANSSEN, CORNELIE, (CORNELIUS JANSENIUS), was born in a hamlet called Accoy, close upon Leerdam, in Flanders, in A.D. 1585. In 1602 he went to study at Louvain, but his severe industry brought on a malady which required change of air, and the young student repaired to Paris, where he formed a friendship with Jean du Verger de Hauranne, better known as the Abbé St. Cyran in the subsequent history of Jansenism. The two friends retired to Bayonne, where they spent several years in earnest study and meditation. On returning to Louvain, Jansen was elevated to the principality of the college of St. Pulcheria, became doctor of theology in 1617, and was added to the number of professors in ordinary. Twice was he sent by his college to Spain on business of moment. He was raised to the bishoprick of Ypres in 1635; a work written by him against France for forming alliances with protestant states having contributed to secure him such patronage from the court of Spain. He died of the plague in 1638, in the fifty-third year of his age. A large part of his life—at least twenty years of it—had been spent in studying and collecting the works of Augustine. The result of his labors—his 'Augustinus,' scarcely finished at his decease—he submitted

to the judgment of Pope Urban VIII. His friends published the posthumous volumes at Louvain in 1640. The Jesuits, who were favorers of Pelagianism, were its bitter and truculent opponents. Five propositions were selected to be condemned, and after many scenes of strife and papal anathema, the Bull *Unigenitus* was issued by Pope Clement XI., which put under ban the evangelical doctrines of Quesnel, Janssen, and the whole party. Port-royal, the happy abode of so many of them, had before this time been razed to the ground by Jesuit malice and intrigue.

JAY, JOHN MICHAEL LE, an Oriental scholar and advocate of the parliament of Paris, d. 1675.

[Residence of Jay, Bedford, N. Y.]

JAY, JOHN, the first chief justice of the United States under the Federal Constitution, and one of the wisest statesmen and purest patriots of the days of the American war of independence. His grandfather, Augustus Jay, was a French Huguenot, who sought and found an asylum in America upon the revocation of the Edict of Nantz, and who married here the daughter of another Huguenot, Balthasar Bayard, who formed one of the French colony of New Rochelle. John Jay was born in New York, on the 12th of December, 1745. At an early age he was placed in New Rochelle for his preparatory education, and at fourteen was admitted into Columbia College (then King's). In 1764 he was graduated with the highest honors of the institution, and, immediately entering on the study of the law, was admitted to the bar in 1768, and rose very rapidly in the profession. In 1774 he was one of the most prominent members of the New York committee of correspondence, and at the end of that year took his seat as a member of the Continental Congress. Here he was deservedly conspicuous, though he was but 29 years old, and the youngest member of the body, as he was also the last survivor of it. To his pen we are indebted for the address made by that Congress to the people of Great Britain, than which no better state paper has ever appeared in our country. It is a model of elegant and dignified composition. He continued in Congress until 1776, performing, however, many duties in New York, but, in the year just named, he felt that his native state required all his services, and he gave them with a fidelity and industry unsurpassed. Heart, head, hand, tongue, pen, were all indefatigable. In 1777 he was selected to draft a constitution for the State, and under it, he was appointed the first chief justice of New York. He was also a member of the council of safety, which was invested with legislative powers during the recess of the assembly. In the autumn of 1778 he was sent

again to the Continental Congress, and chosen its president. In 1779 Congress sent him to Spain to obtain the acknowledgment of our independence, form a treaty of alliance, and borrow money. He continued in Europe for some time, serving his country in various diplomatic appointments, until in 1782 he was appointed one of the commissioners for negotiating a treaty with Great Britain. In November of that year, he, with Adams, Franklin and Laurens, signed the preliminary treaty, and the next year, he had the pleasure of putting his name, on the part of the United States, to the definitive treaty which closed the war of independence. John Jay never refused during the whole struggle, to render any service his country asked; and multifarious as were his labors, his countrymen, through the the whole, were perfectly convinced of his purity of motive, and spotless integrity of conduct. After the peace, in July, 1784, Mr. Jay returned home, and entered upon the duties of chief of the foreign department, under the old articles of confederation. Here he continued until the adoption of the Federal Constitution, when, on Washington's nomination, he was appointed Chief Justice of the United States. He, in connection with Hamilton and Madison, had a large share in securing the adoption of the Constitution. Their combined essays, known, under the name of 'The Federalist,' is a text-book to which our wisest statesmen gladly turn. In 1794 Mr. Jay was sent to England to negotiate a commercial treaty with that country: parties ran high in the United States, and the treaty was not satisfactory to France, or those who were known as the French party. Washington and the country, however, sustained Mr. Jay, and on his return home in 1795, he found the office of governor of New York, to which he had been elected, awaiting him. He administered its duties until 1801, when, full of honors, he determined, though a hale man of but 56 years, to retire from public office, and spend the residue of his days at his seat at Bedford, near New York. He lived nearly 30 years after his retirement, but he was not idle. John Jay was a devoted christian, and, though he had escaped from the turmoil and strife of the world, yet found ample employment in the generous interest he took in all moral and religious enterprises, and particularly in his office of President of the American Bible Society. Beloved by friends, respected by political opponents, honored by all, he died on the 17th May, 1829; and it may truly be said that our country has no purer name inscribed on the list of her worthies, than that of John Jay, the first Chief Justice of the United States.

JAY, WILLIAM, an English dissenting divine, was born at Finsbury, Wiltshire, England, 1769. He commenced his clerical career before he had reached his sixteenth year, and we have his own published authority for the fact, that he had delivered nearly one thousand sermons before he was of age. In 1791 he became minister of Argyle Church in Bath, where he remained for the long period of sixty-two years. As a preacher he was remarkable for an earnest pathos and a style of familiar illustration. Sheridan said of him, that he was the most perfectly natural orator he had ever met with. Mr. Jay was the author of numerous religious works, and of a form of family prayer familiar to thousands of pious people, d. 1853, aged 85.

JAYADEVA, a celebrated Hindu poet, 12th to 15th century.

JEACOCKE, CALEB, a tradesman of London, celebrated as a debater; author of a 'Vindication

of the Moral Character of the Apostle Paul,' died 1786.

JEAN EVANGELISTE, LE PERE, was a Capuchin of Louvain, who was known to be living in 1639. He is the author of a work entitled 'De Regno Dei in Anima,' which is the finest introduction to the understanding of mystical subjects ever written, and is the only work at all comparable to Boehmen's 'Divine Vision.' In this eulogium we must be understood to include a second part, added to the editions of Frankfurt in 1690 and 1692, and entitled 'De Separatione Animæ et Spiritus,' or 'The Separation of the Soul and the Spirit, illustrating the inward ascent of the Bride through the degrees of Pure Love.' In support of his thesis concerning the soul's gathering in to herself, of her introversion, and of her drawing near and exalting herself into God, the author cites many famous names of admitted integrity. It is altogether a curious and valuable treatise on the state of ecstasy. [E.R.]

JEBB, SAMUEL, a distinguished physician, and oriental scholar, was born in Nottingham. He studied medicine and practised at Stratford, in Essex. He was the conductor of a classical journal, entitled 'Bibliotheca Literaria.' Died 1772. SIR RICHARD JEBB, Bt., son of Samuel, physician to George III., 1729-1787.

JEDAAIA, H., RABBI, surnamed Habbedrasci, a Jewish poet and theologian of Spain, 13th century.

JEFFERSON, THOMAS, an eminent American statesman, was born in 1743, at Shadwell, in Virginia. He was educated as a lawyer, and combining with his professional training great scholarship, and a capacity of expressing himself with ease and precision, he became of eminent service in drawing the documents connected with the establishment of American independence, and otherwise aiding in the arrangements connected with that great event. He prepared the first draught of the Declaration of Independence, which was revised by Franklin and Adams. In a document relating to the disposal of his estates in his old age, he gave this brief and distinct account of his history:—'I came of age in 1764, and was soon put into the nomination of jus-

[Thomas Jefferson.]

tices of the county in which I lived, and at the first election following I became one of its representatives in the legislature; was thence sent to the old Congress; then employed two years with Mr. Pendleton and Mr. Wythe on the revisal and reduction to a single code of the whole body of the British statutes, the acts of our assembly, and certain parts of the common law; then elected governor; next to the legislature, and to Congress again; sent to Europe as minister-plenipotentiary; appointed secretary of state to the new government; elected vice-president and president; and, lastly, a visitor and rector of the university of Virginia.' His opinions were strongly impressed on the principles of government and the early legislation of the United States. He was a thorough republican, and the opponent of the federative party; but it requires to be kept in view that this opposition was derived from the old American school of abstract republicanism, and equality of citizenship, and had little harmony with the later anti-federalism, and its appeals to mob influence to accomplish conventional purposes. Thus, while he abolished primogeniture and the church establishment, he also restrained the slave trade,

[Monticello, seat of Jefferson.]

and his sentiments were in favor of the abolition of slavery. In 1801 he succeeded the elder Adams as president, by choice of the House of Representatives, who had to decide between him and an opponent, on account of an equality of votes. There is no

doubt that this choice was eminently propitious to the stability of the constitution, when it is known that his rival was the unscrupulous and clever Colonel Burr. Jefferson filled the office for eight years, and from the year 1809 he lived in retirement in Virginia, until his death on the 4th of July, 1826, the anniversary of the declaration of independence, and the day on which his friend and rival, the elder Adams, died. JEFFERY, J., a divine and moralist, 1647-1720.

JEFFERY, TH., a nonconformist divine, last century.

JEFFREY, FRANCIS, one of the most masterly critics and most eloquent writers in the English language, was a very remarkable instance of the combination of different and dissimilar faculties, as well as of indefatigable energy and rapid versatility in the employment of mental powers. During the twenty-five years when his literary labors would have seemed to be incessant, he was practising the legal profession with activity and increasing success: he was the leading barrister in the Scottish courts, while he continued to vindicate his place as the first literary critic of his time; and in his declining years, when literature had ceased to be for him any thing more than an amusement, he gained, by his knowledge and acuteness and industry on the bench, an eminent reputation among the best judges that have administered the law of Scotland. He, too, the good lawyer and celebrated writer, was a singularly eloquent and effective speaker; fluent, refined, and masterly in public oratory, and in private society one of the most brilliant of talkers. In his writings, again, to say nothing of the variety of information involved in the diversified fields over which he expatiated, there is an admirable union and an harmonious balancing of vigorous thought with impressive representation: gay and graceful wit, sometimes luxuriating too keenly to be good-natured, alternates with the natural expression of serious feelings which are always refined and not infrequently profound; and an imagination almost fertile and original enough to have made him a poet, throws over all his writings a wealth of felicitously illustrative imagery hardly ever employed to garnish so much of active and sagacious thinking.—Francis Jeffrey was born at Edinburgh in October, 1773. His father, a lawyer by profession, was one of the deputy-clerks or registrars of the Court of Session, the supreme law-court of Scotland. After having passed six years at the High School of Edinburgh, he studied at the university of Glasgow for two sessions of six months each, and afterwards, in his eighteenth year, resided for a few months at Oxford. His youth was spent in industrious reading, which embraced classics, history, ethics, criticism, and the *Belles-Lettres*: he was indefatigable in practising composition, and in early manhood wrote many verses. At the age of twenty-one, he was admitted to the Scottish bar, where, for not a few years, he was so little employed as to have full leisure for literary purposes. The first number of the *Edinburgh Review*, which contained five papers of Jeffrey's, appeared in October, 1802, when he was just twenty-nine years old; and he became its editor after the first two or three numbers. The celebrity which the *Review* at once attained was owing more, in an incalculable degree, to him than to any other of the contributors: the papers which he furnished to it were for many years very numerous, and were those on which its critical authority rested; and his skill and industry in editing were very valuable. At first considerably open in its politics, the *Review* soon became decidedly

Whiggish; and the *Quarterly* was established as a rival. But, for a good many years after this, its energy suffered no perceptible diminution; and the exertions of its editor were unrelaxed, in spite of the claims of a professional practice, which was now becoming very great. In the meantime, in 1802, he had married a relation of his own, whom he soon lost, to the deep grief of a heart keenly awake to the domestic and friendly affections. In 1813 he married a grand-niece of John Wilkes, crossing to the United States to bring her home. In 1815 he became the occupant of the beautiful villa of Craigmock, near Edinburgh, which, improved by his fine

[Craigmock Castle.]

taste, became a place of meeting for many of the most distinguished persons in Europe. In 1816 Jeffrey's eloquence as a public speaker found for the first time an adequate field; trial by jury, which had hitherto been confined in Scotland to criminal causes, being then extended to civil questions. From this time till he ceased to practise, he was the acknowledged leader of the Scottish bar. In 1820, and again in 1821, he was elected Lord Rector of the university of Glasgow by the students, an honor which has since been cordially accepted by some of our most eminent literary men and statesmen. In 1829 his professional brethren authoritatively acknowledged his standing, by appointing him Dean or President of the Faculty of Advocates. He immediately resigned the editorship of the *Review*, which had long been burdensome and undesirable. At this point his literary life may be said to close. During the twenty-seven years he had contributed to the *Review* about two hundred articles. A new stage in his history opened with the accession of the Whigs to political power. In December 1830, he was appointed Lord Advocate, an office which, besides many other duties, involves those of a secretary of state for Scotland. He necessarily entered parliament, but too late for eminent success, being now in his fifty-eighth year, without adequate training for the peculiar arena, and with a voice already broken so far as to deprive him in a great measure of the advantages which had belonged to his powers of oratory. His chief speeches in the House of Commons were made in support of those measures of reform in parliamentary representation and civic government, which it was his official duty to introduce. In May, 1834, he was raised to the bench as one of the judges in the Court of Session, assuming, according to the Scottish fashion, the honorary title of Lord Jeffrey. He delighted in his judicial duties; and no man ever performed them better. The remaining years of his life were spent in peace and honor. Never

was old age more kindly or more placid; and, when the last scene arrived, the regrets of a whole community were poured on his grave. In 1841, an attack of bronchitis, the disease which had often distressed and at length destroyed him, compelled him to seek repose for some months. In 1843 he published, with unfeigned reluctance, three volumes containing selections from his 'Contributions to the *Edinburgh Review*.' He died at Edinburgh on the 26th of January, 1850, leaving a widow who survived him but for a very short time, and a daughter, whose husband, Mr. Empson (also since dead), became the third editor of the *Edinburgh Review*.

JEFFREYS, GEORGE, Lord, an English lawyer, whose name, though he was a man of considerable ability, is better known by the infamy than the capacity of its owner, was born in the year 1648. He was the sixth son of a moderately wealthy country gentleman, unable to give him more than a good education as a barrister, and he had thus to fight his way in the world—a function to which he brought abilities, perseverance, and an utterly unscrupulous nature. Until he had shattered his nerves by dissipation, he was not destitute of courage, and he first obtained notice by attending an assize at Kingston during the plague, when other members of the profession were frightened away. He became recorder of London, and gradually rose, until, in 1683, he became chief justice of the King's Bench. In this capacity, after Monmouth's rebellion, he lent himself more in the spirit of a savage chief than of an English judge to the exterminating policy of the court, and his judicial condemnations obtained the characteristic name of Jeffreys' campaign. He was immediately rewarded with the office of lord high chancellor, when he transferred his services to a less sanguinary sphere. His wild recklessness of demeanor, his dissipated life, and his unscrupulous perversion of the judicial function in political matters, mixed up with an able discharge of his duty in other questions, make a curious and varied narrative in the memoirs of Jeffreys by Woolrich. Conscious of danger, if not of guilt, at the Revolution, he disguised himself as a sailor, and lurked at Wapping to attempt an escape. A man, whom he had terrified from the judgment-seat, recognized his ferocious eyes glaring from a tavern window, and gave the alarm. He was with difficulty rescued from popular vengeance, and removed to the Tower, where he died, on the 19th April, 1689. [J.H.B.]

JEFFREYS, GEORGE, an English poet and miscellaneous writer, was born at Weldon, Northamptonshire, in 1678, and studied the legal profession. Died 1755.

JEFFRIES, JOHN, a physician, was born at Boston, U. S., in 1774, and was educated at the University of Cambridge. On his return to America he practised with success in his native city for some time, when he accompanied General Howe to Halifax, and was in 1776 appointed surgeon-general of the British forces. Having resigned this situation in 1780, he resided in London, and there turned his attention to scientific matters, and rendered his name celebrated by the performance of two aerial voyages across the British channel from Dover to France in a balloon in 1785. He again returned to America in 1789, and died in 1819.

JENNER, CH., an English poet, 1737–1774.

JENNER, EDWARD, M.D., F.R.S., the discoverer of vaccination, was born at Berkeley, in Gloucestershire, on the 17th of May, 1749. He lost his father, who was vicar of Berkeley, early in life, and the direction of his education devolved upon his brother, the Rev. Stephen Jenner. He displayed at an early age a taste for history, and being destined for the profession of medicine he was apprenticed to Mr. Ludlow of Sodbury, near Bristol, a respectable provincial practitioner; and subsequently removed to London in 1770, where he became for two years a house pupil of the celebrated John Hunter. On the completion of his education in London he returned to his native place, where he began business as a general practitioner, and soon acquired an extensive and well-deserved reputation. In 1798, he made that discovery with which his name is now

permanently associated, namely, that a pustular eruption on the teats of cows, and supposed to be identical with the disease called the 'Grease' in the heels of horses, had such a relationship to the matter of small-pox, that if inserted into the human constitution it would be protected against that terrible disease. This great fact was announced publicly by Dr. Jenner in 1798, but it was coldly received, and both the public and the profession were extremely sceptical as to its truth. It is now too firmly established to be shaken, though the amount of protection is not so great as was at one time supposed; still the saving of human life from this discovery has been immense, and assuredly scientific medicine has never bestowed upon humanity a more precious gift than the practice of vaccination. It was proposed to reward this distinguished physician by a grant of £20,000, but the House of Commons would only give £10,000, and even that with difficulty. It is melancholy to be obliged to state that Jenner's life was embittered by the controversies to which his discovery led, and that an amiable, a virtuous, and an accomplished man, was disturbed by petty squabbles, to which his nature was utterly abhorrent. He died on the 26th of January, 1823, in the seventy-fourth year of his age, and was buried on the 3d of February in the chancel of the parish church of Berkeley. [J.M.C.]

JENNINGS, DR. DAVID, a dissenting minister of great learning, author of 'An Appeal to Reason for the Truth of the Holy Scriptures,' and a posthumous work on 'Jewish Antiquities,' 1691-1762.

JENNINGS, HENRY CONSTANTINE, a celebrated collector of antiquities and objects of vertu and natural history, author of works connected with religious and philosophical inquiries, 1731-1819.

JENOUR, JOSHUA, an English prolific but obscure writer, who died 1853, at the great age of 102.

JENSON, N., a French printer, 1420-1483.

JENYNS, SOAME, a country gentleman, known in the political world as a member of parliament, and partisan of Sir Robert Walpole, and distinguished in literature as one of the most elegant and ingenious writers of his age. Besides poems, essays, and political tracts, he is the author of 'A Free Inquiry into the Nature and Origin of Evil,' published 1757, and 'A View of the Internal Evidence of the Christian Religion,' which became the subject of a considerable controversy, born in London 1704, died 1787.

JEPHSON, RICHARD, a dramatist, was born in Ireland in 1736. He was master of the horse to the Lord Lieutenant for some years, and held the rank of Captain in the army. He wrote the tragedies of 'Braganza,' and the 'Count of Narbonne,' which were considered his best productions, also several other works. Died 1803.

JEROBOAM, the *first* of the name, king of Israel, 962-943 B.C. The *second*, 817-776 B.C.

JEROME, or according to his full Latin name, EUSEBIUS HIERONYMUS SOPHRONIUS, was born of Christian parents at Stridon, a town of Dalmatia, about the year 331. After enjoying high educational advantages under his father, he was sent to Rome to prosecute his studies. On being baptized he made a tour into Gaul, and remained for a few

years at Treves, carrying out his likings for Christian and ecclesiastical literature. On leaving Gaul, the probability is that he returned to Rome, and at Aquileia, in 370, he composed his earliest theological essay—the first-born of a numerous progeny. Here also he formed his intimacy with Rufinus, the friend whom afterwards he so heartily abused. In 373 he carried himself, his library, and some friends to the East, passed through Thrace and the other provinces on his line of journey, and on his arrival at Antioch one companion died, and himself was visited with an alarming illness. This malady seems to have darkened his spirit, and deepened his resolution to live in cloistered solitude. Soon after he retired to a desert east of Antioch, and spent four years in ascetic torture, hard literary labor, and self-education. His retreat was at length invaded by controversy, for Meletius and Paulinus fought for the pre-eminence in the church at Antioch, and he espoused the interest of the latter. In 379 he returned to Antioch, and was ordained a presbyter. The next year he visited Constantinople, where for three years he enjoyed the friendship and patronage of Gregory of Nazianzus. Here he translated the Chronicon of Eusebius, and portions of the works of Origen. The contests at Antioch still raged, and Meletius being dead, Pope Damasus summoned Paulinus and his party to Rome, in order to ascertain the bearings of the quarrel. In the conferences held on the subject, Jerome officiated as secretary, and the pope became so interested in him, that he retained him in the Western capital, and urged him especially to the revisal of the Latin version of the Bible. But his passion for a monastic life led him to describe its virtues and glories in such impressive pictures, that the ladies of Rome were filled with his enthusiasm, and so much did the furor spread, that husbands, brothers, and fathers denounced Jerome, and the very populace insulted him. On the death of Damasus, his discretion prompted him to leave Rome, and he returned to the East in 385. There immediately followed him two wealthy devotees, the widow Paula, and her daughter Eustochium. With these ladies and their female attendants, Jerome travelled through the Holy Land, and having visited Egypt, he finally settled at Bethlehem, in 386, where Paula erected four religious establishments, three for nuns, and one for monks. This latter monastery Jerome governed for many years, and spent the remainder of his life in the composition of many religious works. In the great controversies of the period he bore no inactive share. The Pelagians, whom he had so bitterly castigated, were at length tempted to retaliate with secular hostility, and a band of them invaded his retreat, and so endangered his life, that he was obliged to spend two years in secrecy and exile. Safety being restored, he returned in 418 to his cell; but his exhausted nature at length sunk amidst unceasing labors and mortifications, and he died at the age of ninety, on the 30th September, 420.—The life of Jerome was a busy one. He wrote on almost every subject. Biography, history, theology, biblical translations, polemics, and commentaries on a very large portion both of the Old and New Testaments, kept him in incessant toil. His Latin style is pure and terse on the whole. He excelled all his contemporaries in erudition. He wanted the glowing fancy of Chrysostom, and the serene temper and symmetrical intellect of Augustine, but he was beyond them both in critical skill and taste. His faults lie upon the surface; a hot and hasty disposition, which so resented every opposition, and magnified trifles, that

in his towering passion, he heaped upon opponents opprobrious epithets and coarse invective. Haste, eagerness, and acerbity, appear also in his letters and expositions. His mode of life must have greatly aggravated this touchiness and irascibility, as it deprived him of the mollifying influence of society and friendship. His heart was estranged from human sympathies; and save when lighted up by the ardors of his indignant passion, it was like his own cell, cold, gloomy, and uninviting. The works of Jerome will always maintain for him the esteem of Christendom. There is in them a great deal that is baseless, fanciful, and one-sided, but very much that is useful and instructive in exegesis and theology. In the Vulgate, the Old Testament was translated by him directly from the Hebrew, and the New Testament is a revision of previous translations. The first of those works, great and meritorious as it is, was received with some suspicions, under which the translator was very impatient and fretful. The first edition of Jerome's works was that of Erasmus, Basle, 9 vols. folio, 1516. The Benedictine edition appeared in 5 vols. folio, 1693-1706. The best edition is that of Vallarsi, in 11 vols. folio, which originally appeared at Verona, 1736-1742, and was reprinted in quarto at Venice in 1766-72, in 24 parts, usually bound in 11 volumes. [J.E.]

**JEROME EMILIANI**, a Venetian officer in the Austrian service, afterwards a religious founder, 1481-1537.

**JEROME OF PRAGUE**, an intimate friend of John Huss, and like him a martyr of the truth, is said to have copied the writings of Wickliffe at Oxford, and to have studied at the universities of Paris, Heidelberg, and Cologne. His career as a reformer dates from 1400 to his death at the stake in 1415, and the scenes of his activity were in Bohemia, Poland, and Hungary. He was a man of great learning and dignity of manner, and endured his fate so courageously as to excite the admiration of his enemies, who have also testified to the superiority of his character.

**JEROME OF SANTA FE**, a Spanish Jew, remarkable for his conversion to Christianity, and his writings against the errors of the Jews, 15th cent.

**JERUSALEM**, J. FR. WILLIAM, a German divine, author of 'Letters on the Mosaic Religion and Philosophy,' on 'German Literature,' &c., 1709-1789. The suicide of his son, 'Young Jerusalem,' suggested to Goethe the story of Werter.

**JERVAS**, CHARLES, an Irish portrait painter, who became fashionable as an artist. He published a translation of Don Quixote; died 1739.

**JERVIS**, JOHN. See ST. VINCENT.

**JESSEY**, HENRY, an eminent clergyman who suffered imprisonment at the Restoration for his non-conformity. He was a learned Oriental scholar, and distinguished for his biblical knowledge. Minister of St. George's, Southwark, during the Commonwealth; died 1633.

**JESUA**, LEVITA, a Spanish rabbi, 15th cent.

**JEUFFROY**, R. V., a French gem and medal engraver, 1749-1826.

**JEWEL**, JOHN, bishop of Salisbury in the reign of Queen Elizabeth, is distinguished as one of the ablest and most eloquent writers against the Romish Church. His 'Apology for the Church of England' is the work by which he is best known; but he is the author of many controversial treatises equally learned and judicious, and most of them are rendered agreeable reading by the historical and antiquarian notices dispersed through them. The most important of these is the controversy with Dr. Harding,

arising out of a sermon preached by Bishop Jewel at St. Paul's Cross, and usually called his 'Challenge Sermon.' The works of this eminent prelate have been recently published by the Parker Society.

**JEZZAR** or **DJEZZAR**, a common Mameluke who rose to be pacha of Acre and Saida. He held the former place, under the direction of Sir Sidney Smith, against the whole force of Napoleon, who was compelled to raise the siege 21st May, 1790. Jezzar died in 1804.

**JOAB**, the general of King David, d. 1001 B.C.

**JOACHIM**, a religious founder of Spain, 1130-1202.

**JOACHIM**, GEORGE, a savant of the Tyrol, best known as an astronomer, 1514-1596.

[House of Joan of Arc.]

**JOAN OF ARC**. The proper name of this heroic and pure-hearted woman was **JEANNE DARC**, and her birth-place the village of Domremi, on the borders of Lorraine. Here she first saw the light in 1410, and being the child of poor parents, she was inured to servitude, and acquired that extraordinary skill as an equestrian, which was afterwards so valuable to her, by riding the horses to water. She was piously educated, and when about thirteen years of age—as appears from her own history, which is best collected from the process of her trial at Rouen—she began to have visions, and to be informed of her mission for the deliverance of France. In 1428-9, the eyes of all Europe were turned upon the city of Orleans, the siege of which was closely pressed by the English, in alliance with the Burgundians, while Charles VII., despairing of his throne, had assembled the deputies of the French towns still remaining under his government, at Chinon, to deliberate upon their approaching ruin. This was the critical moment chosen by Jeanne Darc, or always pointed to, as she averred, by her celestial visitants, for the deliverance of her country. She presented herself to Baudricourt, the governor of the neighboring town of Vaucouleurs, and demanded to be conducted to the French court. Dissuasions and the extreme danger of the journey were urged in vain, and in due course she arrived at Chinon, inspired the phantom of a king with a share of her own spirit, and was presented to the assembly. The popular enthusiasm rose to the highest pitch when Joan appeared at the head of the troops in armor, her beautiful hair hanging in ringlets upon her shoulders, her soldier's bonnet adorned with white feathers, and the sword of St. Catherine to point the way to victory. In due time, on the 29th of April, 1429, La Pucelle entered the city of Orleans, and finally accomplished the strange presages of her early life by conducting the king to Rheims, where he was

crowned in her presence on the 17th of July. Here according to all that she stated afterwards, her mission was ended, but Dunois, the French commandant, commonly called the bastard of Orleans, persuaded her to remain with the army, as a consequence of which, she was taken prisoner by the English at Compeigne, after performing prodigies of valor, on the 24th of May, 1430. Her trial and condemnation on the charge of sorcery is one of the foulest blots in history, and is to be attributed, not to the English authorities only, but at least in as great a degree to the ecclesiastical party, headed by Pierre Cauchon, the bishop of Beauvais, who had a quarrel with Charles VII., and chose this method to revenge himself. It is pitiable to read in the process of her trial the exquisite mental torture to which this poor girl was subjected—after being bound with iron chains—by a crowd of subtle theologians, who had prepared their questions beforehand, with a view to entrap her into contradictions, in order to sustain the charge of demoniac intercourse. Her answers, however, were wonderfully consistent. She declared that her mission was from God, because she had been prepared for it for years past by celestial agents, the chief of whom were Saint Marguerite and Saint Catherine, who appeared richly clothed, and crowned, and always accompanied with a brilliant light. She called them her holy protectresses. To the question, how they could speak, being pure spirits, without members, she answered she knew not, it was the will of God; she only knew that their voices were sweet, and their language beautiful, their counsel holy! It was again objected that they were mere appearances, without reality: 'Whether they be apparent or real,' said the heroine, 'I have proved them, and I would rather lose my head than deny their being. I am as sure of it,' she added, 'as I am of my faith in Jesus Christ.' She was asked what they advised her in regard to the process: she answered, 'To reply without fear.' 'Whether they hated the English?' She said 'They desired them to return to their own country.' One of her judges tried the purity of her imagination, by asking her if St. Michael had appeared clothed or naked. 'Think you,' she said, 'that God has not the means of clothing his spirits?' Such questions were multiplied and twisted into every variety of form, to disconcert her if possible, but she preserved her dignity and modesty through all, and ended by an admonition to the infamous Cauchon, 'Oui, je suis envoyée de Dieu—yes! my mission is of God! You say that you are my judge. Have a care what you do, for you stand in great danger!' She knew her fate, as she told the earl of Warwick, who visited her in prison, and she was prepared to die whenever God pleased, but she would fain have returned to her father and mother, and kept their flocks again, and her sister and her brothers would have been so glad to see her! She was burnt alive, the virgin-martyr of French liberty, on the 31st of May, 1431, in the twenty-first year of her age, and it is remarkable that her dying predictions in regard to the final expulsion of the English were literally accomplished. Jeanne Darc never shed any blood with her own hand, but rode into the midst of the enemy at the head of her troops, who followed her with unbounded confidence in her supernatural powers. [E.R.]

**JOAN OF NAPLES.** This accomplished and ill-fated princess was the daughter of Charles duke of Calabria, and granddaughter of Robert, king of Naples, to whose authority she succeeded in right of her deceased father 1343. In order to unite the

claims of the two branches of the house of Anjou, and secure the tranquillity of her reign, King Robert had married her to Andrew, youngest son of Carobert, king of Hungary, when they were both children. The match was not a happy one, either for the princess or her subjects, by whom Andrew, a man of unamiable and gross disposition, was about equally beloved, and a conspiracy being formed against him, he was murdered in 1345. In 1347 the queen married her kinsman Louis of Tarentum, who had been her lover, and was the principal instigator of the conspiracy; and the circumstances led to a war in which Charles III., duke of Durazzo, became a principal actor, and Avignon with its territory was ceded to the pope by Queen Joan. Louis survived these events till 1632, when Joan was married again to James of Arragon, and for a fourth time in 1376, to Otho of Brunswick. Eventually, Charles of Durazzo usurped the throne of Naples, and caused the queen to be suffocated in 1381. The daughter of Charles known as Joan II. of Naples, who succeeded to his ill-gotten power in 1414, and died 1435, was married successively to William, the son of Leopold of Austria (1404-6), and to James, count of La Marche (1415). She was a woman of profligate character, and no redeeming virtues are recorded of her. Joan I., on the other hand, who possessed commanding talents, and governed her dominions with great skill, has had many apologists, and Laharpe has made her history the subject of one of his tragedies. [E.R.]

**JOAN, POPE,** the subject of a scandalous story which relates that a woman was elected to the papacy under the name of John in the middle of the 9th century, and that she reigned for nearly two years and a-half, when she was taken with labor-pains on the way to the Lateran Basilica, and compelled to discover her sex. It is held by some that the story has been clearly disproved, but even grave historians assert that women of scandalous lives had great influence over the papal councils of that period, and perhaps there are few historical events truer than this story if it be understood by metonymy—one thing being put for another not altogether unlike it. Pope Joan is understood to have been an English woman, and to have acquired her reputation by teaching divinity, disguised in man's clothing. The first to mention this delectable piece of scandal was Marianus Scotus, a monk of the abbey of Fulda, who died in 1086, and a full account of her life, attributed to F. Durant, was published at Geneva in 1578. Its refutation, if it may be considered such, is due to the learned protestant David Blondel, who displeased the protestants thereby as much as he had gratified them by his book 'De Episcopis et Presbyteris.' In 1785, however, a work was published by Humphrey Shuttleworth, entitled 'A Present for a Papist, or the History of the Life of Pope Joan, proving that a woman called Joan really was Pope of Rome.' See John. [E.R.]

JOHNES, THOMAS, a gentleman of Shropshire, distin. as a man of taste and letters, 1748-1816.

JOHNSON, CH., a dramatic writer, died 1748.

JOHNSON, EDWARD, an early New England historian, was a native of Kent, England, emigrated to America in 1630, probably with Governor Winthrop. He resided for some time as a trader at Merrimac. In 1643, and for several succeeding years, he was elected representative, and in 1655, he was chosen speaker of the house. He was the author of 'History of New England from the English planting in 1628, until 1652; or wonder working Providence of

Zion's Saviour,' a work reprinted in Massachusetts historical collections. Died April 23, 1682, aged 70.

JOHNSON, ISAAC, one of the founders of Massachusetts, was born at Clipsham, Rutland, England; accompanied governor Winthrop to America, where they arrived June 12, 1630. On the 30th July following, the church of Charlestown was founded, Mr. Johnson being one of the persons who laid the foundation. He afterward removed to Shawmut or Boston, which place was settled under his directions. He possessed extensive property, and at his death left a portion of it to the colony. Died Sept. 30, and was buried in what is now called Chapel graveyard, being the first ground laid out for that purpose.

JOHNSON, JOHN, one of the nonjuring divines, known as a learned and religious writer, 1662-1725.

JOHNSON, SIR JOHN, son of Sir William Johnson, was appointed major-general in succession to his father in 1774. At the commencement of the war, he joined the British, and in 1777 defeated Herkimer at Fort Stanwix, but in 1780, was himself defeated by General Van Rensselaer at Foxes Mills. He was appointed Governor of Upper Canada in 1796. Died 1798.

JOHNSON, JOSEPH, an Indian preacher, was born at Mohegan near Norwich, Connecticut, about 1750. He was educated by Mr. Wheelock at Lebanon, and at the age of fifteen, sent as a schoolmaster to the six nations of Indians in New York. There he remained a couple of years, and afterward spent a vagrant life for some time. During a fit of sickness occasioned by his irregularities, he became a sincere penitent, and was soon licensed to preach, and was a missionary in the State of New York for some years. He was well acquainted with theology.

JOHNSON, M., a painter, reign of James II.

JOHNSON, M., an antiquarian, died 1756.

JOHNSON, R., a grammarian, died 1720.

JOHNSON, RICHARD M., was vice-president of the United States, distinguished himself in the wars, with the Indians of the north-west, and is supposed to have killed the great Indian Chief Tecumseh. He was a member of the legislature, and afterward a member of Congress. He was a distinguished politician. Died in 1850.

JOHNSON, ROBERT, appointed governor of South Carolina in 1719, and again in 1730. During his administration the settlement of Purrysburgh by the Swiss under Colonel Purry was organized. Died May 3, 1735.

JOHNSON, SAMUEL, the son of a bookseller, was born at Lichfield in 1709. Beginning his studies at Oxford in 1728, he was obliged by poverty to retire after three years without taking a degree. He became successively, an usher in Leicestershire, the drudge of a bookseller in Birmingham, and the head of a school established with some money he acquired by marrying, 1736, a widow who was much older than himself, but to whom he was sincerely attached. The school speedily failed; and, in 1737, removing to London, Johnson entered on his long course of literary toil. His reputation rose very slowly: the greater part of his time was wasted, for many years, on desultory and occasional efforts; he had an unhealthy constitution, and a strong tendency to hypochondriac melancholy. For the twenty-five years during which he struggled for a livelihood, he had no leisure for systematizing his knowledge, or for concentrating his thoughts; and when, at length, he obtained a small competency, he was already fifty-three years of age, with decayed strength and soured temper, and with a weariness of labor which made him too glad to enjoy in indolent repose the

fame he had so hardly won. The works which, in these adverse circumstances, Johnson produced, were celebrated beyond measure in the latter half of his century, and though they add disappointingly little to our stock either of solid knowledge or of literary invention, they are extraordinary monuments both of vigor and originality in thinking, and of great though ponderous power of expression.—During his long period of hard labor, the mere quantity of his writings was very great. A large proportion of them

[Birth-place of Samuel Johnson.]

appeared in 'The Gentleman's Magazine' or as pamphlets; and most of these are quite forgotten. His two poetical satires, 'London,' and 'The Vanity of Human Wishes,' are striking specimens of reflection and diction; but neither they nor his tragedy of 'Irene' entitled him to be considered as a poet. 'Rasselas,' written in a week to pay for his mother's funeral, is one of the most interesting and characteristic of his works. His two sets of periodical essays, 'The Rambler' and 'The Idler,' are in no respect comparable to their models of Queen Anne's time. For eight years from 1747, Johnson's attention was chiefly engaged by his 'Dictionary of the English Language,' a work highly honorable to the author in the circumstances in which it was produced, but possessing little of real philological value.—In 1762, after having, though a devoutly religious man, refused to take orders, Johnson obtained, through Lord Bute, a pension of three hundred a-year. Not long afterwards he was received into the house of Mr. Thrale. He was thenceforth the dictator of a large society of accomplished persons, and the acknowledged chief of the literature of his day. In 1765 appeared his edition of Shakspeare, the preface to which, with all its shortcomings, is a very fine and instructive contribution to the philosophy of poetical art; his 'Journey to the Hebrides,' the liveliest of his writings, was published in 1775; and his 'Lives of the Poets,' the last of his works, appearing in 1781, is remarkable alike for its impressive composition, and for its mixture of valuable truth and strong prejudice in criticism. Johnson died in 1784, at his famous house in Bolt-Court. In 1790, his reputation was revived and extended by Boswell's 'Life.' This curious collection of sayings, the most minute record that was ever taken down from any man's lips, is now generally held to convey a more favorable impression of his real strength, both in thought and language, than any thing in the works which he wrote and published. Was a member of Congress in 1774, and for several successive years. Born in Calvert County, died at Rose Hill, Oct. 26, 1819.

JOHNSON, WILLIAM SIR, a major-general in the New York militia, was born in Ireland in 1714, and emigrated to America in 1734. Having settled on the Mohawk near Albany, he carried on a lucrative trade with the Indians, and acquired a knowledge of their language, manners, &c. Being placed in command of the Provincial troops of New York in 1755, he marched on Crown Point, but was attacked while encamped on Lake George. In this affair the French were repulsed and Dieskau their leader taken prisoner; but Johnson was much blamed for not availing himself of the advantage thus gained, and continuing his march on Crown Point. He was however rewarded by the King with a Baronetcy, and a sum of £5,000 was voted to him by the House of Commons. In 1759 he commanded under General Prideaux in the expedition against Niagara, and on 24th July took possession of that place. Died 1774.

JOHNSON, WILLIAM SAMUEL, LL.D., president of Columbia College, New York, from 1792 to 1800, was born at Stratford, Oct. 7, 1727. After graduating at Yale College in 1744, he engaged in the study of law, and soon became distinguished in his profession. In 1765, he was chosen a delegate to the Congress at New York, and in 1766, he went to England as agent of the colony. From 1772 to 1774 he was judge of the supreme court of Connecticut, in 1785, a delegate to Congress, and in 1787, a member of the convention which framed the Constitution of the United States. Died at Stratford, Nov. 14, 1819, aged 92.

JONES, HENRY, an Irish dramatist, died 1770.

JONES, INIGO, was born in London about 1572. He was patronized in early youth by William earl of Pembroke, who is supposed to have sent him to Italy to study landscape painting: he took up architecture later, about 1605, after his return. The little attention he paid to this art in his first visit to Italy

is shown in Crewe Hall, Cheshire, positively attributed to Jones, and St. John's College, Oxford, or the Grotto at Wilton; the first in what is called the Elizabethan style, and the latter, abortive attempts at the classical. The Elizabethan, a modification of the Renaissance imported from the Low Countries, supplanted the Tudor in England, the last remains of ecclesiastical style, which had become generally obnoxious after the persecutions against all such religious expressions by the Regent Somerset, and after the fires of Smithfield; yet in the comparatively distant times of Inigo Jones, attempts at the Gothic were rare from indifference or neglect, rather than from any religious animosity.—Jones was himself the great pioneer to the revival of classical taste in England, which was thoroughly established by Sir Christopher Wren, though both committed the grossest inconsistencies of style in their own restorations of old buildings. Jones visited Italy a second time in 1613–14, and on this occasion seems to have completely mastered the principles of the Italian Renaissance, as exemplified in the buildings of Palladio and others, of which in Whitehall Banqueting House we have a noble monument of his own production, but yet only a small fraction of the magnificent palace, which report gives Charles I. the credit of having wished to carry out as opportunity afforded: the whole design of this truly royal palace may be seen in several sheets in Campbell's 'Vitruvius Britannicus;' it was to have had seven courts, and its extreme dimensions would have been 1,152 feet by 720 feet; a scale of magnificence which perhaps may be termed visionary, in spite of the experience of any age since the time of the Roman emperors. The building at Whitehall was executed in the reign of James I., 1619–21; he was the surveyor of works, and he was appointed about the same time to restore the then St. Paul's Cathedral, to which old Norman and Gothic structure he added some years afterwards (1639) a Corinthian portico and other Renaissance features, the whole of which, however, were destroyed in consequence of the great fire of 1666. Jones was but little more fortunate in St. Paul's, Covent Garden; this absurdly overrated structure, little better than a barn as regards any ornamental feature, was built for the earl of Bedford in 1631, and was destroyed by fire in 1794, but was faithfully restored by Hardwick in the following year: it is valuable as an example of extreme simplicity and agreeable proportions. Greenwich Hospital is another, and one of his most successful works, erected by his nephew and son-in-law, Webb. Jones died in London in 1652, aged 80. Webb, who married his only daughter, published some of his designs; and a complete edition of his works was published by Kent, 1770. Jones's copy of 'Palladio,' with which he travelled in Italy, and containing his own marginal notes, is still preserved in Worcester College, Oxford. JONES, JACOB, born 1770, in the State of Delaware. He studied medicine when a young man, but abandoned it at the age of twenty-nine, to enter the United States Navy as midshipman. He served first on board the United States, Captain Barry, then in the Ganges. When the war with Tripoli broke out, he was ordered to the Philadelphia, and on the capture of that frigate, became with the rest of the crew, prisoner to the Tripolitans. After twenty months of captivity, he was liberated, and raised to the rank of lieutenant. Afterwards he was promoted to the command of the brig Argus, and in 1811

to that of the Wasp. In the latter vessel he was sent out in 1812 with despatches to the American ministers in England and France. On the 18th of October, 1812, while on his third cruise with the Wasp, he fell in with and captured the English brig Frolic. The day after this victory, both vessels were taken by the Poitiers 74, and carried into Bermuda. Here he was treated with great respect, and in a few weeks was exchanged and returned to New York. He was welcomed with enthusiasm. His native state voted him a piece of plate, Congress granted \$25,000 to himself and his crew, to make up the loss they had sustained, by the re-capture of the Frolic, a gold medal was bestowed on Jones, and a silver one on each of his commissioned officers. He had subsequently command of the Macedonia and the Mohawk. In 1821 he again visited the Mediterranean, this time as commodore. On his return he accepted a seat as one of the Board of Navy Commissioners. In 1826 he resigned this post, to accept the command of the Pacific squadron. He commanded afterwards at the Baltimore, New York, and Philadelphia stations. He died at Philadelphia, on the third of August, 1850.

JONES, JOHN, an English divine, last century.

JONES, JOHN, a medical writer, 16th century.

JONES, JOHN, a Hebrew scholar, 1575–1636.

JONES, JOHN, an American phys., 1729–1791.

JONES, JOHN, LL.D., a philological writer, and minister of the unitarians, died 1827.

JONES, JOHN, M.D., an eminent physician and surgeon, was a native of Jamaica, Long Island. Studied physic with Dr. Cadwallader of Philadelphia, and finished his education in Europe. On his return to America he settled at New York, where, on the establishment of a medical school, he was chosen professor of surgery. In 1780 he removed to Philadelphia, where he was the medical adviser of Washington and Franklin. Died June 23, 1791.

JONES, JOHN GALE, a celebrated political character of the period of the French revolution, distinguished as a leading member of the London Corresponding Society, 1771–1838.

JONES, JOHN, a Welch lawyer and man of letters, au. of a 'History of Wales,' &c., 1772–1838.

JONES, JOHN, a Welch antiquarian, 16th and 17th centuries.

JONES, LESLIE GROVE, aid-de-camp of the duke of Wellington in the peninsular war, and commandant of Brussels during the battle of Waterloo, afterwards known as a political writer, 1779–1839.

JONES, NOBLE WIMBERLY, an eminent physician, statesman and patriot, of the Revolution. He obtained a commission in the army in 1738. In 1761 he was chosen a member of the Assembly. In 1775 and again in 1781, he was a delegate to Congress. In 1780, he was taken prisoner by the British at the capture of Charleston, and on being exchanged in 1781, he commenced the practice of physic in Philadelphia, but soon removed to Charleston, where he practised successfully till 1788, when he went to Savannah. Died 1805.

JONES, OWEN, a Welch antiquary, and a member of the Cambrian Society, for the encouragement of the language and music of Wales. Was born in 1740. Died 1814.

JONES, PAUL, a naval commander in the interest of the colonists during the American war of independence, was born at Selkirk, in Scotland, 1736, and died in poverty at Paris, 1792. He was a man of dauntless courage, and great ability as a sea captain, and was for a long period the terror of the

coasts of Great Britain and Ireland. His principal action was a combat off Flamborough head with the convoy of the Baltic fleet in 1779, in which he proved the victor, and captured the two frigates opposed to him. He was complimented for his success on this occasion by an invitation to Paris, where the cross of military merit and a sword of honor were presented to him by the king. The Congress of the United States also voted him a golden medal for his services during the struggle for independence, but though his valor merited such an acknowledgment, it is difficult to find any trace of republican virtue in his conduct, unless an intense hatred of the English be esteemed such. At the conclusion of the war he entered into the service of the Russians, and retiring in disgust solicited a command from Austria and France, which, however, he did not obtain. 'Full of vanity,' says a French writer, 'he believed that only a king was worthy of such an admiral!' His career is at once an example and a warning, for it points to the unhonored grave which awaits all those, whatever their present reputation and talents, who are led by their selfish passions, instead of principle, even in the path of glory. Paul Jones had neither the wisdom nor the ambition to adopt the country that he had so well served, and instead of the Washington of the seas, it is difficult to regard him in any other light than that of a bold buccaneer.

JONES, ROGER, an assistant general of the American army, distinguished himself in 1813-14. Died 1852.

JONES, RICE, a Welch poet, 1715-1801.

JONES, RICHARD, an English comic actor, died in London, 1851, aged 73.

JONES, SAMUEL, an eminent American lawyer, was born in New York. He was successively chancellor, judge of the court of appeals, and chief-justice of that State. Died 1853, aged 80.

JONES, SAMUEL, an eminent lawyer of New York. He rendered much service in assisting to organize the judiciary system, at the termination of the Revolutionary War.

JONES, THOMAS, a Welch divine, 1756-1807.

JONES, WALTER, M. D., a physician, was a native of Virginia, graduated at the university of Edinburgh in 1770. On his return to America he settled in Northumberland county, where his practice became extensive. Was a member of Congress for a few years. Died 1815.

JONES, WILLIAM, an eminent mathematician, 1680-1749.

JONES, WILLIAM, commonly called 'Trinity Jones,' or 'Jones of Nayland,' and well known for his public spirit and ability as a writer, was a clergyman of the Church of England, born at Lowick, in Northamptonshire, 1726, and appointed perpetual curate of Nayland, in Suffolk, where he went to reside about 1776. He was the intimate friend and biographer of Bishop Horne, to whom in early life he had presented the doctrines of John Hutchinson, of which they were both distinguished advocates. His works are—'A Full answer to Bishop Clayton's Essay on Spirit,' 1753; 'The Catholic Doctrine of the Trinity Proved from Scripture,' 1757; 'An Essay on the First Principles of Natural Philosophy,' 1762; 'Remarks on the Confessional,' 1764; 'Physiological Disquisitions, or Discourses concerning the Natural Philosophy of the Elements,' 1781; 'A Course of Lectures on the Figurative Language of the Holy Scripture,' 1787; and, when the French Revolution broke out, a series of tracts well known by their title of 'The Scholar Armed against the Errors of the Times;' and 'A Letter from Thomas Bull to

his brother John,' written in support of government. His 'Memoirs of Bishop Horne,' to whom he became private chaplain after his elevation to the see of Norwich, were published in 1695, with an introductory exposition of the theological and philosophical doctrines of Hutchinson. Jones of Nayland was the original projector of the British Critic; and besides his literary endowments was a great proficient in church music. He died in 1800. [E.R.]

JONES, WILLIAM, governor of Rhode Island from 1810 to 1817, and previously speaker of the House for some years. Served during the war as captain of marines, and was 'taken prisoner at the capture of Charleston. Born in Newport 1754, died in Providence 1822.

[Statue of Sir William Jones, in St. Paul's, by Bacon.]

JONES, SIR WILLIAM, whose researches in Oriental literature, and his surpassing genius as a translator from the Eastern languages, have rendered his name illustrious throughout Europe, was born in London 1746, son of Mr. William Jones, an eminent mathematician, and devoted himself to the study of the Oriental languages while a student at Oxford. When twenty-four years of age he translated the life of Nadir Shah from the Persian into French, and, in 1771, published a grammar of the Persian language, which still maintains its ground as a work of standard value. Between this period and 1783, when he received an appointment as judge in the supreme court of judicature in Bengal, this laborious student published his commentaries on Asiatic poetry, written in Latin; and we may here remark, that it is difficult to say whether his fine taste for poetical composition, or his extensive learning and philosophical insight, is the more admirable characteristic of his genius. On his arrival in India, he established an Asiatic Society for the purpose of collecting materials to illustrate the history, learning, and antiquities of the East; and as he succeeded in rallying the learned around him, the publication of their transactions commenced almost immediately. He died suddenly in the heat of this career, so new to English learning, in 1794; and his collected works, with a life by Lord Teignmouth, have since been published in an edition of thirteen volumes, 8vo. To Sir William Jones belongs the merit of a great originator, as well as that of an unrivalled linguist. Until his appearance, and the impetus given by him to the study of Asiatic literature, the English scholar might well blush for the little that had been achieved in that direction by his own countrymen. The encouragement, indeed, was

miserably small, compared with the necessities of the case; and, at this moment, the officers of the Asiatic Society can tell us what volumes of invaluable matter must remain buried in obscurity, even on their own shelves, for want of funds. We ought to add, that Sir William Jones was an accomplished lawyer, a warm lover of freedom, and, as an Indian judge, indefatigable and irreproachable. [E.R.]

[The Globe Theatre.]

JONSON, BENJAMIN, was born at Westminster in 1573. His father, a Scotsman by descent, dying in his boyhood, the widow married a bricklayer; and Ben Jonson is said to have been taken from Westminster school and obliged to work at his stepfather's trade. We read also of his having enlisted as a soldier, and served in the Low Countries. On the other hand, the obscure accounts we have of his youth represent him as having studied both at Oxford and Cambridge; and it is certain that, in one way or another, he had obtained a good education, and was especially a ripe and exact Latin scholar. He cannot have been much older than twenty, when, like so many men of genius in the latter part of Elizabeth's reign, he attached himself to the theatres. He became an actor, but was a bad one; and his life was chiefly spent in play-writing, amidst the fluctuations of success incident to that pursuit, and the alternations of poverty with something little better, which made up the history of almost every one of our old dramatists. But his fame stood very high in his own time. In the most brilliant period of Shakespeare's career, Ben Jonson was the only man who contested the palm with him; and in the whole history of the old English drama, none but Beaumont and Fletcher come nearer, or so near, to the excellence of the great master. He is vigorous, not graceful, a skilful and reflective artist, rather than an impulsive or imaginative poet; but there is great force in his comic pictures of character, and striking pomp of eloquence in his tragic dialogue. In 1598 he exhibited his first successful piece, the prose comedy of 'Every Man in his Humor;' after several other plays, his dignified tragedy of 'Sejanus' appeared in 1603; 'Volpone,' a comedy in blank verse, abounding both in eloquence and poetry, was played in 1605; in 1609 came 'The Silent Woman,' a comedy constructed with great regularity and admirable skill; and the roll of his good plays was closed in 1610, by the lively and energetic comedy 'The Alchemist.' In 1619

he was appointed poet-laureate. But his later years were spent in poverty; and his natural gloominess of temper was aggravated both by the failure of his popularity and by ill-health. He died in 1637, and was buried in Westminster Abbey. His uncompleted 'Sad Shepherd,' a pastoral drama, and many of his lyrics, show a delicacy both of poetical feeling and of diction, beyond any thing that appears in his other works; and his learning, especially in philology, is proved by several prose dissertations.

JORDAN, DOROTHEA, an eminent English actress, born in the neighborhood of Waterford 1762, was the daughter of Captain Bland, an Irish gentleman. She adopted the stage for a profession as the means of support for her mother, a lady of Wales, with whom her father had eloped. She first appeared at Dublin in the character of Phebe, in 'As You Like It;' and afterwards gained considerable repute as a juvenile tragedian. Her next engagement was at the York theatre; where she remained for three years, and took the name of Mrs. Jordan, though never married, by which name she was thenceforward known. Her *débüt* in London was in the part of *Peggy*, in 'The Country Girl;' in which, and in *Nell* in 'The Devil to Pay,' she proved equally successful. Her line of business was now fixed; but she also occasionally appeared in the pathetic characters of tragedy. Her celebrity betrayed her into an alliance with a royal duke, with whom she for some time resided in great splendor; but (such is the uncertainty of such connections) she died at St. Cloud, 5th July, 1816, in poverty and obscurity, notwithstanding a long and brilliant theatrical career. The circumstances attending her seclusion were mysterious, and are not cleared up by Mr. Boaden's biography, notwithstanding the ample means of information possessed by him. Indeed, the impression left upon the mind by his narrative is, that Mrs. Jordan did not die at the place and time stated; but lived probably under another name in England for seven years longer; after which, a liquidation of her debts was publicly advertised. Be this as it may, her theatrical career was one of the most illustrious; and her style of that natural sort which commands the approbation of the best judges. As a woman, too, her heart seems to have been of the kindest, and her domestic duties to have been performed with exemplary attention and devotion to the best interests of her family.

JORTIN, DR. JOHN, flourished about the middle of last century, having been born in 1698, and died

1770. He, and his patron Archbishop Herring, are fair exponents of the learning and doctrine of the Church of England, and of the spirit by which it was animated at that period. Jortin was rector of St. Dunstan's in the East, and afterwards of Kensington, near London. He is the author of 'Discourses Concerning the Truth of the Christian Religion,' 'Remarks upon Ecclesiastical History,' 'Remarks upon the works of Erasmus,' 'Miscellaneous Observations upon Authors, Ancient and Modern,' and of various other criticisms and learned tracts. His private character was most estimable; and his public life marked in a high degree by independence and integrity. This is saying a good deal for a minister of the Church of England in an age of compromise and difficulty, and such, it is well known, was the first generation or two which followed the revolution of 1688. JOSEPH II., son of the emperor, Francis I., and of Maria Theresa, born 1741, king of the Romans 1764, emperor after the death of his father 1765, but did not really govern until the death of Maria Theresa, when he became king of Hungary and Bohemia, 1780, died 1790. Joseph II. was the brother of Marie Antoinette, and was remarkable for his ambition and activity as a reformer and statesman.

JOSEPH, or JOSEPH EMMANUEL, king of Portugal, born 1714, succeeded his father, 1750, died 1777.

JOSEPH-ALBO, a Spanish rabbi, 15th century.

JOSEPH, MEIR, an Italian rabbi, 1496–1554.

JOSEPH OF PARIS, or FATHER JOSEPH, whose proper name was FRANCIS LE CLERC DU TREMBLAY, an agent of Cardinal Richelieu, 1577–1638.

JOSEPHINE, first wife of Napoleon Buonaparte, and empress of the French, was by birth a creole, and was born at Martinique, 1763. Her maiden name was MARIE JOSEPH ROSE TACHER-DE-LA-PAGERIE, which she exchanged for that of Madame de Beauharnais, when she married the viscount of that name at the age of fourteen, for which purpose she was brought to France by her father, in terms of a previous betrothal. As the pretended memoirs of her life cannot be trusted, we omit the scandal connected with her residence at the court of Marie Antoinette, and simply record the fact that she became the mother of two children, Eugene and Hortense—the latter of whom became queen of Holland. In 1787, her mother then suffering from illness, she returned to Martinique, and remained in the island till her safety was threatened by the insurrection, three years later, when she escaped to France, and rejoining her husband, who was a chief of the constitutionalists, made her house the rendezvous of the politicians and men of letters belonging to his party. The viscount de Beauharnais was executed under the ascendancy of Robespierre in 1794; and Josephine, saved with difficulty by Tallien, met Napoleon soon afterwards at the house of Barras, and was married to him in 1796. From that period till her

divorce in 1809, her history is identified with the emperor's, not only personally but politically. Passionately devoted to him as a man, his glory as a sovereign was also dearer to her than her own happiness, and the unbounded influence she exercised over him was never abused, as Napoleon himself acknowledged, by a word of bad counsel. It had been predicted twice over, at Martinique and in France, that Josephine would be queen; and as stormy

[Malmaison, residence of the Empress Josephine.]

scenes would sometimes occur between her and the emperor, she has been heard to exclaim, 'They speak of *your star*, but it is my star that rules these events!' And, in fact, Buonaparte was greatly indebted to her political talents and her fascinating manners, if not for his elevation to the throne, at least for his welcome among the influential circles of Parisian society. Her divorce was urged by the family of Napoleon, and by such statesmen as Fouché and Talleyrand, for the sake of an heir to the throne and the consolidation of the new dynasty; and, when resolved upon, Josephine meekly retired to Malmaison, and was succeeded by the Austrian bride of her husband. She saw the emperor for the last time in January, 1814; on the 4th of April he abdicated, and, on the 29th of the month following, Josephine breathed her last in the arms of her children. Like her husband she was born for empire; and he, however blinded by dynastic ambition, must have lived to feel that her divorce was as mistaken in policy as it was indefensible in principle and cruel in the execution. It is singular, and only poetical justice to add, that Josephine, after all, should have given an heir to Napoleon in the person of her grandson, the present emperor, Louis Napoleon. [E.R.]

JOSEPHUS, FLAVIUS, the historian of the Jews, descended, on his father's side, from the high priests of his nation, and on his mother's from the Asmonean princes, was born at Jerusalem in the year 37. He was remarkable from boyhood for the promise of those high qualities which he afterwards displayed as a commander and man of letters; and after studying in every school of learning, submitting himself to the initiation of the Essenes, and even mortifying his flesh in the desert, he attached himself to the Pharisees, and acquired a high reputation among them for his prudence and wisdom. After a visit to Rome at the age of twenty-six, to intercede for some of his countrymen who had been

condemned by Felix, he was appointed commissioner from Jerusalem to the disturbed district of Galilee, and shortly after became its governor. Unable to prevent the internal dissensions which prevailed among the Jews from ripening into a revolt against the Romans, Josephus reluctantly undertook the conduct of a war of which he foresaw the issue, and for forty-seven days defended Jotapata against the whole force of Vespasian and Titus. After the fall of the city, Josephus saved his life by a stratagem worthy of Machiavel, and saluted his conquerors as the future masters of the world,—the issue of the war, and the elevation of Vespasian and Titus, he avers, having been shown to him in dreams. He accompanied Titus to the siege of Jerusalem, and endeavored to act as mediator, but was repulsed by his countrymen as a traitor. Finally, he lived in honor at Rome, and is supposed to have died about the year 95. The works of Josephus are his 'Jewish Antiquities, the defence of his history Against Appian,' 'The Martyrdom of the Maccabees,' and his noble 'History of the Jewish Wars,' which is that of an eye-witness of all he relates. Besides these, which are among the most interesting and valuable remains of antiquity, he wrote his own 'Life,' the public portion of which is further amplified in the 'Wars.' We learn from the former that he was thrice married, first, at the instance of Vespasian, to a captive virgin, who soon afterwards left him; second, to a lady of Alexandria, whom, he says, 'I forsook, because her manners pleased me not, although she was the mother of my three children!' and, thirdly, to a native of Candy, 'endowed with as laudable manners as any other woman whatsoever.' Opinions differ as to the reliability of some things that Josephus relates, but in matters personal, his disclosures are as candid as they are edifying. The politic shrewdness of Jacob, the learning of the ancient priesthood, and the valor of his ancestors, the Maccabees, were all united in him. It is no slight proof of his worldly wisdom, that he survived the destruction of his people, the last unexceptionable Jew of the whole race. [E.R.]

JULIAN, an Italian theologian, 5th century.

JULIAN, a Spanish prelate and theologian, and a saint of the Roman calendar, died 690.

JULIAN, FLAVIUS CLAUDIUS, emperor of Rome, nephew of Constantine the Great; famous in history because of his effort to re-establish the shrines and worship of Paganism; hence named the Apostate. He was born at Constantinople in 331, and died at the age of thirty-two, of a wound received near Ctesiphon, in the midst of his contest with Sapor, king of the Persians. The life of this remarkable person was altogether singular. Escaping death,—always imminent during his earlier years,—chiefly through protection of the obscurity to which the jealousy and avarice of his cousin, the possessor of the purple, had doomed him, he grew up a philoso-

pher, first instructed by Christian bishops, and then an attached pupil of the school of Athens. The necessities of Constantius recalled him to the capital, and procured his adoption as Cæsar: but, haunted by guilty terrors, the emperor virtually banished him to Gaul, under guise of assigning him that exhausted and perturbed region as a Province. In a position thus inauspicious, the extraordinary military and administrative talents of Julian first burst forth. Repression had not broken the spring in him; neither had a life of study unfitted him for action. He restored discipline, consolidated and inspired the legions, overthrew the Germans and pacified Gaul. Deprived of his government by the sleepless enmity of Constantius—for the hatred of the timid is never asleep—he was proclaimed Augustus by the soldiery, and had just entered on civil war, when the death of his unworthy relative opened his path to the throne. Then Julian began the work for which he imagined that Fate had prepared him,—a work in itself impracticable; and the attempt to perform it involved him in controversies so bitter, and actions so questionable, that it would have been vain now to attempt to disentangle his motives, even had the history of these times been much more reliable than any early history is. It is alleged that he revolted from the unjust repugnance of the Church to Philosophy as such, and hated its intolerance. Unfortunately, the early Church was intolerant, and had learnt too soon the process by *anathema*; and it is equally true, that intolerance was especially foreign alike to the religion of Rome, and the philosophy of Athens; the first having ever admitted without scruple, new gods to seats on its Olympus; and the latter, inspired by the Alexandrines, endeavoring at that period to discern the secret meaning of all forms and modes of Mythology,—resolving them into symbols. But if Julian had been moved solely by a respect for liberty, he would have remained firm by his earliest measures—viz., the restoration of the old gods, and the equal protection of their worships. On the contrary, he persecuted those he blamed as persecutors, closed their schools, and launched into all the excesses of REACTION. The great and catholic moral pointed by his history is this—*no Power can revive in this world, that which even a REVOLUTION has destroyed*. The destruction of ancient systems, although by apparent violence, is never possible, unless new moral elements, and forces, have been born and risen into efficiency,—in other words until these systems have ceased to represent the life of the world, and become unfit to evolve the future. In matters of Religion especially reaction can, on this account, replace the *form* only: the faith has gone, and the husk—the ceremony and the dogma—can never be propped up as a verisimilitude.—Julian had much activity, and as already stated, singular administrative skill; but the weakness inherent in every Reactionist, passed with him too, into its usual, if not unfailing issues—fanaticism and frenzy. [J.P.N.]

JULIANA, a woman of remarkable talents and military courage, who possessed great influence at the courts of the Mogul emperors of Hindostan. She was the daughter of a Portuguese named Augustin Dias D'Acosta, and was born in Bengal, 1658. Died 1733.

JULIANA, a devotee of the reign of Edward III., who immured herself in a stone cell at Norwich, and having suffered from extreme mortification, wrote a book of devotion entitled 'Sixteen Revelations of the Love of God,' containing an account of her visions, or the 'Showings' by which her reflections were illustrated. The MS. of this

work was preserved by the monks, and published by a learned catholic named Cressy, in 1670, who could discover nothing concerning her history beyond the hints which are scattered through the work itself. It appears, however, that she was about thirty years of age when the principal of her visions occurred, in the year 1373, and that she was very severely tempted, and deeply experienced in what the mystics regard as the spiritual life. Her book was reprinted in the quaint language of the period in which it was written, by G. H. Parker, in 1843. The most interesting of her visions is one of the Virgin Mary, which Juliana has related with an artlessness and sense of wonder which it is impossible to accuse either of insincerity or extravagance.

JULIEN, P., a French sculptor, 1731-1804.

JULIEN, S., a Swiss painter, 1736-1799.

JUNGE, JOACHIM, a native of Lubeck, eminent as a mathematica. and natural philosopher, 1587-1657.

JUNGER, J. F., a German dramatist, died 1797.

JUNGERMANN, GODFREY, a German translator and commentator, died 1610. His brother, LOUIS, a botanist, 1572-1653.

JUNIUS, ADRIAN, a Dutch *savant*, 1512-1575.

JUNIUS, FRANCIS, a French scholar, a professor of divinity at Leyden, and a fellow-laborer with Tremellius upon his Latin version of the Old Testament, author of commentaries and theological works, 1545-1602. His son, of the same name, born at Heidelberg, eminent as a philologist, 1589-1677.

JUNKER, G. A., a German Jesuit, 1716-1805.

JUNOT, ANDOCHE, a marshal of the French empire, and duke d'Abrantes, born 1771, entered the army as a volunteer 1791, distinguished at the siege of Toulon 1793, general of division in Egypt 1801, governor of Paris 1804, commander of the army in Portugal 1806, lost the battle of Vimiera, and compelled to capitulate, 1808, afterwards governor of the Illyrian provinces, and died 1813.

JUNOT, LAURA PERMON, wife of the preceding, and duchess of Abrantes, distinguished as a novelist, but chiefly by her 'Memoirs,' 1784-1838.

JURAIN, CL., a Flemish antiquarian, died 1618.

JURET, FR., a French poet, 1553-1626.

JURIEU, PETER, a famous protestant theologian, born at Men, in the Orléannais, 1637; died at Rotterdam, where he occupied a chair of theology, and was pastor of the Walloon church, 1713. He was a great partisan of William III., and engaged protestants and catholics in controversy with about equal animosity. The ablest of his works is a 'Critical History of Doctrines and Modes of Worship.'

JURIN, JAMES, an English physician, distinguished as a mathematician and natural philosopher, 1684-1750.

JURINE, L., a Swiss naturalist, 1751-1819.

JUSSIEU, ANTOINE DE, an eminent botanist, was born at Lyons in 1686. He died in 1758. He

possessed an extensive knowledge of botany, and filled the situation of professor of that science at the Jardin du Roi at Paris. [W.B.]

JUSSIEU, BERNARD DE, a celebrated botanist, and a younger brother of the above, was also born at Lyons, in 1699, and died in 1777. He derived his taste for botany from his brother, and through his interest was nominated, in 1772, botanical demonstrator at the Jardin du Roi. Louis XV., wishing to make an extensive botanical garden at Trianon, intrusted the execution and superintendence of it to Bernard de Jussieu. He has left behind him very few writings, but he nevertheless exercised a great influence upon the study of botany in France; and his arrangement of the plants cultivated in the garden of Trianon, as shown by his catalogues, proves that he had commenced practically demonstrating the natural method so beautifully and fully carried out afterwards by his celebrated nephew.

JUSSIEU, ANTOINE LAURENT DE, nephew of the above, and upon whom his uncle's mantle seems to have fallen, was born at Lyons in 1748. He died in 1836. He was appointed, in 1770, assistant to Lemonnier, the professor of botany; and, in 1777, obtained the general administration of the Jardin du Roi. In his lectures, and in his memoir of the new arrangement of plants in the royal garden, he explained for the first time clearly and with precision, the fundamental principles of the natural method of arrangement of plants, and, in 1789, he published his 'Genera Plantarum,' a work which employed him four years in bringing out. In this excellent work, he has carried out satisfactorily the first principles of the natural classification of his uncle Bernard, and the profound and sagacious manner in which he has applied these principles to the institution of the natural families has caused the Jussieuan method to be adopted by almost all botanists throughout the world. In 1793, when the royal garden was remodelled, and became the Jardin des Plantes, Jussieu was appointed professor of rural botany; and afterwards was chosen by his colleagues to be director and treasurer of the museum of Natural History. Like his uncle, Bernard, he had become almost totally blind for some years before his death. [W.B.]

JUSSOU, H. C., a Ger. architect, 1754-1825.

JUSTEL, CHRISTOPHER, a French *savant*, and ecclesiastical antiquarian, whose works illustrate the history of France in the middle ages, 1580-1649. His son, HENRY, editor of some of his father's MSS., 1620-1693.

JUSTI, JOHN HENRY THEOPHILUS, a German mineralogist, author of a 'Treatise on Money,' on 'Mineralogy,' 'Chemistry,' &c., 1720-1771.

JUSTIN, surnamed 'The Martyr,' but anciently 'The Philosopher,' was born about the beginning of the second century, of pagan parents, at Flavia Neapolis (Naplous), the ancient Shechem or Sychar in Samaria. He was brought up in the religion of his parents, and studied in succession the Stoic, Peripatetic, Pythagorean, and Platonic philosophy. But none of them fully satisfied his restless and inquisitive mind, though the last greatly inflated him. Meeting with an old and venerable Christian in one of his solitary walks by the sea-side, he was surprised by the conversation, shown his own ignorance of many things, and urged to read the Hebrew Scriptures. This interview led at length to his conversion, when he was still but a young man. His subsequent life was spent in the earnest diffusion of the faith which he had embraced. He visited Alexandria, and was no stranger in Rome. He suffered

death under Marcus Antoninus, in A.D. 165 or 166; and as usually recorded, his prime accuser was a Cynic philosopher of the name of Crescens. The mode of his martyrdom is uncertain; some affirming that he was scourged and beheaded, and others that he was put to death in secret. The best works of Justin are in the form of apologies—one, probably in A.D. 150, addressed to Antoninus Pius, and a second to Marcus Aurelius about the year 164. The 'Dialogue with Trypho the Jew,' a tract, the genuineness of which has been unsuccessfully attacked, is a defence of Christianity against Jewish assaults and prejudice, and is founded upon a personal discussion. The argument is drawn from the types and prophecies of the Old Testament, but the interpretation is often fanciful and inexact. Doubts are entertained about the genuineness of other works ascribed to him, such as the 'Oration,' and 'Cohortation to the Greeks,' the famous Epistle to Diognetus, and the tract 'On the Monarchy of God.' Some other spurious treatises are assigned to him, and many of his writings have been lost. As Justin continued to wear the garb of a philosopher, so he never renounced the philosophizing spirit. His platonic notions gave peculiar coloring to his views and defences of many Christian doctrines, and some of his arguments were not learned in the school of the apostles. His erudition, however, is always subservient to Christianity; but his style is often rugged though expressive. His works in whole and in parts have often been published. The editio princeps was published by Robert Stephens, Paris, folio, 1551. A better edition appeared under the care of Maranus, Paris, 1742. Thirlby published the Dialogues, London, 1722, in a tall and handsome folio, and the last and best edition, edited by Otto, was issued from the press at Jena, in 3 volumes 8vo. 1844. The separate pieces have often been reprinted, and not a few of them have been translated into English. Useful information on the life, times, and theology of Justin, may be got in Bishop Kaye's 'Writings and Opinions of Justin Martyr,' Cambridge, 1829, and especially in two German works of Semisch on the subject, published at Hamburg, 1842-1848. JUSTIN, a Roman historian, 2d century.

JUSTIN I., emperor of the East, born 450, succeeded Anastasius 518, made Justinian his colleague in the empire, and died 527.

JUSTIN II., son of Vigilantia, sister of Justinian, suc. the latter, 565, died in retirement, 578.

JUSTINIAN I., emperor of Constantinople, was the son of a farmer, and of the sister of Justin, who from entering the army as a simple soldier, had become emperor, and was succeeded by his nephew, then in the forty-fifth year of his age, 527. Some months before the death of his uncle, Justinian had persuaded him to consent to his marriage with Theodora, a well-known actress and courtesan, who was declared Augusta, and crowned the same day as her husband. About the same time, Belisarius, the friend and future general of the new emperor, was married to Antonina, a professional companion of Theodora; and to the intrigues and jealousies stirred up by these two women is to be attributed the principal part of the untoward circumstances which have cast a stain on the personal character of Justinian. The political events of his reign may be summed up in the wars of Belisarius and the eunuch Narses, who obtained splendid successes over the Persians in the East, and the Vandals and Goths in Italy, and in the terrible sedition which broke out at Constantinople in 532, and was extinguished in the blood of thirty thousand persons. In the latter

case, Justinian would have fled from his capital, and in all probability lost his crown, but for the courage and talents of Theodora, whose vices were gilded by some of the rare qualities befitting an empress. The glory of his reign is the famous digest of the Roman law, known generally as the *Justinian Code*, which was compiled out of the Gregorian, Theodorian, and Hermogenian codes, by ten of the ablest lawyers of the empire, under the guiding genius of the juriconsult, Tribonian. Their labors consist—1. of the 'Statute Law,' or Justinian code, properly so called; 2. the 'Pandects,' a digest of the decisions and opinions of former magistrates and lawyers,—these two compilations consisted of matter that lay scattered through more than two thousand volumes, now reduced to fifty; 3. the 'Institutes,' an abridgment, in four books, containing the substance of all the laws in an elementary form; 4. the laws of modern date, including Justinian's own edicts, collected into one volume, and called the 'New Code.' These labors, which a Cæsar had not been able to accomplish, were completed by the year 529; and we can only lament that Christianity was not in its prime at that epoch, whereby the spirit of natural right and equity had been infused into them, in place of the dogmas of authority. Besides this important work of imperial reform, Justinian was a great builder and engineer, and works of public utility were kept constantly in progress in all parts of the empire. He was remarkable for temperance and chastity, and not less so for his great learning and diligent application to business; but his religious bigotry, and his weakness in the hands of Theodora, marred all his good qualities. Died in the eighty-third year of his age, 565. [E.R.]

JUSTINIAN II., surnamed 'Rhinothmetus,' became emperor of the East on the death of his father, Constantine, 686, when he was about sixteen years of age. He was deposed and banished for his cruelty, by his general, Leontius, 695; regained his throne ten years afterwards, and, exhibiting the same ferocious disposition, was assassinated, 711.

JUSTINIANS, THE, or, GIUSTINIANI OF VENICE, descended from the emperors of that name, form a long roll of famous names. The principal of these are—LORENZO, or ST. LAURENT, the first patriarch of Venice, a man of remarkable public and private virtue, author of sermons, letters, and ascetic tracts, 1380-1465. LEONARDO, his younger brother, distinguished as an Oriental scholar and poet, procurator of St. Mark, 1388-1446. BERNARDO, his son, procurator and member of the council of ten, author of a life of Lorenzo Giustinian, and of letters and speeches delivered by him on various occasions, 1408-89. BERNARDO, uncle of the latter, a learned ecclesiastic and dignitary of the order of St. George, author of a 'History of the Military Orders,' published 1692. SEBASTIAN, ambassador to England in the reign of Henry VIII., 1515-1519. ORSATTO, a Greek translator and poet, 1538-1603. POMPEIUS, a celebrated general and historian of the Flemish wars, 1569-1616. MARC-ANTONIO, elected doge of Venice 1684, died, after sustaining a war with the Turks, 1688. NIC.-ANTONIO, a learned theologian, who became bishop of Padua, and edited an edition of Athanasius, and a chronology of the bishops of his see, 1712-1796. ANGELO, proveditor of Treviso when the state was invaded by Buonaparte in 1797.

JUSTINIANS, THE, or GIUSTINIANI OF GENOA, assumed the name without the right of descent. The principal of the family are—AUGUSTIN, bishop of Nebo, or Nebbio, and the most learned man of his age, 1470-1536. JEROME, a tragic writer, born

about 1560. HORACE, a learned cardinal, risen from a poorer branch of the family, died at Rome 1649. MICHEL, a learned ecclesiastic, author of many works left in MS., 1612-1680. VINCENT, a famous connoisseur, whose collection of engravings forms the 'Giustinian Gallery,' published 1640. FABIO, a learned prelate, adopted into the family when a youth, 1579-1627. The name occurs in other parts of Italy besides Venice and Genoa; of these we may mention GIOVANNI, a native of Candy, distinguished as a poet, died about 1556; and LAURENT, or LORENZO, a professor at Naples, author of historical works, &c., 1760-1825. [E.R.]

JUVARA, F., a Sicilian architect, 1685-1735.

JUVENAL, DECIUS JUNIUS, a celebrated Roman satirist, was born at Aquinum, in Campania, at the beginning of the reign of Claudian. His first satire being directed against Paris, a favorite of Domitian, Juvenal was exiled to Egypt under pretence of an appointment, and died there at an advanced age, 128. Only sixteen of his satires remain, most of which are considered masterpieces of that class of writing. They have been translated by Dryden, Gifford, and others.

JUVENAL, the name by which a grammarian named W. Jouvenneaux is known, abt. 1460-1505.

JUVENAL, or JOUVENAL DES URSINS, a French statesman who owed his elevation to rescuing Charles VI., born about 1350, died 1431. His son, of the same name, archbishop of Rheims, and historian of Charles VI., died 1473.

JUVENCUS CAIUS VECTIUS AQUILINUS, one of the earliest Christian poets, b. in Sp. 4th c.

JUVENEL, F. author of a 'History of the Crusade under the Pontificate of Urban II.,' a 'History of the Moors in Spain,' and a 'History of the Popes,' 17th century.

JUXON, WILLIAM, successively bishop of Hereford, bishop of London, and archbishop of Canterbury, was a prelate of great learning, chiefly remembered for his fidelity to Charles I., whom he attended at the Isle of Wight, and whose last requests he received on the scaffold. He is the author of a sermon, entitled 'The Subject's Sorrow, or Lamentation on the Death of Britain's Josiah, King Charles,' published 1649, and 'Some Considerations upon the Act of Uniformity,' 1662. Died 1663.

KABBESE, J., a Dutch painter, died 1660.

KABEL, A. VANDER, a D. pain., 1631-1695.

KABRIS, JOSEPH, a sailor in the French service. He was taken prisoner by the English, and allowed to ship on board a whaler bound for the Pacific Ocean, but being wrecked near the island of Nukahiva, he fell into the hands of the cannibals, and would have suffered death but for the interference of the King's daughter, to whom he was soon after married. He lived on the island for several years, exercising the office of chief judge, to which he had been appointed. At length he was carried away by the captain of a Russian vessel, and died in France, in 1822, while endeavoring to raise sufficient money to enable him to defray the expense of a passage back to the Pacific.

KANNI, J. A., a Ger. Orientalist, 1773-1824.

KANT, IMMANUEL, born at Königsberg, 21st April, 1724, in which city he spent a long life of eighty years in the tranquillity so acceptable to a sage: he died on 24th February, 1804. It has happened to two of Europe's most illustrious Thinkers since the revival of Philosophy, to undertake the same momentous problem regarding the Grounds and Limits of Human Knowledge: two men, almost contrasted in character, but each in relation to his age, offering a solution so profound and suitable, that his works stand as an era, from which, as its commencement, a spacious range of Metaphysical History will ever be dated:—the Inquirers were KANT and JOHN LOCKE. Contrasted in mental character—for, while Locke, participating in the peculiar genius of his country, cared not to adventure beyond the concrete—the practical—the objective,—the intellect of Kant manifested an analytic power, an ability to pierce through abstractions and construct Systems, certainly never surpassed since the days of Aristotle,—these two great men were so placed, that in their common revolt against scepticism and dogmatism, it fell to them as if through necessity, to look at their common subject from these separate points of view, which in philosophy, have stood for the most part also as contrasted. Repelled by the dogmatism of less discreet Cartesians, who were ever inclined to arrest inconvenient Inquiry, by interposing the obstacle of a so-called Innate principle or truth—Locke re-asserted our harmony with the External World, and hastened to vindicate for its action on Mind, the important part which that action plays in the construction of human knowledge: Kant, on the other hand, lived in times when the claims on behalf of Sensation—instituted by Locke—had again risen to excess; when the figurative expression of the Englishman, that the mind is a *tabula rasa* had become accepted as a literal maxim; and the unrelenting scepticism of Hume had driven from systematic philosophy all recognition of Energy in Mind, Personality in Man, or of Permanence, Substance and Truth, in Nature or any where. Accordingly, it was his distinctive vocation to reassert the Force of the Thinking principle, to re-establish it as a Power, co-ordinate, and at least co-equal with the External Universe: and he accomplished his task so thoroughly, that the despotism of mere Sensationalism can never reappear in the progress of modern thought. Inevitably, perhaps, from his position, Kant's tendencies lean unduly towards Idealism: nevertheless, profiting by his long posteriority to Locke, the solution offered by the profound and penetrating German, is assuredly the completest which our human Intellect has yet elaborated; and, however surprising to the English reader, it may be also asserted, that by no one, since the Stagyrite wrote, has clear and definite thought been expressed more clearly, or more conscientiously guarded from possible misapprehension. We shall endeavor as distinctly as

we can—encumbered by the necessary brevity—to offer an appreciation of Kant's remarkable labors.—I. Two considerations are essential to a right apprehension of the achievements of the sage of Königsberg. *First*; as it is necessary to repeat, his effort was to establish the *grounds* and *limits* of Human Knowledge—destroying scepticism on the one hand, and discrediting dogmatism on the other: and *Secondly*; He sought to accomplish this double object by defining exactly the spheres of those two *factors* of all knowledge—the *Mind* and *Nature*; thus rescuing Truth from doubt, although *Sensation* alone might not account for it, and by rigorously appreciating and surveying the action of the purely *Mental Force*, warning us not to mistake for *real*, what is merely *notional*. To carry out the foregoing aim was the effort of Kant's life; and his philosophy was hence rightly designated the *Critical Philosophy*: although he has surveyed many departments of *Doctrine*, his efforts point every where rather to *Criticism*, than to *Doctrine*; he has shown rather how Philosophy may become a Science, than filled in the matter of the Science. Taking his writings as a whole—even allowing that the whole is a composite of isolated parts—they go with the strong light of Criticism nearly around all possible knowledge. The mind manifesting its energies mainly under *three Modes*, usually discriminated as the Intellect, the Emotions, and the Will (see article KRAUSE),—KANT has tracked its corresponding laws and methods of action, in his classical treatises—the *Critique of the Pure Reason*—the *Critique of the Judgment*—and the *Critique of the Practical Reason*. To complete the two latter works, several of his smaller treatises are needful as a supplement; but, with this addition, they may be justly esteemed as contributions yet unsurpassed, to the disentangling of difficulties in theoretical and practical *Morals*, and to the establishment of fundamental canons in *Æsthetics*. Both works abound in passages of Noble Eloquence: the Critique of the Practical Reason, presents the best appreciation offered by any modern Thinker, of the system of Epicurus, and the morality of Stoicism: the Critique of the Judgment achieved an influence in Germany which even the superficial student of the literature of that country will not fail to recognize; and in the section on Teleology, the philosophical rudiments appear, of that recent method in Natural History, which will constrain a reconstruction of all the Sciences of Organization.—It is, however, of the *Critique of the Pure Reason* only, that, in illustration of Kant's manner, we shall here give any particular account.—II. As the foundation of this memorable *Critique*, Kant inquires, what characteristics must attach to Knowledge drawn simply from *Sensation*, or from *Experience*? Sensation, or experience, can inform the mind of *facts* only, of things that *are*, because they are felt; it never can show that a thing *must be*, or that it is *universally*. The characteristics of *necessity* and *universality*, then, cannot come from experience; the products of which must be empirical, and can never rise higher than *generalizations*: so that whenever either characteristic inheres in a *notion*, we are obliged to infer that the said *notion* is, in thus far, not a pure product of experience, but an experience viewed and modified by some quality or energy of the thinking faculty. The *criterion* obtained, let the Intellect, or the Pure Reason be examined; and the *factors* of the whole separated, after a full analysis of its contents. The Pure Reason, or the Faculty of Knowing, operates in three different modes—*First*, that of *SENSIBILITY*, or our power to construct representations of objects by

means of the sensations they produce : *Second*, the Faculty, which co-ordinates, unites, and discerns the relations of these representations, or the UNDERSTANDING ; and *Third*, that loftier Faculty which bestows on Knowledge its highest Unity—passing beyond Sensibility and the Understanding, and seeming to descry Ultimate and Eternal Law ; this faculty is the REASON.—Of the contents of the *Sensibility* then, what are the *à posteriori*, and what the *à priori* elements ? What portion of a perception is Empirical, and what Necessary and Universal ? The perception of a fact or thing as existing, is clearly empirical ; but we cannot perceive any thing without conceiving it as necessarily existing in *Space* and *Time* ; these conceptions no mere apprehension of empirical existence can supply ; therefore they are *Forms* of our *Sensibility*,—qualities or forces belonging to the perceiving agent, by which a new nature, so to speak, is impressed on the thing perceived. With regard to the *Understanding* again, we discern that it universally classes objects under certain determinate *relations*, which relations it considers *universally* applicable : these relations, therefore, or the *Categories*, are the Laws, or Formal principles of the Understanding—its constituent elements—or rather the *Conditions* under which alone, in virtue of its structure, it can work. In his determination of the *Categories*, Kant analyzes alongside of Aristotle ; nor, if the works of the two great men are compared, will it appear, that, to the philosopher of Königsberg, thought had advanced for so many centuries, in vain. One of the *Categories* of the Understanding is the relation of *Cause* and *Effect* ; the Student will at once discern how easily under this view of it, the German disposed of the otherwise bewildering speculations of Hume. Beyond Sensibility and the Understanding lies the *Reason*, governed also by *à priori* Ideas, one of which elevates us to the conception of the Soul, or to the transcendental Unity of Man ; a second, the ground of all rational Cosmology ; and a third, that constructs the notion of God.—How limited the glimpse afforded by these abrupt works, of the amplitude and superb proportions of the *Critical Philosophy* ! But let the Student be assured that for the first time in History the problem it undertook has been entirely solved : no longer does the region of our *Subjective* Human Knowledge contain dark, unvisited, or unexplored corners.—III. The opinion now ventured as to the labors of Kant, is not pronounced in ignorance of the questionings to which they have given rise. Numerous the modifications proposed on his table of the *Categories* ; as well as exceptions to other interior peculiarities of his system : but these—whatever their plausibility or weight—little affect the merits of his gigantic and symmetrical scheme. We have said, however, that its tendencies lean unduly towards Idealism ; and it is necessary now, to show in what manner the foregoing speculations open and influence the *questio vexata* of modern thought—the supreme difficulty of existing metaphysics. The *Critical Philosophy* has indeed saved all necessary Truths by referring them to Laws of the Mind—*conditions* under which alone the Thinking Organism can operate : but, *what is the relation between these Laws subjective, and external or objective Realities ? Space and Time—the à priori elements of the Sensibility—do they not exist for the Universe as well as for Us ? Is that representation purely Ideal, by which the marvels of materialism are placed before the mind, sparkling through Infinity and evolving through all Time ? The Categories of the Understanding, again—the relation for instance of Cause and Effect—*

although they are necessitated through the nature of the Understanding itself, are they all *purely* subjective ? Is there not a world of phenomena, regulated by laws which are their exact counterparts, and, to bring us into whose presence, our Intellectual Nature is the instrument ? So, finally of the *Reason* ?—the Idea of God is a necessity with it,—is it *only* a *subjective* necessity,—does not that necessity conduct us towards a Real, ever-living, all-creating, all-sustaining Omniscience ? The reader will not learn without dismay that Kant denied the legitimacy of every attempt to effect a transition to Reality, from the region of the Speculative Reason. By a process that at least is ingenious, and in which he is supported by our own Sir William Hamilton, he did effect a bridge towards the realities of Ontology ; he assumed the existence of God as a consequence of the law of Morality : nevertheless, it is his dictum, that the representations of the Sensibility and the verities of the Intellect, authorize our belief in no objective counterpart ; and that Existence, as recognized by them, is a mere *Noumenon*—a thing originating a sensation, but unknown as to its qualities, and *unknowable*. Doubtless one is startled by such a conclusion ; but it were folly to underrate the difficulty which checked the advance of Kant. Many and various the efforts to remove it ; with what success, this is not the place to declare : with not a few Inquirers, the desire to accomplish the feat seems to have passed for its accomplishment. Nevertheless, on the occurrence of such difficulties, even when they seem to approach the insuperable, it is something to discern that their existence need not surprise us ; and that even their appalling magnitude is no reason for ultimate despair (article LEIBNITZ). The question against which Inquiry is here impinging, has to do with the lowest down—the least accessible portion of our human Nature. As we have remarked elsewhere, the faculty of Intuition, the power to look beneath Sensation into Realities—INTUITION—is, although the most educable, the most difficult to *apprehend*, and the least educated of all the forms of energy appertaining to mind. It acts indeed in every mind, but it acts imperfectly ; rarely does it act through *reflection*, or, as yet, so that we can explain its operations. Let the student turn to Sir William Hamilton's celebrated memoir on *Presentation* and *Representation* ; he will find there how sadly men have erred, and how toilsomely they have labored, before that single act of Intuitive Perception could be described ! That act of Intuition, as we now understand it, is simply the act constraining our acceptance of an objective reality, corresponding to Kant's subjective Laws or Forms of the Sensibility : is it not likely then, that a deeper and clearer view, in the two remaining and corresponding directions, shall enable us to assert as authoritatively, concerning the Objectivity of Laws which we apprehend in the meantime, simply as regulating Forms of the Understanding and the Reason ? Between these two classes of Forms or constituent elements, and the Forms of Space and Time, there is much in common ; especially this vital characteristic—no speculative doubt can destroy our practical belief that they have real correlatives. Nay, it may be alleged even—as Kant rightly asserts with regard to the Practical Reason, or the Law of Morality—that without that belief, or rather that INTUITION, the faculties would not operate. Perception indeed involves no conscious voluntary act ; the working of the Understanding and the Reason, on the other hand, do involve one ; and it appears safe to aver that un-

less for the conviction, that we are concerned about a great and real Universe, apart from the Thinking Subject, the Human Will would cease to urge the Understanding to evolve its relations, or the Reason to aspire after that highest Unity which, in obedience to its nature, it struggles to attain.—It were unsuitable to close this imperfect notice of the Philosophy of Kant, without a word concerning the character and aspects of the Philosopher. We have said that he lived in tranquillity, devoted to meditation. But it were wrong to fancy him the abstracted sage. His benevolence and simplicity were great; he much relished society, mingling with its innocent gayeties; and he was beloved by the young. He was a man of unimpeachable probity; and that sincerity which is the right arm of Genius in its contests for Truth, was inseparable from his nature. His ideas in morals have been surpassed in elevation by no writer in History; he never uttered a word or committed a sentence to the world derogatory to man's highest nature, or which the sternest virtue would recall. A pure lover of Truth, he proclaimed and vindicated liberty of Thought and Speech: Philosophy, with Kant, was no make-believe—neither the *formula* of a School, nor an affectation of the *Salon*—but an earnest discernment of the rights and duties, the functions, privileges and position of Humanity, and therefore a reverential offering by our Human Reason to the august Power that formed it.—There are now excellent editions of Kant's collected works in German, by his pupils; good French translations of several of them; an English version of the Critique of the Pure Reason by Mr. Hayward, and one of his Ethics by Mr. Semple. KEAN, EDMUND, one of the greatest tragic actors of which England can boast, and possessed of decided genius for the drama, was, on his mother's side, great-grandson of Harry Carey, reputed author of 'God save the King.' The date of his birth is dubious, but he is stated to have been born in Castle Street, Leicester Square, in November, 1787; but to have himself asserted that 17th March, 1790, was his birth-day. He seems to have been placed on the stage when an infant, and to have thus appeared in processions and pageants both at Drury Lane and the Haymarket theatres. At these periods he was remarked for his shyness, but attracted the sympathy of Miss Tidswell, an actress of some standing, who was able to recommend him to a manager in Yorkshire, where he acted under the name of Carey. *Hamlet*, *Lord Hastings*, and *Cato*, were the parts which even then he was capable of filling; and he showed besides much elocutionary skill in recitations from Milton and Shakspeare, which attracted the attention of Dr. Drury, who sent him to Eton school, where he remained three years, and acquired considerable knowledge of Latin. After this, he played *Hamlet* and *Shylock*, first on the Birmingham stage, and afterwards at Edinburgh, Sheerness, Sevenoaks, Tunbridge Wells, and Swansea. At about the age of nineteen, we find him at Waterford, in Ireland, where he acted *Douglas*, and obtained a wife, remaining there two years, after which he visited Weymouth, Exeter, and Taunton. At Dorchester, he is said to have performed, not only in tragedy and comedy, but in opera and pantomime. By the intervention of Dr. Drury, he was ultimately recommended to the committee of Drury Lane theatre; at which theatre he made his *débüt* 26th January, 1814, as *Shylock*, to a meagre house, but the few who were present became convinced of his genius; the critics were in his favor, and on waking the next morning the young actor found himself famous. His *Richard the Third*, *Hamlet*, and *Othello*, confirmed the favorable impression. His career was thenceforth assured, and his successes were of the most brilliant description. As a contrast to the classical style of the Kemble school, his acting was impulsive, fiery, and startling. After several seasons of triumph in England, Scotland, and Ireland, he visited America, being induced to that step by some private circumstances which permit not detail. On his return to England, he became manager of the Richmond theatre, and died in the house attached thereto, 15th May, 1833. His funeral was numerously attended by distinguished persons, and he was interred in the cemetery belonging to the old church at Richmond, near the grave of Thomson and Burbage. A cenotaph has since been placed on the church wall by his son, Mr. Charles Kean, the present manager of the Princess's theatre. Had the father been as prudent as the son has proved, his life would have been happier, and his ultimate triumph more decided. His genial aptitude for acting was indisputable, and the lightning-flashes fre-

quent during his extraordinary performances, astonished the critic as much as the ordinary spectator. We have certainly had no performer whom the conscientious biographer can cite as his superior in tragic effect and passionate elocution. [J.A.H.]

KEARSLEY, JOHN, a physician of Philadelphia, was born in England, emigrated to America in 1711. He was a member of the house of assembly, where he strenuously advocated the rights of the colony, and became a great favorite with the people. Died Jan. 11, 1772.

KEATE, GEORGE, a poet and miscel. writer, author of an 'Account of the Pelew Islands, 1729-97.

KEATING, G., an Irish historian, d. abt. 1625.

KEATS, JOHN, was born in London in 1796. Some years of his boyhood were spent in a school at Enfield. There he received classical impressions which moulded the form of his youthful fancy and feelings, producing a singularly interesting, though anomalous, kind of images, by their mixture with the romantic ideas which modern poetry afterwards inspired. When he was about fifteen years old, he was apprenticed to a surgeon in London; but poetry had taken close possession of his mind, and the art was enthusiastically practised. In 1817, he published a volume of poems, which was little noticed. Next year appeared 'Endymion, a Poetic Romance.' This poem displayed a predominance of imagination over judgment, so decided as to prompt a doubt whether even maturer years could have qualified the writer to attain very high excellence; but it has an affluence of imagery, a fine ideality, and an exquisite grace of feeling, which make it to poetical minds one of the most seductive of all poems. It was criticised by Gifford in the *Quarterly Review* with savage severity. The attack affected the young poet very deeply, and has even been said to have caused or accelerated the consumptive symptoms which soon showed themselves. He published, however, in 1820, a new volume, containing, among other pieces, 'Hyperion,' 'The Eve of Saint Agnes,' 'Lamia,' and 'Isabella.' In a paper on his former volume, which now appeared in the *Edinburgh Review*, it was justly said by Jeffrey, that, with all its faults both of matter and of diction, no book could be more fitly put into the hands of a reader, as a test to ascertain whether he had 'a native relish for poetry and a genuine sensibility to its intrinsic charm.' The poetry of Shelley, and that of Keats, may be pointed to as the earliest indications of those poetical tendencies which have been further developed by Tennyson and his school. The poet sought renovation of health in Italy, but in vain. He died at Rome in December, 1820, when he had recently completed his twenty-fourth year.

KEATS, SIR R. G., a naval officer, 1757-1834.

KEBLE, JOSEPH, an English lawyer, was born in 1632, educated at Oxford, and called to the bar in 1658. He was remarkable for his regularity in attendance at court during a period of nearly fifty years, as reporter of the cases that came before it. He wrote many works, the principal being 'A Table to the Statutes,' 'Assistance to Justices of the Peace,' 'Reports,' and 'Essays on Human Nature and Human Actions.' Died 1710.

KEDER, N., a Swedish antiquarian, 1659-1735.

KEENE, EDMUND, bishop of Ely, 1713-1781.

KEILL, JOHN, a Scotch mathematician, 1671-

1721. His brother, JAMES, a physician and medical author, 1673-1719.

KEISAR, W. DE, a Flem. painter, 1647-1693.

KEISER, REINHARD, a celebrated German musician and composer, was born at Leipsic in 1673. He was the author of many operas, the last of which called 'Circe,' which was performed at the Ham-burgh theatre in 1734, was considered the best. Died 1735.

KEITH. See ELPHINSTONE.

KEITH, GEORGE, a quaker, was a native of Aberdeen, Scotland, emigrated to America in 1682, and was appointed surveyor-general in East Jersey. He wrote several articles in favor of the Quakers, but in 1691, a misunderstanding arising between him and them, he withdrew from the society, and became an Episcopalian in England. In 1706, he was appointed rector of Edburton in Sussex.

KEITH, ISAAC STOCKTON, D.D., minister of Charleston, South Carolina, was born in Bucks County, Pennsylvania, 1755, and was educated at Princeton College in 1775. In 1778, he was chosen minister of Alexandria, Va., and in 1788 he removed to Charleston. At his death in 1813 after a ministry of twenty-five years, he bequeathed to his church at Charleston \$5,000.

KEITH, JAMES, younger son of William Keith, earl marshal of Scotland, distinguished as a field-marshal in the service of Prussia, 1696-1758.

KEITH, THOMAS, a professional accountant and mathematician, author of 'Introductory Works in Geometry,' &c., 1759-1824.

KEITH, SIR WILLIAM, governor of Pennsylvania, from 1717 to 1726, had previously been surveyor-general of customs of America. He was an intriguer, fond of public favor, and careless of the performance of his promises. In 1738, he published the history of the British plantations in America. Died 1749.

KELAOUN, sultan of Egypt, 1279-1290.

KELGREN, H., a Swedish poet, 1751-1795.

KELLEHOUN, MORITZ, a Ger. pain. and engr., director of the academy at Munich, 1768-1831.

KELLER, J. B., a Swiss statuary, 1638-1702.

KELLER, G., a German historian, 1750-1827.

KELLER, D. L. CHR., Count, a Prussian diplomatist, kn. at the congress of Vienna, 1757-1827.

KELLERMANN, FRANCIS CHRISTOPHER, duke of Valmy, a famous general of the French revolution, was born at Strasburgh, 1735, and, embracing the military profession when a youth, had risen to the rank of camp-marshal, besides serving in several political missions, before the commencement of the revolution. In 1791, he was appointed to a command in the army of the Moselle, and occupied himself in organizing the defence of the frontier against the emigrants and the duke of Brunswick. On the 19th of September, 1792, he effected, by forced marches, at the head of twenty-two thousand men, his famous junction with Dumouriez, and, the following day, intrenched on the heights of Valmy, resisted an attack of forty-five thousand Prussians and twenty thousand Austrians. This famous victory was the first in the series of successes which marked the career of the republic and the empire, and was gained by the raw, ill-provided levies of the patriots over experienced troops. On the same day the national convention was assembled in Paris. On the morrow, the republic was proclaimed, and the news arriving in the camp of Valmy after their victory, was the occasion of great rejoicings, in the midst of which the duke of Brunswick with his army recrossed the frontier. Escaping the denunciations of Custine, who sought his ruin, Kel-

lermann was appointed, in 1795, commander-in-chief of the army of the Alps and Italy, and in a short time found himself auxiliary to Napoleon, whose star rose above him. His position afterwards was that of a senator and peer of France; and, like many others of his order, he made peace with the Bourbons on the fall of the emperor. He died in 1820.

KELLEY, EDWARD, the seer and companion of Doctor Dee in his alleged intercourse with spirits, was born in Worcester, 1555, and is said to have been educated at Oxford, but, leaving the university abruptly, he was captured in Lancashire, and for some crime, it is supposed, lost his ears. It must have been soon afterwards that he made the acquaintance of Dr. Dee, who was at first persuaded that Kelley 'had been brought into unison with him by mediation of the angel Uriel,' for as early as 1589 they had separated again. The cause of their disagreement was Kelley's indulgence in magical practices for the sake of gain, which the Doctor could not tolerate; and, left to himself, our adventurer not only lived handsomely upon his profits, but obtained the honor of knighthood from the Emperor Rodolph. It was the popular belief that Kelley outlived the time of his compact with the devil, and was carried off bodily by infernal spirits in the sight of his wife and children—but according to unadorned history he was imprisoned for his knaveries, and died of the injuries he received while endeavoring to escape, in 1595. He is the author of poems on chemistry and on the philosopher's stone, and was the penman of several discourses, which are printed in Casaubon's 'Relation of What Passed for Many Years Between Dr. Dee and Some Spirits,' published 1639. Some curious particulars concerning him will be found in Weaver's 'Funeral Monuments;' and there are some MSS., both of his and Dr. Dee's, in the Ashmolean Museum at Oxford. [E.R.]

KELLISON, M., a catholic divine, died 1641.

KELLY, HUGH, a dramatic writer, was born near the lake of Killarney in 1739. His first occupation was that of a stay maker, afterwards an attorney's clerk, and finally became an author of much reputation. Died 1777.

KELLY, JOHN, an English clergyman, author of 'A Practical Grammar of the Ancient Gaelic, or Language of the Isle of Man,' 1750-1809.

KELLY, MICHAEL, a vocalist and composer, was born in Dublin in 1762, and at an early age exhibiting signs of musical talent, he was placed under the tuition of Rauzzini, then in Dublin, at whose recommendation he was sent to Italy. After performing at most of the Italian theatres he went to Vienna, where he formed the acquaintance of Mozart. Having returned to London, he made his first appearance at Drury Lane Theatre in 1787 where he remained as first singer until he retired from the stage. Died in 1826.

KELP, JUSTUS J., a Ger. philologist, 1650-1720.

KEMBLE, CHARLES, an English actor, was born 1775. He was the brother of Mrs. Siddons, of John Philip and Stephen Kemble, and father of Fanny Kemble, now Mrs. Butler. In the winter of 1792-3, he made his first appearance at the Sheffield theatre, as Orlando, in 'As You Like It,' and in April, 1795, presented himself for the first time before a London audience as Malcolm, in Macbeth, on the Drury Lane boards. He visited the United States with his daughter Fanny Kemble, and met with a triumphant success. He appeared both in tragedy and comedy, but he achieved his chief excellence as a genteel comedian. He had retired of late years from the stage, and died 1854.

KEMBLE, GEO. STEPHEN, a popular actor and manager, brother of the celebrated J. P. Kemble, 1758-1822.

KEMBLE, JOHN PHILIP, next to Garrick, the most eminent of English actors, but in style, the contrast of his great predecessor, being as reflective as he was impulsive. His father, Roger Kemble, was theatrical manager at Prescott, in Lancashire, and in that county, John Philip was born, February, 1757. He was educated first at the Roman Catholic Seminary of Sedgeley Park, Staffordshire; and afterwards at the college of Douay, being intended for one of the learned professions. His own course, however, had been already determined on, and he commenced active life as an actor at Liverpool, after which he visited York and Edinburgh. At Liverpool he acted in a tragedy of his own composition, called 'Belisarius;' and soon after published a volume of 'Fugitive Pieces,' which, however, he sought to suppress. His appearance in London took place 30th September, 1783, at Drury Lane, when he performed 'Hamlet,' with extraordinary applause; though it was five years before he became leading tragedian. About that period, too, he succeeded to the management of the theatre, which he conducted till 1801, during which he restored some good old plays, and produced some original pieces, including a musical entertainment of his own, entitled 'Lodoiska.' Next year, he became the manager and the purchaser of a sixth share of Covent Garden theatre, but the destruction of the edifice by fire in 1809, caused him much trouble, which, after its rebuilding, was increased, in consequence of the prices being augmented, and the boxes arranged too exclusively for the accommodation of the aristocracy. Public disturbances, known by the name of the O. P. Riots, ensued, and continued for several nights. On his retirement from the stage, 23d July, 1807, Mr. Kemble was complimented with a public dinner, which was attended by persons of rank and talent. He died at Lausanne, in Switzerland, 26th February, 1823, of a paralytic attack. Mr. Kemble's style of acting was eminently regulated by art; his performances were premeditated, and as little as possible was left to natural impulse. This style was most suited to the artificial characters of the drama, such as *Cato*, *Coriolanus*, *Hamlet*, *King John*, *Jacques*, and *Penraddock*. In his different managements Mr. Kemble brought his learning to bear on the business and decorations of the stage, which is, accordingly, indebted for some of its earliest reforms to him. But he preferred building his reputation on the old drama, to risking it in the production of novelty—the ill consequences of which mode of proceeding, ultimately resulted in the total fall of the two patent theatres, which are now superseded by smaller establishments. [J.A.H.]

KEMBLE, PRISCILLA, widow of the preceding, formerly wife of the actor Brereton, 1755-1845.

KEMENI, prince of Transylvania, 1660-1662.

KEMENYI, a Hungarian revolutionist, distinguished himself in the patriotic struggle against Austria, assisted by Russia; died 1852, aged 53.

KEMP, JAMES, D.D., consecrated Bishop of the Prot. Epis. church in Maryland, in 1814. Killed by the overturning of a stage coach in 1827.

KEMP, J. T., a Dutch missionary, 1748-1811.

KEMP, JOSEPH, a celebrated composer, was born at Exeter in 1778, and while studying was a chorister at that cathedral. In 1802 he got the appointment of organist at the Bristol Cathedral. In 1807 he obtained the degree of M. B., at Cambridge, and in two years after of Doctor. Died 1824.

**KEMP, KENNETH**, a Scotch chemist. He was the first who solidified carbonic acid gas in Great Britain, and was the introducer of amalgamated zinc plates into the galvanic battery. He was assistant professor in the University of Edinburgh, under Hope. Died 1843, at the early age of 36.

**KEMPELLEN, WOLFGANG**, Baron, a Hungarian dramatist and mechanician, inventor of the famous automaton chess-player, 1734-1804.

**KEMPER, J. M.**, a Dutch juriscôn., 1776-1824.

**KEMPIS, THOMAS A.**, whose real surname was **HEMMERKEN**, or **HAMMERLEIN**, was born at Kempen near Cologne in 1380, was educated at the school founded by Gerhard Groote at Deventer, to which he was sent at the age of thirteen; entered seven years afterwards the convent of St. Agnes, formally assumed the monastic habit in 1406, and finally became the superior of the same establishment. His was an earnest practical piety, and his writings are deeply imbued with his peculiar devotional spirit. A tinge of ascetic mysticism is very apparent in his so-called works. The work by which he is best known in this country is the 'Imitation of Christ,' (*De Imitatione Christi*), which is but the title of the first book of a larger treatise (*De Contemptu Mundi*). It is, however, suspected not to be of his composition, the probability being that the work was only translated by à Kempis, but in reality composed by the Chancellor Gerson of the university of Paris. Thomas à Kempis died in 1571, aged ninety-two; not one of those Titans who win immortality by intellectual prowess, but one of those humbler saints whose calm and meditative piety surrounds their memory with an undying fragrance. [J.E.]

**KEN, TH.**, bp. of Bath and Wells, and one of the seven sent to the Tower by James II., 1637-1711.

**KENDAL, G.**, a Calvinistic divine, died 1663.

**KENDAL, SAMUEL, D.D.**, minister of Weston, Massachusetts, was born at Sherburne, July 11, 1753. After graduating at Harvard College in 1782, he was ordained 1785. He published several sermons, viz., one at the ordination of T. M. Harris in 1794; seven sermons for the young, 1808, &c. Died Feb. 16, 1815.

**KENDRICK, J.**, an Amer. navigator, died 1800.

**KENICIUS, P.**, archbishop of Upsala, 1555-1636.

**KENNAWAY, SIR J.**, an East Indian officer and diplomatist, time of Tippoo sultan, 1758-1836.

**KENNEDY, JAMES**, a relig. founder of Scotland, bishop of St. Andrews, and lord chancellor, and one of the regency time of James III., 1405-66.

**KENNEDY, J.**, a chronologist, died about 1770.

**KENNEDY, J.**, a Scotch antiquarian, d. 1760.

**KENNEDY, WILLIAM**, a Scottish lawyer and antiquarian, author of the 'Annals of Aberdeen,' 1759-1836.

**KENNET, WHITE**, an English prelate, dist. as a political partisan in the time of Atterbury and Sacheverel, author of historical and antiquarian works, 1660-1728. His brother **BASIL**, a learned divine and antiquarian, 1674-1714.

**KENNETH**, the *first* of the name, king of Scotland, 604-606; the *second*, reigned 823-854; the *third* succeeded 978, assassinated 994.

**KENNEY, JAMES**, an Irish dramatic writer, born in 1770, and known as the writer of the laughable piece of 'Raising the Wind,' also 'Love, Law, and Physic,' &c. Died 1849.

**KENNICOTT, BENJAMIN**, an Eng. divine, dist. as an Orient. scholar and biblical critic, 1718-83.

**KENRICK, WILLIAM**, a miscellaneous writer, was

a native of Hertfordshire. He followed the trade of a rule maker for some time, and afterward applied himself to study and obtained the degree of Doctor at Leyden. Among his works are 'Epistles Philosophical and Moral,' 'The Duellist,' &c., also compiled an English Dictionary. Died 1779. He first started the 'London Review.'

**KENT, EDWARD AUGUSTUS**, duke of, fourth son of George III., and father of Queen Victoria, born 1767, commander of the British forces in North America 1799, governor of Gibraltar 1802, married to Victoria Maria Louisa, widow of the hereditary prince of Leiningen, and youngest daughter of the duke of Saxe-Coburg, 1818, died 1820.

**KENT, JAMES**, was born at Winchester, in 1700, where at an early age, he was admitted into the choir of the cathedral under the tuition of Mr. Vaughan Richardson, then organist. He afterwards became one of the children of the Royal Chapel, where, under the care of Dr. Croft, he laid the foundation of his future greatness. The first situation which Kent obtained was organist of the chapel of Trinity College, Cambridge; and his next and last was organist of Winchester chapel and college, where he continued to his death, which occurred in 1776. As a composer of sacred music Kent's fame stands on a secure basis, and many of his anthems will take rank amongst the most sublime musical works of any age or country. [J.M.]

**KENT, JAMES**, one of the most distinguished jurists and upright men that our country has produced, was born in Dutchess County, N. York (in the portion that now constitutes Putnam), on the 31st of July, 1763. In 1777 he entered Yale College, and in 1781 took his first degree with distinguished honor. While in college he read 'Blackstone's Commentaries,' which is said to have given him a taste for the profession of law, and on leaving Yale he entered upon his professional studies with Egbert Benson, then Attorney-General of New York. In 1785 he was admitted as an attorney, and in 1787 as a counsellor of the supreme court. He then lived at Poughkeepsie, had a small family to sustain, and was one of the most methodical and diligent of students. His time was regularly divided, and each portion had its allotted occupation, the largest, of course, being given to law. He took also an active interest in politics, and was a pupil of the school in which Hamilton was a leader. In 1790 and 1792 he sat for the Poughkeepsie district in the legislature. In 1793 he removed to the city of New York, and was made professor of law in Columbia College. In 1796 he was made a master in chancery, and in the following year elected Recorder of the city. He was on terms of close friendship with Governor Jay, who in 1797 appointed him to the bench of the supreme court of N. York. Three years afterwards, he in connection with Judge Radcliffe performed, with signal ability, the work of revising the statutes of the State, and added thereby largely to his professional reputation. In 1804 he was appointed chief justice of the State, and continued in the office, with constantly increasing renown until 1814, when he was made chancellor of New York. Here he showed his thorough and amazingly extensive professional knowledge, and his decisions may be referred to as a perfect treasure house of learning. In 1823 he attained the age of 60 years, and under the unwise provision of the constitution of 1821, he was no longer capable of holding the office; it having been satisfactorily ascertained that in New York, a man at 60 must be non compos. Before he left his chair as chancellor, he decided every case that was

before him, and ripe for a decree, and he left the office with the regrets alike of the profession and the public, and with a reputation that any man might envy. He was immediately re-elected professor of law in Columbia College, and his lectures in that office led to his four volumes of 'Commentaries on American Law,' a standard work of great value, and duly appreciated by his professional brethren. It is a text-book in our country. He died in New York in 1847, at the age of 84 years; and it is remarkable that this man officially stultified at 60, lived for 24 years thereafter, furnished a proud testimonial to his lawyer-like abilities in his Commentaries, and almost up to the very last moment of his life, retained his faculties, not of mind only, but of body also, in the freshness and vigor of their earlier exercise. Some men become fools long before they reach 60; some never become fools at all. Of this latter class was Judge Kent, who beside his fine intellect, retained to the last the beautiful simplicity and truthfulness of character which so well became him as an eminently learned and thoroughly good man, whose last hours were cheered and brightened by the faith and hope of an humble and consistent Christian.

KENT, WILLIAM, an Eng. painter, 1685-1748.

KENYON, LLOYD, Lord, chief justice of the King's Bench, first distin. as counsel for Lord George Gordon along with Mr. Erskine, 1733-1802.

KEPLER, JOHN, a distinguished astronomer, was born at Weil, in Wirtemberg, on the 21st December, 1571. His father, Henry Kepler, was an officer in the army who had reduced himself to poverty by his extravagance. His mother, Catherine Guldemar, gave premature birth to a son, John Kepler, who was a sickly child. After recovering with difficulty from small-pox, he was sent to school in 1577. Having become bankrupt, his father was obliged to keep a tavern at Elmendingen, and his son John was taken from school to perform the functions of a servant in his father's house. When he was in his fifteenth year, he was received into the school at the monastery at Maulbron, established at the reformation as preparatory for the university of Tübingen, where he was admitted as Bachelor in 1588; and returning to the school to complete the usual course of study, he took his degree of Master in 1591, holding the second place in the examination. While attending the mathematical lectures of Mästlin, a disciple of Copernicus, he adopted the opinions of his teacher, and wrote an essay to prove that the primary motion was produced by the rotation of the earth. In 1594 he was unwillingly made to accept the astronomical class at Gratz, though he knew little of the subject. He was thus forced to study astronomy, and in 1595 he devoted all his leisure time, and all his mental energy to study the size and the motions of the planets, and their orbits. Finding no regular law in the planetary distances, he made numerous attempts of the wildest and most speculative character, but though he ventured to publish them in 1596 in his 'Prodromus of Cosmographical Dissertation,' he obtained no true results, and was satisfied with the little reputation which his ingenuity had procured for him. In 1597 he made a foolish marriage with a young widow, and in addition to pecuniary difficulties in which this involved him, he was obliged to retire into Hungary to escape from the persecution of the Catholics. Though he was soon recalled to his professorship by the states of Styria, he did not occupy it long. Tycho, whom he visited at Prague in 1600, induced him to become his assistant, but he was not fairly settled in this new office till he was

attacked with a quartan ague and embroiled in a quarrel with Tycho. When Kepler came to Prague in 1601, Tycho presented him to the emperor, who gave him the title of Imperial Mathematician on the condition of assisting Tycho in his calculations. Their first joint work was the computation of the Rudolphine Tables, the expense of which was defrayed by Rudolph. Upon the death of Tycho, in 1601, Kepler succeeded him as principal mathematician to the emperor, with a handsome salary, partly from the imperial treasury, and partly from the States of Silesia. In 1606, Kepler published a 'Supplement to Vitellio,' in which he treats of the optical part of astronomy, and had very nearly stumbled on the law of refraction, afterwards discovered by Snellius. In 1611, he published his *Dioptrics*, an admirable work, which laid the foundation of the science of optics. In this work he gives the theory of the telescope,—describes the astronomical one with two convex lenses,—expounds the spherical aberration of lenses, and the law of total reflexion at the second surfaces of bodies. The work, however, on which his fame rests, is his 'New Astronomy, or Commentaries on the Motions of Mars,' published in 1609. In this work he proves that Mars moves in an elliptical orbit, in one of the foci of which the sun is placed, and that the Radius Vector, or the line joining the planet and the sun, describes equal areas in equal times. These two great discoveries, the first made in physical astronomy, he extended to all the planets in the solar system, and it was through them that Newton, Hooke, Halley, and Wren, independently arrived at the great law of the diminution of gravity with the square of the distance. In the midst of the studies which led Kepler to these fine discoveries, he was harassed with pecuniary difficulties which were the bane of his existence. His salary was ever in arrears, and the treasury of Rudolph was always empty. Upon the death of the emperor, however, in 1612, Kepler's arrears were paid. Mathias, the brother and successor of Rudolph, re-appointed him imperial mathematician, and he was permitted to accept of the professorship of mathematics at Linz, in Austria. He had lost his wife and one of his children by small-pox in 1611, and his family now consisted of a daughter, born in 1602, and a son born in 1607. He married a second time in 1615, and added to his family three sons and two daughters, who, along with their mother, survived him. About this time, Kepler was summoned to the diet at Ratisbon, to give his opinion on the reformation of the calendar, a subject upon which he published a short essay. His pension was again in arrears, and in order to support his family he was obliged to compose what he calls 'a vile prophesying almanack,' which, he adds, 'is scarcely more reputable than begging, unless from its saving the emperor's credit, who abandons me entirely, and would suffer me to perish with hunger.' In 1617 there appeared one of the most interesting of his works, entitled 'The Harmonies of the World.' It is dedicated to James I. of England, and is remarkable as containing his celebrated law that the squares of the periodic times of the planets are as the cubes of their distances. This law occurred to him on the 8th March, 1618, but from a blunder in his calculations he rejected it. Having discovered his error on the 15th May, he recognized with transport the absolute truth of a principle which for seventeen years had been the object of his incessant pursuit. He was almost frantic with joy; 'the die is cast,' he exclaimed, 'the book is written to be read, either now or by pos-

terity, I care not which. It may well wait a century for a reader, as God has waited 6,000 years for an observer.' In the same year Kepler published the three first books of his 'Epitome of the Copernican Astronomy,' the fourth, fifth, sixth, and seventh appearing in 1622. In 1620, Sir Henry Wotton, the English ambassador at Venice, visited Kepler while passing through Germany. He urged the astronomer to take up his residence in England, assuring him of a welcome and an honorable reception; but neither the welcome nor the reception, which is all the encouragement he would have got, would have released him from his pecuniary difficulties. 'If the imperial mathematician, therefore,' as Sir David Brewster (*Martyrs of Science*, p. 243) has remarked, 'had no other assurance of a comfortable home in England than that of Sir Henry Wotton, he acted a wise part in distrusting it, and we rejoice that the sacred name of Kepler was thus withheld from the long list of distinguished characters whom England has starved and dishonored.' Notwithstanding his own pecuniary difficulties, the emperor Ferdinand, in 1622, ordered the whole of Kepler's arrears to be paid, including those due by Rudolph and Mathias, and he supplied also the necessary funds for completing the Rudolphine Tables. The wars of the reformation, however, interfered with this and with every other peaceful pursuit. Kepler's residence at Linz was blockaded by the Catholic peasantry, and his library sealed up by the Jesuits; and it was not till 1628 that the *Rudolphine Tables*, founded on the observations of Tycho, and his own laws, appeared at Ulm in a folio volume. The Grand Duke of Tuscany sent him a gold chain in testimony of his approbation of this great work, and Albert Walenstein, duke of Friedland, munificently invited him to reside at Sagan, in Silesia. With the emperor's permission he accepted this offer, took his family to Sagan in 1629, and by the duke's influence obtained a professorship in the university of Rostock. Finding it difficult in this remote locality to obtain payment of his imperial pension, the arrears of which were 8,000 crowns, he went to the imperial assembly at Ratisbon, to obtain them. The vexation which the failure of this attempt occasioned, and the fatigue of his journey, threw him into a catarrhal fever, which was accompanied with an imposthume in his brain, the result of excessive study. Medical skill failed, and he died on 5th November, o.s., 1631, in the sixtieth year of his age. His remains were interred in St. Peter's churchyard, at Ratisbon, and on his tombstone was placed an inscription written by himself. This monument was destroyed in the wars which desolated Germany, and it was not till 1803 that the prince bishop of Constance erected a handsome monumental temple near the place of his interment, surmounted by a marble bust of Kepler. Between 1594 and 1630, Kepler published thirty-three separate works, and he left behind him 22 volumes of MSS., four of which contained his correspondence. The correspondence was published by Hansch, in 1718, but no part of the other MSS. now in the library of the Imperial Academy of Sciences at St. Petersburg, have been thought worthy of publication. See Mr. Drinkwater Bethune's *Life of Kepler*, and his life in Sir David Brewster's *Martyrs of Science*, second edit. [D.B.]

KEPPEL, AUGUSTUS, an English admiral, son of William, earl of Albemarle, distinguished in action with the French off Ushant, 1725-1786.

KICKX, J., a Flem. botanist, 1772-1831.

KIDD, JOHN, an English physician and professor at Oxford successively of chemistry and medicine, and librarian of the Radcliffe library. Died 1851, age 76. He was the author of one of the Bridge-water Treatises.

KIDD, SAMUEL, a divine and Oriental scholar, au. of 'Illustra. of Chinese Symbols,' 1801-1843.

KIDD, ROBERT, a notorious pirate, went from New York to London, where, on the recommendation of a Mr. Livingston of New York, he obtained command of a vessel fitted out by Lord Rummey and others against the pirates in the East Indies; but on arriving in India he turned pirate himself, and committed many daring acts. Having returned to America in 1699, he was arrested at Boston, by order of the governor Lord Bellamont, and with most of his crew sent to England, where they were condemned and executed.

KIDDER, RICHARD, an English prelate, and a fellow of Emanuel College, Cambridge, was born in Sussex. In 1689 he obtained the degree of D.D., and was made dean of Peterborough, and succeeded Dr. Ken as bishop of Bath and Wells in 1693. He and his wife were killed during the storm on the night of November 26, 1703.

KIEFFER, J. D., a Fr. Orientalist, 1767-1833.

KIEN-LONG, emperor of China in the time of Lord Macartney's embassy, a poet and patron of literature, born 1710, reigned 1735-1800.

KIERINGS, a Dutch painter, 1590-1646.

KIESEWETTEN, CHRISTOPHER GOTTFRIED, a German musician, distinguished as a violin player, d. 1827.

KIESEWETTER, J. G. C. CHRISTOPHER, a German philologist and philosopher of the school of Kant, died about the end of last century.

KILBYE, RICHARD, an English divine, rector of Lincoln College, Oxford, where he was educated. He assisted in the translation of the present version of the Bible. Died 1617.

KILLEN, WILLIAM, chancellor of the State of Delaware, was born in Ireland, and emigrated to America at an early age. After some time he took up his residence with Samuel Dickenson of Wilmington, where, under the tuition of Jacob Orr, he made rapid progress in his studies. He held the office of county surveyor for some years, and afterward studied law. Through his knowledge of surveying and various branches of mathematics, he became distinguished in the courts of Delaware, particularly in suits for land. He was a representative of the assembly of Delaware some years before the Revolution, and held the office of chief justice of the supreme court of the State after the declaration of independence. In 1793 he was appointed chancellor. In the performance of the duties of the many offices he held from time to time, he invariably acted with the strictest integrity. Died 1805.

KILLIGREW, CATHERINE, wife of Sir H. Killigrew, an ambassador, dist. for her skill in the learned languages and poetry, about 1530-1600.

KILLIGREW, MARGARET, second wife of William Cavendish, duke of Newcastle, au. of the life of her husband, and 'Miscellanies,' died 1673.

KILLIGREW, WILLIAM, a courtier and dramatic writer of the reign of Charles II., 1605-93. His brother, THOMAS, a famous humorist, and favorite of Charles II., author of several plays, and some time political resident at Vienna, 1611-82. HENRY, a third brother also a writer of plays, and chaplain to

James, duke of York, born 1612, date of his death unknown. ANNE, wife of the latter, dist. for her beauty, her unblemished virtue, and her skill in historical painting, author of poems, died 1685.

KILMAINE, C. J., a French general, 1754-99.

KIMBALL, DANIEL, the founder of Union Academy, Plainfield, New Hampshire. At his death he bequeathed a large sum of money to that establishment. Died 1817.

KIMBALL, JOSEPH HORACE, joint author with I. A. Thorne, of 'Emancipation of the West Indies,' a 'Six Months' Tour in Antigua, Barbadoes and Jamaica.' Died 1838.

KIMBER, ISAAC, a dissenting minister, known as a biographical and historical writer, 1692-1758. His son, EDWARD, author of a 'History of England,' and miscellaneous works, died 1769.

KIMCHI, DAVID, a famous rabbi of Spain, in high repute among all denominations of biblical scholars, as a Scripture commentator and grammarian, was born at Narbonne, where he passed the greater part of his life, toward the end of the 12th century. His father, JOSEPH KIMCHI, who flourished about 1160, and his brother, MOSES, were eminent Oriental scholars, and expositors of Scripture, to which character the latter added that of a moralist; but neither of them acquired a reputation comparable with that of rabbi David. The respect in which he is held by the Jews is greatly enhanced by his defence of Maimonides, as arbitrator between the French and Spanish Jews in 1232. His philological works furnished Buxtorf with the materials for his 'Thesaurus' and 'Lexicon;' and his commentaries have been largely incorporated with the Bibles of Venice and Basle. For the catalogue raisonné of his writings, which include a Talmudic Dictionary, see the 'Bibliotheca Hebraica' of John Ch. Wolf, published at Hamburgh, 1715-1733. Kimchi died in Provence at an exceeding old age, 1240. [E.R.]

KING, EDWARD, a youthful poet, who was drowned on his passage to Ireland in 1637, and whose fate is celebrated by Milton in his poem of Lycidas.

KING, EDWARD, a biblical critic and antiquary, author of 'Munimenta Antiqua,' 'Remarks on the Signs of the Times,' 'Hymns,' &c., 1724-1807.

KING, GREGORY, an engraver and heraldic painter, author of 'Natural and Political Observations and Conclusions upon the State and Condition of England,' and distinguished for the part he took in state ceremonials, 1648-1712.

KING, SIR HENRY, a British army officer, distinguished in the peninsular campaign, d. 1854, aged 66.

KING, JOHN, D.D., a controversial divine of the Church of England, 1652-1732. His son, of the same name, a physician, 1696-1738.

KING, JOHN, a learned prelate, distinguished as a preacher and speaker in the Star Chamber, about 1559-1621. His son, HENRY, chaplain to Charles I., and dean of Rochester, author of Sermons and Poems, 1591-1669. JOHN, brother of the latter, a dignitary of the church, and author of Sermons, &c., died 1639.

KING, JOHN GLEN, an eccles. antiq., died 1787.

KING, PETER, nephew of the illustrious John Locke, distinguished for his ecclesiastical learning, born 1669, lord chancellor 1725, died 1733.

KING, PETER, great-grandson of the preceding, distinguished for his speeches and writings on subjects of political economy, 1775-1833.

KING, CAPTAIN PHILIP PARKER, made four voyages (1817-1822) to the coast of Australia; and added greatly to our knowledge of the intertropical portions of that continent.

KING, RICHARD, a polemical writer, 1749-1810.

KING, SIR RICH., a naval officer, 1771-1834.

KING RUFUS, was the son of an eminent merchant of Scarborough, Maine. He was born in 1757, and was educated at Harvard, where he took his degree in 1777 with high reputation as a scholar and an orator. He studied law with Judge Parsons; but not before he had served as a volunteer aid to General Glover in Sullivan's expedition against the British on Rhode Island, in the summer of 1778. He was admitted to the bar in 1780, and it so happened that in his first case he was opposed to his old instructor, Parsons, one of the first jurists this country has produced. Young King exhibited great power, and so acquitted himself that the door was at once open to employment and distinction. In 1784 he was sent to the legislature of Massachusetts. In the same year, he was sent to Congress, and in 1785 introduced a resolution to prohibit slavery in all the territory of the United States, north-west of the Ohio River. In 1787 he sat, as one of the delegates from Massachusetts in the convention that framed the Federal Constitution, and though young, won for himself a proud distinction. Afterwards, on the question of adoption submitted to the several States, he was one of its ablest advocates in Massachusetts. He then removed to New York, and in 1789 he was sent to the legislature of that State, and in the summer of that year, he and Gen. Schuyler were elected the first senators from New York in Congress. When Mr. Jay made his treaty in 1794 (see article JAY, JOHN), Mr. King and Gen. Hamilton warmly defended it in a series of papers signed *Camillus*. All but the first ten of these were written by Mr. King. In the United States Senate he was one of the most brilliant and influential members. In 1796 Gen. Washington sent him as American minister to the Court of St. James, and he continued in that dignified position, sustaining himself and the interests of his country with great honor until the end of the first two years of Mr. Jefferson's presidency. In 1803 he returned home and retired to his seat at Jamaica, on Long Island, where he remained until aroused by the war of 1812. He was sent to the Senate of the United States in 1813 for six years, and in 1820 was re-elected for a similar period. In 1825, Mr. Adams wished him to go again as minister to Great Britain. Mr. King hoping that he might be useful to his country there in adjusting some of our foreign relations consented, and once more took up his residence in London. But his health failed him, and after a year's absence he returned home. He died in 1827 at the age of 72 years.

KING, THOMAS, a celebrated dramatic writer and actor, author of 'Love at First Sight,' &c., 1730-1805.

KING, WILLIAM, LL.D., a humorous writer of remarkable fertility in the reign of Queen Anne, famous for his satires on the characters and events of the day, 1663-1712.

KING, WILLIAM, an elegant writer, 1685-1763.

KING, DR. WILLIAM, successively dean of St. Patrick's, bishop of Derry, and archbishop of Dublin, was born at Antrim in Ireland, but descended from a Scottish family, in 1650, and commenced his career, as a divine, as chaplain to the archbishop of Tuam in 1676. He died in 1729, and is now chiefly remembered for his treatise, 'De Origine Mali,' on the origin of evil, which produced animadversions from Bayle and Leibnitz, which belongs, in fact, together with his 'Discourse on Predestination,' &c., to a widely-extended controversy on the attributes

of God, continued through many years at the commencement of last century, and including the names of the most eminent churchmen and freethinkers of the day. Archbishop King did not reply to the censures of Bayle in his life-time; but, after his death, answers were found in MS., and were embodied in the notes upon a new edition of the work, published by Edmund Law, who was opposed to him on his fundamental principle of analogy. The endeavor of the Archbishop had been to reconcile the existence of evil with the goodness of God, without supposing a source of evil co-eternal with Deity; and his method of argument was to represent the divine attributes as essentially different from the moral attributes of the human mind, which are used as their signs; while the opposite writers held them to be the same, but infinitely greater. The key to this controversy will be found in Clissold's lectures on the 'Connection between Theology, Psychology, and Physiology.' [E.R.]

KING, WM., first governor of the State of Maine, died 1852, aged 84.

KING, WILLIAM, a political writer, author of 'Political and Literary Anecdotes of his own Times,' was born at Stepney in 1685; died 1763.

KING, WM. R., Vice-President of the United States, was born in North Carolina. He was a representative in Congress from 1811 to 1816, secretary of legation to Russia, U. S. senator from Alabama from 1819 to 1845, minister to France from 1845 to 1849, and U. S. senator from 1849 to 1853. He was also for several years president of the Senate of the U. S., which position he resigned in consequence of ill health December 20, 1852. He was elected Vice-President in November, 1852, and sworn into that office in Cuba, March 24th, but was prevented from entering upon its duties by the disease of consumption, of which he died April 13, 1853.

KINGSBOROUGH, EDWARD, Viscount, a fellow of the Antiquarian Society, author of a valuable work on the 'Antiquities of Mexico,' 1795-1837.

KINGSLEY, JAMES L., an American scholar and classical professor at Yale College, 1778-1852.

KINGSMILL, ANDREW, a puritan divine and moralist, 1538-1569. His relation, THOMAS, professor of Hebrew at Oxford, from 1569 to 1579.

KINGSTON, ELIZABETH CHUDLEIGH, duchess of, a profligate woman of the court of George III., 1720-1788.

KINNAIRD, THE HON. DOUGLAS, known as a friend of Byron, and a patron of letters, 1786-1830.

KINSEY, JAMES, LL.D., chief justice of New Jersey. He had been a member of Congress before the present constitution was adopted. Died 1802.

KINSKI, F. J., an Austrian general, 1739-1805.

KIEPING, N. M., a Swed. trav., 1630-1667.

KIPLING, THOMAS, dean of Peterborough, a professor of divinity at Cambridge, author of a pamphlet on the Thirty-nine articles, &c., died 1822.

KIPPING, H., a German philologist, died 1678.

KIPPIS, ANDREW, D.D., an English Socinian minister, known as a biographical and miscellaneous writer, founder of the 'New Annual Register,' and author of a 'History of Knowledge, Learning, and Taste in Great Britain.' The best known of his works is the 'Biographia Britannica,' 1725-1795.

KIRBY, EPHRAIM, first judge of the District Court of the United States at New Orleans, which office he held but a short time. He published reports of cases adjudicated in the Supreme Court of Connecticut from 1785 to 1788. Died 1804.

KIRBY, JOHN JOSHUA, an artist patronized by George III., author of 'The Perspective of Archi-

ture,' and father of the celebrated Mrs. Trimmer, 1716-1774.

KIRBY, REV. WILLIAM, an eminent entomologist, was born in Suffolk in 1759. He died in 1850. He was educated at Cambridge, and in the year 1782, was admitted into holy orders. In 1796, he became rector of Barham, having done the duties of curate of that parish for fourteen years. He first studied botany, and while collecting the plants of the neighborhood in which he lived, he had his mind directed to the study of entomology. A little 'lady bird' or 'cow lady' (*Coccinella 22 punctata*), one day attracted his attention on the window, and his admiration was so much excited, that he began to collect insects with as much zeal as he had already done plants. He has published many valuable papers and memoirs on various entomological subjects, in the 'Linnæan Transactions' and 'Zoological Journal'—but his great fame as an entomologist is derived from his 'Monographia Apum Angliæ,' or History of English Bees—his 'Introduction to Entomology,' in conjunction with Mr. Spence, and his description of the insects in the 'Fauna boreal-Americana' of Sir John Richardson. The first of these works at once stamped him as one of the best entomologists of the day; and had he written nothing else, his fame would have been established. The second has been translated into German and French, and has gone through six or seven editions in England, and combines the popular form with great scientific merit. Mr. Kirby conscientiously performed his duties as a clergyman; he was beloved by his parishioners, and enjoyed the esteem and friendship of most of the naturalists of his own country, as well as of the continent of Europe and America. He was honorary president of the Entomological Society of London, fellow of the Royal, Linnæan, Zoological and Geological Societies, and honorary member of several societies abroad. His life was prolonged to the venerable age of ninety-one.

[W.B.]

KIRCH, GOTTFRIED, a celebrated German astronomer, 1639-1710. His wife, MARY MARGARET WINCKELMANN, assistant of her husband, and author of astronomical works, 1670-1720. CHRISTIAN FREDERIC, son of the preceding, astronomical observer and author, 1694-1740.

KIRCHER, ATHANASIUS, generally called 'Father Kircher,' was a Jesuit of great learning and varied abilities, born at Geysen, near Fulda, in Germany, 1601; died at Rome, in the situation of a professor of Hebrew and mathematics, 1680. His accomplishments seem to have ranged from the lowest to the highest point of the scale of human ingenuity; including many useful discoveries in his experimental philosophy, and some of the most abstruse subjects of inquiry in his speculations. His works, which were written in Latin, consist of thirty-six volumes, twenty-two of which are in folio, and nearly all the rest in 4to. In such a mass of writing and learned research, it may be supposed there is a good deal of trifling import; but in his case, as in others of a similar kind, the extent of his labors has been the greatest obstacle to the due appreciation of them. Kircher's favorite subject was the hieroglyphics of Egypt, and the school of Champollion glory over his dark guesses, as so many detected crimes against their new canon of criticism. It may be said, however, that he made the best he could of his traditional and other materials used scholastically; collecting with much labor, and putting together with marvellous ingenuity, the scattered notices which he found in ancient writers, and sparing no

pains in making his own observations. Besides his literary and professional labors, Kircher travelled in China. He also collected a valuable museum of antiquities, which he bequeathed to the college of Rome. [E.R.]

KIRCHER, CONRAD, a German divine, 17th ct.

KIRCHER, H., a Ger. missionary, 1608-1676.

KIRK, a colonel in the English army in the time of James II., notorious for the barbarities committed by him in the West of England in 1685.

KIRKALDY, W., a partisan of Mary Stuart, queen of Scots, executed at Edinburgh 1573.

KIRKLAND, JOHN THORNTON, president of Harvard College from 1800 to 1828, was born at Little Falls in 1770, and graduated at Harvard. He was minister at Boston for several years. Died 1841.

[Monument of President Kirkland, Mount Auburn Cemetery, Cambridge.]

KIRKLAND, SAMUEL, a missionary to the Indians. Having studied at Wheelock's school, he graduated at New Jersey College in 1765. Having acquired a knowledge of the Mohawk language at school, he afterwards spent some time among the Seneca Indians for a similar purpose. In 1766 he was ordained as a missionary to the Indians, which office he held for nearly forty years. Died 1808.

KIRKLAND, T., a medical author, 1721-1798.

KIRKPATRICK, JAMES, an East Indian officer, known for his works in Oriental learning, died 1812.

KIRMANI, an Arabian author, 14th century.

KIRSTEN, KIRCHSTEIN, or KIRSTENIUS, G., a German physician and botanist, 1613-1660.

KIRSTEN, M., a philologist, 1620-1678.

KIRSTEN, PETER, an Arabian scholar, physician to Queen Christina, born in Prussia 1577-1640.

KIRWAN, RICHARD, born in Galway in the middle of the last century, died 1812. A distinguished chemist, was originally, it is said, destined for the bar, but ultimately prosecuted chemistry and mineralogy. He published a work on the 'Temperatures of Different Latitudes,' 'Elements of Mineralogy,' 'Essay on the Analysis of Mineral Substances,' 'Essay on Phlogiston,' 'Essay on Geology,' 'on Manures,' &c. It was his work on 'Phlogiston' which gained him most notoriety. It was distinguished by the able defence which he made of a bad cause; but which was thoroughly refuted by Lavoisier, who succeeded in banishing for ever this myth from the field of chemistry. He was undoubtedly the first chemist who appreciated the importance of inorganic substances as manures, and who advocated a knowledge of the constitution of minerals as being the only criterion of their true position in nature.

KIRWAN, W. B., an Irish divine, celebrated for his pulpit oratory, dean of Killala after his conversion to protestantism, 1754-1805.

KISSAM, RICHARD S., M.D., an eminent surgeon, was born in New York 1763, graduated at the University of Edinburgh. On his return to New York, he commenced the practice of surgery. He was one of the surgeons of the New York Hospital, and as a lithotomist particularly successful. Died 1822.

KITCHENER, WM., an eccentric physician, author of 'The Cook's Oracle,' &c., 1775-1827.

KITE, CHARLES, a medical author, died 1811.

KITTREDGE, THOMAS, M.D., an eminent physician, was a native of Andover, studied physic with Dr. Sawyer, of Newburyport, was attached to the army in the early part of the Revolution, and was afterwards several times a member of the legislature. After a long practice, he died in 1818.

KLAPROTH, HEINRICH JULIUS VON, son of the famous chemist of that name, distinguished as an Oriental scholar and critic, was born at Berlin in 1783. He abandoned the pursuits of his father, after making considerable progress in them, for the fascinating studies connected with the history and antiquities of the East; and as early as 1802, commenced the 'Asiatic Magazine' at Dresden. In 1805 he accompanied a Russian embassy to China; and in the three years, 1807-1810, was employed by the Academy of St. Petersburg in exploring the Caucasian Mountains. On returning to Germany in 1812, he was appointed professor of the Asiatic languages at Berlin. In 1815 he visited Paris with the allies, and was so charmed with its attractions, that France became his adopted country, and the remainder of his days were devoted to the propagation of Asiatic literature, including the organization of the Asiatic Society, in that capital. The works of Klaproth embrace nearly all the subjects of interest connected with Eastern learning,—races, languages, monuments, and general history. We may mention among those in French, a Criticism of Champollion, a Memoir on Chemistry translated from the Chinese, a Dissertation on the Roots of the Semitic Languages, and his editorial labors on the 'Asiatic Journal.' Died at Paris 1835. [E.R.]

KLAPROTH, MARTIN HENRY, born at Wernigerode, 1743, died 1817. A student in various laboratories at Quedlinburg, Hanover, Berlin, without any very distinguished instructor, Klaproth became in his twenty-eighth year assistant to Valentine Rose, who, however, dying in a few months, he established a laboratory and class of his own in Berlin, and afterwards, when a university was established, he became attached to it. His life was one of incessant labor, and he left six volumes, with materials for a seventh, consisting of upwards of 200 analyses of mineral species, executed with such accuracy, that his results even at the present day, with all the advantages of subsequent improvements, are quoted as models. He was the discoverer of uranium, zirconia, titanate acid, (although anticipated by Gregor), strontian (also anticipated by Crawford and Hope) tellurium and oxide of cerium, which he termed ochroita. His contributions to processes of analytic chemistry, were invaluable; probably no chemist having ever developed more of the characters of inorganic substances. Klaproth was modest, generous, unselfish, and exhibited the benevolent tendency of his character, by the honorable care which he bestowed on the education of the children of Valentine Rose. He was also distinguished by sound religious principles, which directed his con-

duct, and enabled him to avoid superstition on the one side, and infidelity on the other. [R.D.T.]

KLASS, FRED. CHR., a German landscape painter, died abt. 1800. His broth., CHRISTIAN, d. 1794.

KLAUBER, J. S., a Ger. engraver, 1753-1817.

KLEDER, JEAN BAPTISTE, a famous general of the French revolution, distinguished for his services in Egypt, where he was assassinated 1800.

KLEIN, B., a German composer, 1794-1832.

KLEIN, E. F., a Ger. jurisconsult, 1743-1810.

KLEIN, F. A., a Ger. theologian, 1793-1823.

KLEIN, G. M., a Ger. philosopher, died 1820.

KLEIN, J. T., a Ger. naturalist, 1685-1759.

KLEIST, CHRISTIAN EVARD VON, a German poet, was born in Pomerania in 1715. Having studied at Königsberg he joined the Danish service. He afterwards changed into the Prussian army, and was killed, fighting gallantly in the action at Kunersdorff, in 1759.

KLEIST, H. VON, a German poet, 1776-1811.

KLEIST VON NOLLENDORF, COUNT FRED. H. FERDINAND EMILIUS, a distinguished Prussian general, 1763-1823.

KLENGEL, a German organist and composer, died 1852, aged 68.

KLENKER, J. F., a Ger. theologian, 1749-1837.

KLINGEMANN, AUGUSTUS, a German dramatist, was born at Brunswick in 1777. He became director of the National theatre of his native city. Died 1812.

KLINGENSTIERNA, SAMUEL, a Swedish philosopher and mathematician, author of Memoirs upon Optics, an edition of Euclid, &c., 1689-1785.

KLINGER, F. M. VON, a Russian dramatist, 1753-1831.

KLINGSTET, C. G., a Russian pain., 1657-1734.

KLINTBERG, C., a Swed. financier, 1767-1826.

KLITZ, PHILIP, an English musical composer, song and general writer, died 1854, aged 49.

KLOCKER, D., a German painter, 1629-1698.

KLOPSTOCK, FRIEDRICH, a German poet, was highly celebrated till the public taste received a new direction from the more brilliant genius and the greater versatility and ease of Goethe. He was born in 1724, at Quedlinburg, in Prussian Saxony. After receiving a regular education, and studying theology, he abandoned all professional views, and devoted himself entirely to literature. He shifted his residence from place to place, residing a considerable time at Copenhagen, whither he had been invited with a pension; and the last thirty years of his life were passed at Hamburg, where he died in 1803. His greatest work, the sacred epic called 'The Messiah,' was published partly in 1748, but not completed till 1773. Its strained dignity, its overflow of feeling, and its artificiality of diction, have long ceased to receive the admiration which was once lavished on them. His odes, especially those of a religious cast, are still much valued by his country, in spite of their frequent obscurity. He made himself known respectably also by philological writings. [W.S.]

KLOPSTOCK, MARGARET, wife of the preceding, author of a tragedy entitled 'The Death of Abel,' and 'Letters from the Dead,' d. 1758.

KLOSE, F. J., an English composer, d. 1830.

KLOTZ, C. A., a German critic, 1738-1771.

KLUBER, J. L., a Ger. jurisconsult, 1762-1840.

KLUGEL, G. S., a Ger. mathema., 1739-1812.

KNELLER, SIR GODFREY, a famous portrait painter, who was born at Lubeck about 1648, and acquired great distinction in England in the reigns of Charles II., James II., and William III. Many of his portraits are at Hampton Court. He died in prosperous circumstances, 1723.

KNIAJENIN, J. B., a Russian poet, 1742-91.

KNIBB, REV. WILLIAM, distinguished for his exertions in the cause of negro emancipation, was born in 1800. He arrived in Jamaica in 1824, to labor as teacher of a baptist school, and in 1829 became pastor of the mission church of Falmouth. His efforts to improve their condition secured the warm gratitude and affection of the poor negroes, but provoked the jealousy and hostility of the planters. After suffering many indignities in Jamaica, he returned to England to advocate his favorite cause, and his heart-stirring appeals in favor of total emancipation no doubt had their degree of influence in inducing the British legislature to pass the great measure of 1833. He soon afterwards returned to Jamaica, and died of yellow fever in 1845.

KNOWLES, JAMES DAVIS, an American Baptist divine, and author of 'Memoir of Mr. Judson' and 'Memoir of Roger Williams,' d. 1838, aged 40.

KNOWLES, JOHN, minister of Watertown, Mass., was born in England, and educated at Cambridge University, and became a fellow of Catharine Hall in

1625. He emigrated to New England in 1639, and was ordained there. In 1642 he went to Virginia as a missionary, but was opposed by Governor Berkeley, and an act was passed prohibiting any minister from preaching in that colony, unless he conformed to the church of England. In 1650 he returned to England, and settled at Bristol. Died 1685.

KNOWLES, T., a learned divine, 1723-1802.

KNOWLTON, T., an antiquarian, 1692-1782.

[General Knox.]

KNOX, HENRY, a major-general in the American army, was born in Boston, July 25, 1750. He served as a volunteer at the battle of Bunker Hill. In 1776, when the artillery corps was augmented, he was appointed to the command, with the rank of brigadier general. He distinguished himself at Trenton, Princeton, Germantown, and Monmouth, and was promoted to the rank of major-general after the surrender of Cornwallis. He held the office of secretary of war from 1785 to 1794, when family affairs obliged him to retire from public life. He died in 1806.

[Montpelier, residence of General Knox, at Thomaston, Me.]

KNOX, JOHN, a tradesman of London, author of 'A Systematic View of Scotland,' written from his own observations, which had for their object the settlement of new towns in connection with a herring fishery on the N. E. coast of Scotland, died 1790.

KNOX, JOHN, was born at Gifford in East Lothian in 1505. In his boyhood he attended the grammar school of Haddington, and in the year 1522 he was sent by his father to the university of Glasgow, and the name of Johannes Knox stands among the *in-*

porati of that year. His preceptor was Mair, or Major, at that time professor of philosophy and theology, who removed in the following year to St. Andrews, whither Knox seems to have followed him, and where he taught the current philosophy. Before his twenty-fifth year Knox was ordained to the priesthood. But his examination of popish theology as usually taught did not satisfy him, and from the writings of Jerome and Augustine he turned to the study of the Scriptures themselves. By degrees he renounced scholastic theology as useless and unsound; and about the year 1535, his mind began that decided process of scrutiny and repudiation which ended in his withdrawal from St. Andrews, and the vengeful arm of Cardinal Beaton, and in his formal avowal of protestantism about the year 1542. He soon found an asylum at Langniddrie, in the house of Hugh Douglas, to whose sons he acted for a short time as tutor. The principles of the reformation had now been spreading for some time—the stake had been consuming its victims—the murder of Cardinal Beaton had produced an immense excitement, the conspirators still held the castle of St. Andrews, and as it was reckoned a place of safety, Knox and his pupils took refuge in it at Easter, in the year 1547. Here he taught and exhorted, and being called to the ministry, exercised also the functions of a Christian pastor, and solemnly dispensed for the first time in public in Scotland the ordinance of the Lord's Supper, after the primitive and protestant mode. But in the month of June, a French fleet came to the assistance of the Regent Arran, invested the castle, and forced it to capitulate. Knox and some others were transported to Rouen, confined on board the galleys, and loaded with chains. After a severe and unhealthy imprisonment of nineteen months, he was liberated in February, 1549, and repaired to England, was at once recommended to the English council, and sent by Cranmer to preach in Berwick. For two years he continued there, laboring with characteristic ardor, exposing the delusions of popery with no unsparing hand, and gaining hosts of converts to the cause of the reformation. Tonstall, bishop of Durham, cited him to Newcastle, and the undaunted Knox delivered a public vindication in presence of the bishop and the learned priests of his cathedral, and so increased his fame, that the privy council in London appointed him one of King Edward's chaplains, with a salary of £40 a-year. He was consulted also about some changes in the Book

of Common Prayer, and general form of service for the English Church. His plain speech in the north of England made him many enemies, so that he was summoned to appear at London, where he had already declined a living, and commanded to vindicate himself; and he was there in full enjoyment of the royal patronage, when King Edward died, 6th July, 1553. After the accession of Mary, he left the capital, preached in various parts of the country, and was married at Berwick to Marjory Bowes, a young lady to whom he had been long and warmly attached. Finding himself in increasing jeopardy, he left the kingdom and landed at Dieppe, on the 20th January, 1554; set out the next month and travelled through France to Switzerland, was cordially received by the leading divines of the Helvetic churches, returned to Dieppe in order to gain information from his native land; went back to Geneva and won the friendship of Calvin; was again at Dieppe to learn still more of his family, and the cause of truth in Scotland; took charge for a brief time of a disturbed church at Frankfort, revisited Geneva, and recrossed the channel in 1555. After visiting his wife at Berwick, he preached in Edinburgh and various parts of the country, patronised by many of the nobility and

gentry; dispensed the Lord's Supper in Ayrshire, the region of the Scottish Lollards; was, in consequence of his zealous labors, ordered to sist himself before a convention of the clergy, in the church of the Blackfriars at Edinburgh, but the summons was set aside, and the 'diet deserted.' Being about this time chosen pastor of the English congregation at Geneva, he with his family departed for Switzerland, and remained in Geneva for the two following years. The English version, usually called the Geneva Bible, was made at this time by the English exiles, and here, too, Knox blew 'The First Blast of the Trumpet against the Monstrous Regiment of Women.' A series of changes favorable to the reformation had in the meanwhile been taking place in Scotland, the protestants had greatly multiplied, the prospect of coming persecution had banded them together, and Knox, on their invitation, landed at Leith, 2d May, 1559. No sooner was it known to the terrified priesthood that the ardent reformer had returned, than he was proclaimed an outlaw. Joining with his brethren, he repaired to Perth, and preached zealously against idolatry, while the chicanery of the Queen Regent, and the accidental folly of a priest so enraged the mob, that they pulled down several religious houses and churches, overthrew the altars, and defaced the pictures and images. This tumult,

the origin of which has been often misrepresented, Knox distinctly ascribes to the 'rascal multitude.' The Queen Regent mustered her host to quell these riots; and the protestant leaders, aware of her ultimate design, raised an army in self-defence, but a treaty prevented any hostile engagement. The 'lords of the congregation' were now alarmed into activity. Knox went down to St. Andrews, and soon, as the effect of his instructions, the popish worship was peacefully abolished, and the church stripped at once of all idolatrous symbols. This example was quickly, but not as peacefully followed in many other parts of the kingdom; and so there perished many valuable works of art, which had been degraded by their application to superstitious purposes. When his party had obtained temporary possession of Edinburgh, Knox was chosen minister of the city, but he retired with the protestant forces on the approach of the regent, made an extensive tour, and preached in many of the larger towns. After being formally ordained at Edinburgh, in 1560, he pursued with ceaseless zeal the work of reformation: a Confession had been already drawn up, a Book of Discipline was added, and the organization of the church was so far matured, that the first General Assembly of the Church of Scotland was held at Edinburgh, on the 21st December, 1560. No sooner had Queen Mary arrived in Scotland, than she had a long interview with the stern reformer, after a sermon which had offended her. This was followed by several meetings, but to no purpose. Knox's sermons at this time were bold, defiant, and mighty—his tongue was a match for Mary's sceptre. He was accused of high treason, but acquitted, in spite of all the malignant influence of queen and court. After being about three years a widower, he married in March, 1564, Margaret, daughter of Lord Ochiltree, and connected with the royal blood of Scotland. His dispute with the abbot of Crossraguel about this period is familiar to most readers. The reformer persevered amidst growing difficulties—the marriage of the queen with Darnley, and its melancholy consequences—the attempt to restore popery—the assassination of Rizzio—his own virtual banishment, and the queen's refusal of permission for him to return to Edinburgh. Darnley was murdered—Mary wedded Bothwell—soon resigned in favor of her son, appointed the earl of Murray regent during his minority, and fled to England—the good regent was assassinated, but Knox still kept his post at Edinburgh. Yet the regent's death, and his own multifarious anxieties and labors during these critical times preyed upon his constitution, and in October, 1570, he was struck with apoplexy. In the course of a few weeks he was able to preach again, but not with his wonted vigor. In the mean time the queen's party gained strength by the weakness of Lennox, the abilities of Maitland, and the defection of Kircaldy of Grange; and when the civil war broke out he retired to St. Andrews, still carrying on by tongue, pen, and counsel, the great work to which his life had been devoted. During a cessation of arms he returned to Edinburgh, and shone out in his pristine style, when, on hearing of the massacre of St. Bartholomew, he denounced in glowing terms Charles IX. of France. Sickness, however, soon seized his emaciated frame, and after a very brief period of increasing debility, he died 24th November, 1572. Two days afterwards his body was interred in the churchyard of St. Giles. The funeral was attended by an immense concourse of weeping and afflicted people, as well as of the resident nobility, and the Regent Morton pronounced

over him the well-known eulogium, 'There lies he who never feared the face of man.' Knox was of small stature, and by no means of a robust constitution. His character has been portrayed very differently by various writers. Indiscriminate eulogy would be here as much out of place as sweeping censure would be unjust. The reformer was cast upon an age of violence and change, and he needed a correspondent energy. Elegance and delicacy of language were not common at the period, and would have been crushed in the tumult. Knox spoke and wrote his honest thoughts in transparent terms, in terse and homely simplicity, and with far less of uncouthness and solecism than might be imagined. He was obliged to appear not like a scholar in the graceful folds of an academic toga, but as a warrior clad in mail, and armed at all points for self-defence and aggression. It must have been a mighty mind that could leave its impress on an entire nation, and on succeeding ages. He was inflexible in maintaining what he felt to be right, and intrepid in defending it. His life was menaced several times, but he moved not from the path of duty. The genial affections of home, friendship, and kindred, often stirred his heart amidst all his sternness and decision. In short he resembled the hills of his native country, which with their tall and splintered precipices, their shaggy sides, and wild sublimity of aspect, yet often conceal in their bosom green valleys, clear streams, and luxuriant pastures.

KORNILEFF, admiral in the Russian navy, who commanded in the barbarous attack upon and massacre of the Turks at Sinope, was killed at Sevastopol, 1854, during the siege by the allied forces of England and France.

KORTHOLT, CHRISTIAN, a Lutheran divine, flourished in Germany 1633-1694. His grandson, of the same name, also a theologian, 1709-1751.

KOSCIUSKO. THADDEUS KOSCIUSKO was born in 1756, of a noble but not wealthy Lithuanian family. He was educated for a military life; and, while young, he went to America with other volunteers, and served the United States in their war of independence against England. He acquired high credit there for skill and courage, and rose to the rank of general in the American Army. At the end of this war, Kosciusko returned to Poland. When the crowned conspirators of Prussia, Russia, and Austria, attacked Poland in 1792, 1793, and effected the second partition of that unhappy country, Kosciusko signalized himself at the head of one of the national armies, until the treacherous cowardice of the Polish king Stanislaus paralyzed all the efforts of the defenders of the land. Kosciusko now became a refugee, but when the Poles rose against their oppressors in 1794, Kosciusko returned to serve his country. He was rapturously welcomed. The Poles made him their generalissimo, and their dic-

tator. Never did a nation trust a great man more generously; and never was a trust more nobly and disinterestedly fulfilled. He maintained order; he strove to ameliorate the condition of the serfs. He summoned an assembly of representatives of the nobles, and of representatives of the cities. And he gave a brilliant example of an enthusiastic lover of liberty, who was stained by no deed of violence or injustice, and who was never hurried by democratic favor into forgetfulness of the shortcomings, as well as of the capabilities, of the age and nation in which he lived. In the field, Kosciusko struggled long and gallantly against adverse fortune and overwhelming numbers. Simple in his habits, unaffected in his manners, amiable and mild to his comrades and associates, chivalrously bold in danger, and sternly resolute when duty required, he was the idol of his soldiers' hearts; and he commanded esteem even from his foes.—After many alternations of success, Kosciusko was at last wounded and taken prisoner by the Russians at the fatal battle of Maciovice (1st October, 1794), and the complete downfall of his country soon followed. He was for some time kept in prison by the Russians; but, in 1796, the emperor Paul released him, and offered him rank in the Russian armies, which was declined. Kosciusko passed some time in the United States and in England, and he then lived in retirement near Paris. He saw through the selfish ambition of Napoleon, and refused to become a soldier of fortune under the French Eagle. In 1814, he exerted himself to obtain for Poland from the Russian emperor Alexander, a free constitution like the English, an amnesty for all exiles, and the institution of schools for the education of the serfs. Disappointed in the hopes which he formed respecting Alexander's treatment of his country, Kosciusko retired into complete privacy at Soleure in Switzerland, where he closed his unstained and noble life in 1817. KOSEGARTEN, B. C., a Dutch theologian, 1722-1803. His son, LOUIS THEOBUL, a dramatic writer and translator, 1758-1818.

KOSTER, H., an English traveller, 1793-1820.

KOSTROW, E. L., a Russian poet, died 1796.

KOTTER, CHR., a German prophet, 1585-1647.

KOTZEBUE, AUGUST VON, born at Weimar in 1761, became an advocate. In 1781 he received the first of a series of appointments under the Russian government. Public business divided his time with literary composition, especially dramatic: he was for two years poet of the court theatre at Vienna; and his place of residence was changed several

times, partly through feuds in which he became entangled with Goethe and his adherents. In 1817, he received from the Russian court an appointment more lucrative than honorable, being charged with the duty of communicating to his employers information as to the state of opinion in Germany. He aggravated the unpopularity of this employment by scoffing at liberal and constitutional opinions in a weekly paper which he conducted; and, in 1819, Sand, an insane student, seeking him out in Manheim, did what he thought to be good service to the father-land by assassinating the Russian spy. Besides a variety of other works, Kotzebue wrote ninety-eight plays. The best of these are to be found among the comedies, some of which have lively wit and exact observation of manners; but he is best known in England, and not to the credit of German literature, by some of his serious plays, such as 'Pizarro,' 'The Stranger,' and 'Lovers' Vows.' His own countrymen would be very unwilling to have these productions accepted as fair specimens of their dramatic poetry. [W.S.]

KOTZEBUE, OTTO VON, son of the celebrated German dramatist, went with Krusenstern as midshipman in a voyage to Japan in 1803, the object of which was to establish a trade between Russia and that country. In 1815, he set sail from Plymouth on a voyage round the world, as lieutenant in command of a Russian ship of 180 tons, and made some important discoveries on the north-west coast of America. Disabled by an accident, he abandoned the idea of penetrating to the Polar Sea, and returned home in 1818. As captain of a ship of war in the same service, he made a second voyage in 1824-1826, and discovered some islands in the Pacific. Accounts of both voyages have been published; of the first by himself; of the second by Escholtz, the well known naturalist who accompanied him. [J.B.]

KRAUSE, CHARLES CHRISTIAN FREDERIC, born at Eisenberg, 6th May, 1781, died on 28th September, 1832. Mention of this ingenious and profound metaphysician is introduced here, with the

simple view of recommending to the student one of the most judicious successors of Kant. His writings are altogether fertile. In so far as the writer is aware, he is the first who has thoroughly supplanted the old division of the mind into *faculties*, by proposing to examine it under its three normal modes of action—as it *thinks, feels, and wills*. In itself a great reform, suggested perhaps by Kant's scheme of three *Critiques*; but Krause has many other claims that would thankfully be recognized by a thoughtful student. [J.P.N.]

LABROUSSE, CLOTILDA SUSANNA COURCELLES DE, born 1741, was an ascetic of the order of St. Francis, who became greatly celebrated by her prophecies at the period of the French revolution. Her impulse was to travel over the world, in order to convert the whole human race by her preaching, but her superiors refused their consent, and she addressed a memorial on the subject, with an account of her life, to M. Pontard, the constitutional bishop of Deodagne. This document came into the hands of Dom Gerle, once a monk, who in 1759 entered into a correspondence with her, and in 1790 endeavored to introduce her into the national assembly. She afterwards went to Rome, preaching to the populace on her way, and proposing to herself the conversion of the pope, but she was arrested in Italy, and imprisoned in the castle of St. Angelo till 1796, when the directory procured her liberation. Two years later she returned to Paris with the French troops, and was surrounded with a circle of believers till her

death in 1821. The duchesse de Bourbon published some curious particulars concerning her in 1791, and her works were collected by Bishop Pontard in 1797. Lamartine has perpetuated the mistaken belief that she died in the castle of St. Angelo, while the chair of the illuminée was occupied by Catherine Theos, the new flame of Dom Gerle, at Paris. LA-CAILLE, NICHOLAS LOUIS DE, born March 15, 1713, died March 21, 1762; a celebrated French astronomer; one of the best observers in modern times. He had no superior in industry, activity, and honor; and few men have ever handled instruments, equal to him in that enviable power, which enables the Observer to produce exactness of result, even though his instrument be imperfect. La-Caille was honorably connected with that measurement of the degree of the meridian in France, which rectified Picard's erroneous estimate, and went to establish the true shape of the Earth; but his principal achievements lay at the Cape of Good Hope, where he remained four years surveying the southern heavens. After fixing the places of about ten thousand stars, he returned to Paris and published the results of his voyage. His works are numerous, the chief being the *Fundamenta Astronomiæ* and the *Cælum Australe*. His principal catalogue has recently been recomputed with every care, and republished. LACTANTIUS. LUCIUS CAECILIUS LACTANTIUS FIRMIANUS, was in all probability a native of Italy,

and born about the middle of the third century. He studied rhetoric in Africa, as the pupil of Arnobius. His own fame as a teacher of the same art was so extensive, that Diocletian invited him to settle at Nicomedia, and open a school of oratory. But his career in this Greek city was by no means so successful as might have been anticipated from imperial patronage; and therefore he devoted his hours, not to rhetoric, but to literary composition. When an old man, he superintended the education of Crispus, son of Constantine, and he seems to have died in Gaul, perhaps about 330. The principal work of Lactantius is his 'Divine Institutes,' divided into seven books; designed to refute paganism, and show, in various ways, the superior purity and lustre of the Christian faith. Lactantius wrote also two tracts 'On the Anger of God,' and 'On the Workmanship of God,' along with a Symposium, an Itinerary, and numerous Epistles and Poems. The disquisition 'On the Death of the Persecutors,' which many critics have assigned to another Cæcilius, describes the miserable fate of those who attempted to suppress Christianity by sword and fire. The style of this Father has often been admired, and he has been called the Christian Cicero. Certainly he excels all his contemporaries in the classical form of his style, in the graceful and rhythmical construction of his periods, and the easy and lucid sequency of his clauses. His knowledge of theology was very superficial and inaccurate. The editio princeps of his works was printed at Subiaco, in 1465, and many other editions have followed at various times and in various places. His book 'On the Death of the Persecutors' has been twice translated into English, by Gilbert Burnet 1687, and by Sir David Dalrymple 1792. [J.E.]

[Grave of Lafayette.]

LAFAYETTE, MARIE PAUL JEAN ROCH YVES GILBERT MOTIER, Marquis De, one of the most illustrious names in the annals of modern history, was born at Chavaignac, in Auvergne, 1757, and commenced his career at the court of Louis XV., at the period when hostilities were commencing between Britain and her American colonies. At the age of twenty he left the arms of his bride, and, fitting out two vessels with arms and provisions, sailed for Boston; was received by Washington and his army with acclamations, and, joining their ranks as a volunteer, was wounded in his first action near Philadelphia, and commanded the vanguard of the patriot army at the capture of New York. On returning to France, when peace was concluded with the mother country, Lafayette found himself in possession of an immense popularity, and presently took his seat with the notables, convoked in 1787. The questions of public right in ferment at this crisis are matters of history. Lafayette embraced the popular cause, and was the first to demand the convocation of the estates-general. Elected deputy to the latter body in 1789, he proposed the 'Declaration of Rights,' which he had brought from the free soil of America, as the preliminary

of a constitution. Proclamation of this world-renowned document was made July 22, and it furnished the French people with the metaphysical reasons for the 'sacred right of insurrection'—a well-known phrase of Lafayette's. Meanwhile the Bastille had been taken July 14, the national guard organized, and Lafayette appointed to the command. In this capacity he rode a white charger, and shone the impersonation of chivalry, and twice the royal family owed their preservation to his address and courage—the greatest of these occasions being the march on Versailles, 5th and 6th of October. Some months later, 12th May, 1790, he joined Bailly in forming the club of Feuillants to counteract the Jacobins—formerly 'the friends of the constitution,' to which his party had belonged before its final transformation. The arrest of the king at Varennes, being followed by the petition for his deposition on the field of Mars, Lafayette lost much of his popularity by assisting Bailly to disperse the people, which was not accomplished without bloodshed. In the lull of the popular enthusiasm he returned to his native fields; the national guard on his retirement, presenting him with a bust of Washington, and a sword forged from the bolts of the Bastille. When the coalition was formed, and their armed troops threatened the frontier, he was appointed general of one of the armies opposed to them. While in this command, the progress of the Jacobins, and the outrages committed upon the royal family, provoked him to address letters of remonstrance to Paris, and these not producing any effect, he was chivalrous enough to leave his troops and appear at the bar of the assembly. Before leaving the capital on this occasion, he had arranged with the king for a review of the national guard, when the 'constitution' was to be saved by a *coup de main*; but the review was countermanded in the night, Lafayette rejoined his army, was burnt in effigy by the sansculottes of Paris, and, at length, endeavoring to escape from France, was captured by the Austrians and imprisoned at Olmutz. He was confined from the failure of the constitution to the assumption of power by Buonaparte, and released in 1797. Lafayette had no share in any of the events connected with the death of the king and the reign of terror, and, in the years following, rejected every overture of the consul and emperor. His first movement in public was made after the battle of Waterloo, when he endeavored to preserve the chamber of representatives in being, on the principle that it derived its authority from the electors—not from Buonaparte, by whom it was convoked—and with the view of restoring the public liberties. These arguments were urged upon Blucher and Wellington without effect, and Lafayette returned to private life. In the year 1818, he became a member of the chamber of deputies, and, resuming his career as an advocate of constitutional principles, had the satisfaction of seeing the dream of his life realized in 1830. In 1824 visited the United States, and was received with great enthusiasm. It was to Lafayette, intrusted with the power of a dictator, in his original character of commander of the national guard, that Louis Philippe owed his elevation to the throne. Time, wiser or more capricious than he, allowed him to see the stone hurled at the feet of his idol, and he carried this saddest of all lessons with him into eternity, 1834.

LAGRANGE, JOSEPH DE CHANCEL DE, a French dramatist, cel. for his precocious talents, 1675–1758.

LAGRANGE, JOSEPH LOUIS, born at Turin, 25th January, 1736, died at Paris, 10th April, 1813; a man prevented only by the rivalry of LAPLACE, from being held, by common consent, the most illustrious geometer of modern times. The honorable rivalry of these great men was almost life-long; nor could it be easily declared at any special date which was foremost in the race. Living at a time when the exigencies of Science demanded, and its

possessions pointed to new methods and great conquests, their united labors constitute its Modern Epoch: now to one, and then to the other, the glory of the last advance was due. Speaking of the sum of their achievements, this perhaps may, without injustice, be said,—if Laplace, to some extent, surpassed his compeer in the range of his view, and manifested more of an encyclopædic force, that high merit which belongs to intensity in the power of generalizing, and therefore to taste and lucidity in composition, must be awarded to Lagrange. No Analyst ever possessed a finer appreciation of Method, than the illustrious Piedmontese; whose name accordingly is inscribed among the *Fasti* of every department of Inquiry which arrested his notice. This especial characteristic of his genius will best appear through a brief synopsis of his main achievements.—I. In reference to the efforts of Lagrange to bestow on the Infinitesimal Calculus a logical place in *pure* Analysis, it cannot perhaps be asserted that success was complete; nevertheless his positive success has been undervalued. Previous to his time, that Calculus had been chiefly regarded as a powerful Instrument towards important positive results. Indeed, if one except that ever-memorable section of the *Principia*, it could not be said that attention had been paid to its philosophical basis, so much as to the efficacy of its methods; nor had the expositions either of Leibnitz or D'Alembert rendered farther research unnecessary to the solidity and symmetry of all Transcendental Analysis. Desirous to establish that symmetry, Lagrange proposed to discard consideration alike of *Infinitesimals* and *Limits*; and to attach the new Power to the old Foundations, by presenting differentials as co-efficients of the successive terms of the Infinite Series representing a Function in which the variable has received an increment. The validity of his proof that every function thus modified, must be represented by the series known as *Taylor's Theorem*, has been strongly contested: but apart from such criticism, it is very certain that by resting the doctrine of the Calculus, on the doctrine of Infinite Series, we do not get rid of the Idea of a *Limit*; seeing that we can attach no notion to an Equation, one side of which is an Infinite Series, except that the other and apparently definite side expresses the Limit of that Series: and besides, in every application of the Calculus of Functions thus based—whether to Geometrical or Dynamical Problems—our Geometer was reduced to the necessity of again directly employing the logic and phraseology of Limits. Unless, however, as vitiated by this logical and almost technical defect at the threshold, the success of the *Theorie des Fonctions* cannot be questioned. If Lagrange has not succeeded in discarding the consideration of Limits, he has presented Analysis in no greater dependence upon it, than are other branches of Science. After the publication of that remarkable work, it could nowhere be said that the extraneous element inhered in the *Method of treatment*, but only that it belonged to the *nature of the thing treated*: and—as a necessary and immediate effect of this disentangling—every pure and positive Method in Analysis assumed its proper generality, and put forth its natural power. The student who would appreciate the gain thus accruing from the *Theorie des Fonctions*, may refer to what it accomplished in the treatment of Series; or what is yet more special, to its exposition of the nature and treatment of *Contracts*.—II. The earliest achievement of Lagrange in pure analysis, was equally illustrative of the peculiar character and grasp of his genius,—

we mean the discovery of the *Method of Variations*. Almost from the rise of Geometrical Science, problems of *maxima* and *minima*, had been a favorite and at the same time a difficult exercise with Inquirers: separate solutions varying in ingenuity had, through the contest of wits, been attained for specific problems, but it was reserved for the differential calculus to produce that general method—foreshadowed by Fermat—which diminished the intellectual interest of such problems, by rendering them all easily resolvable. But as this difficulty disappeared, a new class of problems, related to the previous class but much less manageable, gradually absorbed attention; and singularly enough this too became the chosen battleground on which the best spirits of Europe contested for superiority. The history of the problem of the *solid of least resistance* is well known; but it was only one incident in the rivalry of mathematical genius. Now the relation between the new class of problems—problems of *Isoperimeters* as they were termed—and the old *maxima* and *minima*, is the following: a problem regarding a maximum or minimum is this,—to find those values of certain unknown quantities, which constitute a certain specified function or combination of these quantities, a maximum or minimum: an Isoperimetrical problem on the other hand is this,—to determine a function or combination of certain unknown quantities, so that some other specified and determinate function, of that function shall be a maximum or minimum. The great access of difficulty and complicity here, is apparent, and to these new problems Lagrange applied a new method, as grasping, as exhaustive as the method of the Differential Calculus in the simpler case. And not only did his Calculus of Variations put an end to all efforts after special solutions; but it became, like the simpler calculus, a general method of immense comprehensiveness and power: even now, its resources and applications are not more perhaps than generally sketched out.—III. Next in order of complicity, if not of difficulty, are the achievements of Lagrange in the methods of Rational Mechanics. This great division of Mathematical Science, also consisted, previous to the publication of the *Mecanique Analytique*, of separate analytic artifices, whose authority rested on a number of separate general principles. Lagrange combined the whole; or rather he rose above those separate and special principles, producing a method of contemplating mechanics, and a course of procedure, that involved and connected them all. The principle of Virtual Velocities became in his hands the foundation and summing up of all Statics; and by a dexterous use of D'Alembert's Theorem in Dynamics, he succeeded in reducing all Dynamical investigations under the category of strict Statics. His new calculus of Variations was indispensable as an instrument; and it enabled him to realize to the utmost, the grand necessity of his intellect, viz.: to co-ordinate, what he found separate; and so to establish the fixed and final Method of the Science. It is rare that a work like the *Mecanique Analytique* comes to be valued at once; nor has this work been so: nevertheless, it has been of greater service to Dynamical Theory than the achievements of any man since the time of Galileo. Through some strange caprice, Lagrange, after concluding his imperishable volumes, conceived a strong distaste alike at the subject and his own labors. He did not open the printed volume for a long time; and his thoughts found refuge in meditation on the History of *Religion* and *Medicine*. His friends have said, that what the Analyst thought, on these apparently incongruous subjects, would have made the fortune of several ordinary writers.—IV. What we have said of

Lagrange refers mainly to his remarkable influence on Method in Analysis. His specific discoveries are as remarkable, although unsuited—even an enumeration of them—to a work like this. It were wrong, however, to omit his crowning achievement in reference to the mechanism of our solar system; especially characteristic as it is, of the commanding genius of the man. He and his compeer had worked elaborately at the problem of *perturbations*—that problem which Newton bequeathed to after time. That the several bodies of the Solar System importantly influence each other, and so affect the arrangements of the system, was a consequence of the law of Gravitation; but the result, or the *harmony* of those perturbations had yet to be discerned. Drawing his conclusion from a large induction, Laplace had asserted the invariability of major axes of the Planetary Orbits, and of course, the Stability of the System as a *fact*: Lagrange, from a higher flight, showed the *necessity* of that Invariability, and therefore of the permanency of the Planetary Mechanism. It was indeed a great discovery: he proved that because of the *dispositions* of the Planets,—their arrangement nearly in one plane, the uniformity of the directions of their motions, and the proximity of their orbits to the circular form, this stability must exist: so that, if present arrangements come to an end, it will be through no imperfection; but because, that—gorgeous though they are—they are somehow subject to the doom of all finite things, and—withstanding their augustness—only part of some development yet more gigantic, beats of the pulse of a still grander life. It is not easy to estimate the amount of this advance beyond the position of Newton, who thought that our system contained the seeds of dissolution, and that, in the words of Leibnitz, a time would come, when Deity, would require to interfere and readjust his worn-out mechanism!—The life of Lagrange had some anxieties, but it was crowded with honors. Called to Berlin by the great Frederick, he early obtained the position due to him. Afterwards, for many years, he resided in Paris, in command of the first employments. By rare fortune he escaped the fate of Lavoisier—when 'in a moment a head fell which the world might not replace in a century;' and with Laplace he shared the early labors and glories of the *Ecole Normale*. Take him as a whole, abstract science has in modern times possessed no other servant so great. [J.P.N.]

LAGRENEE, LOUIS JOHN FRANCIS, a French historical painter, 1724–1804. His brother, JOHN JAMES, called the younger, 1740–1821. The nephew of the latter, ANSELM LOUIS, 1775–1832.

LAGUERRE, L., a French painter, 1663–1721.

LAGUERRE, M. J., a cel. cantatrice, 1755–83.

LAHARPE, A. E., a Fr. general, 1754–1796.

LAHARPE, F. C., a Swiss republ., 1754–1838.

LAHARPE, JEAN FRANCOIS DE, born at Paris in 1739, was the son of an artillery captain of Swiss extraction. In early manhood he became an author by profession. His strength lay in literary criticism, which at length became his chief employment. He is a useful and judicious critic, though not a profound one; and his analysis of celebrated works are especially instructive. Much may be learned as to modern literature, and a little as to that of Greece and Rome, from his voluminous '*Lycée, ou Cours de la Littérature*,' which contains lectures he delivered in Paris from 1786. He died there in 1803. [W.S.]

LALAMANT, JOHN, a disting. *savant*, 17th cent.

LALANDE, J. DE, a Fr. lawyer, 1622-1703.

LALANDE, JOSEPH JEROME LE FRANÇAIS DE, born July 11, 1732, died in Paris 4th April, 1807; an observer of much industry, and a voluminous writer, who contributed something to the advancement of astronomy, and much to a diffusion of the knowledge of it. He was one of the group of *savans* whom Frederick the Great gathered around him; and he conducted the observatory established by that eccentric monarch at Berlin. On his return to Paris he pursued his researches; often communicating memoirs to the Academy of Sciences. He assisted Clairaut with materials for his computation of the return of Halley's comet; published an account of the transit of Venus; composed his great work on astronomy, which extends to four 4to. volumes; and drew up his catalogue of eight thousand stars. He also edited and wrote many elementary treatises. The catalogue of Lalande has been recently published in England, and is of considerable value. His systematic and historical works have given place to others; although the 'Traité' may still be consulted with advantage by the student. We owe also to Lalande the completion of Montucla's valuable History of Mathematics. [J.P.N.]

LALLOUETTE, P., a Fr. physician, 1711-92.

LALLY, THOMAS ARTHUR, Count De, baron of Tullendally, or Tollendal, in Ireland, was descended from one of those devoted adherents of the Stuarts who became naturalized in France, and who there acquired distinction in the service of the crown. He was born in Dauphiné, 1702, and began his military career in an Irish regiment, commanded by his uncle, General Dillon. After greatly distinguishing himself at the sieges of Kehl, Menin, Ypres, and Furnes, and particularly at the battle of Fontenoy (dating from 1733 to 1749), he was appointed (1756) commandant-general of the French possessions in the East Indies. On his arrival there, at the end of April, 1758, war was declared with the English, over whom he obtained a series of successes, but was at length defeated before Madras, and then besieged in Pondicherry, upon which he had been compelled to fall back. Here, with less than a thousand men, he resisted the whole English army for several months, and only surrendered when reduced to the last extremity, January 16, 1761. He now became the prisoner of the English, but was soon liberated, and, returning to France, was arrested on a charge of treason. All the perils and toils he had undergone were rewarded by the corrupted administration of that expiring monarchy by his judicial murder, in the vain effort to hide from the public eye their own factious dishonesty. He was dragged to the scaffold with a gag in his mouth to prevent him from addressing the people, and was executed May 9, 1766. [E.R.]

LALLY-TOLLENDAL, TROPHIMUS GERARD, Marquis De, son of the preceding, was born at Paris, 1751, and though he was ignorant of his parentage until the eve of his father's execution, he devoted himself to obtain the re-establishment of his good name. His filial efforts were virtually crowned with success in 1778, though the last judicial form was never completed in consequence of the troubles of the period, and in 1783 he obtained possession of his estates. In 1789 he became a deputy of the noblesse to the estates-general, and was one of the most popular members of that body when it changed its name to the national assembly, and commenced the erection of a constitution. In the fruitless labors directed to this end he was a warm supporter of Lafayette; but, despairing of the monarchy and the constitution, he retired with Necker, in September, 1790, and published an address to the French people. After the 10th of August, 1792, he was arrested by the Jacobins, but escaped the massacres of September, and arrived safely in England; where, as a royalist, and a writer in the interest of the emigrants, he enjoyed a small pension from the government. He was authorized to return to France by the first consul in 1801, but took no part in public affairs till the restoration, when he became a member of the privy council, and, in that capacity, accompanied Louis XVIII. to Ghent during the hundred days of 1815. After the second restoration he was made a peer of France; and, remaining true to

his principles, resisted the attempts of the Bourbons to resume their arbitrary power. He died a few weeks before the revolution of July, 1830, and has left a name in considerable repute both as an historico-political writer and a poet. [E.R.]

LALUZERNE, CÆSAR WILLIAM CARDINAL DE, one of the clerical deputies to the estates-general, and the first to propose the establishment of a representative system in France, author of several theological and political works, 1738-1822.

LAMA, J. B., a painter and architect of Naples, about 1508-1579. Another of the same name, born 1660.

LAMA, JULIA, a Venetian painter, last century.

LAMANNA, J., a Sicilian poet, 1580-1640.

LAMANON, R. P., a French naturalist, 1752-1787.

LAMARCK, or as his real name is JEAN BAPTISTE PIERRE ANTOINE DE MONET, an eminent naturalist, was born at Bazantine in Picardy in 1744. He died in 1829. A soldier in his youth, he had already begun to distinguish himself, when an accident compelled him to relinquish the army. Like many other naturalists, Lamarck's first study was botany. The first work he published was the 'Flore Française,' which, appearing at a time when Rousseau had made botany fashionable, met with an astonishing degree of success. Other botanical works soon followed, and for some time Lamarck seemed completely occupied with these, and works of a more speculative kind, which do not now add much to his reputation. In 1793 he was appointed to a chair attached to the museum of natural history at the Garden of Plants, which had for its object the history of insects and the lower animals, which Linnaeus had arranged under the general name of worms. At this time he was fifty years of age, and the study of zoology was nearly new to him. Such, however, were his zeal and assiduity in preparing himself for the duties of his chair, that in a few years he had made himself thoroughly master of the subject; and his great and excellent work, the 'Histoire des Animaux sans Vertébrés,' will ever entitle him to take his place in the very first rank of zoologists. As a conchologist, Lamarck's name stands pre-eminent, and the Lamarckian arrangements of shells is still that of the present day. A sad affliction overtook him in his latter days. He gradually lost his sight, and for some years before his death he was totally blind, while an injudicious investment of his money in some swindling schemes, reduced him in his old age to comparative poverty.

LAMB, LADY CAROLINE, daughter of the earl of Besborough, and wife of the Hon. William Lamb, afterwards Lord Melbourne, distinguished as a novelist and fugitive writer, 1786-1828.

LAMB, CHARLES, the son of a barrister's clerk, was born in London in 1775. He was educated at Christ's Hospital; and, being disqualified by stammering from being sent to college on the foundation, he became, in 1792, a clerk in the India House. He retained this place for thirty-three years, living with a sister, to whom he devoted himself in circumstances of melancholy interest, and indulging those literary tastes which constituted his happiness. He died in 1834. From the days of his schoolboy friendship with Coleridge, he always continued to

[House of Charles Lamb.]

associate with men of letters; no one could have been more admired or liked than he was by his friends; and during the last period of his life his name was one of the most famous of the day, though few of those who knew it were really familiar with his works. He was a man of unquestionable though eccentric genius. His sphere of thinking was very confined, but he moved in it with great independence; his fancy was lively and original, but very irregular; he had great power both of pathos and of quiet humor, and oscillated capriciously between the two extremes; and his taste, keenly alive to the beautiful, was gratified not less by the oddest puns which his teeming fantasy suggested to him. His style is characterized by a singular engrafting of modern peculiarities on the diction of our Old English writers; and he took equal delight in rapturously expatiating on the beauties of Elizabethan literature, and in observing and chronicling the oddities of contemporary life in the aspect in which it presented itself to him. His tragedy of 'John Woodvil,' published in 1801, is a disjointed series of beautiful imitations of the old dramatists: some of his smaller poems are strangely touching. He criticised with intuitive fineness of feeling in his 'Specimens of the English Dramatic Poets' (1808); and there are suggestive criticisms, especially on the drama and the stage, in others of his productions. The most notable of these are the fantastically beautiful 'Essays of Elia.' [W.S.]

LAMB, GEORGE, younger brother of Lord Melbourne, a reviewer and secretary of state, 1784-1834.

LAMB, SIR JAMES BLAND BURGESS, Baronet, only son of George Burgess, Esq., known as a journalist and miscellaneous writer, 1752-1825.

LAMBALLE. The Princes Lamballe, whose fate is one of the most piteous stories of the French revolution, was a descendant of the house of Savoy-Carignan, and was born at Turin, 1749. In 1767 she married the Prince de Lamballe, son of the Duc de Penthièvre, and the year following was left a widow at the age of eighteen. Her subsequent history is closely connected with that of Marie Antoinette, who made her the superintendent of her household, and the agent of her bounty. The queen and the princess were passionately attached to each other; and the latter, who had escaped to England at the commencement of the horrors of 1792, hastened back again when she heard that the queen was in prison, and with heroic fortitude asked, and obtained permission to share her misfortunes in the Temple. This indulgence was thought too merciful by the commune of Paris, who ordered her, at

the end of August, to be imprisoned separately in La Force. Immense sums of money, and many agents among the dangerous party were set in motion to save her, but even Hébert and Lhuillier could not conduct her in safety through the ranks of the assassins at the outside of the prison, on the fatal 3d September. The circumstances of her murder are too horrible to repeat. Her head was afterwards paraded at the top of a pike before the windows of the Temple, and conveyed in the same manner, in the midst of a drunken saturnalia, to the Palais Royal. The Duc D'Orleans, who was dining within, went to the window, and, as the writer is assured by a connection of one who was in the room at the time, said to his companions, 'It is only Lamballe; I know her by her beautiful hair!' Writers of all parties agree that the Princess de Lamballe was as good as she was beautiful. Lamartine has given a letter from Marie Antoinette, which was found in the hair of the princess after her assassination, entreating her to provide for her own safety by remaining with the old Duc de Penthièvre. The letter, till then unknown, is a touching proof of the friendship which united the unhappy princesses. [E.R.]

LAMBERT, G., an English painter, 1710-65.

LAMBERT, JOHN, a general of the parliamentary forces during the civil war, chiefly remarkable for his opposition to the protectorate, especially of Richard Cromwell. In the year of the counter-revolution he was preparing for a contest with Monk, as the chief of the extreme republicans, but was arrested, and after the restoration banished to Guernsey. His taste for the arts of peace was shown in retirement by his devotion to horticulture and flower painting. He was born about 1620, and educated for the bar. He became a Roman Catholic, and died 1692.

LAMBERT, JOHN HENRY, a German mathematician and philosopher of French descent, reputed the ablest geometrician of the 18th cent., 1728-77.

LAMBINET, P., a Fr. biblioplist, 1742-1813.

LAMBRECHTS, C. J. M., a juriconsult and political character of Belgium, 1753-1823.

LAMBRUN, MARGARET, the widow of a Scotch adherent of Mary Stuart, remarkable for her attempt to assassinate Queen Elizabeth.

LAMBTON, JOHN GEORGE. See DURHAM.

LAMBTON, WILLIAM, an English officer, conductor of a great trigono. survey of India, died 1823.

LAMENNAIS, FELICITE ROBERT, was born June 19, 1782, at St. Malo, in Bretagne. He early evinced a bias for theological study, and in spite of his father's wish, who had destined him for the counter, he chose the pulpit, and was ordained a Roman Catholic priest. He went to Paris in 1814, where he warmly advocated the cause of the Bourbons, and was so identified with it, as to be obliged, during the hundred days before the fatal Waterloo, to fly France and take refuge in England, where he supported himself as a teacher. On his return to his native land, Lamennais commenced a career of great popular success as a writer. His first work of note was the 'Essai sur l'Indifférence en Matière de Religion.' In this the author transcended papal orthodoxy itself, arguing that the church should be supreme even in the temporal matters of the state, and that the idea of God could be inferred from tradition alone.—Lamennais received a flattering welcome from Pope Leo XII., in 1824, when he went to Rome. On his return to Paris, his next work, 'La Religion considérée dans les Rapports avec l'ordre Civil et Politique,' was given to the world. Having in this book denounced the act of 1682, which had declared the Gallican church independent, he was subjected to a fine. In 1830, Lamennais commenced his journal, 'L'Avenir.' The doctrines sustained were the independence of the church from all secular authority and support, and the latitudinarian right of all men to hold and express what opinions they pleased. Pope Gregory XVI. denounced this publication, and it was discontinued in consequence. Lamennais's next position of antagonism to the church was assumed in his 'Paroles d'un Croyant,' in which a political direction was given to his peculiar views. This incurred a papal anathema, and the author revenged himself by his book, the 'Affaires de Rome,' in which Pope Gregory met with no quarter; and the former Abbé henceforth severed himself from his ecclesiastical ties. His writings now became more exclusively political, and his bold, uncompromising independence of opinion brought down upon him the vengeance of the government. He was, on the publication of a revolutionary pamphlet—'Le Pays et le Gouvernement'—imprisoned for a year, with the additional punishment of a fine of two thousand francs.—After the revolution of 1848, Lamennais was elected successively member of the constituent and legislative assemblies, for the department of the Seine. He was also nominated in the first of these assemblies to the committee appointed to draw up the constitution of 1848; but he refused to take any part in the labors of that body. He never spoke but once during the whole of the time he was a representative of the people, and that was to earnestly entreat the House to let him be included in the prosecution instituted against the responsible editor of the journal, the *Peuple Constituant*, of which he was the chief editor, on the occasion of the re-establishment of the caution-money on jour-

nals. On the same occasion he spoke strongly against the dictatorship of Gen. Cavaignac, and against any fiscal regulations whatever on the press. In his last illness, every attempt made to induce him to conform to the duties of religion proved ineffectual; he refused positively to the end to receive the minister of any religious persuasion. A final but vain endeavor was made just before his demise, by one of his nieces, who was sent for expressly for the purpose from Brittany.—Lamennais expired on the 28th February, at his residence in the Rue du Grand Chantier, Paris. According to his will, his body was not to be carried into any place of religious worship, but to be taken directly from the house in which he died to the burial place of Père la Chaise. Lamennais, in his will, disinherited all his relations who took any part in suppressing the insurrection of June, 1848. Although Lamennais was so perverse in his religious opinions as to actually say he regretted revelation, he leaves a brother in Brittany, who is the head of a Christian community, resembling that of the *Frères Chrétiens*. The desire expressed in his will was strictly carried out. His body was placed in what is called *corbillard des Pauvres*—a pauper's hearse,—without any of the trickery of funeral ornament. It was borne to Père la Chaise, followed by a few relatives and friends, among whom were Béranger, Garnier Pages and Auguste Barbet, while Louis Napoleon showed his regard for the memory of the deceased, by sending one hundred and fifty policemen and a hundred municipal guards, well-armed and equipped. His remains were deposited in the common grave. No prayer was uttered, no last words said, and neither cross nor stone placed to mark the tomb of Lamennais.—Lamennais's career was strangely diversified. He was priest, editor, author, politician. By turns theologian and deist, believer and unbeliever, conservative and revolutionist, monarchist and republican. He suffered for royalty, and was a martyr to freedom; he was anointed a priest, and died an infidel.—Lamennais is described as a man of small stature, with a heavy, downcast expression of face, an awkward address, and a shuffling, timid gait. While in England an application for a tutorship in the family of Lord Stafford was refused, on account of his unpromising appearance. His utterance was slow and hesitating; he shone neither in the pulpit nor at the tribune. He seldom spoke when a member of the legislative assembly. Among his private friends Lamennais is said, however, to have been spirited in conversation, and of a social turn. As a writer, he was animated and impulsive. His style was written oratory. His work best known in the United States, is the *Paroles d'un Croyant*, which was translated in New York, it is said, by a gentleman who is now one of the distinguished prelates of the Protestant Episcopal Church. Lamennais's works are theological, social, and political. He strove to reconcile tradition with progress, theological dogma with freedom of opinion—and failing, found refuge in a boundless skepticism. His religion, which taught him to believe all or nothing, left his inquiring mind no alternative but infidelity.

LAMESENGERE, P. DE, a French author, 1761-1831.

LAMET, ADRIAN AUGUSTINE DE BUSSY DE, a doctor of the Sorbonne, distinguished as a casuist, died 1691.

LAMETH. Three brothers of this name became marked characters in the events of the French revolution, and all had previously distinguished themselves in the cause of American independence, fol-

lowing in the wake of Lafayette.—1. ALEXANDER, the most noted of them, born 1760, distinguished himself in the estates-general by his project for organizing the army, which was instantly adopted. He served in the army of the north under Luckner and Lafayette, and, sharing in the flight of the latter, was captured by the Prussians, and imprisoned at Magdeburgh during the three years 1792-1795. Being set at liberty, he next entered into commercial pursuits at Hamburgh, and returning to France under the consulate, obtained a prefecture. In this capacity he served the state continuously to the first restoration, but lost favor by accepting office under Napoleon during the hundred days. In 1821 he was returned to the chamber of deputies, and was an active member of the opposition till his death in 1829. He wrote a 'History of the Constituent Assembly,' which is valuable as the work of an eyewitness. 2. CHARLES, the next in importance, born 1757, was one of the first among the noblesse to go over to the third estate in the estates-general, when they formed themselves into a national assembly. He was at first devoted to the people, and was dangerously wounded in a duel with Lautrec, fought in their interest. At a later period he shrunk from the gulf that was opening under his feet, and became more decidedly a constitutionalist. He served in the army of the north as general of cavalry under Lafayette, and fled with the rest of his party, in August, 1792. Returning to France in 1800, he accepted military service under Napoleon. He was elected to the chamber of deputies 1827, and died a partisan of Louis Philippe, 1832. 3. THEODORE, a constitutionalist like his brothers, and a member of the legislative assembly, fled to Switzerland during the reign of terror, 1793, and was only known subsequently as a representative during the hundred days. Died, aged 81, 1837. All the Lameths possessed military skill and personal courage; but they were drawn into the popular cause by vanity and the example of others, and soon lost heart in the movement. [E.R.]

LAMETHERIE, JEAN CLAUDE DE, a French physician, distinguished as a naturalist and philosopher, 1743-1817.

LA-METTRIE, JULIAN OFFROY DE; born at St. Malo, 1709, died at Berlin 1751:—one of that group of eccentric, and in the main not very reputable persons, whom, under the name of philosophers, Frederick the Great collected at Berlin. It were needless to enumerate, and an utter waste of time, to criticise the works published by La-Mettrie, on what he called philosophy; the man had neither heart nor head; dissolute, foolish, and frivolous, he obtained his degree of repute and influence, through a certain reckless insolence and dare-devil gaiety. He belonged to the set which produced that stupidest and dullest of works the *Système de la Nature*. For Frederick, some apology can be conceived: he brought great men around him, as well as persons like La-Mettrie; and his own position of resistance and contest, induced him into a certain sympathy with *resistants*, irrespective of any critical appreciation of their worth. But for writers and thinkers of the La-Mettrie class, there is neither apology nor palliation. Opposing what they term bigotry, they are themselves the most inveterate bigots; attributing received opinions to ignorance, they have never undergone the labor of acquiring any knowledge; without morals, they undertake to dogmatize on morality; incapable of earnest thought, they venture to propagate systems of philosophy. LANCASTER. The royal house of Lancaster flourished in two lines. The first commences with EDMOND, son of Henry III. and Eleonora of Provence, and brother of Edward I., employed by the latter as ambassador to Philip of France, and afterwards commander in the expedition for the recovery of Guienne. Born in London, 1245; died at Bayonne, 1296. THOMAS, his son and successor in the earldom, cousin-german to Edward II., headed the confederacy of barons against Piers Gaveston, and, finally, shared the responsibility of his death with Hereford and Arundel. He was at length taken in arms against the sovereign, and beheaded at Pomfret, 1322. HENRY (previously earl of Leicester), brother and heir of Thomas, joined the conspiracy of Isabella and Mortimer against Edward II., and received the king into his custody at Kenil-

worth. He was freed from this charge on account of his too great humanity; and, when fortune changed, was appointed guardian and protector of the person of his son, Edward III. He died 1345. HENRY, his son (previously earl of Derby), after vainly endeavoring to make peace with John, king of France, under the mediation of the pope at Avignon, was sent with an army into Normandy, and took part in the victory of Poitiers and the subsequent French wars. About this time his title was changed to duke of Lancaster, this degree of nobility being then newly introduced into England. He died 1362. The next duke of Lancaster commences a new lineage, that of the princes opposed to the house of York. The first in the line was JOHN OF GAUNT, or GHENT, third son of Edward III., born 1339. He was married successively to the daughter of Henry, the last duke, who died without male issue, and to the daughter of Peter, king of Castile. His name is one of the most celebrated in English history, and in the chivalry of the middle ages. Died 1399. HENRY OF HEREFORD, the successor of John of Gaunt in the dukedom, was son to him by his first wife. He claimed the crown by descent, by the mother's side, from Edmond the first earl, who was popularly supposed to be the elder brother of Edward I., and to have been deprived of the succession by his father for personal reasons. He became king by deposing Richard II., 1389, and was a prince of great ability and valor. He reigned until his death in 1422, and was succeeded by his son, Henry V. The son of the latter also inherited the crown as Henry VI., and in his reign the feuds of York and Lancaster broke out, which ended in the union of the two houses in the person of Henry VII. See YORK. [E.R.]

LANCASTER, CAPTAIN, afterwards SIR JAMES, had command of one of three ships fitted out in 1591 for the first English expedition to India by the Cape. The object was less to establish trade than to harass the Portuguese; but the result was unfortunate. One of the ships was sent home from the Cape with the sick, another was wrecked on the coast east of the Cape; Lancaster's ship only reached India. On her return, however, she was driven by storms to the West Indies and lost, Lancaster and seven men escaping and returning to England in a French vessel. In 1594 he made a predatory voyage to Brazil against the Portuguese. His most important services, however, were rendered in his conduct of the expedition sent out to India by the East India Company in May, 1601, soon after their charter was obtained. In compliment to his zeal in promoting the discovery of a north-west passage, the existence of which he firmly held, Baffin named after him the sound leading from Baffin's Bay (Sea?) to the Arctic Ocean. His death occurred in 1620.

LANCASTER, JOSEPH, well known as a promulgator of the system of national education introduced by Dr. Bell, was born in London of obscure parents, of the Quaker persuasion, in 1778. He commenced his career by opening a school for poor children in St. George's Fields, and was soon publicly known for his enthusiasm in the cause he had adopted. He died at New York in indigent circumstances, 1838.

LANCELLOTTI, or LANCILLOTTI, SECONDO, a learned Italian writer, historian of the 'Congregation of Mount Olivet,' to which he belonged, and author of 'Impostures of Ancient History,' &c., flourished about 1575-1643.

LANCELLOTTI, G., an Italian jurist, about 1510-91.

LANCELOT, a French antiquarian, 1675-1740

LANCILOTTI, F., an Italian painter, 16th ct.

LANCILOTTI, J., an Italian painter, 1507–54.

LANCISI, GIAMMARIA, or JOANNES MARIA, an Italian physician, eminent as an anatomist and physiologist, was born at Rome in 1654, and died, after an undisturbed professional career, in 1720. He surpassed the anatomists of his day in generalizing on form; and while demonstrating the fundamental structure of the arterial coats, and the joint action of the nerves and the blood in the motion of the heart, he drew the attention of his students to more remote causes of structure and motion, and recommended the study of analogies. Having discovered the lost copper plates of Eustachius, he edited a set of tables from them; and besides the value of his own writings to the profession, bequeathed a magnificent library of 20,000 volumes to the Hospital of the Holy Ghost. He was physician and chamberlain to several popes between 1688 and his death in 1720, and a member of many learned societies, as well as a master of polite literature. [E.R.]

LANCJEAN, REMI, a Flem. painter, died 1671.

LANCON, N. F., a Fr. jurisconsult, 1694–1767.

LANCRE, PETER DE, a provincial councillor of France, whose name is celebrated in many trials for witchcraft and as a writer on demonology, d. 1630.

LANCRET, N., a French painter, 1690–1743.

LANCRINCK, PROSPER HENRY, a painter of German extraction, employed by Sir Peter Lely in painting the grounds, landscapes, flowers, ornaments, and sometimes the draperies of his principal pictures, born about 1628, died 1692.

LANDAIS, or LANDOIS, PETER, a favorite minister of Francis II., duke of Brittany, formerly his tailor, executed by conspirators, 1485.

LANDEN, J., an Eng. mathematician, 1719–90.

LANDENOLFE, the *first* of the name, prince of Capua, 884–887; the *second*, prince of Benevento and Capua, succeeded 982, assassinated 993.

LANDER, RICHARD and JOHN, who completed the solution of the great problem of African geography left half-finished by Mungo Park, were born in Cornwall—Richard in 1804, his younger brother two years later. The former abandoned the trade of a printer, to which both were brought up, in order to accompany Capt. Clapperton on his second journey to Africa, in the capacity of attendant. On the death of Clapperton at Soccatoo, 13th Sept., 1827, he proceeded southward to Funda, intending thence to trace the course of the Niger to its embouchure; but meeting with hostile natives, and being without a companion to aid and cheer him, he was obliged to make for Badagry, on the bight of Benin, by the nearest route. He reached it in safety on the 21st November, two years two months and fourteen days after his departure from it with Clapperton; and soon after took ship to England. Having submitted to government a plan for exploring the course of the Niger, which was approved of, and confidence being reposed in him, from the intelligence, address, and bravery he had already exhibited, Lander was commissioned, by instructions dated 31st December, 1829, to trace the great river from Katunga, to the sea, to Lake Tchad, or wherever its stream should carry him. 'My brother,' says Lander in his account of the journey, 'eagerly volunteered to accompany me, though the government refused to allow him a salary, or make him even the promise of a reward.' John's name is mentioned in the instructions; and to him was assigned the duty of making inquiries, as far up as Boussa and Yaori, after the books and papers

that belonged to Mungo Park, believed to be in possession of the sultan of that country. Richard himself was granted all the articles that he asked for his personal convenience during his journey, together with 200 dollars in coin, and leave to draw for 300 more at Badagry if required; his wife was to be paid £100 during the ensuing year, and on his return a gratuity of £100 was to be paid to himself. On such slender means, and such slight temptations, did these two enterprising and high-spirited young men undertake one of the most difficult missions, and accomplish one of the most interesting and important discoveries of modern times. 'Science,' says Lieutenant Becher, 'was here out of the question; and all depended on that homely quality of mind, determination of purpose, a leading feature in the character of our countrymen, without which science itself is of little avail.'—(Introduction to *Journal in Family Library*.) The Landers left England on the 9th January, 1830; and departing from Badagry on the 31st March with a small escort, crossed the country N.E. to Katunga, following Clapperton's route in his second journey. Thence they turned northwards to Boussa without separating, as originally contemplated, visited the scene of Park's lamented death, and discovered some portions of his property, but not his journal, or any papers of value. From Yaori, on the 2d August, they began the descent of the river, and without serious molestation reached as far as Kirree. Here they were robbed and made prisoners, and taken down the river to Eboe, within the delta. At this place, by the promise of a considerable ransom, for which a written promise was given to a friendly chief, King Boy, they were delivered from the imminent danger of being sold as slaves, and they pursued their downward course. On the 18th November, 1830, our adventurous travellers reached the sea by the river Nun (Brass river of the English), one of the chief branches of the Niger, which has its mouth in the bight of Benin,—and thus set for ever at rest the long-disputed question of the course of this great river. The feelings of satisfaction and gratitude which now filled their minds at the success of their mission, and their deliverance from so many dangers, were speedily changed to those of bitter disappointment, by the disgraceful conduct of a countryman. Captain Lake, of the English brig Thomas, on board of which they were taken at the mouth of the river, peremptorily refused to honor their draft for goods and arms in favor of King Boy; and the kind-hearted chief was driven from the ship with terrible threats. On their return home, however, orders were sent out to pay the proper demand. The Landers found their way home from Fernando Po by Rio de Janeiro, and reached Portsmouth on the 10th June, 1831. On their voyage to Rio, they learned that Lake and his crew met a violent death at the hands of pirates. By the kindness of Lord Goderich, then colonial secretary, Richard Lander was placed in circumstances of 'honorable competence,' and a government appointment promised to his brother. To Richard also was awarded the first prize given by the Royal Geographical Society, value fifty guineas; and at the same meeting at which it was presented, the African Association which had accomplished so much for discovery on that continent, was incorporated with the Geographical Society, and thus no longer maintained a separate existence. In the following year, the Landers returned to Africa with the expedition projected by Mr. M'Gregor Laird and other gentlemen of Liverpool, for the purpose of establishing a settlement on the Upper Niger, and opening trade with the interior.

From causes, however, which might have been avoided, and could again be foreseen and met, this expedition proved a total failure. Among the great number who perished were the two Landers; Richard, from wounds received in an affray with the natives, and John, from the effects of the climate. An interesting account of their discoveries, their joint production, published before leaving England, forms three volumes of Murray's Family Library. [J.B.]

LANDON, C. P., a French painter, 1760-1826.

[Birth-Place of Miss Landon.]

LANDON, LETITIA ELIZABETH, the daughter of an army agent resident in London, became favorably known to poetical readers while she was hardly beyond the years of childhood, by many pieces of verse published in the *Literary Gazette*. In 1824, while she was still very young, appeared, with her early signature of L. E. L., the first of her volumes, which attracted general notice. It contained, with smaller pieces, 'The Improvisatrice.' Other poems of considerable extent showed her to possess much affluence of fancy, and excellent power of expressing romantic emotion. Her strength, however, was wasted, like that of Mrs. Hemans, in a constant succession of small pieces contributed to magazines and annuals; nor did she ever fulfil the promise of high genius held out by her youthful effusions. She was the authoress, also, of three sentimental novels. In 1837 she married Mr. Maclean, the governor of the settlement at Cape Coast; and, accompanying her husband to Africa, she died there in 1838, in consequence of having taken an over-dose of medicine. [W.S.]

LANDSBOROUGH, DAVID, a Scotch divine and writer on Natural History, and miscellaneous literary subjects. Died 1854, aged 73.

LANDUS, an Ital. physician, assassinated 1562.

LANE, SIR RICHARD, a statesman of the reign of Charles I., who made him lord chief baron of the exchequer, and one of the privy council. He is the author of 'Reports' in the court of exchequer in the reign of King James, and in 1640 was counsel for the earl of Strafford. Died in 1650 or 1651.

LANFRANC, archbishop of Canterbury, was born at Pavia in 1005. When but a young man, and after having studied at Bologna, he travelled into France, stayed for a time at Avranches, and entered the monastery of Bec, of which he ultimately became the prior. His teaching here attracted immense crowds of students from all the countries of Europe. William, duke of Normandy, appointed him in 1062 abbot of the monastery of St. Stephen at Caen. He refused the archbishopric of Rouen, but as counsellor to the Conqueror he came over to England, and was by his influence elected to the see of Canterbury in 1070, and he remained in this high office till he died, May, 1089. Lanfranc was a man of independent spirit, and was no vulgar flatterer of popish pretensions, while he stoutly contested the pre-eminence with Thomas, the archbishop of York. He was also a politician of no mean order, and took an active share in all the business of church and state. He was besides one of the early founders and expositors of the scholastic philosophy. He has left commentaries on the Epistles of Paul, a tract on transubstantiation, and some letters. His works were published by Luc D'Achery, in one volume folio, at Paris, 1648; and in England by Dr. Giles, Oxford, 1844, in two volumes, 8vo. [J.E.]

LANFRANC, an Ital. wr. on surgery, 13th cen.

LANGHAM, SIMON DE, an English monk, who rose to be abbot of St. Peter's, Westminster, and, finally, archbishop of Canterbury and cardinal. His name occupies a considerable place in the history of the reign of Edward III., who seized the temporalities of his see, and was a long while at enmity with him and his party. He died at Avignon, 1376, but his body was solemnly removed to St. Benet's chapel in Westminster Abbey, where his tomb still exists.

LANGHORNE, DANIEL, an English divine known as a writer on British history and antiq. d. 1681.

LANGHORNE, JOHN, known as a miscellaneous writer and poet, was born at Kirkby Stephen, in Westmoreland, 1735, and lived by his profession as a tutor and curate in the Church of England. He was the author of many fugitive pieces, published from about 1759 to 1765, when he became a contributor to the 'Monthly Review,' and, from that period to his death, in 1779, enjoyed considerable repute in the literary world—such as it then was. In 1804, his son published an edition of his poems with a life of the author; and his brother, WILLIAM, who died before him in 1772, had some poetical skill, and assisted Langhorne in a translation of Plutarch.

LANGLANDE, ROBERT, 14th century, a priest, fellow of Oriel College, Oxford, and satirical poet.

LANGLE, H. M., a Fr. composer, 1741-1807.

LANGTOFT, P., an Eng. chronicler, 14th cent.

LANGTON, JANE, an English lady of noble descent, but whose proudest boast was that she was the god-daughter of the celebrated Dr. Johnson. Died 1854, aged 79.

LANGTON, STEPHEN, an English ecclesiastic, educated in France, and appointed to the see of Canterbury by Innocent III., in the reign of King

John. The quarrel on this occasion, between the pope and the crown, brought the kingdom under an interdict, and the king was compelled to yield possession of the diocese, upon which Langton entered in 1213. Langton was a learned man, and wrote commentaries on the Scriptures. He also became a strenuous advocate of the independence of the English Church, and manfully resisted the tyranny of the pope. Died 1228. [E.R.]

LANGUET, HUBERT, a French diplomatist and political writer, who, being a protestant, narrowly escaped the massacre of St. Bartholomew, and died in the service of the prince of Orange, 1518-1581.

LANGUET DE GERGY, JEAN BAPTISTE JOSEPH, a doctor of the Sorbonne, distinguished as a charitable founder, 1675-1753. His brother, JEAN JOSEPH, a member of the French Academy, and archbishop of Sens, also distinguished for his benevolence, 1677-1753.

LANGUSCO, PHILIP, Count De, a Guelph leader, who held the supreme power at Pavia from 1300 to 1313, died a prisoner at Milan 1315.

LANNES, JEAN, Duc De Montebello, one of Napoleon's marshals, was born at Guienne 1769, and apprenticed to a dyer. In 1792, he entered the army as a volunteer, and distinguished himself in the first campaign of Italy, and afterwards in the principal actions which have shed such a lustre on the French arms. He was mortally wounded at the battle of Essling, in 1809; and Napoleon passed the remarkable eulogium upon him, that he had become greater by every day's experience. At first he said, Lannes had more valor than genius (*esprit*), but his spirit was continually mounting to the level of his courage; and he, whom he had found a pigmy, he lost a giant! [E.R.]

LANOUE, DENIS DE, a Fr. printer, died 1650.

LANOUE, FRANCIS DE, one of the most celebrated Calvinist captains of the 16th century, distinguished in the principal actions fought with the League, and killed at the siege of Lamballe, 1531-1591. He is the author of 'Military and Political Dissertations.' His son, ODET, a man of letters, was also in the military service of Henry IV.; and STANISLAUS LOUIS DE LA NOUE, of the same family, served in the French armies in the campaign of 1741 and 1756, and was killed in the affair of Saxenhausen, 1760. He is the author of 'New Military Constitutions.' His life was written by Toussaint.

LANOUE, J. S. DE, a Fr. dramatist, 1701-61.

LANSBERG, J., a Bavarian ascetic, died 1539.

LAPARA, L., a French engineer, 1651-1706.

LA PEROUSE, JEAN FRANCOIS GALAUP DE, was

[Monument to La Perouse, at Sidney, New South Wales.]

born at Alby, dep. of Tarn, 1741. At the age of fifteen he was appointed a midshipman in the French navy, and served with great distinction at home, in the East Indies, and in Canada, up to the peace of 1783. Soon after, he was put in command of an expedition destined to explore the Pacific, with instructions admirably laid down, but embracing a range of discovery much too wide for one expedition to overtake in a reasonable time. The French government had been excited by the example of England, and longed to reap such a harvest of glory as had been recently gained for her by her most accomplished and successful navigator.—La Perouse was to determine every thing left incomplete by Cook, to fill up every gap in the maritime geography of the globe. *Verification* of Cook was not contemplated; for the French authorities had full confidence in his accuracy, and La Perouse regarded his memory with 'unbounded veneration.' The expedition consisted of two fine frigates, the *Boussole* and *Astrolabe*, fitted out in the most complete manner, and with such a staff of scientific men as had never before been sent afloat. Yet there is hardly an expedition on record which ended so disastrously, and to which a like melancholy interest has so long attached. On the 1st of August, 1785, the expedition sailed from Brest, and proceeded westwards by the straits of Magellan; and after visiting several islands in the Pacific, hastened to fulfil instructions by making the American coast in lat. 59 N., and exploring it southwards from the point where Cook had begun his examination, going north. But as La Perouse found it impossible to reach this latitude earlier than June (1786), and as his instructions obliged him to be in China by February, too little time remained for a satisfactory survey of this broken coast. He arrived at Monterey in September, repaired the ships there, and crossing the Pacific westwards, fixed the

position of the Ladrone and Bashee islands, and on 2d January, 1787, cast anchor at Macao. The work appointed for the succeeding summer was an investigation of the coast of Tartary from Corea towards the north-east. This La Perouse successfully accomplished, and was the first to give an accurate coast outline of those regions. From Kamtschatka, with the permission of the Russian governor, he sent M. de Lesseps home to France, overland, with his journals and despatches; a duty which this enterprising young man safely fulfilled, and was thus the first who crossed through the whole length of the old world. The expedition now sailed south to the Navigator's islands, where twelve persons belonging to the ships, among whom was M. de Langle, captain of the *Astrolabe*, were killed in an unexpected attack by the natives. La Perouse soon after reached Botany Bay, where he refitted for his third voyage. Before proceeding upon this, however, he fortunately sent home by some English ships the journals and charts of his various discoveries from the time M. de Lesseps had left. His plan of operations for the future was laid down in a despatch, dated 7th February, 1788; this proved to be the last communication ever made by him. He sailed from Botany Bay in the same month, and from that date till the year 1826, all trace of the expedition was lost—its fate was involved in complete mystery. In 1791, an expedition was sent out under D'Entrecasteaux (*q. v.*), in search of the lost navigators; but no intelligence was obtained. No further effort was made by the French; but the fate of La Perouse was a constant subject of inquiry to the voyagers of other nations. At length, in May 1826, Captain Dillon, in the ship *St. Patrick*, returning from Valparaiso to Pondicherry, and calling at the island of Tucopia, in the northern part of the New Hebrides group, to learn the fortune of some persons landed there in 1813, from the ship *Hunter*, Captain Robson, on board of which Dillon had been at the time, found in the possession of one of those persons, who was a Lascar, a silver sword guard, on which he thought he could trace the initials of La Perouse's name. His curiosity was strongly excited, and he at once instituted inquiries among the natives. From some of them who had visited the adjoining isles, he found that two ships had been many years before wrecked on one to the N. W. called Vanikoro, or Recherche isle; and that several articles of French manufacture were in possession of the islanders. With this intelligence he returned to India; and in January, 1827, was sent out in command of a ship, the *Research*, to make a full investigation of the facts. He returned to Calcutta in April; and in February, 1828, reached Paris with many relics of Perouse's ships, collected at the island of Vanikoro. Several brass guns were raised from a coral reef; and many articles were purchased from the natives—as fragments of a theodolite, barometer tubes, iron bolts and bars, pieces of china, the backboard of a ship with the fleur-de-lis carved upon it, a silver candlestick, a ship's bell with the inscription 'Bazin m'a fait,' millstones, &c. Count Lesseps, who was still living, believed the backboard to be that of the *Boussole*, that the guns and millstones were the same as he had seen in the ships; and Sir William Bethan determined certain armorial bearings on the bottom of the candlestick to belong to the family of Colignon, the name of the botanist who was on board the *Boussole*. The natives asserted to Captain Dillon that one of the ships had struck, and then gone down in deep water,

at a place pointed out by them ; and that the other ran on a coral reef, and kept together till the crew had landed upon the island, where they remained five months, and then sailed away in a small vessel of their own construction. It appears clear, therefore, that it was the Boussole which stuck upon the reef, and the Astrolabe that went down. Whether La Perouse was among those who left the island, and what was the fate of those who thus braved the dangers of the sea, must ever remain an impenetrable mystery. Captain Dillon was received with great favor by Charles X., and rewarded with a pension of 4,000 francs. In the following year the French navigator Dumont D'Urville confirmed the observations of Captain Dillon, and brought home additional relics, raised from the reef on which the Boussole went to pieces. LAPIS, GÆTANO, an Ital. painter, 1704–1776.

LAPLACE, PETER DE, a French magistrate, killed at the massacre of St. Bartholomew, author of 'Commentaries on the State of Religion and the Commonwealth,' 'The Use of Moral Philosophy,' and 'The Excellence of the Christian Religion,' 1526–1572.

LAPLACE, PETER ANTHONY DE, a miscellaneous writer, and translator of many English works into French, including a wretched version of Shakspeare and Otway, 1707–1793.

LA PLACE, PIERRE SIMON, Marquis De, born at Beaumont-en-Auge, near Honfleur, in March, 1749, died in Paris on 5th May, 1827. It were vain indeed to propose to present within the rigorous limits of our volume, either the character or the achievements of this titanic Geometer. The works of his illustrious compeer Lagrange are also, in their detail, utterly remote from appreciation, unless by masters in mathematical science ; but then, through the exquisite taste of that great man, his perfect conception of method, and his eminent possession of that blending and fusing imagination, which—on whatever it concerns itself withal—demands, as a necessity, the imposition of unity and symmetry,—the eye even of the ordinary onlooker, cannot rest on any achievement of his, without discerning something of its import and beauty, and of its value in extending or re-arranging some large domain of Analysis. That La Place had nothing of this Æsthetic Faculty, it would require indeed something beyond hardihood to assert,—seeing that in the *Système du Monde* he has left a *resume* of all Modern Astronomy, unsurpassed, for perspicuity and elegance, in any Scientific Literature ; and a verdict scarcely less favorable must be pronounced on parts of the *Essai Philosophique sur les Probabilités* and those exquisite, but too few and brief sketches of Mathematical History. Nevertheless, it is unfortunately true, that in his more massive works—especially in that one which is his imperishable monument, the *Mécanique Céleste*—he has shown so great a negligence or disdain of art in composition, that to this day, and chiefly through this defect, it is, to the most instructed, a heaviest labor to peruse it. Thinking apparently always of *results*, and rarely if ever of *methods*, he starts from one mode of exposition to another, with perplexing rapidity,—not caring apparently, provided he can co-ordinate or rather present in successive order the truths he has to expose, from what source his power to exhibit them comes, or whether or not they are set down as flowing easily and naturally out of each other. Something of this apparent negligence ought undoubtedly to be laid to the gigantic character of his enterprise—one that could have been

rivalled in its vastness at no former time, and which no one has ventured to undertake again : it was not like that which fell to the lot of Newton, viz. : the privilege to explain and establish for ever a grand Law of Nature,—but the pursuit of that Law through all the intricacies of the actual Universe, the tracking of it as modified by conditions and circumstances, and the precise evaluation of its effects. Still further ; it seems by no means unlikely, that this overweight—so to speak—of his subject-matter, allowed him to permit himself that supreme indifference, which has so often induced reprehension, regarding the claims and discoveries of his predecessors and rivals. Lagrange's name, for instance, he rarely mentions ; one of the finest analytic discoveries of that Geometer he simply calls '*the formula of No. 21 of the second book of the Mécanique Céleste* ;' he treats more summarily still, the remarkable deserts of Brook Taylor ; nor indeed need any one go to his volumes for information in History, unless he is first in possession of the substantive merits of all our Analysts. If jealousy, or any feeling akin to it, gave rise to this singular reticence, the jealousy must indeed have been morbid ; for, irrespective of the debt we owe him for his immense compositions, La Place had achieved enough, of distinct and positive discovery, to secure as enduring a fame as can fall to any man, since the lifetime of Newton. His strokes, it is true, are apart and rugged ; but they are both wide and deep. With an infelicity remarkable in him, Napoleon is said to have contemptuously designated La Place the '*infinitesimal philosopher*.' Infelicitously ; inasmuch as scarcely any epithet could have been selected less applicable : there is no modern mathematician whose power of generalizing was more grasping, or in whose mind it more preponderated. Glance almost at any page, for instance, of the extraordinary *Théorie des Probabilités* :—from the opening chapter which unfolds the yet unfathomed *Calculus of Generating Functions*, down to the last, there are sown through it, as if broadcast, germs of fresh methods—such as that with regard to definite integrals—and of wholly unsuspected resources. It is the same with all writings of his, touching on the metaphysics of his subject ; ever and anon we find the largest views indicated in a sentence or unpretending phrase ; and—in still more palpable illustration—it may be permitted us to quote that far-famed '*Nebular Hypothesis*,' which, be it exactly accurate or not, leads the astonished imagination—searching a solution of the fundamental constitution of our planetary system—back into the depths of ages, when organized orbs were not, or existed only in the foresight of the Generic Powers, that were then preparing their birth ! From a mind of such a stamp, and indeed from no other, could have sprung his specific and lustrous contributions to Astronomy, for instance—the discovery of the long inequality of Jupiter and Saturn—the settlement of the old puzzle regarding the acceleration of the mean motion of the Moon—the theory of Jupiter's Satellites—or that earliest indication of conditions of stability within our system. Beyond and above all, however, the crowning glory of the '*infinitesimal philosopher*' is unquestionably the power that conceived, and the corresponding fortitude that executed the *Mécanique Céleste*. This book, as we have said, had no predecessor ; and a second La Place must arise, ere it shall be threatened by a rival. Extending to five quarto vols. of investigation, generally abrupt through its over condensation, it is divided into the sixteen books whose general titles we subjoin. 1. The General Laws of Equilibrium and Motion. 2. The Law

of Universal Gravitation, and the Motion of the Centres of Gravity of the Celestial Bodies. 3. The Figure of the Celestial Bodies. 4. The Oscillation of the Sea and the Atmosphere. 5. The Rotation of the Celestial Bodies. 6. Particular Theories of the Planets. 7. Theory of the Moon. 8. Theory of the Satellites of Jupiter, Saturn, and Uranus. 9. Theory of Comets. 10. Miscellanea, Refraction, &c. 11. Figure and Rotation of the Earth. 12. Attraction and Repulsion of Spheres, and the Statics and Dynamics of Elastic Fluids. 13. Oscillation of Fluids covering Planets. 14. Precession, Libration, and the Ring of Saturn. 15. Supplement to Book II. 16. Further views concerning the Satellites.—Within this immense programme—placed as if parenthetically—one finds the most striking notices on almost every important problem of mechanical physics; any one of which, would have made the fortune of an ordinary mathematician. The Student, betaking himself to *La Place*, must not go, however, under any delusion. To the best informed we have said, the perusal of this stupendous work is no holiday task: nor should that valuable assistance be declined, afforded by the annotated translation of the *Mecanique*, munificently presented to the world by the excellent American Dr. BOWDITCH.—In an unhappy hour for the completeness of his fame, *La Place* went aside from the field of pure science to become a politician. The cause of Napoleon's displeasure with him is unknown; certainly the Emperor himself gave no correct account of it. For many reasons, indeed, we should consider *La Place* quite unlikely to take successful part in that great game, in which Empires were the stakes; but that had signified less, if he had preserved an ordinary constancy. To the FIRST CONSUL, he had dedicated the First Edition of the *Mecanique*,—not living to publish a second. But from the Second Edition of the *Theorie des Probabilites*—published after the Restoration—he meanly struck out the former dedication to NAPOLEON EMPEREUR. One is required so often to lament political degeneracy among Scientific men in France, and their proneness to bend the knee before existing power, that it is refreshing to turn to the unsullied integrity of our late illustrious ARAGO. Another charge, commonly brought in England against our mathematician, we are constrained in all honesty to repudiate; at the very least, we demand the verdict of Not Proven. Originating, we believe, in Professor Robison's feverish book on continental Free Masonry, and further sustained by mistaken views as to the relations of the 'Nebular Hypothesis,'—the rumor has gone wide abroad, among the religious public of Great Britain, that this great Geometer professed himself, or was an Atheist. It is scarcely necessary to say that *La Place* never wrote on Ontology: but we deem it incumbent to add, that after a careful review of his written works, with reference to this interesting point, we are prepared to disallow the title of any one to repeat such an assertion. In the present state of thought and language on such matters, there is no rule which ought to be more sacred than this,—Sentiments ought never to be imputed; nor that right tampered with, which belongs to every man—the right to define and designate his own. Concerning those loftier verities of Ontology, vision, alas! does not come equally clearly to all! But one's apprehension of Realities so awful, must not be measured by his degree of glibness in speech, or that often irreverent aptness in the repetition of words and formulas, which in itself, argues, after all, nothing superior to the parrot's faculty. To the

failings of this great French Geometer, the splendor even of his achievements, ought, indeed, in nowise to blind us: in regard to the relations of his inner soul to the Infinite, if we cannot rest without curiosity, at least let us judge justly, in charity, and with hope—recalling, in all humility, his own last words on Earth—*Ce que nous connaissons est peu de chose; ce que nous ignorons est immense!* [J.P.N.]

LAPPO, JAMES, or JACOPO, of which it is the diminutive, a distinguished Florentine artist, died 1262. His son, ARNOLPHO, an architect and sculptor, died 1300. Another LAPPO, or JACOPO, distinguished as a canonist, died 1391: and RICCIO DI LAPPO, a painter of Florence, and grandfather of Giotto, was born 1330.

LAPPOLI, MATTHEW, an Italian painter, died 1504. His son, J. ANTHONY, a painter, 1492–1552.

LARA, a celebrated Spanish family, the founder of which was Ferdinand Gonzalez, count of Castile and Lara, died 970. In 1130, the family was divided into two branches, the first with MANRIQUE DE LARA, who took the title of viscount of Narbonne, for its stock; and the second deriving from ORDOGNO PEREZ, and preserving the title of count of Lara, until it became extinct in the latter half of the 14th century. The members of this family played an important part in the civil wars of Castile, under Alphonso X., Sancho IV., Ferdinand IV., and Alphonso XI., with whom they often disputed the crown.

LARCHER, P. H., an eminent French critic and Hellenist, author of remarks on Voltaire's philosophy of history, under the title of a 'Supplement,' &c., 1726–1812.

LARDIZABAL, DON MANUEL DE, minister of Ferdinand VII., 1750–1823.

LARDNER, DR. NATHANIEL, a learned dissenting minister, author of 'Credibility of the Gospel History,' 'Letter on the Logos,' 'A Vindication of Three of our Saviour's Miracles,' 'The Testimonies of the Ancient Jews and Pagans in favor of Christianity,' a 'History of Heretics,' &c. Dr. Lardner was educated among the presbyterians, and, in 1729, became assistant minister at Crutched Friars, 1684–1768.

LA REVEILLERE-LEPEAUX, LOUIS MARIE, described by Napoleon as a hot and sincere patriot, and a fanatic by temperament, was born 1753, and became a member of the constituent assembly, the convention, the council of elders, and the directory. He had a considerable share in the direction of affairs, and was chief of the sect of Theophilanthropists. His peculiar talents led him to give his attention to the details of business, while he left to Barras the exercise of authority. Died 1824.

LARGILLIERE, N., a Fr. painter, 1656–1746.

LARIVE, J. M. DE, a French tragedian, 1744–1827.

LARIVEY, P. DE, a Fr. dramatist, died 1612.

LARIVIERE, P. J. H., a member of the French assembly and convention, dist. among the Girondists, whose fate he escaped by flight, 1760–1838.

LARNED, SYLVESTER, Rev., an American divine, 1796–1820.

LAROCHE, BENJAMIN, a French author and translator of the works of Shakspeare and of Lord Byron, d. 1852, aged 54.

LA ROCHEFOUCAULD. See ROCHEFOUCAULD.

LA ROCHEJAQUELEIN. See ROCHEJAQUELEIN.

LA ROMANA, MARQUIS DE, a Spanish general, dist. against the French in the late war, died 1811.

LARON, M., a Dutch painter, 1653–1705.

LARREY, DOMINIQUE JEAN, Baron, a celebrated

military surgeon, and devoted follower of Napoleon Buonaparte, who pronounced him the most virtuous man that he had known, 1766-1843.

LARREY, ISAAC DE, a French historian of the reformed religion, who fled to Holland on the revocation of the edict of Nantes, au. of a 'History of England,' a 'Hist. of Louis XIV.,' &c., 1638-1729.

LARRIVÉE, H., a French actor, 1733-1802.

LARROQUE, MATTHEW DE, a French protestant and controversial divine, 1619-1684. His son, DANIEL, a protestant minister, and author of 'Les Véritables Motifs de la Conversion de l'Abbé de la Trappe,' 1660-1731.

LARRUYA, E., a Spanish statistician, died 1804.

LARUE, GERVAIS DE, a French ecclesiastic and antiquarian *savant*, author of 'Histoire des Trouvères,' &c., 1751-1835.

LARUE, J. S. DE, a Fr. historian, 1765-1830.

LARUETTE, J. L., French actor, 1731-1792.

LA SALLE, ANT. C. L. COLLINET, Count De, a general of cavalry, killed at Wagram, 1775-1809.

LA SALLE, H., a French author, 1765-1833.

LASCA, the assumed name of A. F. GRAZZINI, a burlesque poet and novelist of Florence, born 1503.

LASCARIS. Two learned Greeks of this name were among the fugitives who quitted Constantinople in 1454. The *first*, CONSTANTINE LASCARIS, died at Messina 1493. He is the author of the first book printed in the Greek character. The *second*, ANDREW JOHN LASCARIS, of the same family, distinguished as a scholar and ambassador, was patronized by Leo X., and became principal of the Greek college founded at his own instance. Died at Rome 1535. Constantine Lascaris is generally called BYZANTINUS, and John, or Andrew John, RHYNDACENUS.

LASCARIS, A., an Ital. economist, 1776-1838.

LASCARIS, P., grand master of Malta, 1560-1657.

LASCARIS, THEODORE, a Greek prince, known as THEODORE I., son-in-law of Alexis Angelus, emperor of Constantinople. After the taking of that city by the crusaders in 1203, Lascaris possessed himself of Bithynia, Lydia, the coasts of the Archipelago, and of a part of Phrygia, which he formed into a kingdom, with Nicæa as its capital, and reigned over it from 1206 to his death, 1222. The *second* of the same name, born 1222, succeeded his father, John Ducas, as emperor of Nicæa 1255, and died 1259. The son of the latter, named JOHN LASCARIS, succeeded him when six years of age, and died the same year. His successor was Michael Palæologus.

LAS CASES. The count of this name, MARIN JOSEPH EMMANUEL AUGUSTE DIEUDONNE, was a Frenchman of patrician origin, whose history is that of a chivalrous devotion to Napoleon Buonaparte. He was born at the chateau of Las Cases, in the department of the Haute-Garonne, in 1766, and acquired distinction in several actions as a naval officer; among these, was the storming of Gibraltar by the combined fleets of France and Spain. At the outbreak of the French revolution, he joined the emigrants at Coblenz, and after sharing in the fruitless efforts of the Vendean war and the expedition to Quiberon, settled in England. He was among the first of the emigrants to return to France on the invitation of Napoleon; and having engaged himself as a volunteer under Bernadotte, when the English attacked Flushing in 1809, he became known to the emperor, and gradually rose high in his confidence. His loyalty to Napoleon shone the brighter for his reverses in 1814 and the year fol-

lowing, when he accompanied him to St. Helena, and remained in the closest intimacy with him for eighteen months. At the close of each day, Las Cases noted all that transpired, and every thought expressed by the emperor, in a journal, which has since been published as a 'Memorial of Sainte Hélène;' and in the perusal of which, it must be remembered, that it came under the eye of Napoleon, leaf by leaf, as it was written. This modern Bayard was at length sent a prisoner to England, and treated with every indignity, not to say petty spite, by the government of the time, under Lord Castlereagh. The emperor Francis at last interfered in his favor, and he was allowed to pass the remainder of his days in peace in the vicinity of Paris. Died 1842. [E.R.]

LASCO, or LASKI, JOHN A., a Polish theologian, known as a promoter of the reformation, d. 1560.

LASCY, or LACY, PETER, Count De, an Irish officer, who entered into foreign service after the conquest of Ireland by William III., and became a field-marshal of Russia, and governor of Lithuania, 1678-1751. His son, JOSEPH FRANCIS MAURICE, Count De Lacy, born at St. Petersburg 1725, became a marshal in the service of Austria, d. 1801.

LASERNA SANTANDER, CH. AN., a learned Biscayan, author of 'Dict. Bibliographique,' d. 1813.

LASIUS, L. O., a German philologist, 1675-1750.

LASNE, M., a French engraver, 1596-1667.

LASSALA, M., a Spanish poet, 1729-1798.

LASSALLE, A. DE, a French metaphysician, 1754-1829.

LASSELLS, RICHARD, an Oxford scholar, who became a convert to Romanism, and wrote 'Travels in Italy,' born 1603, died at Montpellier 1668.

LASSO, ORLANDO DI, an eminent musician of Bavaria, author of a great number of sacred compositions, 1520-1596. His works were published by his sons, RUDOLPH and FERDINAND, both of whom distinguished themselves in the same profession.

LASSONE, J. M. F., a Fr. physician, 1717-88.

LASSUS, a Greek poet, about 500 B.C.

LASSUS, P., a French pathologist, 1741-1807.

LASTESIO, NOEL, an Ital. *savant*, 1707-1792.

LASTMAN, PETER, a Dutch painter, 1581-1649. His son, NICHOLAS, a painter and engraver, born 1619.

LATAPIE, F. DE PAULE, a French botanist, author of 'Hortus Burdigalensis,' 1739-1823.

LATHAM, JOHN, an English physician, eminent as an ornithologist and antiquarian, author of 'A General Synopsis of Birds,' in 6 vols. 4to.; an 'Index Ornithologicus;' and 'A General History of Birds.' The latter is contained in 10 vols. 4to., and is esteemed his greatest work. Born at Eltham in Kent 1740, died 1837.

LATHAM, JOHN, a physician of London, author of several contributions to the Medical Transactions, and of a work on 'Diabetes,' 1761-1843.

LATHROP, JOHN, Rev., born and educated in England as an Episcopal divine, became an independent minister, and emigrated to America. Died 1653.

LATHROP, JOHN, Rev., an American divine, 1740-1816.

LATHROP, JOHN, son of the preceding, an American writer, 1772-1820.

LATHROP, JOSEPH, Rev., an American Presbyterian divine, 1731-1820.

LATIL, J. B. M. A. ANTHONY DE, cardinal and archbishop of Rheims, conf. of Charles X., 1761-1839.

[Latimer.]

LATIMER, HUGH, one of the early English reformers, was born at Thurstaston, near Mount Sorrel, in Leicestershire, about 1472. After taking his degree at Cambridge, he entered into holy orders, and was quite a zealot on behalf of popery. The influence of Thomas Bilney induced him to scan the subject more thoroughly, and to study the Bible. His eyes were gradually opened, and at the age of fifty-three he renounced Romanism. His bold opinions against many Romish errors soon made him notorious in his own university and elsewhere. He even ventured to remonstrate with Henry VIII. on the sin and danger of prohibiting the Bible in English. Through the patronage of Thomas Cromwell he was appointed to a living in West Kinton, Wiltshire, where he preached with great earnestness and fervor the evangelical truths of the reformation; and he first became chaplain to Ann Boleyn and then bishop of Worcester in 1535. When the act of the six articles was passed, he dissented, and proved his sincerity by resigning his bishopric. For

[Birthplace of Latimer.]

his disinterestedness and firmness he was committed to the Tower, where he lay a prisoner for six years; and though the accession of Edward led to his liberation, he would on no account resume the government of his see. No sooner had Mary ascended the throne, than Latimer, as might be anticipated, became a marked object of papal vengeance. He refused to fly from the royal citation, conscious that his hour was come. After a manly vindication of his opinions, he was, along with Ridley, condemned to the flames. On the day of his martyrdom at

Oxford, 16th October, 1555, he appeared in a shroud, was, with his fellow-sufferer, bound by an iron chain to the stake, and five bags of gunpowder were fastened round his body. The faggots were kindled, and Latimer turning to Ridley cried with prophetic voice, 'Be of good comfort, master Ridley, and play the man. We shall this day light such a candle, by God's grace, in England, as, I trust, shall never be put out.' Latimer's sermons, which were collected and published, London, 1825, in two octavos, are distinguished by quaint and homely sense, and pointed and vigorous admonition, the offspring of a playful temper, a happy disposition, and a sincere and noble heart. [J.E.]

LATIMER, W., a distinguished scholar of the 16th century.

LATINI, BRUNETTO, a literary *savant*, and partisan of the Guelfs, author of 'Trésor de Toutes Choses,' a species of encyclopædia, written in French, and inventor of the Terza Rima. He was one of the first teachers of Dante, 1220-1294.

LATINI, LATINO, an Italian critic, 1513-1593.

LATOMUS, J., an advocate of Luther, died 1544.

LATREILLE, PETER ANDREW, one of the greatest entomologists of France, member of the Academy of Sciences, and professor at the museum of Natural History, 1762-1833.

LATROBE, B. H., an English architect, died 1820.

L'ATTAIGNANT, GABRIEL CHARLES DE, a Fr. ecclesiastic, known as a popular poet and gallant, 1697-1779.

LATUDE, HENRY MAZERS DE, a French courtier, who was liberated from the Bastille in 1784, after an imprisonment of thirty-five years, occasioned by his intrigues against Madame Pompadour. He is the author of 'Memoirs,' which have made his name celebrated throughout Europe, 1524-1804.

LAUD, WILLIAM, archbishop of Canterbury, and favorite minister of Charles I., was a prelate of great learning, and in all probability of sincere intentions, but he was carried away by the high sacerdotal and regal doctrines which prevailed under the Stuarts. He was born at Reading 1573, became fellow of St. John's College 1593, obtained a living in the Church of England 1607, and was appointed chaplain to James I. in 1611. With Laud's abilities and doctrines, promotion followed as a matter of course, and it became the aim of his life to unite the three kingdoms in one profession of religion. The power of the Star Chamber, courts of high commission, fines, penances, and all the means he could command, were strained to this purpose. Since the Union, the Scotch presbyterians had infused much of their own spirit into the English puritans, and when Prynne, Bastwick, and Burton, came bleeding from the scaffold, such a spirit was aroused as only the blood of those who had provoked it could allay in the minds of the people. It was in 1628 that Laud succeeded the duke of Buckingham as prime

minister; in 1630 he became chancellor of Oxford; in 1633, archbishop of Canterbury, and chancellor of the university of Dublin; and in 1637 he procured that decree of the Star Chamber which destroyed the liberty of the press, and made him the universal censor and demi-gorgon of opinion in England. With full allowance for all that can be urged in favor of his zeal for religion, and in the cause of learning, it is neither surprising nor to be regretted that he shared the fate of Strafford. Pity for an infirm old man, and the well-known bigotry of his enemies, would persuade us otherwise. The historian, however, is bound to make choice between these emotions and the demoralization of a nation, to be followed eventually by such horrors as those of the French revolution. Laud was declared guilty of treason by a bill of attainder, and executed on Tower Hill, January 10, 1645. [E.R.]

LAUDER, SIR TH. DICK, Baronet, a famous novelist and miscellaneous writer, known as a contributor to Blackwood's and Tait's Magazines, and for his works descriptive of Scottish scenery, born at Edinburgh 1784, died 1848.

LAUDER, a Scotch writer, known for his false accusations of plagiarism against Milton, died 1771.

LAUDERDALE, DUKE OF, an English statesman minister of Charles II. from 1670 to 1682.

LAUDERDALE, JAMES MAITLAND, earl of, a statesman of the party of Fox, born 1759, succeeded his father as a Scotch peer, 1789, took his seat in the House of Lords as one of the representative peers of Scotland 1790, created a peer of the United Kingdom, and became chancellor of Scotland 1806, died 1840. The earl of Lauderdale was author of 'Letters to the Peers of Scotland,' published 1794, and devoted the last ten years of his life to agricultural pursuits.

LAUDIVIO, L., an Italian poet 15th century.

LAUDON, GIDEON ERNEST, Baron Von, a celebrated Austrian general of Scotch descent, 1716-1790.

LAUDOUNIERE, RENE DE, a French gentleman, distinguished in an attempt to colonize Florida, when nearly all his companions were massacred by the Spaniards, author of 'Histoire Notable de la Floride,' published 1586, twenty years after his adventure.

LAUGIER, A., a French chemist, 1770-1832.

LAUGIER, M. A., a miscellaneous writer, 1713-1769.

LAUGIER DE TASSY, a French historian, last century.

LAUJOU, P., a French dramatist, 1727-1811.

LAUNAY, or LAUNEY, BERNARD RENE JOURDAN, Marquis De, governor of the Bastille at the

commencement of the French revolution, was born in that fortress, of which his father was governor before him, in 1740. The circumstances in which he was placed by the attack of the populace were so unprecedented, that it is not surprising the most contradictory charges have been brought against him. Early in July, 1789, he was visited by three strangers above the common rank, who asked him what he intended to do if the fortress should be attacked? 'My conduct,' he replied, 'is regulated by my duty: I shall defend it.' Soon afterwards, he caused an immense quantity of powder to be transferred from the arsenal to the Bastille, and, on the 14th of the month the fortress was besieged and taken. Rather than yield, De Launay had seized a cannoneer's match to blow up the place, but he was turned back from the magazine by two of his own officers with fixed bayonets. After the capitulation of the garrison he was cruelly murdered, and his head paraded through the streets, with six others, elevated on pikes. What became of his body is not known. The Bastille was first erected in 1383, and when it was destroyed only seven prisoners were found in it. It was levelled to the ground as the monument of an arbitrary power which had endured for ages; and the Memoirs of Latude, who had issued from its gloomy portals in 1784, after a confinement of thirty-five years, were in all probability a great provocative to its destruction. [E.R.]

LAUNEY, J. B. DE, a Fr. deputy, 1752-1831.

LAUNOY, J. DE, a doctor of the Sorbonne, known as a theologian and critic, 1603-1678.

LAURA, or LAURI, F., an Ital. paint., 1623-94.

LAURAGUAIS, LOUIS LE FELICITE, Duc de Brancas, and Count de, a French dramatist and miscellaneous writer, 1733-1823.

LAURATI, P. an Italian painter, 1282-1340.

LAUREMBERG, W., a German physician, 1547-1612. His son, JOHN, a mathematician, d. 1658.

LAURENBERG, P., a physician, naturalist, and astronomer, 1585-1639. His brother, JOHN, a Greek and Latin poet, hist., and math., 1590-1658.

LAURENCE, FRENCH, professor of civil law at Oxford, known as a miscellaneous writer, died 1809. His brother, RICHARD, professor of Hebrew, archbishop of Cashel, and a distinguished theologian, 1760-1839.

LAURENS, HENRY, an American revolutionist and statesman, born in Charleston, S. C., in 1724. Commenced life as a merchant, and amassed a handsome fortune. He was in India on the breaking out of the American revolution, but returned immediately, and was soon after elected a delegate to the General Congress, of which he was chosen president, retaining the office until the end of the year 1778. He was appointed Ambassador to the Hague, but was captured by the British on his voyage to Holland, and imprisoned in the Tower of London, where he remained in confinement for the space of fourteen months. He was subsequently associated with Franklin and Jay, as a commissioner for the negotiation of peace, and signed, in conjunction with them, the preliminaries to a treaty with Great Britain. On his return home he lived in retirement upon his farm, and died in the year 1792. His son, JOHN, 1753-1782, was a distinguished officer in the American army, a lieutenant-colonel, and aid-de-camp to Washington, and won great renown for valor and military conduct at Brandywine, Germantown, Monmouth, Savannah and Charleston. During the revolutionary war he was sent as a special ambassador to the court of France to negotiate a loan, in which mission he succeeded, after some

delay, by presenting himself to Louis XVI. and urging his suit in person. He was killed in a skirmish with the British in South Carolina, at the early age of 29.

LAURENS, L. DES, a Fr. theologian, died 1671.

LAURENT, J. A., a Fr. painter, 1763-1833.

LAURENT, P., a French engraver, 1739-1809.

LAURENT, PETER JOSEPH, a mechanic of Flanders, celebrated as an hydraulic engineer, and in the construction of artificial limbs, 1715-1773.

LAURIERE, E. J. DE, a Fr. jurist, 1659-1728.

LAURISTON, JAMES ALEXANDER BERNARD LAW, marquis of, a diplomatist and marshal of France, grandson of Law, the financial projector, was born 1768. He was distinguished in the wars of the empire, and became ambassador to England as the bearer of the propositions of peace, or rather, of preliminaries of peace between Great Britain and France in 1802. He was promoted to the highest rank under Louis XVIII., and died 1828.

LAUTREC, ODET DE FOIX, Seigneur De, one of the bravest captains of France in the 16th century, died at the siege of Naples 1528.

LAUWERS, N., a Flemish designer, born 1620.

LAUZUN. The Duke de Lauzun, formerly Count Antonine Nompur de Caumont, is the hero of an intrigue with Mademoiselle de Montpensier, the granddaughter of Henry IV., to whom, it was alleged, he was secretly married. Died, after a long imprisonment and exile, 1723.

LAVAL, FRANCOIS DE, the first Bishop of Canada, arrived in America, 1659.

LAVAL, LE PERE, a Jesuit, author of a voyage to Louisiana, 1720.

LAVALETTE, ANTH. DE, a cel. Jesuit, whose shameful practices in the middle of the last century contributed to the expulsion of his order from France.

LAVALETTE, MARIE CHAMANS, Count De, a distinguished soldier of the French revolution, who was born 1769, and, becoming a favorite of Buonaparte, was appointed director-general of the post-office, and counsellor of state under the empire. He shared the misfortunes of the emperor in 1814, but resumed his functions and promoted the cause of Napoleon during the hundred days, for which, after the restoration, he was condemned to death. By the aid of his wife, and three English gentlemen at that time in Paris, he had the good fortune to escape from prison. Died 1830.

LAVALETTE, EMILIE LOUISE DE BEAUHARNAIS, countess of, and wife of the preceding, deserves a separate notice for her conjugal fidelity and courage. Being a niece of the empress Josephine, she was married to Lavalette at the instance of Napoleon towards the close of the last century, and after the condemnation of her husband in 1815, whose execution was fixed for the 21st of December, she exchanged clothes with him in prison, and thus enabled him to escape. For her conduct on this occasion she was accused, along with her accomplices, of a conspiracy against the state; and though the charge could not be supported, the anxiety she had undergone, and the loss of her husband, ended in insanity.

LAVALLEE, JOHN, Marquis De, a Fr. drama. and miscellan. writer in the magazines, 1747-1815.

LAVAT, R. P., author of 'Nouveau Voyage aux Isles de l'Amerique,' 1711.

LAVATER, H., a Swiss physician, 1560-1623.

LAVATER, JOHN GASPAR, the famous writer on physiognomy, was born at Zurich 1741, and died in 1801 of the wounds which he received when his native town was taken by the French, under Massena, when he was busy in the streets animating the defenders and aiding the sufferers. He was pastor of

the principal church in his native place, and has left a high character for moral purity and benevolence of disposition. His 'Physiognomy,' consisting indeed only of fragments, or materials, towards a system, was published in 4 volumes 4to. 1775, illustrated with numerous engravings. The popularity it immediately acquired was due, in some measure, to the fact that many of the heads were portraits, and his descriptions often a good-humored satire upon well-known characters. Some of his hints are very valuable, and his inductions sufficiently supported by facts; but there are many crude observations, and proofs of hasty generalization, which have done much perhaps to prevent physiognomy from making any considerable progress. Besides this popular work, Lavater wrote 'Aphorisms on Man,' 'Jesus the Messiah,' 'Swiss Lays,' 'Spiritual Hymns,' 'A Look into Eternity,' and 'The Secret History of a Self-Observer.' He is unjustly ridiculed for his belief in spirits, and their agency in human affairs, which is nevertheless a characteristic common to the greatest names in literature and history. His real fault is want of method, without which the greatest philosophical insight must fail to create a system. It cannot be denied, however, that he excels as a moralist, and the more, perhaps, for this very deficiency. As an art-writer he may be more open to criticism, yet his work contains many valuable precepts. [E.R.]

LAVATER, L., a Swiss theologian, 1527-1586.

LAVATUR, W. DE, a French author, 1653-1730.

LAVAU, C., a French advocate, 1747-1836.

LAVAU, J. C. T., a Ger. lexicog., 1749-1827.

LAVICOMTERIE DE ST. SAMPSON, LOUIS, a political writer, and partisan of the French revolution, au. of 'Crimes des Rois de France,' d. 1809.

LAVINGHAM, R., a prior of Bristol, au. of an abridgment of Bede's History, close of 14th cent.

LAVINGTON, GEORGE, Bishop of Exeter, chiefly known for his 'Enthusiasm of the Methodists and Papists Compared,' was born 1683, and died 1762. This work, possessing singular humor, and marked by much learning, is utterly deficient in a true appreciation of the facts contained in the Diary of Wesley. As the raillery of a gentleman and a scholar, the book may be unexceptionable, but it is a singular production for a prelate of the church, and can only be excused by the extravagances it was intended to correct, and the ignorance of its author. Besides this amusing work, and its continuation applied to the Moravians, Bishop Lavington published some occasional sermons. [E.R.]

LAVOISIER, ANTOINE LAURENT, born in Paris 1743, guillotined 1794. With the advantages of birth and station, Lavoisier acquired an excellent education, distinguishing himself at an early period by the precocity of his talents. Although Lavoisier might probably have gained celebrity by the discovery and determination of the characters of new bodies, he chose a more important field, viz. that of generalization, and of thus explaining the bearings of what appeared to others isolated facts of comparatively little import. It was by making use of the discovery of oxygen by Priestley, that he was enabled to supply a theory of oxidation and combustion, which has stood the test of three quarters of a century, although he has laid himself open to the charge of at least want of candor in appearing to deprive Priestley and Rutherford of the credit of their discoveries of oxygen and nitrogen. By this theory he extinguished the idea of phlogiston, which had only served to obscure all new discoveries. Another valuable contribution to the science by

Lavoisier, was the chemical nomenclature which he is understood to have invented, and which is still retained, having served as the basis of all subsequent improvements in this important branch of the literature of the science. Occupied in his researches on respiration, and in the discharge of his government duties, he was suddenly deprived of life during the horrors of the French revolution. [R.D.T.]

LAW, ANDREW, an American writer on music, 1748-1821.

LAW, EDMUND, bishop of Carlisle, was born at Cartmel, in Lancashire, and lived 1703-1787. He was the author of an 'Inquiry into the Ideas of Space, Time, &c., published 1734 or 1735, in a controversy with Dr. Clark, arising out of a previous translation by Law of Archbishop King's essay upon the Origin of Evil. His other works are 'Considerations on the Theory of Religion;' 'Reflections on the Life and Character of Christ;' and the works of Locke, with a life and preface. Add to these his sermons and lesser tracts on metaphysical and theological subjects. Law was opposed to the doctrine of analogy assumed by Archbishop King and Bishop Brown, and held that the moral attributes of the human mind were the same as those of the divine, only that they are greater in the latter case. See KING. [E.R.]

LAW, EDMUND. See ELLENBOROUGH.

LAW, JOHN, the celebrated financial projector, was born at Edinburgh, son of a banking goldsmith there, about 1670; and being a clever mathematician and accountant, was employed by his government to bring the accounts of the revenue into order. Thus initiated into the knowledge of finances and of public business, and possessing a restless, scheming disposition, it appeared to him that the industry of the country was languishing for want of money to employ it. This led to his famous project for a Land Bank. A vicious commercial theory prevailed at that time, which took its rise from the recent introduction of bank notes, and the supposition that a large currency constitutes the wealth of a country without regard to its commercial wants. The Bank of England, and the British banks generally, had acted upon this mistaken notion, and created great disappointments and irritation, by suddenly limiting their loans when they discovered the drain of gold that it created. It was at this juncture that Law came forward with his scheme for issuing paper money equal to the value of all the lands in the kingdom; and on his proposal being rejected by the parliament of Scotland, carried it to the continent, and finally procured its adoption by the Duke of Orleans, regent for Louis XV., then in his minority. Hitherto bank notes had not been seen in France. Mr. Law commenced his operations in 1717, and between that period and 1720, when the bubble burst, France was converted into one vast stock exchange, and at last covered with ruin. Our limits do not admit of particulars in matters so difficult of explanation as financial operations, but the basis of Law's project was the idea that paper money may be multiplied to any extent, provided there be security in fixed stock; while the truth is, if the bulk of a currency is increased beyond the actual wants of commerce, all its parts, or separate coins and notes, must depreciate in proportion. In the working out of Law's scheme, a trading company was created which had conveyed to it the whole province of Louisiana, and the possessions of France on the banks of the Mississippi, which, besides, obtained by purchase the charters and property of the Senegal Company, the India Company, and the China Com-

pany, and became the sole public creditor by farming the whole of the taxes and revenues of the kingdom. The ruin of this vast machinery at that particular moment, and with the suddenness that it occurred, was produced by an edict of the regent, May 21, 1720, reducing the value of the notes, in defiance of Mr. Law's protestations, to an equality with that of the French coinage, which, in former times, had frequently been altered by the government to suit its convenience. This breach of faith instantly stopped their circulation, the deplorable results of which went nigh to produce an insurrection of the people. Law became an exile, and after wandering in England, Holland, and Germany, at last died in Venice, fully convinced of the solidity of his system, 1729. See LAURISTON. [E.R.]

LAW, JONATHAN, Governor of Connecticut, 1674-1750.

LAW, RICHARD, son of the preceding, chief justice of Conn., and district judge of the United States, 1733-1806.

LAW, WILLIAM, one of the most powerful and original of English writers in the interest of religion, was born at Kingscliffe, in Northamptonshire, 1686, and educated for the Church of England at Emmanuel College, Cambridge, where he took the degree of M.A., and obtained a fellowship in 1711. On the death of Queen Anne, 1714, he refused to take the necessary oaths of allegiance to the new dynasty, and thus cut himself off from all hope of preferment in the church. In 1717, the Bangorian controversy was commenced by the attack of Hoadley on the principles and practices of the nonjurors, and Law defended his cause in 'Three Letters,' remarkable for their logic compactness and command of language. In 1721 and 1726, he made a further exhibition of his principles in 'Remarks on the Fable of the Bees,' and 'The Unlawfulness of Stage Entertainments.' In the latter year he also published his 'Christian Perfection,' and in 1729 his 'Serious Call to a Devout and Holy Life.' This work is universally acknowledged to be the most stirring appeal to the practical, common sense of mankind, in behalf of religion, ever written, and its 'characters' are not inferior for humor and conception to those of La Bruyere. It is the only work by which Law is known to the public at the present day. Our author had now become domesticated in the family of Gibbon, as tutor to the historian's father, with whose sister, Miss Hester Gibbon, and her friend, Mrs. Hutcheson, he afterwards established himself at Kingscliffe in the capacity of chaplain and almoner. After the 'Serious Call,' he published one of the most powerful of his logical works, entitled 'The Case of Reason,' in answer to Tindal's 'Christianity as Old as the Creation;' and this, excepting such correspondence as he carried on—in which he was a great master—was the last production of his pen before his adoption of the principles of Jacob Boehmen. His acquaintance with those works may be traced to the years between 1733-1736. In 1737, he sprang like the eagle from fresh fastnesses, and published the book of the 'Sacrament' in answer to Hoadley, which unfolds his new philosophical divinity in the happiest manner. In 1739 appeared his 'Christian Regeneration,' which is really another 'Serious Call,' written from higher ground, followed by his 'Earnest and Serious Answer to Dr. Trapp,' who had attacked his 'Christian Perfection' and 'Serious Call.' In 1740 his 'Appeal' was given to the public, the aim of which is to confute Arianism and Deism from the very nature of things; and, in the same year, a rejoinder to his opponent, entitled,

with the fine sense of the humorous, 'Dr. Trapp Vindicated from the Imputation of being a Christian.' In 1746, his 'Way to Divine Knowledge' opened the grounds of a positive religion, founded on the principles contained in the writings of his master. It was followed by the 'Spirit of Prayer,' introductory to the 'Spirit of Love,' published 1752, which is a masterly demonstration that the wrath to be quenched is not in God, but the creature, who can possess no goodness by birth of his natural parents. Law died in 1761, immediately after completing the most eloquent and perfect of all his works, 'An Humble, Earnest, and Affectionate Address to the Clergy.' It is not easy to do justice to his character and influence in few words; but he was the first teacher of Wesley, who afterwards quarrelled with him; and England owes him a great debt in the revival of evangelical religion, and the reaction against the worldliness of the church establishment, which characterized the commencement of last century. However mistaken in the foundations of his mystical system, he was always guided by high principle, even to the matter of his bachelorship, which he maintained to the end of his days. Besides the works we have mentioned, he edited an edition of Boëthius, in 4 volumes 4to, which are embellished with drawings, made by a German named Frere. There are likewise some minor tracts from his pen, not included in our enumeration, and among these is a dialogue on 'Justification,' between a churchman and a Calvinistic methodist, published 1759, in answer to Beveridge. All the memoirs of Law are miserably deficient in appreciation of his genius and consistency. [E.R.]

LAWES, HENRY, the court musician of Charles I., and the composer of Milton's 'Comus,' &c., 1600-1662. His brother, WILLIAM, also a musical composer, the subject of the next notice.

LAWES, WILLIAM, a celebrated composer, was the son of Thomas Lawes, vicar-choral of Salisbury, of which city he was a native. In his early life he was a member of the choir of Chichester, from which place he was called to become one of the gentlemen of the chapel royal in 1602, and afterwards one of the church musicians to King Charles I. He lost his life at the siege of Chester, in the year 1645. [J.M.]

LAWLESS, JOHN, an Irish agitator, 1772-1837.

LAWRENCE, ABBOTT, one of the most eminent, successful, and liberal merchants the United States has ever produced, was born in Groton, Massachusetts, on the 16th December, 1792. He was the seventh son of Samuel Lawrence, an officer in the revolutionary war, who obtained leave of absence on furlough for the purpose of fulfilling his engagement of marriage, and during the performance of the ceremony heard the alarm bell, which called all officers to their posts at Cambridge. The moment the knot was tied, he waited for no congratulations or festivities, but taking a hasty farewell of his wife hurried to his post. At the age of fifteen, Abbott Lawrence entered as an apprentice in the counting-house of his elder brother, Amos, in Boston. He soon proved himself to have an aptitude for the business in which he had embarked, and gained deserved confidence by his industry, close attention, and morality. In 1814, he became the partner of his brother. Scarcely, however, had the new arrangement been completed, when disastrous news so prostrated the value of goods in the market that Abbott, who foresaw ruin in the prospect, wished to dissolve the connection; but the counsels of his brother prevented his taking the step he proposed. It was a

time of war, and the volunteer military companies of Boston were called on to take the field. Mr. Lawrence marched with the 'New England Guard,' to which he belonged, to Marblehead, which was then threatened with invasion. At Fort Strong, and afterwards at the Charlestown navy yard he cheerfully did duty in the ranks as a private, and attracted the particular notice of George Sullivan, Esq., one of his officers, who advised him to devote two hours a day to study and the cultivation of his mind, and Mr. Lawrence had the good sense to appreciate and follow this advice. In March, 1815, he visited Europe on business of the firm, and such was his promptitude and energy that in ninety days from his departure, he had English goods of his selection in the market at Boston, and this, for those days, was wonderful despatch. Business rapidly increased, the firm prospered, and abundant wealth flowed in upon the house. Large sums of money were soon invested in the calico manufactures at Lowell, and indeed the Messrs. Lawrence may be said to have built up Lowell. Such was the respect felt for the intelligence and integrity of Mr. Abbott Lawrence that he was elected a representative in the twenty-fourth and twenty-fifth Congress, and here he proved himself to be no mean statesman. In 1843 he was appointed one of the commissioners on the part of the United States to settle with the English commissioners the North-east Boundary question, a matter of some delicacy and difficulty. Gen. Taylor, when elected to the presidency, invited Mr. Lawrence to a place in his cabinet. This he declined, but in 1849 was sent as minister of the United States to Great Britain, where he so conducted himself that he was exceedingly popular in England. He settled on this mission another delicate business in the Fishery question, which at one time wore a threatening aspect. After he became wealthy he manifested a princely liberality. He gave to Harvard University \$100,000 to found a scientific school, and his donations to other deserving objects were on a like munificent scale. He died on the 18th of August, 1855, when almost sixty-three years old, and left behind him a high reputation as a worthy and excellent man, a sagacious, and liberal-minded merchant, and a munificent benefactor to a great many deserving objects. He sought to do good in his generation, and dispensed freely of the store with which God had blessed him.

LAWRENCE, AMOS, a wealthy and liberal merchant of Boston, died 1852, aged 97.

LAWRENCE, FRENCH. See LAURENCE.

LAWRENCE, J., an English agriculturist, 1756-1836.

LAWRENCE, JAMES, an American naval officer. Was born at Burlington, N. J., in 1781. At the age of 16 he entered the American Navy as a midshipman. Was with Decatur as his first lieutenant in the engagement against Tripoli. While in the Mediterranean he was promoted, and rose to the command successively of the Vixen, Wasp, Argus, and Hornet. While cruising with the latter off Delaware, Feb. 24, 1813, he met the British vessel Peacock, which he captured after a brilliant engagement of only fifteen minutes. On his arrival in the United States he was received with acclamation in consequence of this dashing success, and was made post captain and given the command of the frigate Chesapeake. He was preparing for sea, with his vessel in the roads of Boston, when the British frigate, the Shannon, Capt. Brooke, appeared off the harbor, and challenged the Chesapeake, which Lawrence, although his ship was in an incomplete condition as

to crew, armament and stores, resolved to accept. He accordingly put to sea as morning broke on the 1st of June, 1813. The Shannon bore away at his approach, but the Chesapeake hauling to and firing a gun, the enemy followed suit and the action began. At almost the first fire Lawrence was severely wounded in the leg. Nothing daunted the brave commander continued the engagement, which was soon brought to close quarters. Lawrence now received a mortal wound in the abdomen, and as he was carried below, in the hottest of the struggle, he cried out in these immortal words, 'Don't give up the ship.' The battle, however, did not last long. Capt. Brooke grappled with the Chesapeake, and boarding, overpowered her. The struggle lasted 11 minutes. Capt. Lawrence lingered four days in extreme suffering, and died June 6th, 1813, at the early age of 31. His brave enemy honored his memory by burying his body with great respect at Halifax. His remains were afterwards brought to New York, and deposited in Trinity Churchyard, where a handsome monument has been erected to his memory.

LAWRENCE, S., an E. Indian gen., 1697-1775.

LAWRENCE, THOMAS, an English physician and medical writer, author of the life of Harvey, 1711-1783.

LAWRENCE, SIR THOMAS, P.R.A., was born at Bristol, 4th May, 1769. He obtained an early reputation at Bath as a portrait painter in crayons, and as early as 1787 established himself as a portrait painter in oils in London, where four years afterwards, 1791, he was elected an associate of the Royal Academy, and in 1795 an academician; he had previously succeeded Sir Joshua Reynolds as painter to the king. He was knighted by the prince regent in 1815, and in 1820 succeeded West as president of the Royal Academy. He died in London, 7th January, 1830.—Sir Thomas had perhaps, since the days of Vandyck, an unrivalled career as a portrait painter; he, however, owed his chief success to the skilful flattery of his female portraits, the complexions of which left nothing to be desired: his male pictures, as a rule, bear no comparison with his female; besides being ill-proportioned, they are wanting in manly character; still his portraits of the emperor Francis, of Pius VII., and of the Cardinal Gonsalvi in the Waterloo Gallery at Windsor, are among the greatest masterpieces of the art

extant.—(Williams, *The Life and Correspondence of Sir Thomas Lawrence*, 1831.) [R.N.W.]

LAWSON, SIR JOHN, a naval commander and royalist, killed in action with the Dutch, 1665.

LAWSON, JOHN, an American traveller and surveyor-general of North Carolina. While engaged in exploration he was killed by the Indians in 1712. He was the author of travels in and history of N. Carolina.

LAX, Rev. W., an eminent astronomer, d. 1836.

LAXTON, WM., an English engineer and surveyor, 1802-54.

LAY, BENJAMIN, a benevolent Quaker, born in England, but settled and died in America, in 1760. Was an ardent advocate for slave emancipation.

LAYA, J. L., a French dramatist, 1761-1833.

LAYARD, C. P., a divine and scholar, d. 1803.

LAZARUS, prince of Servia, 1386.

LAZERI, P., an Italian theologian, 1710-1789.

LAZIUS, WOLFGANG, a learned physician, and writer on history and antiquities, 1514-1565.

LAZOWSKI, a Polish refugee, distinguished as an active agent in the Fr. revolution, died 1793.

LAZZARA, N., an Ital. archaeologist, 1744-1833.

LEACH, WM. ELFORD, an eminent naturalist, and curator in the British Museum, 1790-1836.

LEAD, JANE, was a mystical writer, whose works date from 1683, or thereabouts, to the close of the century, and who died in 1704. She wrote from her own experience of the spiritual life, and the state of departed spirits, but qualified by a previous acquaintance with the system of Boehmen. Her works are a 'Revelation of Revelations,' explaining a portion of the Apocalypse, 'The Law of Paradise given forth by Wisdom to a Translated Spirit,' 'The Wonders of God's Creation Manifested in the Variety of Eight Worlds,' &c. This woman, of singular learning and experience, belonged to a society of 'illuminati,' presided over by Dr. Pordage, and, at a later period, to the 'Philadelphians,' among whom Dr. Francis Lee was eminent. The latter has written the life of Jane Lead, and some prefaces to her works. She lived at a period when some great development from the spiritual world was universally expected, but especially in Germany. See SWEDENBORG. [E.R.]

LEAH, the wife of Jacob, and mother of Reuben, Simeon, Levi, Judah, Issachar, Zebulun, and Dinah, dates uncertain.

LEAKE, JOHN, a phys. and medical wr., d. 1729.

LEAKE, RICHARD, one of the bravest officers that ever served in the English navy, created master-gunner of all England, and celebrated for his skill in pyrotechnics, 1629-1696. His son, SIR JOHN, admiral of England, celebrated for the relief of Gibraltar, &c., 1656-1720. STEPHEN MARTYN LEAKE, nephew and biographer of Sir John, distinguished in heraldry and numismatics, 1702-1773.

LEAKE, WALTER, Governor of Mississippi from 1821 to 1825, in which year he died.

LEAMING, JEREMIAH, Rev., an American Episcopal divine and theological writer, 1718-1804.

LEANDER, a French ecclesiastic, died 1667.

LEANDER, a youth of Abydos, who was accustomed to swim across the Hellespont in order to visit his mistress on the opposite shore, and was at last drowned in a tempest, date unknown.

LEANDER, St., archbishop of Seville, 6th cent.

LEAPOR, MARY, the daughter of a poor gardener, authoress of original poems of great merit, and 'The Unhappy Father,' a tragedy, 1711-1735.

LEAR, TOBIAS, an American colonel and consul-general at St. Domingo, died 1816.

LEARCHUS, a Greek sculptor, B.C. 700.  
 LEBAILLY, A. F., a Fr. author, 1756-1832.  
 LEBAS, J. P., a French designer, 1707-1784.

 LECENE, C., a Calvinist minister, 1647-1703.  
 LECERF, P., an ecclesiastical wr., 1677-1748.  
 LECERF DE LA VIEVILLE, J. H., chancellor of Normandy, and a writer on music, 1674-1707.  
 LECHFORD, THOMAS, an Englishman, who emigrated to the American Colonies in 1638, but being disgusted returned to England, and there published a work containing strictures upon the colonial government.  
 LECLERC, DAVID, professor of Hebrew at Geneva, 1591-1665. His brother, STEPHEN, a physician and scholar, died 1676.  
 LECLERC, JOHN, nephew of the preceding, a

laborious theological writer and critic, whose works are well known, and frequently quoted, by the learned. The most famous of his writings concern biblical history, and consist of commentaries, &c., written in Latin, lived 1657-1736. His brother, DANIEL, celebrated as a medical writer and anatomist, 1652-1728. LAURENT JOSSE LE CLERC, son of John, also a learned writer, died 1736.

LECLERC, JOHN, a French painter, 1587-1633.  
 LECLERC, J. B., a member of the French convention, and writer on music, 1755-1826.

LECLERC, M., a dramatic writer, 1622-1691.  
 LECLERC, N. G., a French physician, author of 'Histoire Physique, Morale, Civile, et Politique de la Russie,' 1726-1798.

LECLERC, P., a famous Jansenist, 1706-1773.  
 LECLERC, S., a celebrated French engraver, 1637-1714.

LECLERC, VICTOR EMANUEL, a French general, who distinguished himself in Italy, and was married to Pauline, the sister of Napoleon, who afterwards became the wife of Prince Camille Borghese. Leclerc, who entered the republican army as a volunteer, was born in 1772, and died of the yellow fever on an expedition to St. Domingo, 1802.

LECLERCO, C., a French missionary, 17th ct.  
 LECOAT, YVES MARIA GABRIEL P., a French admiral, appointed by Buonaparte military chief of the port of Boulogne, 1757-1826.

LECOCO, R., a politician of the 14th century.  
 LECOINTRE, LOUIS, called 'Lecointre of Versailles,' a deputy to the legislative assembly and the French convention, and a bitter enemy of the Girondists, born 1750, died unnoticed 1805.

LECOMTE, F., a French sculptor, 1737-1817.  
 LECOMTE, J., a Latin poet, died 1707.  
 LECOMTE, L., a Jesuit and astronomer, author of 'Memoirs on the State of China,' died 1729.

LECOMTE, L., a French sculptor, 1643-1695.  
 LECOMTE, M., a French engraver, born 1719.  
 LECONTE, A., a French juriconsult, d. 1586.

LECONTE, L. J. F., a French author, d. 1740.  
 LE-CONTEUR, JOHN, a native of Jersey, distinguished as an officer of the British army in India, where he became the prisoner of Tippoo Sultan, 1761-1835.

LECT, JAMES, a lawyer of Geneva, 1560-1614.  
 LEDERLIN, J. H., a German philologist, 1672-1737.

LEDERMUTTER, M. F., a physician of Nuremberg, au. of a work on the microscope, 1719-1760.

LEDESMA, A. DE, a Spanish poet, 1552-1623.  
 LEDOUX, C., a French architect, 1736-1306.  
 LEDRU, A. P., a French botanist, 1761-1831.  
 LEDRU, N. P., a French physician, 1731-1807.

LEDWICH, E., an Irish antiquary, 1739-1823.

LEDYARD, JOHN, a famous American traveller, born at Groton, in Connecticut, 1751. After a residence among the Indians he went to England, and sailed with Captain Cook on his second voyage, the narrative of which he published. His next enterprise was a pedestrian tour round the globe; but being prevented from continuing his journey by the Russian government, he returned to London, and was employed by the African Association. He had proceeded as far as Grand Cairo, with the design of penetrating the interior of that interesting country, when he died of a virulent disease, 1788.

LEDYARD, COLONEL, an American officer, who defended Fort Griswold in Groton, Connecticut, against the British in 1781, and was brutally run through the body by the English commander, while surrendering his sword.

LEE, ANNE, sometimes considered the founder of the Shaking Quakers, was born at Manchester, 1735, and after becoming the mother of several children, whom she lost at an early age, gave herself up to religious contemplation, with the conviction that the union of the sexes was the original sin. The society to which she attached herself had been founded by three prophets from the Cévennes, who came to London in 1705, and it was greatly advanced by a person named James Wardley, in 1747. Anne Lee, having become the marked medium of a spiritual manifestation, was recognized as their spiritual head, or 'mother in Jesus Christ,' in 1771. In 1774 she accompanied some of her people to America, in order to escape persecution, and after travelling through New England, fixed her abode in the neighborhood of Albany, where she died, or, in the language of her proselytes, 'withdrew from their bodily view,' 1784. Her case is a very remarkable one. Among other statements, she declared that no one had entered into heaven until the year 1776, which marked the commencement of a new dispensation; and she claimed for herself to be regarded as the 'Bride of the Lamb,' mentioned in the 12th chapter of the Apocalypse. Her followers increased to a considerable number after her death, and, for a short time at least, established a community of goods. [E.R.]

LEE, ARTHUR, an American revolutionist, statesman and political writer, was born in Virginia in 1740, and was educated as a physician in Edinburgh. On his return to Virginia he practised medicine at Williamsburgh, but as the affairs of his country were pointing to a revolution, he determined to fit himself for political life, and accordingly went to London, where he entered as a student of law in the Temple. While in London he became a member of the Society of the supporters of the Bill of Rights, and distinguished himself as a writer under the title of 'Junius Americanus,' of various political pamphlets, &c., in defence of popular interests. In 1776, he, as minister to France, was joined with Franklin and Deane in the negotiation of a treaty with that nation, which he aided in effecting. In 1780, Lee resigned his post at the French court, in consequence of the slanders of Deane in the previous year, and returned to Virginia, and was successively appointed by his native state a delegate to its Assembly in 1781, and a representative to Congress in 1785. In 1784 he was employed in negotiating a treaty with the Six Indian Nations. He was subsequently admitted by special order a counsellor of the Supreme Court of the U. S., and finally elevated to the Board of Treasury, where he remained until his retirement into private life in the year 1789. He died 1792.

LEE, CHARLES, a major-general in the American army during the Revolution, was born in North Wales. He entered the British army at a very early age, and was engaged in service in the American colonies, and subsequently in Portugal under General Burgoyne. Being of a restless disposition, he left the service of his country for that of Poland, and afterwards travelled through all parts of Europe. During his peregrinations he had a quarrel with an Italian officer, which resulted in a duel, by which his antagonist lost his life, and he himself two of his fingers. He early espoused the cause of the American colonies, and hopeless of advancement at home in consequence of his liberal political sentiments, he determined to go to America, where, at the breaking out of the Revolution, he received a commission from Congress in 1775, with the rank

[General Lee.]

of major-general. His first service was at New York, where he was dispatched to prevent the British, in 1776, from obtaining possession of the Hudson and the city. Having accomplished this duty with great success, he was sent as chief in command to the southern colonies. Being again ordered to the north, he had, while marching from New Jersey to form a junction with Washington in Pennsylvania, gone to reconnoitre at some distance from his camp, and was surprised and taken prisoner by the British, and remained in the hands of the enemy until 1777, when he was exchanged for General Prescott. He was at the battle of Monmouth in New Jersey, and was rebuked by Washington for his conduct on that occasion. This led to a mutual recrimination, and finally to a court martial, where Lee was tried for disobedience of orders, misconduct before the enemy, and disrespect towards the commander-in-chief. He was found guilty, and suspended for a year from service. In disappointment and disgust at his treatment, he retired to his farm in Virginia, where he lived in a morose, eccentric manner, with no companions but his dogs, and no society but his books, and there remained until a few months before his death, which took place at an inn in Philadelphia, in the year 1782. His last words were, 'stand by me, my brave grenadiers.' He was a brave, spirited officer, but captious, aspiring, and restless under command. He was a political writer of considerable merit, and has been thought worthy of competing for the honor of the authorship of Junius.

LEE, CHARLES, att rney-general of the United States from 1795 to 1801. Died 1815.

LEE, EDWARD, archbishop of York in the reign of Henry VIII., and a zealous opposer of Luther, 1482-1544.

LEE, EZRA, an American Revolutionary officer. Died 1821.

LEE, FRANCIS, a learned writer on philosophical, scriptural, and mystical subjects, was a physician, descended, by his mother, from the Percies of Northumberland, and by his father from the same family as the earls of Lichfield. He was born in 1660, and being left an orphan when between four and five years of age, was educated under the care of his aunt, Mrs. Elizabeth Jenkins. On receiving a fellowship at Oxford, he became tutor to Sir W. Dawes, afterwards archbishop of York, and at a later period to the son of Lord Stawell, with whose family he remained on terms of intimacy many years after. From 1691 to 1694 he travelled in Italy, and practised as a physician for some time at Venice. In 1708 he was in London. In 1719 he

went to France, and died on his journey at Gravelines. It is a curious circumstance that he was known to Peter the Great, and, at his request, drew up proposals for the advancement of his kingdom, the spirit of which, if not the form, has continued to guide the czars of Russia. His works are very numerous, but they were all published anonymously, or in the names of others. Some of them were collected in two volumes octavo, and published for the benefit of his wife and daughter, but these were by no means his most important labors—among which may be reckoned his 'History of the Montanists.' His mystic poems are among the highest of that class, and his scriptural commentaries, though false in essential principles, exceedingly ingenious. [E.R.]

LEE, FRANCIS LIGHTFOOT, one of the signers of the American Declaration of Independence, was born in Virginia in 1734. He was a member of the legislature of his native state, and of Congress. He died in 1797.

LEE, HARRIET, one of two sisters, who were the conjoint authors of various novels, &c. The 'Canterbury Tales' was almost exclusively written by Harriet, who died 1851, aged 95.

LEE, HENRY, an American Revolutionary officer, was born in Virginia in 1756. He rose to the rank of lieutenant-colonel in the army. In 1786 he was a delegate from his native state to Congress, and continued in that position until the adoption of the constitution. He was a member of the state convention which ratified the federal constitution, and in 1792 was elected governor of Virginia. He subsequently, in 1799, was chosen member of Congress, and on the death of Washington was selected to deliver the funeral oration. In the latter part of his life his pecuniary circumstances became embarrassed, and he was imprisoned within the limits of Spotsylvania county for debt. He however made good use of this compulsory retirement by writing his 'Memoirs of the Southern Campaign.' He also published his 'Oration on the Death of Washington.' Having been wounded during the riot in Baltimore in 1814, he never fully recovered, but continued to pass the remnant of his life in suffering and disability until its close in 1818.

LEE, JONATHAN, an American divine, 1718–1744.

LEE, JOSEPH, an American divine, d. 1819.

LEE, NATHANIEL, an English dramatic writer, author of the 'Rival Queens,' &c. Having attempted the stage as an actor without success, he directed his powers to dramatic composition, and produced a number of tragedies. He latterly became insane, and was two years an inmate of Bedlam, died 1692.

LEE, RACHEL FANNY ANTONINA, a lady of fortune, author of an 'Essay on Government,' died 1829.

LEE, RICHARD HENRY, an American Revolutionary statesman, and signer of the Declaration of Independence, was born in Virginia in 1732. After a finished education in England he returned to his native land, at the age of nineteen, and passed the interval between that and his twenty-fifth year, in literary and philosophical studies, when he was elected delegate to the Virginia House of Burgesses, and won for himself at once an eminent position as a debater and legislator. He was appointed in 1764 to draw up an address to the king, and the result was a masterly state paper. In 1774 he attended the first Congress in Philadelphia, as a representative from Virginia, and took an active part in all its proceedings. He was the author of the memorial of Congress to British America, and the

second address of Congress to the people of Great Britain. In June, 1776, he introduced with an eloquent speech the famous measure which declared the colonies free and independent states. In consequence of ill health he retired from public life until 1778, when he was again elected to Congress, and served with his usual capacity and energy for the course of two years. In 1784 he was re-elected member of Congress, and chosen president of that body. In 1786 was a member of the Assembly of Virginia. He sat in the convention which adopted the present constitution, and was subsequently elected a senator of the United States. His public life ended in 1792, and he died in 1794.

LEE, SAMUEL, a nonconf. divine, 1625–1691.

LEE, REV. SAMUEL, D.D., late regius professor of Hebrew in the university of Cambridge, and a great master of biblical and Oriental literature, was originally a poor carpenter, and was born in the neighborhood of Shrewsbury, 1783. He is one of the most remarkable instances on record of perseverance in self-education under the most embarrassing circumstances, rewarded at last by the highest success in the honorable career he had chosen. His principal works are a Hebrew Grammar, a Hebrew Lexicon, and a new translation of Job. He was editor of the Scriptures in the Arabic, Persian, and Malay languages. Died 1852.

LEE, SOPHIA, a novelist and dramatic writer, author of 'The Chapter of Accidents,' and of three stories in the 'Canterbury Tales' of her sister, Miss Harriet Lee, born in London 1750, died 1824.

LEE, THOMAS, the father of the Revolutionary worthies, RICHARD HENRY, FRANCIS LIGHTFOOT, ARTHUR, WILLIAM, and two other sons less distinguished though both of some note, PHILIP and THOMAS, was born in Virginia, became president of the council, and died in 1750.

LEE, THOMAS BLAND, a member from Virginia of the first Congress. Died 1827.

LEE, THOMAS SIM, governor of Maryland, from 1779 to 1783, and in 1792 a member of Congress, and of the convention which formed the constitution. Died 1819.

LEE, WILLIAM, brother of Francis Lightfoot, born in 1773 in Virginia, and sent to London as agent of that colony. While in that city was elected a sheriff in 1773. During the American Revolution was agent of Congress at Vienna and Berlin.

LEECHMAN, W., a Scottish divine, 1706–1785.

LEEM, CANUTE, a *savant* of Norway, 1697–1774.

LEEMPE, J. A. VAN, a Dutch painter, 1664–1720.

LEET, WM., governor of Connecticut from 1676 to 1680. In 1660 he courageously protected Whalley and Goffe, the regicides, who had fled to Connecticut, and were in danger of arrest. He was an Englishman by birth, and came to America in 1637. Died 1683.

LEEUW, G. VANDER, a Dutch painter, 1643–88. His brother, PETER, of the same profession, 1644–1705.

LEEUWEN, S., a Dutch jurist, 1625–1682.

LEEVES, WILLIAM, a country clergyman, and composer of sacred music, author of the air of 'Auld Robin Grey,' 1749–1828.

LEFEBRE, V., a Flemish engraver, born 1642.

LEFEBURE, S., a French engineer, died 1770.

LEFEBURE, L. H., a Fr. botanist, 1754–1839.

LEFEBVRE, A. B., a Fr. engineer, 1734–1807.

LEFEBVRE, FRANCIS JOSEPH, duke of Dantzic, a marshal and peer of France, commander of the imperial guard at the battle of Jena, 1755–1820.

LEFEBVRE, P., a French author, 1705–1784.

LEFERON, J., a French writer on heraldry, 16th century.

LEFEVRE, A. M., a French antiquarian, last century.

LEFEVRE, CL., a French painter, 1633-1675.

LEFEVRE, F. A., a Jesuit and poet, 1670-1737.

LEFEVRE, J., a French astronomer, d. 1706.

LEFEVRE, J., an old chronicler, died 1390.

LEFEVRE, N., a French philologist, 1554-1612.

LEFEVRE, N., a French chemist, died 1674.

LEFEVRE, P. F. A., a dram. au., 1741-1813.

LEFEVRE, R., a celebrated portrait painter, died 1677.

LEFEVRE, T., a French *savant*, 1615-1672.

LEFEVRE DE BEAUVRAY, PETER, author of a 'Dictionary of Historical and Philosophical Research,' b. 1724.

LEFEVRE DE LA BODERIE, WILLIAM, a learned Orientalist, part editor of the Polyglott Bible of Antwerp, 1541-1598. His brother, ANTHONY, an able negotiator, and the discoverer of the treason of Biron, author of an account of his embassies to England, died 1615.

LEFEVRE-GINEAU, LOUIS, professor of natural philosophy and mechanics in the college of France, distinguished also as a politician, and for his share in the introduction of the new system of weights and measures, 1751-1829.

LEFORT, FRANCIS JAMES, a native of Geneva, who became the favorite of Peter the Great, and the founder of the Russian army, 1656-1699.

LEFREN, LAURENCE OLAVESON, a Swedish *savant*, author of 'Discourses in Philosophy and Theology,' 1722-1803.

LEFRERE, J., a French historian, died 1583.

LEGALLOIS, JULIAN J. C., a physician of Brittany, author of 'Exp. on the Principle of Life,' 1775-1814.

LEGARE, HUGH SWINTON, an American lawyer and writer, was born in Charleston, and educated at the university at Columbia, S. C. Commenced his legal studies in his native town, and completed them abroad, in Edinburgh and Paris. He was elected a member of the Legislature in 1820, and attorney-general of South Carolina in 1830. In 1832 was sent as *chargé d'affaires* to Belgium. Commenced his literary life as joint editor with Mr. Elliott of the Southern Review in 1837, and became one of the chief contributors to the 'New York Review,' for which he wrote several learned and classical articles. In 1841 he was appointed by president Tyler attorney-general of the United States, and died in the year 1848.

LEGAUFFRE, A, French jurist, 1568-1635.

LEGAY, LOUIS P. P., a Fr. author, 1744-1826.

LEGENDRE, ADRIAN MARIE, born in Paris 1751, died there on the 16th of January, 1833. A mathematician who would have been at the head of the most illustrious School in modern Europe, had he not possessed as compeers LAGRANGE and LAPLACE. The contributions of Legendre to Analysis, were numerous and important, but it is less easy to give an account of them, as they consist rather of individual achievements in various departments of Science, than in the completion and co-ordination of comprehensive theories. But it may be said of him with perfect justice, that he rarely touched a subject without advancing our knowledge of it, and connecting his name permanently with its progress: we owe him, for instance, the celebrated proposition regarding the *spherical excess* in Trigonometry; and in his memoir on the Orbits of Comets, is the earliest proposal to employ the full method of the *Least*

*Squares*. Legendre's chief works are his *Exercices du Calcul Integral*, in which he first sketched the determination and development of Elliptic Integrals, a subject afterwards treated by him more fully in the *Traite des Fonctions Elliptiques*, &c.; his *Theorie des Nombres*; and his *Elemens de Geometrie*,—a work of high elegance. A translation of this work into English, with important additions by Legendre himself, was edited by Sir David Brewster, and is well known. It attracted, at the time of its publication, considerable notice, by the fresh impulse it gave to discussions on the vexed question of Parallel lines—a subject which at different periods of his life had much occupied M. Legendre. It is certainly not true that the effort of the French Geometer to surmount the difficulty by aid of the mere algorithm of Functions, met with any success, nevertheless, his process, and the criticisms to which it was subjected, seem to lead pretty nearly to the real seat of that difficulty. If a proposition cannot be demonstrated, or is made to lean on assumption or paralogisms, there is no doubt that imperfection exists where there ought to be none. And the imperfection must be either a flaw in the deductive process, or an inadequate statement of fundamental principles,—the *axiomata* not being sufficient to sustain the whole science. There is certainly no flaw in the *logic* of Geometry: defect therefore must exist in the list of axioms. This indeed appears the opinion of all Geometers; but most have fallen into the error of supposing, that the defect necessarily relates, to the subject of that specific proposition, where difficulty first appears. This is in nowise a legitimate inference; and nothing but failure could attend the effort to supply the deficiency by new postulates or axioms *regarding parallel lines*. The human faculties can lay down no axioms regarding *infinity*, and are not entitled to the concession of any postulate. Infinity, in our highest attainable *expression* of it, is simply the negation of finitude; and no qualities can be predicated concerning it, unless they be negations, or the *limit* towards which the qualities of a series of finite forms can be shown to tend. The imperfection of Elementary Geometry cannot, accordingly, have any thing immediately to do with the theory of parallel lines; it merely happens that in our usual systems, the existence of some fundamental defect first appears when that theory is treated of. The defect itself seems to lie in Euclid's inadequate conception of the *necessarily distinctive* nature of two *definite* attributes of geometrical quantity—*form* and *magnitude*. The Greek Geometer did not trace out the manner in which we acquire our notions of these attributes; and he did not therefore recognize it as an axiom, that the attribute of *form* has no dependence on the attribute of *magnitude*. The phenomena of Universal Belief, indeed, amply sustain the proposition—'If any figure exists or is conceivable, it must exist or be conceivable with the same form, whatever its magnitude;' or any other statement, involving the truth, that in our Perception of the Geometrical qualities of an Object, Form alone is definite; Magnitude being indefinite: and an analysis of the process of Perception reveals the root of that belief; the notion of Magnitude involving an estimate of the distance of the object, while the notion of Form is, at its source, independent of every variable quantity. Now, the foregoing axiom, or some one akin to it, is involved in Legendre's *mise en equation*, as well as in the subsequent processes of Euclid himself; and—that step justified—Legendre's process is correct. It does not, however, require aid from the notation or procedures

of Functions, to remove the long known imperfection in Geometry: a judicious use of the principle now referred to, being quite adequate, without our departing from ordinary methods.—Legendre's life was spent in privacy and strenuous labor in the service of Science. He was not a favorite with any of the governments of France; but felt satisfied with the moderate competency that accrued from the application of his attainments. [J.P.N.]

LEGENDRE, GILBERT CHARLES, marquis of St. Aubin Sur Loire, an antiquarian and historical writer, 1688–1746.

LEGENDRE, LOUIS, one of the principal actors in the French revolution, was born at Paris, 1756, and commenced life as a sailor. The year 1789 found him occupied as a butcher, and well prepared by the roughness of his two professions to take a part in popular tumults. He was soon recognized as leader of the people in his own quarter, and greatly distinguished himself at the storming of the Bastille. His influence now became very considerable, and he took an active part in the insurrectionary movements of the 5th and 6th of October, 1789, when the people marched upon Versailles—of the 20th of June, 1792, when they invaded the Tuileries—and of the 10th of August following, when the guard was massacred, and the royal family imprisoned. He acted between Danton and the lower classes of the people as founder of the Cordelier's Club in October, 1789; and it is a singular proof of the savage sincerity which existed between these men, that they covenanted whichever of the two should detect the other in any defection from the popular cause should poniard him. Legendre found his way from the convention into the Committee of Public Safety, and he was the principal speaker in favor of Danton, when accused by Robespierre. The latter easily talked him down, and when Danton was executed, Legendre fawned upon his destroyer until the 9th Thermidor, when he avenged his friend by joining the reaction. He was the chief instrument of the convention in defeating the subsequent attempt of the Jacobins, and finally became a sober member of the council of 500. He died in 1797, and by bequeathing his own body for dissection, made it appear somewhat less wonderful that he should have proposed to cut up that of Louis XVI. among the eighty-six departments of France. [E.R.]

LEGENDRE, L., a French historian, 1655–1733.

LEGER, ANTHONY, a learned protestant divine of Piedmont, 1594–1661. His nephew, JOHN, also a learned divine, pastor of the Walloon church of Leyden, and author of a history of the Vaudoise churches, 1615–1670.

LEGER, FRANCIS BARRY BOYLE ST., a barrister-at-law, known as a fugitive wr., 1799–1829.

LEGER, F. P. A., a Fr. dramatist, 1765–1823.

[Leibnitz's House in Hanover.]

LEIBNITZ, GODFREY WILLIAM; born at Leipzig, 3d July, 1646; died at Hanover, 14th November, 1716: his tomb may be seen at the extremity of the Grand Alley near the gates; it is a small temple,

with the inscription *Ossa Leibnitzi*. There has been but one man in modern Europe who, in the attributes either of universality or intensity of genius, can be named as compeer to the marvellous intellect we are now to contemplate—his compatriot, GOETHE. The sphere of the latter, indeed, lay chiefly within the domain of our human sentiments, and the strifes, the defeats, and victories of Practical Life; nevertheless, across this fundamental diversity, it is easy to recognize a co-ordinate catholicity and force, raising both to conscious and serene supremacy, and stamping them as law-givers. Within the vast regions of speculative Thought, there was no department unvisited by the ever-living activity of Leibnitz, or unilluminated by his brilliancy: nor—in consequence of the very profundity of his conceptions—is there any writer, whose speculations it is more easy to divest of their relation to occasion and time, and present as a contribution to all ages. Jurisconsult, historian, theologian, naturalist, mathematician, metaphysician of the highest order—Leibnitz has left everywhere the firm impress of his all-piercing Intellect, and sleepless industry; there being not more than one of those large ranges of thought, that can well be described and presented now, apart from commemoration of his achievements. A Jurisconsult by early profession and predilection, he descended, like a flash, towards the necessary principles of all Law—and alone in his time, recognized the pre-eminent grasp and philosophy of the Jurisprudence of ROME. A philosophical Jurist, it is the fashion with men of practice and detail, to scorn as no lawyer, but rather as the jurist of the closet or the drawing-room: the industry and accuracy of Leibnitz, however, might well affright the most plodding practitioner; and he showed that the philosopher alone, can attain the faculty to track and interpret those practical labyrinths. We appeal to his *Essay, Nova Methodus Discendæ Docendæque Jurisprudentiæ*, to the *Traite Sur le Droit de Souverainete et d'Embassade*, or to the elaborate *Codex Juris Gentium Diplomaticus*. Solicited by the elector of Brandenburg to prepare a memoir of that rising House—how untiring the energy he displayed! Throwing off in the way of by-play such treatises as the *Disquisitio de Origine Francorum*, the *Accessiones Historiæ* in two vols. 4to, and various pieces in the *Collectanea Etymologica*,—he prepared for the House of Brandenburg, a history from the era of its birth, such as the greatest of the European States might not unjustly envy;—the results of which immense and conscientious labors, are now republishing by M. Pertz. Again, as Naturalist,—with foresight like GOETHE, and a superior method—let his wonderful PROTOGÆA speak for him! Catching apparently, at a glance of the phenomena—unanalyzed as all these then were—the main force of their indications, he seizes firmly the two grand originators of present inorganic forms, viz., the *aqueous* and the *igneous*: and the honor fell to him, first among Europeans, to repudiate the common opinion that petrifications are mere freaks of Nature, but instead, relics of her history. The *Protogæa*, indeed, is rather a sketch than a finished work,—a mode of composing not unusual with Leibnitz; for, although no man was less of a visionary, his conceptions of the attainable extended far beyond what even an age could accomplish. In the *Protogæa*, and wherever he has left his track, his power to discern the extent of any sphere of Thought, and to lay down its grander outlines, seems even more vigorous than his power to fill in details: without such a faculty, indeed, he could not have been the Lawgiver:—over the unparalleled diversity of Ideas, which our modern

world owes to his genius, no intellectual Force could have held sway, unless its instinct of Unity, or its faculty of Generalizing, had been at least as strong as its ambition to acquire. With the exception, perhaps, of the great Name already mentioned, modern Literary History exhibits a grander spectacle nowhere, than the Intellect of this Hanoverian, moving with so supreme a power, through so wide a diversity of regions, and, in its own sovereign fashion, subjecting all to itself.—But we must speak much more in detail, of the Metaphysical, Religious, and Mathematical Speculations of this illustrious Man.—I. The writings and achievements of Leibnitz in Mental Philosophy are great and various. One important work is purely psychological—*Nouveaux Essais sur l'Entendement Humain*. It is avowedly a critique on Locke's *Essay on the Understanding*: and notwithstanding that Reid, Stewart, and Cousin, have since written, it is not overstepping justice to term it the most valuable criticism to which that *Essay* has ever yet been subjected. None of Locke's mistakes regarding the doctrines of Des Cartes, escapes the eye of the German Philosopher; and very few of the corrections which the general views of the Englishman have since received, are not initiated in that remarkable work. Had Mr. Stewart and his immediate predecessors in England, been earlier acquainted with these *Essays*—which are not in the edition of *Dutens*—much of their own exposition would have taken on a mere scientific form. But the main achievements of Leibnitz in this field, transcend the sphere of mere psychology. They are two-fold, and as follows;—FIRST:—Starting from the true Cartesian foundation—avowing that the Human Mind can obtain no conception of Real Existence, save through its intuitions—SPINOZA had recently asked with clear and resolute spirit, what ultimate information reaches us through these intuitions,—what mean we by the Notion of *Substance*, which is the basis of all our ideas of External or Independent Being? Following, unfortunately, not only the *method*, but also the specific psychology of Des Cartes, that eminent Thinker described our primary Idea of Substance, as characterized in the main by the attribute of *Extension*; and in stern logical deduction from this fallacy, he reared his huge, but symmetrical Scheme of Pantheism. Logical to the uttermost, his views took fast hold on Philosophy; nor was the gloomy despotism challenged, until it surrendered and fell at the command of Leibnitz. What,—our greater Thinker inquired afresh,—*what really is our primary Idea of Substance?* What truly is the Notion, which—in virtue of the necessities of our Being—we accept as the foundation of our Ideas of External Existence? Is it, that such existence is mere extension—an *inert* mass, on which changes are impressed, or within which, as mere modifications, they proceed? Or, on the contrary, is not the conception of ACTIVE FORCE, inwoven with it? Can we form a rational conception of any external Substance, unless as an External Energy, which, by its inherent Activities, makes itself known to us? Leibnitz, by simply putting the foregoing question, succeeded in henceforth associating the Idea of Cause, indissolubly with the Idea of Substance: he broke down, at once and for ever, Spinozistic Pantheism: and established the ground of his own scheme of MONADS. It were wrong, perhaps, to speak of the celebrated scheme of Monads as a System properly so called: at all events, it is by our accepting it as an *illustration*, that it most readily becomes intelligible to the English Mind. What know we then of Existence, except that it is a *Force*? What for instance the

Crystal—that 'Geometer of inanimate Nature'—unless an Energy or simple Power, having the capacity to assimilate what is external, and therewith build up a fabric in accordance with definite laws? What the Animal, if not an Energy alike primal and indivisible, unfolding its Nature and attributes, through the forms into which it constrains whatever it assimilates? What is Man—save a loftier MONAS, operating sovereignly on what is around it, challenging

[Tomb of Leibnitz at Hanover.]

its proper sphere, and, so to speak, establishing its proper dynasty? Stretch higher still; what else those worlds, those vast globes swimming in Ether, but Potentates or Primal Faculties; or what those mightier and unseen Intelligences among whom as ministers, the Eternal has apportioned his offices? Repose for a moment under the Idea of the External Universe, according to this conception of it, and say if an illustration could be found, more apt or impressive? No dead Extension, of which the Mind can frame no conception; but, around and over us—beneath our feet in the dust, and aloft through the great vault of Heaven—Energy and Action; Existence synonymous with Force; the shows and forms of Things, but indices of *Powers* that are! That primary notion of Substance—the bridge across which we pass to our conception of Realities,—analyze it profoundly as you will, and you find it represented best by the scheme of *Monads*.—Often than once it has been asserted that the more one gets rid of the mere terms and forms of modern Speculation, the more is one conscious of rising into unexpected harmony with Leibnitz. A truth still more deeply felt, as one analyzes his SECOND great metaphysical conception—his notion, viz., of PRE-ESTABLISHED HARMONY. This very remarkable scheme grew naturally out of that of *Monads*. If Existence as we apprehend it, is the development of *Independent* individual Energies, how comes it that one Energy does not distract or possibly annihilate another, but rather assists it? How are assimilation, intercourse, progress, possible? Is it not simply because the sphere, the necessities, the nature of each *Monas*, are primarily, by sovereign and supremest Wisdom, adjusted to all that environs it? To appreciate these questions aright, let us reflect on Man. The utmost we can predicate of Man is this,—he is a primal Force, building up a wonderful scheme of nerves, and by that instrumentality, holding intercourse with everything external. But how is that intercourse realized? Man receives through these nerves nothing but sensations. No image or direct picture

of anything without, is ever substantially presented to him:—how then, on being aroused by a simple sensation, does the *Monas* read its cause, or touch the great Universe that hems it in? This question reaches the mystery of our *Intuitions*, or that recon-dite and inexplicable Faculty by which we spring from what is FELT to what IS: and by no form of speech can the nature or affluence of that faculty be better indicated, than by the term Pre-established Harmony. We spring towards the cause of sensation, simply because the Soul,—like every *Monas*—is by pre-adjustment, in perfect harmony with all things; and because in the highest stage of self-consciousness, that Harmony is *known*. In ourselves in fact, we possess the germ of all things: the Soul is a glorious microcosm, within which every phenomenon and law, every form and energy, has its correspondent and counterpart: so that, the stroke of an undulation on the ear, the stroke of another on the eye, reveal, beyond doubt or illusion, that wonderful Universe of colors and sounds; so that, at the stroke of another sensation, Space, Time, Extension, Form, Externality—all spring up as by miracle; and so that, those subjective relations or Categories of the Understanding, and those more spiritual Ideas of the Reason, are known to be counterparts of material systems wherein these relations are realized, and of farther off and as yet scarcely descried, pure but real Intelligences. Go to the roots of the mysterious subject, and in something of this sort, all theories of perception and all such philosophies must end. And if this, or aught like it be true, no marvel that the theory of our *Intuitions*—examined apart—should have been found so fraught with difficulty and fertile of doubt. Self-consciousness being the highest and last attainable knowledge; that which lies at the root of our being, is not likely to be discerned, or reduced within logical theme, while culture is only painfully unfolding. To have defined the strict but extensive domain of INTUITION, is, we believe, one of the main glories of KANT: not only, however, need it cause little uneasiness that he accounted so many of those laws and Ideas, *subjective* only; but, it may be asserted, that as Humanity advances, others now but dimly recognized as dreams, will advance through clearer Subjective reality, into fullest Objective distinctness.—II. A very large amount of meditation and personal exertion were given by Leibnitz not only to the subject-matter of RELIGION, but also to the affairs of the CHURCH. We can refer in this place, only to the leading *results* of his Thoughts, and the *spirit* in which he approached such themes. Recognizing through a high metaphysic, the necessary existence of God in his fullest personality, he bows before him as Creator of the sublunary Machine, and as Ruler of Spirits. Because he is a Being of perfect Wisdom, no work of His can be other than perfect; hence, says Leibnitz, the condition of things around us, is the '*best possible*;'—an Optimism with which he endeavors to reconcile the mystery of Physical and Moral Evil, in his *Theodicée*. Evil, he conceives the sign and consequence of *limitation*; and that each *Monas* inferior to the Supreme, *must* experience limitations, simply because it is finite. Whether, by this striking and ingenious scheme, Leibnitz has succeeded better than others, in reconciling with Man's Intellect and Heart, that painful mystery of Evil—that painfulest mystery of Sin—it were beside our purpose at present to inquire. But it is necessary to remark that the optimism of the Hanoverian differs *toto cælo*, from that of Pope and Bolingbroke. According to the 'Essay on Man' the maxim '*whatever is, is best*,' simply represents an

imaginary *co-existence* of all forms and grades of Being, from zero up to Deity ; while Leibnitz strove to demonstrate, that the Universe is a compact Harmony, in which each Being has indeed an independent place, but an independence insured by the necessity of its Existence to the Existence and Life of all others. The two views stand in utter contrast: the one deducing harmony from activity and duty ; the other, identifying *independence* with simple *isolation*.—More important, however, than any attainable positive result on matters so mysterious, appear to us, the Spirit and Method moving these Inquiries. Satisfied that no Faith could be real, or even intelligible, unless its foundations were detected in the Human Reason,—Leibnitz, in this sense, was a *Rationalist*. Attached to the Church, he yet sought incessantly for the *ground* of its Beliefs : and on no occasion did he falter in his adhesion to that law of Human Liberty, which is the source of Toleration. It is needful to keep the foregoing truth in view, to interpret aright the position of Leibnitz with regard to the *affairs of the Church*. Attracted, like every great Mind and Statesman of that time, by the influence of Church questions on the peace and destinies of Europe—he conceived the project of reconciling differences ; and he conducted a remarkable correspondence with *Bossuet* and *Pelisson*, with the view to discern a basis of reconciliation. For once Leibnitz's practical sagacity was in fault :—*Bossuet* soon informed him, that truth belonged to the Church alone ; that the only possible aim of dealing with the Protestants of Augsburg, was that they might recant and re-enter the Church. *Bossuet* had not reached the position of Leibnitz : nor did he care, in political transactions, to acknowledge what he well knew—viz. : that although Religion, like every Transcendental subject, must rest on what 'passes all Understanding,'—even the greatest of its verities can have no hold or standing place, if dis severed from relationship with the Reason of Man. An external Rule in Morality grows into a Principle, only when it has become harmonized with the Moral Nature of the Agent : and so, Transcendental Propositions, are Dogmas only and not Beliefs, until they have possessed themselves of what is universal and inherent in the REASON, which avows adhesion. But between the Mind and all transcendental Truth, there is this natural Harmony ; and on such conviction Leibnitz grounded his hopes. The age of the Revocation of the Edict of Nantes, however, was not—any more than those recent ones through which the world has rolled—an age for 'Religious Union.' To this phase of our Philosopher's activity belongs the work recently published under the title 'A System of Theology, by G. W. Von Leibnitz.' His recent Editor *Guhrauer*, has quite traced the origin of this treatise. Its real title is 'An Exposition by a Protestant, of the Doctrine of the Catholic Church, made with a view to re-establish Unity.' Leibnitz simply desired to express, with that specific aim, the most catholic views then held by the Church.—III. Pass now, however, into an undebateable land. Not one, in which the vast powers of our remarkable Thinker are most conspicuously shown ; but where neither they nor his achievements can be subject of dispute. The epoch we write of, was one of great Mathematicians : but, on the continent, Leibnitz was *Primus inter Primos* ; and this, although he was not a professional mathematician. He did not attain this place, through mere ingenuity or success in the solution of problems ; although in neither, when he pleased, was he ever second ; but through that rooted attachment to Method, which characterized all his

intellectual nature. In Dynamics and Mathematics, his achievements uniformly tended towards the generalization and perfecting of the foremost conceptions floating in his time ; and he cared little for distinction of any other kind. That memorable success of his, which will ever retain his name in the foremost rank of scientific Discoverers, was of this class. We allude, of course, to the *Infinitesimal Calculus* ; the honor of which, it is a signal national misfortune, that the English mathematicians endeavored so vainly to wrench from him. That NEWTON also discovered that powerful method, no Historian of Science can doubt : the regret is, that in course of the association of these Kings and Peers, any persuasion could have induced Newton to question the pretensions of his rival. His *Rival*, we have said : did rivalry really exist ? Not in any true sense. Not in their respective functions ; not in the nature of their respective faculties ; for these were incommensurable. It has been a habit, with writers English and continental, to compare these two vast Intelligences : but they differed, as intense and limited power differs from the glance of an Eagle—surveying the headlands of a Universe. Which Potentate was greatest, it is accordingly not easy to decide. We reverently bend before the Image of the immortal Englishman, piercing to the depths of one universal law of Material Nature : is the spectacle less admirable, of a Mind, contained by no limits, and, upborne by sympathies large and various as the bonds that unite intelligence with matter, penetrating everywhere, and if not always discerning Laws, approaching more nearly to their discovery than any, even of its greatest predecessors ? Dugald Stewart might well and unhesitatingly declare—that Literature, and Science, in their widest significance, gained more by the universality of Leibnitz, than any special subject could have lost through the diffusion of his powers.—The private habits of this illustrious Inquirer, were those of a sedentary student. He mingled freely—personally as well as by correspondence—with all the remarkable men of his time : but his hours were chiefly spent in his chair. He was of small stature, slightly bent : his hand very large, and with small but piercing eyes. So long as Germany values her supremacy in the Empire of Thought—a supremacy that has raised her above both Greek and Roman fame—she will cherish as one of the most precious monuments, that little temple which protects the *Ossa Leibnitzii*. LENNARD, SAMPSON, a companion-in-arms of Sir Ph. Sidney, distinguished as a translator, died 1633.

LENNEPH, J. D. VAN, a D. Orient., 1714-71.

LENNOX, CHARLOTTE, of whose personal history little is known, save that she was the daughter of Colonel James Ramsay, lieutenant-governor of New York, and a youthful widow, distinguished herself as

a novelist and dramatic writer and translator, in the time of Dr. Johnson. She was highly esteemed by her personal friends, Johnson and Richardson, but outlived them, and died in penury in the eighty-fourth year of her age, 1804.

LENOIR, A., a French archæologist, 1762–1839.

LENOIR, J. C. P., a Fr. magistrate, 1732–1807.

LENOIR, N., a French architect, 1726–1810.

LENOIR, STEPHEN, a celebrated maker of mathematical instruments, 1744–1832. His son, P. S. M. LENOIR, accompanied the *savants* in Napoleon's expedition to Egypt, 1776–1827.

LENOTRE, A., a famous gardener, 1613–1700.

LENS, A. C., a Flemish painter, 1739–1822.

LENS, BERNARD, a designer and engraver, flourished in London 1659–1725. His son, of the same name, an engraver and painter of London, born 1680. Another BERNARD LENS, also an engraver, was born at Brussels about 1730.

LENTHAL, WILLIAM, a speaker of the House of Commons in the parliament of Charles I., from which he was dismissed by Cromwell in 1653, but re-elected in the following year, and also in the rump parliament. Born 1591, died after the restoration, when he was pardoned by the king, 1663.

LENTULUS, the surname of a branch of the famous Cornelian family of Rome, the principal of whom are—PUBLIUS CORNELIUS LENTULUS, an accomplice of Catiline, consul 71 B.C., strangled in prison 66. LENTULUS SPINTHERUS, a friend of Cicero, and a partisan of Pompey. CNEIUS CORNELIUS LENTULUS, surnamed Gætulicus, consul A.D. 26. LUCIUS, son of the latter, put to death for conspiracy in the reign of Caligula.

LENTULUS, a supposed proconsul of Judæa, to whom a letter, describing the Saviour, has been attributed, but which is pronounced a fabrication.

LENTULUS, a mimic, or comedian, 1st century.

LENTULUS, C., a German *savant*, 17th cent.

LENTULUS, CÆSAR J., a Swiss officer in the service of Austria, 1683–1744. His son, R. SCAPIO LENTULUS, distinguished in the seven years' war, 1714–86.

LENZ, C. G., a German *savant*, 1763–1809.

LEO, a disciple of Plato, killed 350 B.C.

LEO, archbishop of Thessalonica, 9th century.

LEO, an ecclesiastic and historian of Ionia, 10th century.

LEO, 'the grammarian,' one of the authors of the Byzantine History, began by Theophanes, wrote his part about the year 1013.

LEO, I., pope of Rome in the age of Attila, and a saint of the Roman calendar, author of letters, sermons, &c., and distinguished by the surname of 'Great,' reigned 440–461. LEO II., who introduced the custom of sprinkling with holy water, and is also acknowledged a saint, reigned 682–683. LEO III., re-established, after a conspiracy, by Charlemagne, whom he crowned emperor, 795–816. LEO IV., who was principally engaged in restoring the city, and securing it against the Saracens, 847–855. LEO V., elected, and deposed, and died in prison, within a few weeks, in 903. LEO VI., who is also believed to have died in prison, after reigning about six months, in 928. LEO VII., famous as a disciplinarian, and an advocate for the marriage of priests, 936–939. LEO VIII., whose reign was one long scene of political disturbance, 963–965. LEO IX., a saint of the Roman calendar, distinguished by his efforts to reform the clergy, and for his capture by the Normans, who defeated him near Beneventum, born 1002, reigned 1049–1054. LEO X.; see next article. LEO XI., a pope of the Medici family, like

LEO X., succeeded and died a month after his election in 1605. LEO XII., whose reign was disturbed by the Carbonari and other secret societies, and who was chiefly occupied with the internal police of his states, and political negotiations, born 1760, reigned 1823–1829.—An anti-pope, named Leo, contested the papacy with Benedict VIII., under the name of Gregory VI., in 1012.

LEO X., POPE. GIOVANNI DE MEDICI, second son of Lorenzo the Magnificent, was born at Florence on the first day of December, 1475. He was early destined to the church, received the tonsure when but a boy seven years old, and the year following got several ecclesiastical preferments. At the age of eleven he was made a cardinal by the title of S. Maria in Domenica. Three years afterwards he took up his residence in Rome as one of the princes of the church, but on the election of Alexander VI. he was obliged to retire to Florence. After some turns of fortune, in consequence of the broils among the various states of Italy and France, he was raised to the popedom in 1513, under the name of Leo X., and crowned with unusual pomp and ceremony as the successor of the Galilean fisherman. Several acts of political generosity graced the commencement of his reign. His great desire was to re-establish the peace of Europe, and he entered into treaty with Louis XII. He also renewed the sittings of the famous Lateran council, and brought them to a conclusion in 1517. Afterwards he joined the league against Francis I., but ultimately entered into a concordat with him. As the tide of policy ebbed and flowed, he made occasional attempts to rouse the Swiss against the French king, leagued himself with Maximilian and Henry VIII. of England, and at a future period, and for the same purpose, with Charles V. in 1521. A formidable conspiracy on the part of some of the cardinals against him was discovered in 1516, and Cardinal Petrucci, who was at the head of it, was condemned and strangled in prison. In self-defence Leo created at this period in one day thirty-one new cardinals. He carried the glory of the Roman see to a pitch of unparalleled splendor, and the grateful citizens of his capital erected a statue in his honor. His heart was set upon the defeat of the Turks, and he endeavored to combine the princes of Europe against them. The project which seems always to have occupied his mind, was the expulsion of the French power from Italy, but in the midst of his triumphs at Milan and Parma, he suddenly died, 1st December, 1521, not without great suspicion of having been poisoned. The completion of the church of St. Peter was another of his cherished plans, and the papal indulgences issued to raise the necessary funds, created or fostered that discontent that led in a short time to the reformation in Germany. Leo was at first wishful of gentle measures toward Luther, but ultimately published the famous bull which Luther so publicly and contemptuously burnt before the gate of Wittemberg. Though the brief pontificate of Leo was so unsuccessful, his patronage of literature and the arts was munificent, as was exhibited in his restoration of the Roman academy, his founding of the Greek institute and the establishment in Rome of a Greek press, his encouragement of search after Eastern manuscripts, his handsome treatment of men of letters, such as Musurus, Ariosto, and Vida, his augmentation of the library of the Vatican, and his propitious employment of Raffaele the painter on a variety of immortal works. As the head of an Italian ducal house, Leo would have eclipsed all his

compeers. Though his character and actions did not in all respects comport with the idea of his being visible head of the church, yet he is better than very many of his predecessors. His talents were good, though his erudition was not profound. His tastes were fine in the arts, but his politics were crooked, and his diplomatic schemes had more cunning than wisdom about them. In all his plans for the pope-dom, he never forgot the advancement of the house of the Medici. Apart from his ecclesiastical status, he must be regarded as one of the zealous and successful co-operators in the revival of letters. [J.E.]

LEO I., emperor of the East, surnamed 'the Elder,' and 'the Great,' was a Thracian of obscure birth, and succeeded to the throne of Constantinople 457. After restoring peace to the empire, which had been rent by religious quarrels, and devastated by the barbarians, he died 474. LEO II., surnamed 'the Younger,' grandson of the preceding, succeeded him, and is supposed to have been poisoned ten months afterwards, 474. LEO III., surnamed 'the Isaurian,' distinguished by his successes against the Saracens, reigned 717-741. LEO IV., grandson of the latter, and husband of the famous Irene, reigned 775-780. LEO V., surnamed 'the Armenian,' dethroned Nicephorus, and reigned for seven years, disturbed by the inroads of the Bulgarians, and the religious struggles of the image-worshippers, 813-820. LEO VI., surnamed 'the Philosopher,' distinguished himself by the defeat of the Hungarians; but sustained a disastrous war with the Saracens, who at last defeated him, 886-911. He was succeeded by his brother, Alexander, and his son, Constantine VI., and is the author of an esteemed work on Tactics.

LEO I., prince or king of the Armenians, established in Cilicia, began to reign 1123, was taken prisoner by John Comnenus in 1137, and died in prison 1141. LEO II., called 'the Great,' grandson of the preceding, obtained the permission of the emperor, Henry VI., and the pope, Celestine III., to take the title of king, and reigned 1185-1219. LEO III., who greatly aggrandized his kingdom, reigned 1269-1289. LEO IV., succeeded 1305, and was dethroned and slain by a Mongul general 1308. LEO V., who saw his kingdom devastated by civil wars, and the invasion of the Mamelukes and Turcomans, reigned 1320-42. LEO VI., proclaimed king 1361, was chased from his kingdom by the sultan of Egypt 1375, and, retiring into France, died there 1393.

LEO, THE HEBREW, a cabalist of the 15th cent.

LEO, JOHN, surnamed 'Africanus,' a traveller and geographer, born of Moorish parents, who was converted to Christianity by Leo X., and, becoming an Italian scholar, translated into that language his 'Description of Africa,' originally written in Arabic, died about 1526.

LEO, LEONARDO, an eminent musician, regarded as one of the greatest opera composers of Naples, 1694-1745.

LEO OF MARSI, a chronicler of the 12th cent.

LEO OF MODENA, a learned rabbi, died 1654.

LEO OF ORVIETO, an Italian chronicler, 12th c.

LEO, PILATUS, first professor of Greek at Florence, who lectured there about 1360.

LEON, DIEGO, a Spanish general and partisan of Espartero, born 1804, executed 1840.

LEON, F. L. DE, a Spanish poet, 1527-1591.

LEON, P. L. DE, a Spanish historian, 16th cent.

LEONARD, N. G., a French poet, 1744-1793.

LEONARD, ST., an anchorite of Limousin, founder of a monastery near Limoges, died 559.

LEONARDI F., a Venetian painter, 1654-1711.

LEONARDI, J., a religious founder, 1540-1609.

LEONARDO, A., a Spanish painter, 1580-1640.

LEONARDO, J., a Spanish painter, 1616-1658.

LEONE-Y-GAMA, ANTONIO, cele. for his extensive knowledge of Mexican antiquities, died 1802.

[Leonidas, from an antique bust.]

LEONIDAS, the *first* of the name, king of Sparta, immortalized by his glorious defence of the pass of Thermopylæ against Xerxes, reigned 491-480 B.C. The *second* of the name began to reign B.C. 257, was banished, and replaced by Cleombrotus 254, recovered his throne 239, died 238.

LEON-LEAL, F. DE, a Spanish painter, 1610-87.

LEONTIUS, an ecclesiastical historian, 6th cent.

LEOPARDI, A., a Venetian architect, d. 1510.

LEOPARDI, J., an Italian poet, 1793-1837.

LEOPOLD, duke of Lorraine, father of Francis I., emperor of Germany, was the son of Charles IV., and was born 1679. He was restored to his dukedom, of which Louis XIV. had despoiled him, by the peace of Ryswick, 1697, and was married to Elizabeth of Orleans, niece of Louis XIV. Died 1729.

LEOPOLD OF AUSTRIA, elected duke of Bavaria, after the death of Henry the Proud, 1138-42.

LEOPOLD, margrave of Austria, and a saint of the Roman calendar, succeeded 1096, married Agnes, sister of the emperor Henry V., and died 1139. He was canonized 1485. LEOPOLD I. or II., surnamed 'the Glorious,' third son of Albert I., succeeded as duke of Austria 1308, and compelled Louis of Bavaria to divide the empire with his brother, Frederick; died 1313. LEOPOLD II. or III., surnamed 'the Courageous,' born about 1350, took a part in the Italian wars, and was slain in a battle with the Swiss, 1386.

LEOPOLD I., emperor of Austria, born 1640, succeeded his father, Frederick III., 1658, died 1705. Having defeated the Turks in 1664, the commencement of his reign was signalized by a truce of twenty years which he concluded with them. From 1672 to 1679, he sustained a disastrous war with Louis XIV., which was then concluded by the peace of Nimeguen. A truce of twenty years with Louis XIV. did not prevent a renewal of hostilities in 1688, which were terminated by the peace of Ryswick in 1697. During this latter interval, the Hungarians, headed by Tekeli, and supported by the Turks, rose in arms 1677, and even besieged Vienna, which was relieved by Sobieski and the Poles 1683. The other principal events of his reign were the elevation of

Hanover into an electorate 1692, of Brandenburg into a kingdom 1702, and a new war with the Turks, who were conquered by Prince Eugene 1697.

LEOPOLD II., emperor of Germany, second son of Francis I. and of Maria Theresa, was born 1747, and succeeded his brother, Joseph II., 1790. The events of his reign were some successes obtained over the Turks, a quarrel with Prussia, terminated by the treaty of Sistow 1791, the troubles in Belgium 1790, and the famous declaration of Pilnitz against the French revolution. He died March 2, 1792, and was succeeded by his son, Francis II.

LEOPOLD, A. D., a Germ. author, 1691-1753.

LEOPOLD, C. G. DE, a Swed. poet, 1756-1829.

LEOPOLD, G. A. S., a Germ. writer, 1755-1827.

LEOWITZ, C., a Bohem. astrologer, died 1574.

LEPAUTRE, ANTHONY, a French architect, 1614-1691. His brother, JOHN, a designer and engraver, 1617-1682. PETER, son of Anthony, a sculptor, 1659-1744.

LEPAYS, R., a French poet, died 1690.

LEPEKHIN, J. I., a learned Russian, 1739-1802.

LEPELLETIER, C., a Fr. theologian, died 1743.

LEPELLETIER, C., a Fr. financier, 1683-1689.

LEPELLETIER, J., a French *savant*, distinguished in art, languages, mathematics, medicine, and alchemy, 1633-1711.

LEPELLETIER-DE-SAINT-FARGEAU, LOUIS MICHAEL, one of the old French noblesse, and a deputy of his order to the estates-general in 1789, was born in Paris 1760, and inherited a large fortune from his parents. On the 4th of August of the year first mentioned, he voted for the abolition of feudal privileges, and, what is more, carried the decree into full effect in his own person. When the estates-general resolved itself into a constituent assembly, St. Fargeau joined the patriots of the left, and was returned again to the national convention in 1792. His votes in the process against the king had great influence over the court, and led immediately to his own death. On the eve of the king's execution, and before the votes were summed up, St. Fargeau had stepped out for refreshment, and was in the act of paying the restaurateur, when a stranger, who proved to be one of the king's body guard, suddenly approached and asked him if he were not Lepelletier who had voted for the king's death? he replied 'yes,' and added that he had voted as his conscience had dictated. 'Scélérat,' exclaimed his interrogator, 'voilà ta récompense!' and instantly run him through with a sword which he had concealed under his cloak. Lepelletier St. Fargeau was the author of several works on law and politics, and of a life of Epaminondas. [E.R.]

LEPIDUS, MARCUS ÆMILIUS, the Roman triumvir, had been ædile, B.C. 52, prætor 49, and consul with Cæsar 46. The latter, when he became dictator, made Lepidus general of the cavalry, and, on Cæsar's death, he divided the empire with Octavius and Mark Antony. At first he had the whole of Spain and Gallia Narbonensis, but on the defeat of Brutus and Cassius, he was compelled to exchange those provinces for Africa, which left him without any real authority in the state. He was included in the triumvirate of B.C. 37, but was deserted by his troops, and banished to Circeii by Augustus. Died 12 or 13 B.C.

LEPRINCE, A. X., a Fr. painter, 1799-1826.

LEPRINCE, J., a French painter, 1733-1781. His sister, MARIE LEPRINCE DE BEAUMONT, a writer of works for young people, 1711-1780.

LEROUX, J. J., a Fr. med. writer, 1749-1832.

LERY, J. D., a French navigator, 1534-1611.

LE SAGE, ALAIN, born in 1668, was the son of a lawyer in Brittany, and, being left an orphan in childhood, lost his patrimony through the carelessness of his guardian. In 1692, after having studied at the Jesuit college of Vannes, he came to Paris, where he was admitted as an advocate, but soon betook himself exclusively to literature. His career was for many years very obscure; few of his plays were successful, and he long wrote for the small theatres only. Whatever the reason may have been, he received no share of the patronage which the government lavished on many men who were much inferior to him; but he was well received in good society. Entering on the study of Spanish literature, and using the comedies of that language with ability, but with little success, in his plays, he turned the Spanish models to a more fortunate use in his comic novels. Some of these are among the liveliest and wittiest of their class, and admirable as cool and observant dissections of human weakness. The earliest of them, appearing in 1707, was 'The Devil on Two Sticks,' (*Le Diable Boiteux*), avowedly a continuation of a Spanish story. His most celebrated work, 'Gil Blas,' though it has been charged with plagiarisms, seems to have really been as much his own in design as it certainly was in those details which constituted its eminent merit. In 'The Adventures of Guzman D'Alfarache,' he confessedly borrowed largely from a Spanish original. Le Sage died at Boulogne in 1747. [W.S.]

LESAGE, G. L., a learned physician, 1724-1803.

LESCAILLE, JAMES, a Dutch printer, who dist. himself as a poet, 1610-1677. His daughter, CATHERINE, a poetess and dramatic writer, 1649-1711.

LESCAN, J. F., a Fr. mathematic., 1749-1829.

LESCARBOT, MARC, author of 'Histoire de la Nouvelle France,' 1612.

LESCURE, L. M., a French royalist, 1766-93.

LESKO, the names of several dukes of Poland, the best known of whom are LESKO IV., reigned 892-913. LESKO V., 1194-1202. LESKO VI., 1279-98.

LESLEY, A., a Scottish antiquary, 1694-1758.

LESLEY, JOHN, bishop of Ross, in Scotland, celebrated as the advocate and ambassador of Mary Stuart, in whose defence he wrote several elaborate works, born 1527, retired to the continent in 1573, became bishop of Constance 1593, died in the monastery of Guirtenberg, near Brussels, 1596.

LESLIE, JOHN, a native of Scotland, who was successively bishop of the Orkneys and of Raphoe and Clogher in Ireland, and is distinguished as a linguist; he died more than a hundred years old, 1671. His son, CHARLES, author of the famous books, entitled 'The Snake in the Grass,' and 'A Short and Easy Method with the Deists,' distinguished also by his adherence to the Pretender, in consequence of which he lost all hope of preferment in the church, was born in Ireland about 1650, and died 1732.

LESLIE, SIR JOHN, was born at Largo, in Fife-shire, 16th April, 1766, died 3d November, 1832, at his seat at Coates. Leslie's life was an active one, and he rose to a considerable place in science. He succeeded Professor Playfair in the chair of mathematics in the university of Edinburgh, and, on the death of that eminent man, he again succeeded him in the chair of natural philosophy. The contributions of Sir John Leslie to British science were various; he occupied himself with the experimental theory of Heat, and produced, as his own, several delicate instruments, such as the differential thermometer, — his claim to the invention, however, has been strongly contested. It were not

easy to challenge for him very sound judgment or much impartiality in his philosophical estimate of other Inquirers; nor was his style of exposition, written or oral, remarkably well suited to a philosophical subject. Still, he had the faculty of invention, and a dash of what, in one sense, may be termed genius. His knowledge was extensive; his reading having been vast, and his memory remarkably tenacious. Leslie at one time obtained a singular popular repute, from the effort of the Church, to hinder his induction as professor of mathematics. The hostile charge was that of some form of infidelity, based on his espousal of Hume's views as to the Idea of *Necessary Connection*. The interference failed, and certainly was injudicious. It is not often that inferences as to practical life or religious sentiment, based on speculative views, have been approved by succeeding times. If Leslie's doctrine was incorrect under one point of view, that of his opponents was quite as untenable, viewed from another. The controversy, however, gave rise to many ingenious pamphlets, among which was the *Essay on Cause and Effect*, of the late Dr. Thomas Brown. [J.P.N.]

LESSER, AUGUSTIN CREUSE, Baron De, a dramatic author and man of letters, 1771-1839.

LESSER, F. C., a German naturalist, 1692-1754.

LESSING, GOTTHOLD EPHRAIM, the son of a Lutheran pastor, was born, in 1729, at Kamenz, in Upper Lusatia. In 1746 he entered the University of Leipzig, where he continued to prosecute his literary studies with extraordinary activity, and in many directions, but showed a strong disinclination to attach himself to any professional pursuit. The dissatisfaction of his father, who was both a poor man and severely orthodox, was increased by the intimacy which the youth contracted with players, and by his writing one or two little theatrical pieces. After being recalled home, and visiting Berlin, he completed his academical course at Wittenberg. In 1753 he cast himself fairly on the world as a man of letters, taking up his abode at Berlin, where he remained for seven years. Even in this opening stage of his career, he firmly established his position as the earliest and most energetic of the pioneers who prepared the way for an original development of German literature. His chief friends and coadjutors at this time were the philosophical Jew, Moses Mendelssohn, and Nicolai, the author and bookseller. With these he co-operated in laying the foundation of criticism in Germany, by the '*Bibliothek der Schönen Wissenschaften*,' and the '*Literatur-Briefe*.' His studies in Italian, Spanish and German, directed especially to the drama, furnished him with abundant materials for his denunciation of the dryness and formality of the French taste, which then prevailed among his countrymen. His own imitation of the English drama, having no higher model than Lillo, produced at first nothing better than his domestic tragedy in prose called '*Miss Sara Sampson*.' About this time, however, he partly composed, also in prose, his vigorous and impressive tragedy of '*Emilia Galotti*,' a modern adaptation of the story of Virginia. To this period likewise belong his '*Fables*,' which, both the metrical and the prose ones, are very striking pieces of reflection, and, like all his other writings, models of clear and symmetrical style. For five years, from 1760, he lived at Breslau, as secretary to the commandant. Here he seems to have been less steadily industrious than before, mixing a good deal in society, and having for a time a strange fondness for the hazard-table. But, at Breslau, among his military acquaintances, he planned and composed his spirited drama, '*Minna von Barnhelm*.'

Here also the study of the arts of design, to which, as exhibited in the master-pieces of Greece, Winkelmann was now inviting attention, led him to begin the composition of that which is the most valuable of all his works, '*Laocoon*,' or an '*Essay on the Limits of Poetry and Painting*,' which was published in 1766. The title of this admirable work indicates but imperfectly its commanding scope. The comparison instituted is between Poetry on the one hand, and the Arts of Design on the other; and between the several Fine Arts (Poetry included), as contrasted with each other. The purpose of all these arts being assumed to be substantially the same, those differences of process are indicated, which arise between the arts by reason of the differences in their instruments. This, like all Lessing's other philosophical speculations, is merely a fragment, a collection of hints, not the exposition of a system; but the principles which he has here established go farther towards founding a just theory of literature and art, than any other æsthetical work that could be named. For some years after leaving Breslau, Lessing led a shifting and uncomfortable life. His longest residence was at Hamburg, where he became, by necessity, not from choice, director of a theatre set on foot by some sanguine lovers of the drama. One satisfactory fruit of this abortive undertaking, was the series of masterly criticisms on celebrated plays, which he called the '*Hamburgische Dramaturgie*.' In 1770, after marrying the widow of a Hamburg merchant, he removed to Wolfenbüttel, being appointed keeper of the library. Here he spent the last eleven years of his troubled life, but not in peace. He was, indeed, meritoriously active and useful in discharging the duties of his office; but he became entangled more hotly than ever in those theological controversies, which he seems to have entered at first only as the champion of literature and the drama, but in which he now became the assailant in his turn. His deviations from orthodox belief were denounced loudly on his publishing a piece called '*Fragments of an Anonymous Writer*,' which he asserted to have been discovered in manuscript in the library, but which is confidently alleged to have been composed by himself. His dramatic poem, also, '*Nathan the Wise*,' published in 1780, while it is fine and interesting as a series of epic pictures and solemn thoughts, is at least equivocal in its religious aspect. Lessing's last work was his short treatise on '*The Education of the Human Race*.' A voluminous correspondence, and many critical papers and notes, are brought together in the collected editions of his works. After much sickness and vexation, he died at Wolfenbüttel in 1781.—[W.S.] At the date of Lessing's birth, it could hardly be said that a national German Literature existed, nor had those peculiar philosophic and critical movements begun which have now long inspired its peculiar life. But the period was auspicious for a revival. Frederick the Great had just burst the limits that restrained the political influence of Northern Germany, and by a series of exploits unparalleled in modern warfare, was evoking the heroic in Teutonic genius, and teaching his people self-respect and self-dependence, by his vigorous compulsion of Europe to recognize Prussia as one of her integrant nations. Lessing was the Frederick of Thought. By nature wholly Teutonic, he too sounded a trumpet call; and with a restless energy in nowise inferior to Frederick's, an activity and plenitude of resources that overlooked no opportunity, he dashed, now into this region of dormant literature, now into that unpenetrated department of philosophy, until he had laid the founda-

tion of almost every conquest that has illustrated the recent ever-memorable career of his kindred. The earliest efforts of this remarkable person lay in that direction in which he accomplished one of his latest and greatest triumphs, viz.: Literary Criticism and *Æsthetics*. His *History of the Theatre*; on *Letters on Literature*; his *Life of Sophocles*; his *Dramaturgy*; his *Fables* perhaps, and his *Theory of the Apologue*, belonged to a career which culminated in the *Laocoon*,—that great classic treatise on the respective limits and characteristics of *Painting and Poetry*. Without forgetting the immense debt that must ever be held due to Winckelmann, it may be averred with justice, that in Lessing's *Laocoon*, all those rich thoughts and aspirations concerning Art, which so enrich modern Teutonic speculation, find their natural root. Striking at once at the principle of distinction, he establishes, that as the arts of Design labor for the gratification of the outward sense, their proper sphere is within the *Beautiful*; whereas Poetry and written thought, appeal to the *Imagination*, which can reconcile itself even to deformity. 'The consequences,' says Goethe, 'of this splendid thought were illumined to us as by a lightning flash; all the criticism that had hitherto passed sentence was thrown away like a worn-out garment; we thought ourselves redeemed from all evil, and fancied that we might venture to look down with some compassion upon the otherwise so splendid sixteenth century, when, in German sculptures and poems, they knew how to represent Life only under the form of a well-bedizened fool, Death under the misformed shape of a rattling skeleton, and the necessary and accredited evils of the world under the image of a Devil in Caricature.'—Lessing, however, did not confine himself to precepts, he led the way by his own admirable dramas, to the practical revival of that highest and profoundest Art. Beginning with a drama of common life, *Miss Sarah Sampson*, he entered a vigorous protest against the frivolities of the super-classic school, and asserted the true function of the Drama. Next and far more perfect, *Minna Von Barnehelm*; then his still greater work, *Emilia Galotti*; and he crowned his triumph by the incomparable *Nathan the Wise*. Incapable of their reach of imagination, and by no means gifted with the amazing penetrating power of a Shakspeare or a Goethe, nevertheless, Lessing has been surpassed by few in that species of Drama, named the moral Drama—rather one, which, in the largest sense, aims at manifesting systematically, through the Dramatic form, the sphere and aspects of some great principle. His analytic faculty was of the first order; his conceptions rarely equalled in definiteness; and his mode of expression especially excelled in chastity, energy and precision. Who has read *Nathan*, and can again lose sight of him? Few creations surpass this Hero, in the qualities of repose and elevation; nor do some of the inferior characters fail to attract corresponding admiration. It was Lessing's last great work—the song of the Swan: but its accents have provoked more than an empty and dying echo; they have raised many hearts to the highest conception we can form of the virtues of Charity and Tolerance. The intellect and influence of Lessing extended far beyond the range of *Æsthetics* and the Drama; nor perhaps, has his sway over Germany, or rather his profound appreciation of its tendencies, and foresight of their effects, more striking illustration and record, than in the celebrated *Wolfenbützel Fragments*. The work of Reimarus, although shaped and annotated by Lessing,—these remarkable writings first stirred that spirit, which issued in

the memorable *critical* and *rational* schools of Germany. In these *Fragments* appear the first formal attack on the then unquestioned tenet of Protestant Churches—the absolute authority of the Scriptures. These writings are declared to be mere Historical documents, which, like all other such documents, must be subjected to the test of criticism: it is asserted that the foundations of Christianity are not solely in the gospels—which may be modified by Inquiry, their text altered, and much of it repudiated as spurious: Christianity all the while not losing its truest foundation, which is in the heart and the reason of Man. It were, of course, quite out of place to criticise here, favorably or unfavorably, these Wolfenbützel propositions: the important point is, that under the conduct of Lessing, they foreshadowed, for good or for evil, so much of the future of German thought:—how new they were at the time, appears in the reclamations of Pastor Goeze of Hamburg, who dealt with them after the manner of Anathema. Lessing followed up with his tract on *The Education of the Human Race*, in which he attempts to shadow out more definitely, the probable future relation of Humanity to the Christian Revelation.—It is more difficult to state with precision the attitude of Lessing towards speculative philosophy properly so called. Practical as he was and earnest, he thought and speculated chiefly in reference to practical problems and interests; nevertheless, the speculative schemes of his great predecessors could not be indifferent to him. *Jacobi*, after Lessing's death, disclosed in certain letters to Mendelssohn, the particulars of a private conversation, tending to establish that his friend had slid into the pantheism of Spinoza. The reporting of such conversation must ever be protested against, as breach of confidence; and it is almost as certainly a source of misrepresentation;—what thinker does not, in the frankness and confidence of intercourse, give utterance at times to momentary impressions, as if they were his abiding ones? This much is unquestionable—Lessing has not written one solitary word inconsistent with a firmest persuasion in the Personality of Man. This great writer, indeed, belongs to a class of minds very easily misapprehended—minds, which none but others in so far akin to them, can rightly understand. Oftenest in antagonism, or in a critical attitude, thinkers like Lessing do not generally express their *whole* thought; they dwell only on the part of the common thought, from which they dissent. So far, however, from being ruled by mere negations, it is certainly more probable that their dissent arises from a completer view and possession of truth; and that their effort is confined to the desire to separate truth from error, or, at all events, from non-essentials. Be that as it may, the writer of whom we speak, stands fitly as the herald of the modern era in his native land:—he polished his mother tongue and made it classical; and as we have seen, he initiated several of the more remarkable movements for which our Teutonic brethren are now famous. His life was that of a brave, unbending literary man. Not exempt from the disasters of such a life, he was not exempt from all its errors: but even amidst error he possessed himself,—he did not resign the freedom, or compromise the dignity of the Thinker. LEUWENHOECK, ANTOINE, a celebrated naturalist, was born at Delft in 1632. He died in 1723. His first title of distinction was derived from the superior skill he manifested in cutting glasses for microscopes and spectacles. He afterwards became more famous for the use he applied the microscope to. His whole life, which was a long one, was devoted to making anatomical observations and experiments, and researches in natural history; and his numerous papers in the Philosophical Transactions of London show his industry and perseverance. His observations upon the continuous nature of arteries and veins; upon the composition of the blood; upon the structure of the crystalline lens of the eye; upon the spermatic animalcules; and the history of some of the more minute animals as observed by the microscope, have established his reputation as an accurate observer, and diligent inquirer into the secrets of nature. His fame during his lifetime had spread

far and wide; and when Peter the Great of Russia passed in 1698 by Delft, Leuwenhoeck was expressly invited to an interview with his majesty, and delighted him by exhibiting through his microscope the circulation of the blood going on in the tail of an eel.

LEYDEN, JOHN, a Scotch physician, eminent as a linguist, antiquary, and poet, 1775-1811.

LEYDEN, JOHN OF, a famous leader of the anabaptists, was a tailor's apprentice at the Hague at the close of the 15th century, and his proper name was John Boccold, or Bockels. The events which have handed his name down to posterity form a bloody episode in the history of the Reformation.—The movements of Luther had been preceded by political and social commotions in Germany, and as it gained strength, the spiritual freedom which it promised was carried down into these disaffected elements. Political sects everywhere sprung up, who grounded their dogmas in the religious principles of the reformers, and raised the cry of equality against the princes and nobles who had so long oppressed them. The ignorant, the poor, the hopeless, the turbulent, swelled these dangerous bodies to scores of thousands, and they were only vanquished in one principality to rise with fresh vigor in another, and begin a new reign of terror under other and more daring leaders. One such was John of Leyden, who began to acquire influence among them in 1533, about which time he associated himself with the anabaptist Mathison. The name of the party was derived from the alleged necessity of rebaptism into the church, (that of infants being held invalid,) and as the church with them *was also the state*, this baptism became as the oriflamme of an armed propaganda which threatened every form of existing order. In 1534, the city of Munster was divided into hostile camps, the anabaptists having become so numerous as to proclaim a new religious and political constitution. The prince-bishop was soon deprived of all authority, and collecting his adherents around him, and adding to their number troops of mercenaries, he laid regular siege to the 'New Israel.' Meanwhile, John of Leyden and his wife had been proclaimed king and queen, and for more than six months their devoted followers defended the city. At length, in June, 1535, the troops were admitted by treason in the stillness of night, but not to an easy conquest. Possession was disputed street by street, and the greater number of the anabaptists perished in the combat—the city afterwards being delivered up to pillage for eight days. John of Leyden, and some two of his accomplices, were taken alive, and executed in January, 1536, with the cruelty usual at that period. The anabaptists accepted the free principles of the Reformation without the Bible, in place of which they laid claim to particular inspiration. Like the Quakers, their more peaceful successors, they were the subjects of preternatural convulsions and visionary hallucinations, which often ended in frenzy and demoniac possession. LIGOZZI, J., an Italian painter, 1543-1627.

LIGUORI, A. M. DE, an ascetic wr., 1696-1787.

LILBURNE, JOHN, a famous English republican, whose merits far surpass the reputation in which he has been held, was born of an old family in the county of Durham, 1613, and, after receiving a common education, became a clothier in London. He was thoroughly imbued with the temper of the times, and was first known to the public through a prosecution of the Star Chamber for complicity with Bastwick. His intrepid defence of his rights as a free-born Englishman, before that dreaded bar of the high church party, gained for him the familiar appellation of 'free-born John.' He was condemned to receive 500 lashes at the cart tail, and to stand in the pillory; but his spirit was only aroused by this disgraceful punishment, his name became the watch-

[John Lilburne, from a contemporary print.]

word of a large and tumultuous party, and the House of Commons voted the sentence 'barbarous and illegal.' Such a man was not likely to be 'slow' when active measures were resorted to by the parliament. He fought bravely at Edge Hill and Marston Moor, and became lieutenant-colonel under the earl of Manchester; for an assault upon whose character he suffered imprisonment, and underwent many hardships. His chief fault was the want of a more statesmanlike spirit, so that he was continually sinking from the leading position he might have held, in virtue of his integrity and intrepidity, to that of a demagogue. He boldly accused Cromwell and Ireton of treason, and the former tried, in vain, to make him comprehend the real situation of affairs, and seems at last to have given him up in despair, and to have prosecuted him from necessity, while he valued his steady qualities and incorruptible nature. Reduced to quiescence under the iron hand of the Protector, his political enthusiasm subsided into the religious, and the famous John Lilburne became a preacher among the Quakers. Died 1657.

LILIENTHAL, M., a German divine, 1686-1750.

LILIO, LUIGI, in Latin, LILIUS, an Italian mathematician, author of the plan for reforming the calendar effected by Gregory XIII., died 1579.

LILLO, GEORGE, an English dramatic writer, famous in the delineation of domestic tragedy, author of 'George Barnwell,' 'Fatal Curiosity,' 'Arden of Faversham,' and other pieces. Lillo carried on the business of a jeweller, and was a man of unblemished character, 1693-1739.

LILLY, JOHN, a dramatic writer, author of 'Endymion' and 'Midas,' acted before Queen Elizabeth, and of a famous pamphlet, entitled 'Martin Mar-Prelate,' about 1553-1600.

**LILLY, WILLIAM**, whose reputation as an astrologer raised him to considerable importance at the time of the parliamentary wars, was born in Leicestershire, 1602, and was in service in London as a bookkeeper, when his master died, and gave him the opportunity of marrying his widow. This lady possessed a small fortune of about £1,000, and dying six years afterwards left him master of considerable leisure, and of the art of invoking spirits, which he derived from the instruction of Evans, a Welsh clergyman, and from the study of Cornelius Agrippa. The first public trial of his art, however, was an attempt to discover a buried treasure in the cloisters of Westminster Abbey with the use of the divining rod, the chief movers in which were Ramsay and Scot. The actors in this scene were terrified from their purpose by a storm which threatened to bury them beneath the ruins of the abbey, and Lilly, who claims the merit of having 'laid the spirits' by which it was raised, attributed their failure to the want of faith and better knowledge in his companions. In 1734 Lilly ventured on a second marriage, which proved unfortunate as a commercial speculation, for though the bride possessed a dowry of £500, she spent more than she brought. In 1644 he published the first of his almanacs, which he continued during the remaining thirty-six years of his lifetime, under the title of 'Merlinus Anglicus.' The predictions contained in this ephemeris, and his interpretation of the three suns which appeared in the heavens that year, on the birth-day of Prince Charles, brought our astrologer a valuable reputation, and he was soon consulted by both the political parties who divided the kingdom. There can be no doubt that his advice was often well-founded, and his predictions frequently verified by the events; but it is just as certain that he was a man of no character. He was a double-dealer and a liar by his own showing, but as stanch a believer in his own honesty as in the truth of his art, and perhaps as decent a man as a trading prophet could well be under any circumstances. It is some excuse that he was courted by noble and crowned heads at home and abroad, and richly rewarded by them. In 1648 the parliament of England gave him an annual pension of £100, which he threw up in disgust two years afterwards on receiving some affront; yet he was able to lay out large sums in the purchase of landed property. He died in 1681, leaving works of great interest in the history of astrology, and of some importance as characterizing the times in which he lived, and the historical persons with whom he was associated.

[E.R.]

**LILY, WILLIAM**, first master of St. Paul's school, author of a well-known Latin grammar, 1468-1522. His son, **GEORGE**, a dignitary of the church, and writer of history, died 1559. **PETER**, brother of George, and his son of the same name, were also distinguished in the church, and the latter, who died in 1614, is author of 'Sermons.'

**LIMBORCH, H. VAN**, a D. painter, 1680-1758.

**LIMBORCH, PHILIP**, pastor of a congregation of Dutch Remonstrants, and professor of divinity, was born at Amsterdam 1633, and died in possession of a high personal character and reputation, 1712. He was nephew, by the mother's side, to Episcopius, and edited some of his papers in conjunction with Hartsoeker. His own works are 'Theologia Christiana,' a defence of Arminian principles; a 'History of the Inquisition,' a 'Commentary on the Apostolic Writings,' &c.

**LIMIERS, H. PH. DE**, born of French parents in Holland, cele. as a critic and historian, died 1725.

**LINCK, J. H.**, a German naturalist, 1674-1734.

**LINCOLN, BENJAMIN**, a general in the American revolutionary war, born in Hingham, Mass., 1733, and lived as a simple farmer until he was 40 years of age. On the breaking out of the revolution he began his military career and was rapidly promoted. Appointed chief in command of the southern division of the army, he led the American forces against the British at Charleston and Savannah. He was forced to capitulate when in possession of the former place, by Sir Henry Clinton, in 1780. Notwithstanding the failure of his southern campaign, the bravery and capacity of Lincoln were left untarnished, and after being imprisoned, he was, on his exchange in 1781, received with honor by Washington, and appointed to the command of the central division at the siege of Yorktown. On the surrender of Cornwallis he was deputed to receive the submission of the captured troops. In 1781 he was chosen by Congress secretary of war, and served in that office for three years, when he returned to his farm, but was called from his quiet congenial agricultural pursuits in 1786 and 87 to command the militia in repressing the Shay's insurrection. In 1787, was elected lieutenant governor of Massachusetts. In 1789, was made collector of the port of Boston, which post he held for 20 years. In 1789, was commissioner to treat with the Creek Indians; and in 1793 again, to make peace with the western tribes. Died in 1810. He was the author of various papers, historical, agricultural, &c.

**LINCOLN, LEVI**, lieutenant governor of Mass. and attorney general of the U. S. under Jefferson from 1801 to 1805, was born in Mass. in 1749, and died in 1820. His two sons, **ENOCH** and **LEVI**, were governors, the former of Maine and the latter of Mass. Enoch was also an author, and published with other works a poem, 'The Village.'

**LIND, JAMES**, an English physician, died 1794.

**LINDANUS, W. D.**, a native of Dort, distinguished as a controversial divine, and theologian of the Roman Catholic Church, 1525-1588.

**LINDBLOM, A.**, a Swedish prelate, 1747-1819.

**LINDEN, J. A. VANDER**, a D. phys., 1609-64.

**LINDERN, F. B. VON**, a Ger. botan., 1682-1755.

**LINDET, A. T.**, a French priest, and member of the convention, 1743-1823. His brother, **J. B. ROBERT LINDET**, a member of the Committee of Public Safety, died 1825.

**LINDSAY, SIR DAVID**. See **LYNDSAY**.

**LINDSAY, J.**, a nonjuring minister of London, au. of a 'History of the Regal Succession,' d. 1768.

**LINDSAY, R.**, a Scottish historian, 16th cent.

**LINDSEY, THEOPHILUS**, a Church of England divine, afterwards known as a preacher and writer on Socinianism, 1723-1808.

**LINDWOOD, W.**, an English divine, died 1446.

**LINGAN, JAMES MACCULM**, a revolutionary officer was killed in Baltimore by a mob in 1812.

**LINGARD, DR. JOHN**, the Roman Catholic historian of England, was born in Winchester, 1771, and made his first appearance as an author in 1805, when he wrote a series of letters in the *Newcastle*

*Courant*, entitled 'Catholic Loyalty Vindicated.' To Dr. Lingard belongs the rare honor of refusing a cardinal's hat. He died, after a life of 'illustrious obscurity,' 1851.

LINGLOIS, P. F., a French jurist, 1580-1629.

LINGUET, SIMON NICHOLAS HENRY, a celebrated political writer and historian, born 1736, executed after taking an active part in the French revolution, 1794.

LINIERE, F. P. DE, a French poet, 1628-1794.

LINIERS-BREMONT, DON SANTIAGO, a Spanish commander, who defended Buenos Ayres against the English in 1806-7, and having treated with Buonaparte, was shot by a party of revolutionists, 26th August, 1809.

LINING, JOHN, a physician and natural philosopher, who, although born in England, settled in S. Carolina. He published the first account of the yellow fever which ever emanated from America. Died 1760.

LINLEY, THOMAS, a distinguished vocal composer, received his first instructions in music from Thomas Chilcott, and afterwards from the celebrated Paradies. Linley was for many years conductor of the oratorios and concerts at Bath, and has been called the restorer of the music of Handel, in the same sense as Garrick was of the plays of Shakspeare. Linley went to London and became joint patentee of Drury Lane theatre with his son-in-law, Richard Brinsley Sheridan, in which establishment he, for many years, conducted the musical department of the entertainments. He composed music for the following pieces, namely: 'The Duenna,' 'The Carnival of Venice,' 'Selima and the Royal Merchant,' 'The Camp,' 'The Spanish Maid,' 'The Stranger at Home,' 'Love in the East,' and many other pieces. His madrigal for four voices—

'Let me, careless and unthoughtful lying,  
Hear the soft winds above me flying'—

is considered equal in all respects, and superior to very many of the most celebrated compositions of the same class. Linley died in London in 1795, and was buried in Wells cathedral, in the same vault with his daughters, Mrs. Sheridan and Mrs. Tickell. [J.M.]

LINLEY, THOMAS, a son of the preceding, celebrated as a violinist, drowned at the age of twenty-two, 1778. His younger son, WILLIAM, a writer and composer of songs, born 1767.

LINN, JOHN BLAIR, an American poet and divine, 1777-1804. Was the author of a poem on Washington, and of one entitled 'Valerian.'

LINN, WILLIAM, an American presbyterian divine and theological writer, 1752-1808.

LINNÆUS, CHARLES, or CARL VON LINNE, one of the greatest systematic botanists and naturalists the world has ever seen, was born in Sweden in 1707. He died in 1778. Sweden is justly proud of having given birth to Linnæus. His father was a poor clergyman in a rural district, who could scarce afford to give his son an education for a profession, and was at one time nearly apprenticing him to a shoemaker; and yet we see this son in after years, by dint of his own genius and talents, rising to the rank of a nobleman, and exercising, even while alive, a most extraordinary and universal influence over the whole science of natural history. During the earlier years of his life he endured many privations and much poverty; but his extensive acquirements procured him numerous friends, and in 1741, at the age of thirty-four, he succeeded in being ap-

pointed to the professorship of medicine at the university of Upsala, where he had studied in his youth; Rosen was professor of botany, a chair which Linnæus would have preferred, but by an amicable arrangement the former lectured on medical subjects, while the latter taught natural history. Previous to his appointment to this chair Linnæus had tra-

[Linnæus in his Lapland Dress.]

velled through Lapland, where he had been sent by the Academy of Sciences for the purpose of exploring the natural history of that Arctic region; he had visited and examined the great mines of Sweden, where he acquired a good knowledge of mineralogy; he had explored the natural history of Dalecarlia, for which purpose he had been sent by the governor of that province; he had visited Denmark, Germany, Holland, and England, and had thus laid up a vast store of knowledge in all the three kingdoms of nature. The extent of this knowledge may be judged of from his 'Systema Naturæ,' a work which has now been before the world for more than a century; and which, notwithstanding that our acquaintance with the objects of nature has increased a hundred-fold since his time, is almost indispensable to every naturalist even at the present day. His acquirements in natural history were universal; still it is in botany that he has obtained most success and his greatest glory. His arrangement of plants by the sexual system, or by the number, disposition, &c., of the stamina and pistils, maintained the pre-eminence over all rival systems till very lately, and even now, though superseded in a great measure by the natural method of Jussieu, retains a most useful place in the study of botany. The binomial nomenclature which he introduced into botany and zoology, or the use of trivial or specific names appended to the generic, to distinguish the different species of animals and plants, is one of the most important helps to the advancement of the study of natural history that has ever been discovered, and which alone would have immortalized the name of Linnæus.—In 1747 Linnæus was appointed physician to the king; in 1753 he was created a knight of the Polar star; and in 1757 he was raised to the rank of nobility. [W.B.]

LINT, PETER VAN, a Flemish historical and portrait painter, 1609-1668. His brother, HENDRICK, a painter and engraver, end of the century.

LINTHOCST, J., a Dutch painter, 1755-1815.

LINUS, a supposed bishop of Rome, 1st cent.

LINWOOD, Miss, famous for her exhibition of needle-work pictures in Leicester Square, was born in Birmingham, 1755, and died 1845. Her copies of pictures from the old masters possessed extraordinary merit, and for one of them, which she bequeathed to the queen, she is said to have refused an offer of three thousand guineas. The collection met the usual fate of such things after her death, and was dispersed by auction.

LIONEL, lord of Ferraro and Modena, 1441-50.

LIOTARD, JOHN STEPHEN, a famous enamel painter, who was called 'the Turk,' on account of adopting the Turkish costume, born at Geneva 1702, died about 1776. His brother, JOHN MICHAEL, distinguished in Paris as an engraver, died after 1760.

LIOTARD, PETER, a Fr. botanist, 1729-1796.

LIPENIUS, M., a German divine, 1630-1692.

LIPPERT, P. S., a German artist, 1703-1785.

LIPPI, FRANCESCO FILIPPO a painter of Florence, born about 1412, died 1469. His son, PHILIPPINO, also distinguished as a painter, 1460-1505.

LIPPI, LORENZO, a famous painter of altar pieces, known also as a burlesque poet, 1606-1664.

LIPPO, a Florentine painter, assassinated 1347.

LIPSIUS, J. G., a Ger. numismatist, died 1820.

LIPSIUS, JUSTUS, a celebrated philologist, critic, and antiquary, and professor at Leyden and Louvain, born at Isch, near Brussels, 1547, died 1606.

LIRELLI, S., an Italian astronomer, 1751-1811.

LIRIS, LEO DU an astronomer, 17th century.

LIRON, J., a learned ecclesiastic, 1665-1748.

LIS, or LYS, JOHN VANDER, a Dutch painter, 1570-1629; another of the same name, 1600-1657.

LISCOV, CHR. L., a German poet, died 1760.

LISLE, CLAUDE DE, a French geographer, historian, and genealogist, 1644-1720. His son, LOUIS, a physician and writer on astronomy, died 1741.

LISLE, SIR G., a royalist officer, famous for his defence of Colchester, shot by the republicans 1648.

LISLE, J. TROINS DE, a Provençal adventurer and alchemist, born about 1662, d. in the Bastille, 1712.

LISLE, W., an English antiquary, died 1637.

LISLE. See DELISLE, DELISLE-DE SALES.

LIST, FREDERIC, a political economist and member of the parliament of Wurtemberg, founder of the Zollverein or customs union, 1789-1846.

LISTER, M., an English naturalist, died 1712.

LISTER, TH., a miscellaneous writer, 1801-42.

LISTON, JOHN, was born in Norris Street, Haymarket, in 1776, and was educated at Dr. Barrow's Soho school. In 1795 he became himself second master at the Grammar, or Library school, Castle Street, Leicester Square, under Archdeacon Tennyson, and was all his life long a great reader. From this school he was, however, expelled for acting plays with the big boys, and went into an office as a clerk. The first time he performed in London, was at the Haymarket, on a benefit night, as *Rawbold*, in 'The Iron Chest.' After this, obtaining £40 from a friend for the purpose, he resolved to adopt the stage as a profession, and spent the money in the purchase of theatrical properties. He then acted at Taunton, Exeter, and Newcastle-upon-Tyne. His first comic part was *Diggory* in 'She Stoops to Conquer,' and he raised the character at once into importance. On the 10th June, 1806, Mr. Liston appeared again at the Haymarket, as a debutant, in *Sheepface*, in 'The Village Lawyer.' Miss Tyrer (afterwards his wife) made her first appearance there also on the same night, as *Agnes* in 'The Mountaineers.' His next character was *Zekiel Homespun*. But it was not until the following October, and at

[Residence of Mr. Liston at Knight's Bridge.]

the Covent Garden theatre, that he secured extraordinary attention, by the part of *Jacob Gavokey* in 'The Chapter of Accidents.' The reputation thus acquired he quite established by his *Lord Grizzle* in 'Tom Thumb,' in which he had to sing 'the dancing song' three times. His elegant and symmetrical form was exhibited in this feat, and undoubtedly contributed to his remarkable success. His wife also produced a similar sensation in *Queen Dolabella*. Notwithstanding his success in these comic and burlesque parts, Mr. Liston thought himself a tragic actor, and 17th May, 1809, attempted *Octavian*. His *Dominie Sampson*, indeed, and *Adam Brock* evinced touches of genuine pathos. In 1823 Mr. Liston had an engagement at Drury Lane of £50 a-week, which he commenced with *Tony Lumpkin*. His *Maworm* next year was applauded by George IV. himself, who *encored* the celebrated sermon; and the public nightly afterwards imitated the royal example. In 1825, he appeared in his famous character of *Paul Pry*; this was the climax of Mr. Liston's popularity. The *furor* for the play was immense. Mr. Liston was henceforth to be seen moulded in all conceivable materials—plaster, clay, china, butter; he gave signs to public houses, names to coaches, and portraits to pocket-handkerchiefs. In 1831, Mr. Liston joined Madame Vestris at the Olympic, where he enjoyed an income of £60 a-week, and appeared as *Dominique*, in a new piece, by Mr. Charles Dance, called 'Talk of the Devil.' At this theatre Mr. Liston continued until 1837. The last night he performed was at the Lyceum, for the benefit of Mr. James Vining—but he never took a formal farewell of the stage. His death took place on the 22d March, 1846, from apoplexy. The attributes of Mr. Liston's acting were nature, thought, and study; his conduct in private life was exemplary, and he was remarkable for attention to his religious duties. [J.A.H.]

LISTON, R., a famous surgeon, 1794-1847.

LITHGOW, W., a Scotch traveller, died 1640.

LITHOV, GUST., a Swedish poet, born 1692.

LITTA, POMPEO, Count, an Italian literary antiquarian, died 1852.

LITTLE, MOSES, an American surgeon, 1766-1811.

LITTLE, W., an English historian, born 1136.

LITTLEBURY, J., an English divine, 17th cent.

LITTLEPAGE, LEWIS, an American soldier of fortune, was born in Virginia. Volunteered under

the Duc de Crillon against Minorca in 1781, and was at the siege of Gibraltar with the Count of Nassau. He then repaired to Constantinople and Warsaw, and was made by the king of Poland his private secretary, and sent on a mission to Russia in 1786. Returned to Virginia, and died there in 1802, aged 39.

LITTLETON, ADAM, a divine of the Church of England, celebrated for his skill in the Eastern languages, author of a Latin Dictionary, &c., 1627-94.

LITTLETON, EDWARD, a divine and poet, died 1734.

LITTLETON, or LYTTLETON, THOMAS, a famous authority in matters of law, was a judge in the reign of Edward IV., and author of a treatise on 'Tenures,' which is the text-book of Coke's Commentaries, died 1481. Judge Littleton left three sons—WILLIAM, ancestor of the Lords Littleton of Worcestershire; RICHARD, a lawyer of the reigns of Henry VII. and Henry VIII.; and THOMAS, knighted by Henry VII. for the capture of Lambert Simnel. A JOHN LITTLETON descended from William, was a partisan of the earl of Essex in the reign of Elizabeth, and died in prison 1600. EDWARD LITTLETON, descended from Thomas, was lord-keeper in the reign of Charles I., and created baron of Mounslow in Shropshire, flourished in 1589-1645. Another descendant of Thomas was a SIR THOMAS LITTLETON, speaker of the House of Commons in the reign of William III.

LITTLE TURTLE, an Indian chief defeated by General Wayne in 1792, on the Miami.

LITTRE, ALEXIS, a Fr. anatomist, 1658-1725.

LITTRON, J. J., a Ger. astronomer, died 1840.

LIVERMORE, SAMUEL, chief justice of New Hampshire, 1732-1803.

LIVERPOOL, CHARLES JENKINSON, earl of, a member of parliament and statesman, who occupied various offices from 1761 to 1784, and died at the age of eighty-one, 1808. His son, ROBERT BANKS JENKINSON, earl of Liverpool, born 1770, was the famous statesman who held the premiership from 1812 till 1827. Died 1828.

LIVIA-DRUSILLA, a Roman empress of the Claudian family, who was first married to Tiberius Claudius Nero, and forcibly taken from him by Augustus, who divorced his own wife in order to marry her. Having no children by the emperor, he adopted her sons by her first husband, one of whom, Tiberius, became his successor. Livia died in the eightysixth year of her age, 29.

LIVIA-LIVILLA, granddaughter of the preceding by her other son, Drusus Germanicus, married her cousin, Drusus, son of Tiberius, and having poisoned her husband in concert with Sejanus, died in a dungeon 35.

LIVINEIUS, J., a Flemish divine, died 1599.

LIVINGSTON, BROCKHOLST, an officer in the American Revolution, a lawyer, and judge of the Supreme Court of the United States, a son of William Livingston, governor of New Jersey, was born in New York in 1764, and died in 1823.

LIVINGSTON, EDWARD, a distinguished American jurist and statesman, was born in the State of New York in 1764, educated at Princeton College, and admitted to the bar in the city of New York. In 1794 he was sent to Congress, and afterward made mayor. On the purchase of Louisiana he went to reside in New Orleans, and was one of General Jackson's aids during the defence of that city against the attack of the British. The legislature of Louisiana intrusted him with the revision of their legal code, which he effected in such a masterly manner

as to gain for him the reputation of one of the ablest of jurists. In 1823 he was elected a member of Congress from Louisiana, and in 1831 was made Secretary of State by President Jackson, who subsequently in 1833 appointed him minister to France. He died in 1836.

LIVINGSTON, HENRY, an American Revolutionary officer, 1752-1823.

LIVINGSTON, HENRY WALTER, an American lawyer and judge, 1764-1810.

[Residence of John H. Livingston near Poughkeepsie.]

LIVINGSTON, REV. JOHN H., D.D., an American divine of the Dutch Reformed Church, and president of Queen's College, N. J., was born at Poughkeepsie, N. Y., in 1746, and graduated in Yale College in 1762. Prosecuted his theological studies in Holland, and on his return was appointed pastor of a church in New York. He was instrumental in bringing about a union of parties in the Dutch church, and a dissolution of its dependence upon the classis in Amsterdam, in the year 1772. In 1784 he was appointed theological professor, and in 1810 president of Queen's College of New Jersey. He died in 1825.

LIVINGSTON, JOHN, minister of the Scots church at Rotterdam, author of 'Letters,' 1603-72.

LIVINGSTON, PHILIP, an American patriot, and a signer of the Declaration of Independence, the grandson of the Rev. J. H. Livingston, was born in Albany in 1716, and graduated at Yale College in 1737. He began life as a merchant, in New York, and in 1754 reached the civic dignity of a New York alderman. In 1759 he was elected a member of the Assembly. In 1770, when the great Edmund Burke was agent for the colony of New York, Livingston conducted the correspondence with him as chairman of the legislature. He was a member of Congress in 1774, in 1776, and in 1777. He died in 1778.

LIVINGSTON, ROBERT L., an early settler in America, and first possessor of the manor of Livingston in the state of New York, was born at Ancrum in Scotland, in 1654, and came to America in 1672. He was a member of the colonial council in 1698. He was the founder of an influential family, and was the father of PHILIP, ROBERT, and GILBERT. Died 1728.

LIVINGSTON, ROBERT R., an American lawyer and statesman, was born in 1746. He graduated at King's College in New York. He was made recorder of the city, and in 1775 elected a member of the Assembly. In 1776 he went to Congress, and was one of the committee appointed to draw up the Declaration of Independence. He was one of the convention for the formation of the new constitution for

the state of New York, and was subsequently appointed chancellor, retaining that office until 1801. He was chairman of the state convention which adopted the federal constitution. He reached high official honors under the general government, was secretary for foreign affairs in 1781, and in 1794 was offered by Washington the post of minister to France, which he however declined. In 1801, however, on receiving this from Jefferson, he accepted, and was received by Napoleon, who was then First Consul, with great consideration. He was joined with Monroe in the negotiation for the purchase of Louisiana. On his retirement from public life he devoted himself to the pursuits of agriculture, and took a strong interest in various scientific associations. He was a friend of Robert Fulton, and seconded him in his efforts to establish navigation by steam. He died in 1813.

LIVINGSTON, WILLIAM, an American lawyer and governor of New Jersey, a descendant of the same family as the preceding, was born in 1741. He removed to New Jersey from New York, and was a member of the first Congress from the former state in 1774. In 1776, when the people of New Jersey sent their governor, William Franklin, under a guard to Connecticut, Mr. L. was elected under the new constitution chief magistrate, and annually re-appointed until his death in 1790. He was thus governor of New Jersey for fourteen years. In 1787 he was a delegate to the convention which framed the constitution. He was not only remarkable for his administrative talents, but also, for his ability as a political writer.

LIVIVS ANDRONICUS. See ANDRONICUS.

[Livy, from an antique bust.]

LIVY. TITUS LIVIVS PATAVINUS, the only illustrious Roman historian of the Augustan age, was born at Patavium (now *Padua*), a town of the Lombardo-Venetian kingdom in Italy, B.C. 59, in the consulship of Cæsar and Bibulus. The surname, *Patavinus*, seems to fix the place of his birth; but according to some authorities, he was born at a village six miles to the south of Patavium. The records of his life, like those of many others of the literary men of antiquity, are meagre and unsatisfactory—the materials necessary to form a connected narrative having been supplied by the imaginations of some of his biographers. After passing the early portion of his life, perhaps in his native town, he appears to have gone to Rome during the reign of Augustus, where his literary talents soon obtained for him the favor and patronage of the emperor. As an admirer of the ancient institutions of his country, Livy attached himself in opinion to the party of Pompey, and considered him as the greatest of statesmen and heroes; but Augustus, entertaining a sincere regard for the historian, did not allow his friendship and patronage to be affected by political

opinions, though they seemed to call in question the right by which he ruled the destinies of Rome. Having spent the greater part of his life in the metropolis, he returned in old age to the town of his birth, and there died A.D. 18, in the seventy-seventh year of his age. He left a son, and also a daughter, who married L. Magius, a teacher of rhetoric, a man of moderate talents, who owed his subsequent success principally to his connection with the historian. The preceding short statement contains all the authentic facts which have descended to us in connection with the personal history of Livy. Many other particulars are related by writers who profess to record the life of the Roman historian; but these are either altogether illusory, or rest upon evidence which will not bear examination. Thus he is said to have commenced his career as a rhetorician, and to have written a work on that science; to have been twice married, and to have left two sons and several daughters; to have been in the habit, like Virgil, Horace, and other wits of the day, of spending much of his time at Naples; and to have first attracted the notice of Augustus by presenting to him some dialogues on philosophy. He is also said to have been the tutor of Claudius, afterwards emperor, and to have recommended to his pupil, in early life, to attempt historical composition. Livy has erected for himself an enduring monument in his *History of Rome*. This great work, which he modestly designated *Annales* (Annals), contained the history of the Roman state from the earliest period till the death of Drusus B.C. 9, and originally consisted of 142 books. Only 35 of these have descended to us; of the others, with the exception of two, we possess *Epitomes*, or short summaries, but the books themselves have been entirely lost. The existing books were brought to light at various times; some of them towards the middle of the sixteenth century, and a fragment of the ninety-first book appeared for the first time in 1772. The hope, so long entertained by the learned, that the lost books would yet be recovered, seems now to have yielded to despair. From internal evidence there appears to be reason for believing that the history was divided by the author into *decades*, or portions each containing ten books. The first *decade*, which embraces the history till B.C. 294, is entire; the second is lost; the third, fourth, and the first five books of the fifth, containing the history from B.C. 219, to B.C. 167, also remain to us. Of the other books nothing has been preserved except some inconsiderable fragments. It is impossible to ascertain the time during which the historian was occupied with his great work. Niebuhr fixes the commencement of it in B.C. 9, when he was fifty years old, and believes that he had not fully accomplished his design at the close of his life. In forming an estimate of Livy as an historian, it is necessary to bear in mind the object which he seems to have proposed to himself. As a Roman and a patriot, his grand purpose was to celebrate the glories of his native country, and the disinterested patriotism which raised it to universal supremacy. He adopted the early history as he found it, exhibiting the legends in attractive language, without inquiring into their authenticity. He makes no pretensions to the character of a critical historian, and thus, in some degree, escapes from the charge which may fairly be alleged against him, of not consulting the public records. 'His style may be pronounced almost faultless; and a great proof of its excellence is, that the charms with which it is invested are so little salient, and so equally diffused, that no one feature

can be selected for special eulogy, but the whole unite to produce a form of singular beauty and grace. The narrative flows on in a calm, but strong current, clear and sparkling, but deep and unbroken; the diction displays richness without heaviness, and simplicity without tameness. Nor is his art as a painter less wonderful. There is a distinctness in the outline and a warmth of coloring in all his delineations, whether of living men in action, or of things inanimate, which never fail to call up the whole scene, with all its adjuncts, before our eyes.'

[Birthplace of John Locke.]

LOCKE, JOHN, born at Wrington, near Bristol, on 29th August, 1632; died at Oates, in Essex, on 28th October, 1704. A name than which there is none higher in English philosophical literature; the name of a Man, surpassed by no one, in that worth which constitutes the dignity of an independent English gentleman.—It is not our intention to offer in this place an analysis of the celebrated '*Essay Concerning the Human Understanding*;' suffice it to touch rapidly on those main points which constitute it a landmark—on the circumstances in which it arose and the peculiarities which gave it historic significance. Falling, like KANT after him, on a period of onesidedness or dogmatism—when statements accurate in the main, had, through their imperfection as representatives of the whole truth, been twisted into assertions of error—Locke found the freedom of the Human Understanding attacked by the CARTESIANS, with the weapon named by them '*Innate Ideas*.' Inquiry he found—fearless and rational—stopped at both its termini: truths clearly within its reach were repudiated because in pretended conflict with so-called Innate Ideas; and regions apparently beyond the sphere of our faculties, were on the same authority sketched out and described, with the pedantry of a mechanical surveyor. To determine the *length of our line*, was therefore Locke's first resolve; nor can it be asserted that his preliminary war with Innate Ideas, is—in the sense in which he looked at the subject—wholly unsuccessful. Rightly interpreted, his theory is this—no authoritative belief can be found in the Mind which has not an origin in Experience; and the most extensive or nearly universal Beliefs existing, are shaped and colored by the varying experience of the men and nations entertaining them. The thesis, so stated, cannot be impugned; neither the value of its assertion at the epoch of Locke; but our philosopher fails in establishing the proposition which he supposed to be his thesis, viz., that there are no Beliefs in the mind of man, which,—although suggested by, and in their forms, dependent on Experience,—cannot yet be explained unless we attribute to the Thinking Faculty, a proper and independent Modifying Force. DES CARTES himself did not think as Locke imagined he thought: and to that illustrious Man the three first chapters of the *Essay* have therefore no true reference. Following out his partial, because controversial first view, Locke proceeds to unfold in what manner every recognized or defensible notion, be-

longing to the Human Understanding may grow up in it. An imperfect first view—we have said—for while looking at the error, he misses the truth of the Cartesians: he never even proposed to establish by a preliminary and rigorous analysis, what those characteristics of our various classes of Ideas are, of which every just philosophy must give an account. Missing therefore, not unnaturally, some of their main characteristics; confounding *necessity* and *infinity*, with the simple attributes of *generality* and *immensity*,—he proceeds to deduce all the forms and results of the Understanding from our pure *Sensations*, and the operation on these of what he terms *Reflection*. Closely scrutinized, Locke's *Reflection* amounts to nothing more than the exercise of *Memory*, *Comparison*, and the processes known as *Association*. The exercise of the Mind as a voluntary Agency indeed seems to remain; but as Leibnitz soon pointed out, and as subsequent History showed, the descent from this Scheme was easy, towards the undisguised Sensationalism of Condillac and the French School of the close of last century. To charge John Locke—as sound and practical a thinker as ever lived—with the extravagances of these hypothetic schemes, were the worst injustice; nevertheless, there is no precaution against the largest excesses of sensational philosophy, in his mode of presenting the genesis of human thought; and it cannot be gainsayed, that 'Essay' in several important directions, has been the parent of as many mischiefs as could well find place amidst the realities of the English mind. Utterly antagonistic to absolutism in thought or life—not less repellant of the doctrines of Sir Robert Filmer, than of all theocratic dogmatism, this remarkable work seemed, however, to harmonize with our notions of rational liberty; and it became the favorite text-book of our best men during the difficult periods when Locke wrote. Himself practically imbued with the sense of personality and independence in all things, our Philosopher stood by constitutional Liberty, suffered with it, and shared its triumphs. Menaced by the Court party—as corrupt a court as the sun ever shone on, then reigned in England—he withdrew to Holland, and for a time found shelter. During this voluntary exile, his name was erased from the roll of the Students of Christ Church Oxford, in consequence of a Royal Mandate; and the spirit of persecution went so far as to demand the rendition of our philosopher from the States-General. Better times, however, were dawning on England. At the Revolution in 1688, Locke returned in the fleet that brought home the princess of Orange; and henceforward his career was prosperous. His residence in Holland, however, was not without avail to him. Associating chiefly with dissentient protestants, he acquired a truer notion of that cardinal principle, on the strength of which alone Protestantism can live; and he showed this in his Letters on Toleration, as well as in the just freedom of his Exegesis. It is seldom that a personal History so much delights one, as that of John Locke. Not only can no one discern a stain on the nature and career of the great Englishman, but his practical career is every where in strictest accordance with the principles he labored to establish. Firmly attached to the cause of Toleration, civil or religious, he scrupled not to suffer for either: nor did his opposition to any faction ever drive him from moderation and justice,—disinclined him to appreciate his opponents aright, or to conceal the excesses of the party, whose fortunes he mainly espoused. He accepted Human Liberty as a basis of his philosophy; and

practically stood by that. Few writers, before or since, in England, have had a finer sense of the respect owing to the determinations of the personal Conscience.—The student is specially recommended to the admirable life of John Locke by Lord KING.

LOCKHART, J. G., a British miscellaneous writer, was born in Scotland 1794. His father was a Scotch clergyman settled in Glasgow, where his son's early education was obtained. Young Lockhart received as an award for his progress an exhibition to Oxford, attached to Glasgow university. He entered there at the age of fifteen, and received the first class honors in *literis humanibus* of that institution. He graduated as B.C.L. 1817, and D.C.L. 1834. After a residence for some time in Germany, by which he was enabled to acquire a competent knowledge of its language and literature, he returned to Scotland and was called to the Scottish bar in 1816. He however neglected the law for the more congenial pursuit of literature, and became historical editor of the Edinburgh Annual Register, and subsequently, one of the ablest contributors to Blackwood's Magazine. Among his articles in that periodical, was a series of Spanish ballads which were afterwards published in a separate volume. In 1819. Lockhart published 'Peter's Letters to his Kinsfolk,' a clever personal and satiric description of the men and society of Edinburgh. In 1820 Lockhart married Sophia, the eldest daughter of Sir Walter Scott. In the same year he published his first novel, 'Valerius, a Roman Story,' and in a short time afterward, 'Reginald Dalton' and 'Adam Blair.' In 1825 he wrote a 'Life of Burns' for Constable's Miscellany, and subsequently a life of Napoleon for the same series. In 1826 he succeeded Gifford as editor of the 'Quarterly Review,' which post he held until 1853, when he resigned it in consequence of ill health. On the death of Sir Walter Scott, Lockhart naturally became the writer of his biography. Lockhart died in 1854, leaving an only daughter, who has also a daughter, these two being the only descendants of Sir Walter Scott.

LOCKMAN, J., a miscellaneous wr., 1698–1771.

LOCKYER, N., a nonconf. divine, 1612–1684.

LOCRE-DE-BOISSY, J. W., a German of French descent, distinguished as a writer on commercial law, 1758–1840.

LODGE, EDMUND, clarencieux-king-at-arms, well known for his 'Portraits of Illustrious Personages of Great Britain,' besides which he wrote 'Illustrations of British History,' and other works of great learning and research, 1756–1839.

LODGE, THOMAS, an English poet, died 1625.

LODGE, WILLIAM, an engraver, 1649–1689.

LOEFLING, P., a Swed. botanist, 1729–1756.

LOESEL, J., a German botanist, 1607–1656.

LOFTE, CAPEL, well known as a miscellaneous writer and contributor to magazine literature, was a gentleman of property, who was educated for the law, and became one of the magistrates of Suffolk, born in London 1751, died 1824.

LOFTUS, DUDLEY, an Orient. scholar, 1618–95.

LOGAN, GEORGE, M.D., an American legislator, was born near Philadelphia in 1753, was a devoted advocate of peace, and succeeded by his active interposition in preventing a rupture between France and the United States in 1798. He was a senator of Congress from 1801 to 1807. In 1810 he proceeded to England with the same purpose as he had gone to France, but with a less successful result; died 1821; wrote several papers on agricultural topics, &c.

LOGAN, JAMES, a Quaker, born in Ireland in

[Stenton, So., Seat of James Logan.]

1674, accompanied Wm. Penn to Pennsylvania in 1699, and filled various offices in that colony, died 1751. He was a person of considerable literary and scientific acquirement, and published treatises on maize, and on light, and a translation of *Cicero de Senectute*.

LOGAN, MARTHA, an American florist, who wrote a treatise on gardening in her 70th year, died 1779.

LOGAN, an Indian chief of the Cayugas, murdered in 1781. He was remarkable for his attachment to the whites until cruelly treated by them, when he took an Indian's revenge. A speech of his, addressed to Lord Dunmore, is an eloquent rebuke of the conduct of the whites.

LOGAN, JOHN, a pleasing versifier and poet, was born in the county of Edinburgh in 1748. When a very young man he edited the poems of the deceased Michael Bruce, and involved himself in controversy by printing in the volume pieces which he claimed, probably with justice, as his own. In 1770 he became minister of the parish of South Leith; and his two volumes of Sermons, published after his death, show him to have possessed a singularly fine flow of animated eloquence. He was also one of the most active and valuable of the contributors to the collection of metrical 'Translations and Paraphrases,' used in the public worship of the Church of Scotland. He delivered Lectures on History, a synopsis of which he published, aspiring unsuccessfully to a professorship. A volume of poems, appearing in 1781, was extremely popular; literary avocations engrossed his attention more and more; and he soon came decidedly into collision with the opinion of the public in Scotland as to the proprieties of the clerical profession, by publishing and bringing on the stage his tragedy of 'Runymede.' His spirits sank, and his habits became irregular. He retired from his pastoral charge, spent about two years in London as a reviewer and pamphleteer, and died there in the end of 1788.

LOGAU, FREDERICK, Baron De, a German poet, whose epigrams and other pieces have been edited by Lessing, 1604-1655.

LOGGAN, DAVID, an engr. of Dantzic, d. 1700.

LOHAIA, Ib., an Arabian *savant*, 8th century.

LOIR, NICHOLAS, P., a Fr. painter, 1624-1670.

LOISEAU, J. F., a French republican, died 1812.

LOISEAU, J. S., a Fr. jurisconsult, 1536-1617.

LOISEL, A., a French jurisconsult, died 1822.

LOKMAN, an ancient Arabian philosopher and

fabulist, surnamed Alhakim, or the Wise. He is supposed to have been contemporary with King David, and even to have lived under his patronage and died in Jerusalem, but his history is involved in great obscurity. The fables which bear his name were first published in 1636, and his name is given to a chapter in the Koran.

LOLI, LAURENT, an Ital. painter, 1612-1691.

LOLLARD, or LOLLHARD, WALTER, burnt for supposed heresy at Cologne in 1322. There is little reason to suppose that he was the namefather of the sect of the Lollards, or Lollhards. The probability is, that the term is an old German one, of the same root as our word *lull*, in the phrase, *lull to sleep*; and that it was given to those sects in whose religion psalm-singing in a low tone formed a distinguished part. It was thus applied by popish ecclesiastics to a great variety of religious parties on the continent as a term of reproach, and in England, was appropriated to the followers of Wycliffe. [J.E.]

LOLLI, or LOLLY, ANTONIO, a celebrated violinist, was born at Bergama in 1723. From 1762 to 1773 he was concert-master to the duke of Wurtemberg. He afterwards went to Russia, where he became a great favorite with Catherine II. He died, after a lingering illness, at Naples in 1802. [J.M.]

LOLLIANUS, a Roman emperor, killed 267.

LOLLIUS, MARIUS, a Roman consul, 21 B.C.

LOM, JOSSE VAN, a Dut. physician, 1500-1562.

LOMAZZO, J. P., an Ital. painter, abt. 1538-92.

LOMBARD, C. L., a Fr. surgeon, 1741-1811.

LOMBARD, J. G., a Prus. statesman, 1767-1812.

LOMBARD, J. L., a wr. on tactics, 1723-1794.

LOMBARD, L., a Flemish painter, 1482-1565.

LOMBARD, PETER, best known as the author of a book of 'Sentences' collected from the fathers of the church, whose contradictions he endeavored to reconcile, was a native of Novara, in Lombardy, and died soon after his election to the archbishopric of Paris, 1160. His work acquired a high degree of celebrity in the middle ages, and gave rise to many glosses and expositions by theologians of all classes, which are now out of date. He was also author of some Scripture commentaries.

LOMBARDI, A., an Ital. sculptor, 1487-1536.

LOMBARDO, J., an Ital. sculptor, b. abt. 1510.

LOMBARDO, PIETRO, a Venetian architect and sculptor, who flourished with his sons, ANTHONY and TULLIO, in the 15th century. The nephew and pupil of the latter, SANTO LOMBARDO, distinguished as an architect, 1504-1560.

LOMBART, P., a French engraver, 1612-1682.

LOMBERT, P., a Fr. translator, died abt. 1710.

LOMEIER, J., a Dutch philologist, 1636-1699.

LOMEIR, J., a Dutch prot. divine, 1636-1699.

LOMENIE, ANTHONY DE, secretary of state, and ambassador of Henry IV. to London, died 1638. His son, HENRY AUGUSTUS LOMENIE, Count De Brienne, minister of state, and author of 'Memoirs,' died 1666. The son of the latter, LOUIS HENRY, Count De Brienne, secretary of state under Louis XIV., died insane, 1635-1698.

LOMENIE-DE-BRIENNE, ATHANASIOS LOUIS MARIE, brother of the celebrated finance minister, sec. at war in 1787, perished on the scaffold 1794.

LOMENIE-DE-BRIENNE, STEPHEN CHARLES DE, finance minister of Louis XVI., was born at Paris, 1727, and being educated for the church, was first known as an enemy of the protestants. In 1763 he became archbishop of Toulouse, and would seem, from the first, to have aspired to the part of a Mazarin, or a Richelieu in the state, without possessing either the ability or the unscrupulous daring neces-

sary to it. In 1737, after figuring in a commission for the reform of the clergy, and coquetting with the philosophy of D'Alembert, and the encyclopædists, he became a member of the assembly of notables; and having headed the party by whom the administration of Calonne was overthrown, he succeeded that unfortunate as minister, adopted his plans, and proved himself just as incapable of executing them. He succeeded, however, in quietly dismissing the notables, and then attempted a bold stroke by banishing the parliament of Paris to Troyes, but within a month after was compelled to recall it, and agree to a compromise. In the spring of 1788, he issued the famous edict for altering the constitution of the parliament, and establishing the 'grand bailliages,' and the 'plenary court,' to do the work which that body had refused, namely, the registration of the king's edicts; and in the execution of this measure was reduced to the necessity of dismissing the parliament with the aid of military force. For about two months he tried to bring his new machinery of government into working order, the parliaments of the provinces every where raising their hydra heads to carry on the battle begun at Paris. About this time he was promoted to the rich archbishopric of Sens, and received a cardinal's hat from Rome, which he returned in 1791, and gained thereby a little fresh popularity. At the end of his two months' despair, July, 1788, he was compelled to announce the convocation of the states-general for the month of May following. On the 24th of August he retired from the ministry, and was succeeded by Necker, having by this time raked together the elements of the wildest conflagration the world ever saw. He was arrested in February, 1794, and died of apoplexy the same night. [E.R.]

LOMONOSSOFF, M. WASSILIEWITCH, a famous poet, and historian, regarded as the father of Russian literature, 1711-1764.

LONDONDERRY. See CASTLEREAGH.

LONDONDERRY, Marquis of, half brother of the British statesman Lord Castlereagh, an officer in the army, a diplomatist and miscellaneous writer; died 1854, aged 76.

LONG, EDWARD, a West Indian judge, known as a political wr. and hist. of Jamaica, 1734-1813.

LONG, J., an English traveller, last century.

LONG, ROGER, a divine of the Church of England, eminent as a mathem. and astr., 1669-1770.

LONG, ST. JOHN, a native of Limerick, who became known in London about the year 1826 as a medical practitioner, and acquired great celebrity by his specific for consumption and for other diseases generally considered incurable by the faculty. Not being educated for the profession, he was twice put on his trial for the death of his patients, and on one of these occasions no less than sixty-three persons of the higher classes appeared in his favor. He accumulated a large fortune, and died at the early age of thirty-six, 1834. Three years previously he published 'Discoveries in the Art of Healing.'

LONG, THOMAS, one of the nonjuring divines, author of several learned works connected with the cause to which he belonged, 1621-1700.

LOGBEARD, W., a famous demagogue of the reign of Richard I., cruelly executed 1196.

LONGPIERRE, HILARY BERNARD DE, a Fr. Hellenist, classical critic, and poet, 1659-1721.

LONGINUS, CASSIUS, a Greek philosopher and famous rhetorician, born about A.D. 210, put to death by Aurelian at Palmyra in 273, A.D. Longinus seems to have been a prolific writer, but no work of his has reached us, except the *Treatise on*

*the Sublime*. The authorship of this remarkable treatise has been contested; but there is not much doubt that Longinus ought not to be deprived of the merit so generally attached to his name: it is a treatise which places him among the most eminent critics of antiquity. Longinus was the friend and teacher of the heroic Zenobia: he fell with her fortunes; and his fate will go down through all history as a dark stain on her imperial conqueror. One of the most recent and best editions of this celebrated treatise, is by M. Eger, Paris, 1837. The other fragments attributed to the Greek philosopher, are appended. [J.P.N.]

LONGINUS, FLAV., exarch of Italy, 568-584.

LONGLAND, or LANGLAND, JOHN, a learned prelate, confessor to Henry VIII., 1473-1547.

LONGLAND, or LANGE LAND, ROBERT, a disciple of Wickliffe, regarded as the oldest poet in the English language, author of 'The Visions of Pierce Plowman,' a satire upon the Roman clergy, and 'The Plowman's Crede,' written in 1369.

LONGMAN, THOMAS NORTON, many years head of the well-known publishing firm of Messrs. Longman & Co., born 1770, died of an accident 1842.

LONGOBARDI, N., a Sicilian Jesuit and missionary, auth. of 'Letters from China,' 1565-1655.

LONGOMONTANUS, CHRISTIAN, a Danish astronomer, assistant of Tycho Brahe, and professor of mathematics at Copenhagen, 1562-1647.

LONGUERUE, LOUIS DUFOUR, Abbe De, a Fr. savant, reputed the greatest scholar of his age, au. of 'Antiquities of the Chaldeans and Egyptians,' 'Historical and Geographical Description of France,' 'The Annals of the Arsacides,' &c., 1652-1733.

LONGUEVAL, JAMES, a French Jesuit, and historian of the Gallican church, 1680-1735.

LONGUEVILLE, the name of a noble French family, the principal of whom are—FRANCIS D'ORLEANS, son of the celebrated Dunois, died 1491. His son, of the same name, at whose instance, in 1505, the county of Longueville was erected into a dukedom by Louis XII., died 1512. His brother, LOUIS, a combatant at the battle of Spurs and at Marignano, died 1516. CLAUDE, killed at the siege of Pavia 1525. LEONARD, at whose instance the dukes of Longueville were allowed the title of princes of the blood royal by Charles IX., died 1571. HENRY, who commanded against the Leaguers, and in 1589 won the battle of Senlis, died 1595. His son, of the same name, served under Louis the XIII., and was afterwards imprisoned with Condé and Conti, as partisans of the Fronde, died 1663. The wife of the latter, ANNE GENEVIEVE, sister of the great Condé, distinguished for her part in the wars of the Fronde, died in a religious retirement. The last of the family were two sons of Henry and Anne, the eldest of whom died in a convent, 1694; and the second, C. PARIS, was killed at the Rhine, 1672.

LONGUS, a Gr. romance writer, 4th or 5th cent.

LONGICERUS, JOHN, a learned German editor, 1499-1569. His son, ADAM, a physician and naturalist, 1528-1586. His grandson, JOHN ADAM, a physician and man of letters, born 1557.

LOOMIS, HARVEY, an Amer. Presbyterian divine of Conn. Died 1825.

LOON, THEOD. VAN, a Flem. painter, 17th cent.

LOOS, CORNELIUS, a D. theologian, died 1595.

LOOS, O. H. DE, a wr. on alchymy, 1725-85.

LOOS, P., one of the encyclopædists, died 1819.

LOOSJES, ADRIAN, a Dutch novelist, last cent.

LOPE-DE-RUEDA, a Sp. dramatist, died 1564.

LOPE DE VEGA, whose full name was LOPE FELIX DE VEGA CARPIO, was born at Madrid in

1562, and died there in 1635. Lope, a man of adventurous disposition, led a very active life till he had attained middle age. After having been secretary to the duke of Alva, he was obliged to conceal himself for a time in consequence of a duel; he served as a soldier, and narrowly escaped shipwreck in the Armada. On the death of his second wife, he took holy orders; but this step, though it removed him from business, did not slacken his literary activity. He was one of the most prolific of all authors, composing with a rapidity which, while it implied extraordinary talents, made it impossible that his works should possess high merit, either in design or in execution. Besides writing epics and many other kinds of poems, he produced a number of dramas, so great as to be almost incredible. He himself states it at upwards of fifteen hundred; and more than five hundred plays attributed to him are actually in print. They embrace all the varieties of kind which are to be found among the works of his successor Calderon; and they abound both in snatches of wit and poetical fancy, and in ingenuity of dramatic invention. Though Lope was not the founder of the Spanish Drama, he was the first who made its romantic irregularities attractive through force and originality of genius. While Cervantes, who was fifteen years his senior, was neglected and starving, the writings of Lope procured for him overflowing wealth, and a popularity such as hardly ever was gained by any other living poet. [W.S.]

LOPES, F., a Portuguese historian, 14th cent.

LOPEZ, ALONZO, a Spanish critic, 16th cent.

LOTHAIRE. The sovereigns of this name are two emperors—LOTHAIRE I., son of Louis le Débonnaire, and third successor of Charlemagne, born about 795, associated with his father 817, crowned king of Lombardy 820, emperor 840, abdicated, and died soon afterwards, 855. LOTHAIRE II., born 1075, elected emperor on the demise of Henry V., 1127, convoked the famous diet of Magdeburg 1135, died 1137. *The kings of France*—LOTHAIRE I., same as the emperor of that name, vanquished by his brothers, Louis and Charles, at the battle of Fontenai, and forced to abandon his pretensions by the treaty of Verdun, 843. LOTHAIRE II., born 941, succeeded 954, died 989. *A king of Lorraine*, second son of the emperor Lothaire I., who raised him to that dignity 855, died 869. *A king of Italy*, son of Hugues of Provence, poisoned by Berenger 950. *A king of Kent*, brother and suc. of Egbert, 673, killed in battle 685.

LOTI, CARLO, a painter of Munich, 1632-1698.

LOTICH, PETER, a distinguished apostle of Lutheranism, in the county of Hanau, died 1567. His nephew, of the same name, known in Latin as *Lotichius*, surnamed *Secundus*, one of the greatest Latin poets of Germany, 1528-1560. CHRISTIAN, brother of the latter, an elegant scholar and poet, died 1568. JOHN PETER, grandson of Christian, a critic, historian, and Latin poet, died 1669.

LOUDON, JOHN CLAUDIUS, a native of Lanarkshire, educated as a landscape gardener, was born 1783, and died 1843. He is author of many valuable works on gardening, agriculture, and architecture, the principal of which are—'Observations on Laying out Public Squares,' 'On Plantations,' 'On Country Residences,' 'On the Formation of Gardens,' and 'Hothouses,' 'Encyclopædias of Gardening and Agriculture,' 'The Gardener's Magazine,' and 'The Magazine of Natural History,' both of which were the first periodicals devoted exclusively to these subjects, 'Encyclopædia of Plants,' 'Hortus Britannicus,' 'Arboretum Britannicum,' &c. Mr. Loudon was first cousin to Dr. Claudius Buchanan.

LOUET, G., a French jurisconsult, died 1608.

LOUIS. The German sovereigns of this name are—LOUIS LE DEBONNAIRE I., emperor of the West and king of France, son of Charlemagne and his second wife, Hildegard, born 778, named king of Aquitaine by his father 781, and succeeded him as king and emperor 814, died 840. LOUIS (THE YOUNG) II., son of Lothaire I., born about 822, king of Italy 844, associated with his father in the empire 849, emperor 855, died 875. LOUIS (THE BLIND) III., grandson of Louis II., born 880, succeeded his father in the kingdom of Arles 887, crowned emperor at Rome the year after vanquishing Berenger 900,

deposed and blinded by Berenger 903, died 923. **LOUIS (THE INFANT) IV.**, born 893, king of Germany 899, successor of his father, Arnulf, as emperor 908, died 912. **LOUIS V.**, son of Louis, duke of Bavaria, and Matilda, daughter of the emperor Rodolph I., born 1286, chosen emperor by a part of the electors, while the others adhered to Frederick, son of Albert, emperor and duke of Austria, 1314; defeated the latter, who then renounced his pretensions, 1322; died 1347.—Besides these in the line of German emperors, history mentions **LOUIS THE GERMANIC**, a third son of Louis le Débonnaire, who revolted against his father 817, beat Lothaire at Fontenai 841, and had a considerable kingdom beyond the Rhine secured to him by the treaty of Verdun 843; d. 876. His son and successor was **LOUIS THE SAXON**, killed in battle with the Normans 881.

**LOUIS.** The kings of France of this name are—**LOUIS I.**, same as the emperor Débonnaire. **LOUIS II.**, born 846, named king of Aquitaine by his father, Charles the Bald, 867, king of France 877, died 879. **LOUIS III.**, eldest son and successor of the preceding, died 882. **LOUIS IV.**, born 920, reigned 936–954. **LOUIS V.**, the last of the Carolingian kings, born 967, succeeded his father, Lothaire, 986, and was poisoned, it is said, at the instigation of Hugh Capet, by his wife, Blanche, 987. **LOUIS VI.**, son of Philip I. and Bertha, born 1078, associated in the government with his father 1100, king 1108, died 1137. **LOUIS VII.**, son of the preceding, born 1120, succeeded his father 1137, engaged in a crusade 1147, divorced his wife, Eleanor Guienne, who soon afterwards married Henry II. of England, 1149, married Constance of Castile 1154, engaged in a war with England 1167–1176, died 1180. **LOUIS VIII.**, son of Philip Augustus and Elizabeth of Hainault, born 1187, succeeded his father 1223, died 1226. **LOUIS IX.**, eldest son of the preceding and Blanche of Castile, famous in French history by the name of *Saint Louis*, born 1215, succeeded his father under the regency of Blanche 1226, embarked for the Holy Land at the head of an army of 50,000 men 1248, returned to France after the death of his mother 1254, undertook a second crusade, and died of the pestilence while besieging Tunis 1270. **LOUIS X.**, son of Philip the Fair and Jean of Navarre, born 1289, king of Navarre 1304, king of France 1314, died 1316. **LOUIS XI.**, son of Charles VII. and Marie of Anjou, born 1423, married to Margaret of Scotland 1436, became leader of a revolt against his father 1440–1442 and 1455; succeeded to the throne 1461, died 1483. **LOUIS XII.**, son of Charles, duke of Orleans, and Mary of Cleves, born 1462, succeeded to the throne 1498, invaded the Milanese in alliance with the Venetians 1499, divided Naples with Ferdinand of Spain 1501, joined the league of Cambray against the Venetians 1509, died 1515. This prince was married in 1473 to Jeanne, daughter of Louis XI., whom he repudiated, on his accession, in order to marry Anne of Brittany, the widow of his predecessor, Charles VIII. The latter dying in 1514, he married in the year following, some three months before his death, the Princess Mary, sister to Henry VIII. **LOUIS XIII.**, son of Henry IV. and Maria de Medici, born 1601, succeeded his father under the regency of the queen-mother 1610, declared of age, and convoked the estates-general for the last time before the French revolution, 1614; married to Anne of Austria 1615, took the famous Richelieu into his counsel 1624. For the events and policy of his reign see **RICHELIEU**. **LOUIS XIV.**, see next article. **LOUIS XV.**, son of Louis duke of Burgundy, and of Marie Adelaide of Savoy, born 1710, succeeded his great-grandfather,

**Louis XIV.**, under the regency of the duke of Orleans, 1715, married to Maria Leczinski, daughter of Stanislaus, nominal king of Poland, 1725, war with Germany in the interest of the latter 1733, 1736, defeated at Dettingen in the war occasioned by his treachery to Maria Theresa 1743, peace of Aix-la-Chapelle 1748, war with England concerning the colonies 1755–1763, died 1774.—See **LAW, BARRY**. **LOUIS XVI.**, see article below. **LOUIS XVII.**, son of Louis XVI. and Marie Antoinette, born 1785, supposed to have died in the Temple prison 1795. **LOUIS XVIII.**, brother of Louis XVI., born 1755, married to Louisa of Savoy 1771, escaped to Coblenz when the king was arrested at Varennes 1791, assumed the title of king of France and Navarre 1795, restored on the fall of Napoleon 1814, retired to Ghent during the hundred days, and replaced on the throne after the battle of Waterloo 1815, died 1824.

[Louis XIV.]

**LOUIS XIV.**, the most magnificent of the Bourbon kings, and one of those great spirits by whom nations are moved, and the policy of states completely changed, was the son of Louis XIII. and Anne of Austria, and was born after his mother had lamented her sterility for twenty-three years, 5th September, 1638. He succeeded to the throne under the regency of the queen-mother, guided by Cardinal Mazarin, 1643, but did not commence his personal government till the death of the latter, 1661, the year after the treaty of the Pyrenees and his marriage with Maria Theresa, which had been stipulated in the articles. The events of this long minority, so to call it, are briefly related under the article **MAZARIN**; in this place, therefore, we shall limit ourselves to a summary of the succeeding period.—I. The external political events of his reign commenced with the exaction of a proper respect for his government from the court of Rome, 1662–1665. The next event was a brief war with the English, terminated by the peace of Breda, 1662. In 1666 his father-in-law, Philip IV., being dead, Louis claimed Flanders and Franche-Comte as dowry, and having won them in two campaigns, possession of the former was secured to him by the treaty of Aix, 1668. Soon afterwards, a quarrel with Holland, and the terror inspired by his successes, provoked a general alliance against him

headed by the prince of Orange, and Louis himself took the field, with the great Condé and Turenne under his orders, 1672. The war continued till 1678, when it was terminated by the treaty of Nimeguen, which, with its almost immediate results, secured great advantages to the French crown. In 1687 Louis was compelled to defend himself against a still more formidable league, occasioned by his revocation of the edict of Nantes, and a long catalogue of wars was concluded by the peace of Ryswick, 1697. During this period he supported the Stuarts, and was obliged by the treaty just mentioned, to acknowledge the prince of Orange as king of Great Britain, under the title of William III. In 1701 the succession of his grandson to the Spanish crown was disputed by the rest of Europe, and a long succession of wars, in which the military genius of Marlborough developed itself, was terminated by the peace of Utrecht, 1713. Louis, though aged and reduced to stand at bay, still retained vigor enough to save France from the dismemberment threatened by the allies, and to leave to his successor his most valuable conquests.—II. The internal administration of his government in this long period had been marked by the highest magnificence, and conducted to the most splendid results. The favorite motto of Louis, '*L'Etat c'est Moi*,' was quite as much the expression of a principle as of personal pride, and it meant the extension and consolidation of the state from its own centre, in place of the distraction of government occasioned by the feudal system. He carried this principle into effect immediately after the death of Mazarin, by dispensing with any future prime minister; and the issue of it (besides its results in his political wars) was to humble the noblesse, and raise the talent of the middle classes to places of trust—as in the person of Colbert. His great fault—political as well as moral—was the revocation of the edict of Nantes, 1685, by which Henry IV. had secured the liberties of his protestant subjects. It was the fruits of his religious bigotry, excited by prelates who divided the nation between the obscure disputes of the Jansenists and Molinists, and who persuaded Louis that his glory was interested in the preservation of the ancient religion—the more easily that Jansenism opened the door and prepared the way, as became evident even then, for the philosophy of the Revolution.—III. The domestic history of Louis, for the greater part of his life, is far more open to censure than any other part of his public conduct. His accession of mistresses, De La Vallière, Montespan, Fontange, and some less known perhaps, exhibits him in the character of a sensualist, and we can only say that he was not an unrepentant one, for, at least, the last twenty years of his life. To Madame de Maintenon, aided by the occasional eloquence of Bossuet, belongs the credit of reforming him in this particular, and the most sceptical of historians have not been able to show that Madame owed her influence to any sacrifice of honor, or that she was not really married to him in 1684, about a year after the death of his queen, Maria Theresa. Apart from all this, Louis XIV. was distinguished by high qualities of heart and mind, and his self-command and moderation in all that pertains to his sovereign character, cannot be doubted. He most completely realized the idea of a monarchy at a period when the habits of thought, and the manners of a people, naturally fickle, and tired of his long reign, were taking a new direction; and if he loved warlike enterprise too much, as indeed he deplored on his death-bed, he also loved France, and did all in his power to develop the re-

sources of commerce, industry, literature, and art, and to discover the efficient instruments of a wise administration. Died 1715. [E.R.]

LOUIS XVI., king of France, was the second son of the prince dauphin, son of Louis XV., and of Maria Josepha of Saxony, daughter of Frederick Augustus, king of Poland. He was born at Versailles, and named Duc de Berri 1754, became dauphin by the death of his father 1765, and was married to Marie Antoinette of Austria 1770. Amiable, irresolute, and timid, he succeeded to the stained and tottering throne of his grandfather when twenty years of age, 1774, and was crowned at Rheims, amidst the enthusiastic applause of his people, June 11, 1775. Apparently, no sovereign ever ascended the throne under happier auspices, but really no European throne ever stood on the verge of a more terrible abyss; the incapacity and corruption of the governing body being already confronted with the philosophic pride and wild vigor of the governed—just awakening to a sense of the 'rights of man.' He commenced his reign happily by promoting many useful reforms, and calling the most upright men to his ministry—among others, Turgot and Malesherbes, but it was soon evident that the resources of the state were utterly disproportionate to its expenditure, and discoveries were continually made which brought the court and government into contempt. As usual in such cases, one palliative succeeded another, while the root of the evil remained untouched; and when the distresses of the people were expressed in open disaffection, the ancient machinery of government was found insufficient, either as a means of effectuating the will of the people, or of controlling their blind impulses by the imposition of a more enlightened authority. The issue of this was the convocation of the 'notables,' who met twice, under the ministries of Calonne and Lomenie Brienne, 1787 and 1788, and of the 'estates-general,' which assembled at the beginning of May, 1789. This body declared for a 'constitution' as the first necessity of France, and took a solemn and united oath not to separate until they had made it. The real

[The Temple Prison.]

conflict between the people and the court was commenced by this act; the disposition to insurrection acquired a form of legality, and the passions of those who might be capable of leading the populace were fairly unloosed. Mirabeau, Lafayette, Danton, Camille Desmoulins, Robespierre, and Marat, are among the names of such, and may be consulted in this volume. As a first step, the 'third estate,' or

plebeians in the 'estates-general,' refused to acknowledge the clergy and the noblesse as separate bodies, and many of these joining them, they assumed the name of a 'national assembly.' Against this body the guards refused to act, and the people, soon enrolled in clubs and in a national militia, surprised the government by storming the Bastille, July 14, and committed some deplorable excesses. The national assembly, presuming on its actual power under these circumstances to make the constitution, called itself 'the constituent assembly,' and promulgated the 'rights of man' as a basis. To the excitement of these occurrences was added the maddening effects of a famine in the succeeding autumn, when the worst forms of clubbism commenced, and the Marats, Carriers, Henriots, and Tinvilles, rose into notice. In June, 1790, the king attempted to fly, and was arrested at Varennes,—the people meeting to petition for his deposition being dispersed by musketry on his return. On the 30th of September following he accepted the constitution, and on the first of October the first biennial parliament, or legislative assembly, met for the transaction of business. The power of 'veto' having been granted to the king, by this new compact, he was unhappy enough to use it against every important measure proposed by the parliament. In the course of another year his deposition was again agitated, tumultuous processions took place, the palace itself was invaded, and the king compelled to wear the red bonnet, or cap of liberty. As time wore on, the republicans became thoroughly organized, and in August, 1792, the Marseilles were quartered in Paris, the Tuileries besieged, the Swiss guard massacred, and the royal family imprisoned in the Temple. The party of Danton now occupied the foreground of events, and prepared to assemble a 'national convention,' and resist the threatened invasion of the emigrants and the Germans under the duke of Brunswick. The first act of this body, which met towards the end of September, was to pronounce on the fate of Louis XVI., who was declared guilty of a conspiracy against the general safety of the state, by 693 votes out of 729, and to be worthy of death by a majority of 433 against 288. Danton uttered what the national convention felt under these circumstances: 'the coalesced kings threaten us; we hurl at their feet, as gage of battle, the head of a king.' For no crime of his own, Louis was guillotined in pursuance of this judgment, Jan. 21, 1793, displaying to the last moment the same singular equanimity of temper, not to say insensibility, that had marked his whole career. In private character he was a man of unexceptionable virtue—a good husband, and a good master, but, as a king, deficient in every necessary quality except that of well-meaning. [E.R.]

LOUIS PHILIPPE, late king of the French, was the eldest son of the duke of Orleans, brother of Louis XVI., and of Marie, daughter of the duke of Penthièvre. He was born in Paris 1773, and in 1791 was commander of a troop of dragoons under Kellerman, in which capacity he distinguished himself at Valmy and Jemappes. After the execution of his father (see ORLEANS), Louis Philippe escaped to Switzerland, and commenced those romantic wanderings through Europe and America, with which the public mind has been rendered familiar. In 1800 he settled at Twickenham, near London. In 1807 he visited Naples, and two years later was married to Amelia, second daughter of the king, after which he settled at Palermo. From the restoration of the Bourbons to 1830, he had resided in France, and in that eventful year was placed on the

throne as constitutional king, mainly by the influence of Lafayette, who declared his accession 'the best of republics.' Often his seat swayed beneath him, but he preserved his balance, with singular astuteness, till 1848, when the republican party suddenly recovered the victory of which they had been defrauded eighteen years before, and Louis Philippe became an exile in England. These events are so recent, and the causes of them are so universally known, that we think it unnecessary to enter into details. Perhaps the history of the citizen king will read nobler in the light of another age, but for the present we can only regard him as the victim of his own cleverness and his mean ambition. He descended to the grave with less respect than his very misfortunes demanded, on the 26th of August, 1850.

LOUIS, son of Ferdinand, duke of Parma, born 1773, received the crown of Etruria from Buonaparte in exchange for his duchy in 1801, died 1803.

LOUIS, k. of Spain, reigned eight months, 1724.

LOUIS, king of Hungary, called 'the Great,' born 1326, succeeded 1342, elected king of Poland 1370, died 1382. The second of the name, born 1506, succeeded his father Ladislas, as king of Hungary and Bohemia 1516, drowned himself, after being defeated by the Turks, 1526.

LOUIS, duke of Savoy, reigned 1451–1465.

LOUIS, duke of Anjou, the first of the name, son of John II., king of France, born 1339, maintained a struggle with Charles of Durazzo for the throne of Naples 1380–1382, died 1384. The second of the name, son and successor of the preceding, born 1377, was crowned king of Naples by Clement VII. 1390, and died after a long struggle with Ladislas, without conquering his kingdom, 1417. The third of the name, son and successor of the preceding, born 1403, died 1434, after a fruitless struggle for the kingdom of Naples with Alphonso, king of Arragon.

LOUIS OF ARRAGON, succeeded his father, Peter II., as king of Sicily, 1342; died 1355.

LOUIS OF TARENTUM, second husband of his cousin, Joan of Naples, was married to that princess in 1347, driven from the kingdom by Louis I. of Hungary, they were recalled by the Neopolitans in 1352, died 1362.

LOUISA, AUGUSTA WILHELMINA AMELIA, queen of Prussia, born 1776, queen 1793, died 1810.

LOUISA OF LORRAINE, queen of France, born 1554, married to Henry III. 1575, died 1601.

LOUISA MARIE OF FRANCE, the last of the daughters of Louis XV., 1737–1787.

LOUISA OF SAVOY, duchess d'Angouleme, daughter of Philip, duke of Savoy, born 1476, married to Louis d'Orleans, count of Angouleme, by whom she became mother of Francis I., 1488. Being appointed regent during the expedition of her son to the Milanese, and during his captivity, 1515 and subsequent years, she governed the kingdom with great wisdom, and was respected by all the princes of Europe; died 1532.

LOUISA-ULRICA, queen of Sweden, sister of Frederick II., king of Prussia, born 1720, married to the Prince Gustavus Adolphus 1744, became queen mother 1751, died 1782.

LOUREIRO, J. DE, a Portu. botanist, died 1796.

LOUTH-ALY-KHAN, seventh regent of Persia, and the last of the Zand dynasty, born 1768, defeated and put to death by Aga-Mahommed, 1794.

LOUTHERBOURG, PH. J. DE, a painter of Strasbourg, distinguished for his battles and hunting pieces, 1740-1812.

LOUVEL, LOUIS PETER, a saddler by trade, who conceived such an intense hatred for the Bourbons that it became a monomania, and caused him to assassinate the duc de Berri, February 13, 1820. This event led to political consequences of great moment; but Louvel declared to the last that he had no accomplices. He was executed the same year, at the age of 37.

LOUVET, PETER, the name of two French historians, the first of whom flourished 1569-1646; the second 1617-1680.

LOUVET-DE-COUVRAY, JEAN BAPTISTE, a Fr. novelist, and mem. of the convention, 1760-97.

LOUVIERS, CH. JAMES DE, a famous defender of the liberties of the Gallican church, councillor of state to Charles V., king of France, 1376.

LOUVILLE, C. A. D'ALLONVILLE, Marquis De, a French diplomatist, time of Philip V., 1668-1731. His brother, JAMES EUGENE, Chevalier de Louville, author of a number of curious treatises on physical and astronomical subjects, 1671-1732.

LOUVOIS, FR. MICHEL LETELLIER, Marquis De, minister of war in the reign of Louis XIV., known to history as the enemy of Colbert, and the author of the Edict of Nantes, 1641-1691. His son CAMILLE, known as the abbe de Louvois, a famous doctor of the Sorbonne, 1675-1718.

LOUYS, E., an ecclesiastical writer, died 1682.

LOVAT, SIMON FRASER, Lord, a Scotch nobleman, and partisan of Charles Stuart, 1657-1747.

LOVE, CHRISTOPHER, a presbyterian minister, and member of the Assembly of Divines, beheaded for conspiring against the republic, 1618-1651.

LOVE, JAMES, son of Mr. Dance, the architect of the Mansion House, known as an actor, died 1774.

LOVEJOY, ELIJAH P., an American divine, editor of the anti-slavery paper 'Alton Observer,' published in Illinois, where he was killed while defending his press against a mob, on the 7th Nov., 1837, aged 35.

LOVELACE, ADA AUGUSTA, Countess of, the only child of Lord Byron. 'Sole Daughter of my House and Heart,' as he has poetically termed her. She married Lord King, afterwards the Earl of Lovelace, in 1835, who was a descendant of the great Locke. The daughter of the poet was, by a striking contrast with the tastes of her father, devoted to mathematical pursuits. Died 1852, aged 37.

LOVELACE, RICHARD, a poet and dramatic writer, son of Sir William Lovelace of Norwich, where he was born 1618. He was distinguished by his fidelity to Charles I., in whose interest he expended his whole fortune, and died in poverty, 1658.

His poems were published in 2 vols. 8vo. under the title of 'Lucasta.' His plays are 'The Scholar,' a comedy, and 'The Soldier,' a tragedy.

LOVELL, JOHN, a cel. classical teacher of Mass.

LOVEWELL, JOHN, was the son of Zaccheus L., who had been an ensign in the army of Cromwell, and settled in New Hampshire, where he died at the enormous age of 120. His sons were three, JOHN, ZACCHEUS, a colonel in the French war of 1759, and JONATHAN, a preacher, representative, and judge. John distinguished himself in Indian warfare, and was killed in an engagement with the savages at Pegwawkett, near Nysbury in Maine, in 1725.

LOVIBOND, EDWARD, an English poet, author of 'The Tears of Old May Day,' and an admirable portraiture of Johnson and Garrick in 'The Mulberry Tree,' died on his estate at Hampton, 1775.

LOW, G., a Scotch divine and naturalist, 1746-95.

LOW, JAMES, an American physician, born at Albany 1781, died 1822, author of various medical treatises.

LOWE, LIEUT.-GENERAL SIR HUDSON, K.C.B., guardian of Napoleon at St. Helena, was the son of an officer in the British army, and was born in Galway while his father's regiment was quartered there, 1769. He was brought up to the military profession, and performed his first important services in Corsica at the period of the French revolution, after which, in 1800-1801, he went to Egypt, and fought at the battle of Alexandria. In 1803 he was despatched on a secret mission to Portugal, and subsequently served against the French in Naples, and, when Murat became king, in several important islands of the Mediterranean; the principal of these operations being his defence of Capri, which, however, he was compelled to evacuate. In 1813 he was sent to northern Germany, and, joining the allied Russian and Prussian armies, served under Blücher during the whole of the campaign, and was with him in every action till the surrender of Paris, when he was despatched to England with the news of Napoleon's abdication, and was knighted by the regent. On the return of Napoleon from Elba, Sir Hudson Lowe was attached to the duke of Wellington's army as quarter-master-general, but left it early in June to take the command of the troops at Genoa, destined to act against Marseilles and Toulon. It was during his occupation of the last mentioned place, on the 1st of August, 1815, that he received orders to return home to take charge of the captive emperor; an office which an angel from heaven, as Montholon confessed, could not have fulfilled to the satisfaction of the French. It is a little curious, however, that the complaints of that sensitive people met with a ready sympathy in England, and some of the foremost British writers, as Sir Walter Scott, Sir Archibald Alison, and Lord Campbell have echoed their sentiments. On the other hand, the editor of the recently published papers of Sir Hudson Lowe, professes to have established, from a judicial review of the mass of documents confided to him, that no blame can attach either to the British government at home, or to the governor of St. Helena, as regards the treatment of Napoleon. At least, we have the case stated for the first time as it appears to the eye of an impartial lawyer, and the actual materials to decide upon. We are much mistaken, however, if the legal tribunal can be admitted the final one in such a cause. Sir Hudson Lowe died at an advanced age, 1844. [E.R.]

LOWE, PETER, a Scotch surgeon, died 1612.

LOWELL, JOHN, first judge of Massachusetts, 1779-1840.

**LOWENDAHL, ULRIC FREDERIC WALDEMAR**, Marshal De, a native of Hamburg, descended from a natural son of Frederick III., king of Denmark, and distinguished as a commander in the service of Austria, France, Poland, and Russia. He acquired immense repute by his share in the battle of Fontenoy, and the sieges of Flemish towns, flourished 1700-1755.

**LOWER, RICHARD**, an eminent physician and anatomist, author of a tractate on the heart, and the motion and heat of the blood, in which the transfusion of the living fluid from the vessels of one animal to those of another is treated of. Born about 1631, died 1691. His relative, **SIR WILLIAM LOWER**, was a courtier and dramatist of the reign of Charles I., and died 1662.

**LOWICZ, JEANNE**, Princess De, wife of the grand duke Constantine of Russia, died 1831.

**LOWITZ, GEORGE MAURICE**, a German astronomer, born 1722, murdered by the bands of Puyatchef, at the capture of Dmetriefsk, 1774. His son, **TOBIAS**, a chemist and naturalist, 1757-1804.

**LOWNDES, WILLIAM**, an American lawyer and statesman, born in Charleston, S. C., in 1781, and died at sea in 1822.

**LOWRY, WILSON**, an engraver, 1762-1820.

**LOWTH, ROBERT, D.D.**, a celebrated bishop in the Church of England, was born at Buriton, 27th November, 1710. From Winchester school he went to Oxford, and having distinguished himself by his literary attainments, was, in 1741, chosen professor of poetry in that university. In 1744 he was appointed rector of Ovington, in Hampshire. Resigning that situation, he passed several years on the continent, and on his return was appointed archdeacon of Winchester, and rector of East Woodhay. He was well known as a scholar; but it was not till the appearance of his lectures 'On the Sacred Poetry of the Hebrews,' in 1753, that he became known as one of the first biblical critics of his age. That work procured him a high reputation both at home and abroad, and it still maintains a distinguished place amongst works on the literature of the Scriptures. Preferments flowed rapidly upon him, for he became successively bishop of Limerick; and leaving Ireland he was made prebend of Durham; bishop of St. Davids in 1766; and bishop of London in 1777. While he discharged with exemplary diligence the duties of that important see, he continued with the greatest ardor to prosecute his biblical studies, and as the fruit of his unwearied industry, 'Isaiah, a New Translation, with a preliminary Dissertation and Notes,' contributed to extend his fame. The beauty and elegance of this translation have been long and universally admitted. Bishop Lowth was the author of several minor works, the chief of which are, 'The Life of William of Wykeham,' and 'The Short Introduction to English Grammar.' He died at Fulham palace in 1787, at the age of seventy-six.

[R.J.] **LOWTH, SIM.**, an English divine, au. of 'Strictures on Dr. Gilbert Burnet's Works,' &c. d. 1720.

**LOWTH, WILLIAM**, father of Bishop Lowth, the subject of a preceding notice, and himself a learned divine, author of numerous practical and theological works, born in London 1661, d. 1732.

**LOYER, G.**, a Dominican missionary, d. 1715.

**LOYER, PETER LE**, Sieur De La Brosse, a French writer of great learning, author of a curious work on Spectres, and one of still greater singularity, entitled 'Edom, or the Idumæan Colonies in Europe and Asia,' 1550-1634.

**LOYKO, FELIX**, a Polish hist., abt. 1750-1800.

**LOYOLA, IGNATIUS**, or **DON INIGO LOPEZ DE RECALDE**, the founder of the order of Jesuits, was the youngest son of Don Bertram, and was born in 1491, at the castle of Loyola, in the district of Guipuzcoa in Biscay. He was attached in his youth as a page to the court of Ferdinand and Isabella, and trained up in all the vices and frivolities peculiar to his position. When still a young man he entered the army, and during his defence of Pampeluna in 1521 against the French, he was severely wounded, and a long and tedious confinement was the result. The invalid, however, amused himself with the Spanish legends of the saints, and other works of a kindred character. His fancy was seized, and in a fit of mystical devotion he renounced the world, made a formal visit to the shrine of the Virgin at Montserrat, and on the 24th day of March, 1522, laid his arms on her altar, and vowed himself her knight. Arrayed in the garb of a pilgrim he then went to Manresa, and devoted himself to deeds of benevolence, which won him great renown. His next resolution was to proceed to the Holy Land, and after ten months' residence at Manresa, he travelled to Barcelona, a poor, begging, sincere, and resolute ascetic, sailed thence for Rome, received the blessing of Pope Adrian VI., and at length reached Jerusalem in September, 1523. After staying but a brief period he returned by Venice and Genoa to Barcelona, where he began in earnest to study Latin at the age of three-and-thirty. At the end of two years, that is in 1526, he removed to Alcala in order to make himself master of philosophy. His retreat from Barcelona was hastened by the danger he had incurred in exposing and attempting to remedy some flagrant disorders in a convent of nuns. His peculiarities of thought and address made him suspected at Alcala, and the inquisition charged him with witchcraft, warned, threatened, imprisoned, and finally dismissed him. The indomitable student was not to be crushed, but repaired at once to Salamanca, where he met with a similar treatment. Little did those inquisitors dream of the power that slumbered in the strange and self-denied recluse. Leaving Spain, which could not appreciate his motives, or divine his character, he came to Paris in February, 1528, where he studied in the lowest classes of the university with unfeigned humility, begged for his daily sustenance, and occasionally startled his friends by religious exhortations. Several young men admired his unwearied zeal and drew around him, and of the two who were domiciled with him, one was the famous Francis Xavier, afterwards known as the apostle of India. Their hearts were on fire for the conversion of the world, and they took solemn vows of chastity, poverty, and entire consecration to the church, in the subterranean chapel of the Abbey of Montmartre. At length, these companions, ten in number, agreed to leave Paris and meet in Venice in January, 1537. As they resolved to go to Jerusalem, they went to Rome to receive the papal blessing and came back to Venice in order to embark. But a war with the Turks frustrated their intentions, and their enthusiasm was in the mean time expended in various forms of effort. Rome naturally became their head-quarters, and Loyola conceived the idea of founding an order, to be devoted to the very work in which he and his fellows were so ardently engaged. The nature and plans of the new institution were sketched, and submitted to the pontiff Paul III., who, under certain limitations, confirmed it on 27th September, 1540; but three years afterwards those limitations were withdrawn. Loyola was president of the order, and remained in Rome in order to direct

and stimulate its movements. Thus sprung up the order of the Jesuits—the mightiest by far of the kindred institutions of the Church of Rome, and which has more than once shaken the nations of Europe. The order increased with great rapidity; it had a romantic origin and a definite aim. Loyola founded at Rome an asylum for converted Jews, and a penitentiary for reclaimed females. Julius III. in 1550 confirmed the order, and Loyola remained its general till his death on 31st July, 1556. At his death the society consisted of more than 1,000 persons possessing 100 religious houses, and divided for the prosecution of its labors into twelve provinces, reaching from Spain to India and Brazil. Loyola was beatified by Paul V. in 1609, and canonized by Gregory XV. in 1622. His famous ‘Spiritual Exercises’ were published at Rome in 1548. Many even in his own church deny that he had enough of learning to write this book, or even enough of ingenuity to construct the rules of the order of Jesus, affirming that he was in both respects the instrument of minds more refined and subtle than his own. His was a self-sacrificing fanaticism. His life was a spiritual knighthood—undaunted in the cause which he had espoused. His labors were soon appreciated by the church, and the society of Jesus became a mighty engine before which popes themselves have trembled. Its secrecy has defied investigation, and its unscrupulous means are only surpassed by the devoted spirit of its combined phalanx of agents and associates. Luther and Loyola represent progress and check, march and counter-march, action and reaction in the same epoch of the ecclesiastical world.

[Lucan, from an ancient medal.]

LUCAN, the commonly received name of MARCUS ANNAEUS LUCANUS, was born at Cordova (then Corduba) in Spain, 38, son of a Roman knight, who was

youngest brother of the famous Seneca. It was his misfortune to find a rival poet in the emperor Nero, and to receive the prize in a public competition with the sovereign, who then forbade him to recite his verses in public. This circumstance, perhaps, added to the general hatred of his crimes, induced Lucan to join a conspiracy formed against him, and the plot being discovered, he is believed to have accused his own mother, in the hope of pardon. If so, Lucan could only have repented of his weakness, when, notwithstanding, he was condemned to die. He chose to have his veins opened, and then bled to death, in the twenty-seventh year of his age, 65. The only portion of his compositions that has descended to the present age, is his ‘Pharsalia,’ an unfinished description of the civil war between Cæsar and Pompey. It has been translated into English by May and Rowe, and is much esteemed for the spirit of freedom and morality which it breathes, in numbers of genuine poetry.

LUCIAN, the most brilliant and purest Greek writer of the second century; born at Samosata, in Assyria, on the banks of the Euphrates, he lived between A.D. 120 and 200, under Trajan, Hadrian, and the Antonines. His life was extremely varied: he had followed many professions; and mingled with all classes of men, and various nations. In his youth a sculptor, we find him soon a lawyer—the profession of his predilection—practising at the bar in Syria and Greece. Next a teacher of rhetoric, settled in Gaul, where he collected a large school, and amassed a considerable fortune. Withdrawing from professional life, he sprung up into the Lucian of History, writing incessantly, but at the same time always travelling; he visited Macedonia, Cappadocia, Paphlagonia, and Bithynia, resting for any long interval only in Athens; and he died in Egypt, administering a lucrative office which he owed to the emperor Commodus. A life so various, would have endowed a mind, even of ordinary quickness, with much practical knowledge of mankind, and given an insight into the actual condition of society: so that with Lucian’s exquisite command of Greek, and his unexceptionable taste, he could in nowise have failed to rise into one of the best and most entertain-

ing writers of the time. Nevertheless, if the praise bestowed on him be nothing more than is due to excellences like these, we shall ill appreciate the character and influence of one of the most formidable pens ever wielded in Antiquity. In keenness of wit, not very unequal to Aristophanes himself, whose talents for popular but significant burlesque he also inherited—Lucian was gifted besides with that boldness, that *sense*, and that sincerity which is insight, belonging only to the greatest minds; and he brought the whole of these rare advantages to the execution of a task, than which none is more arduous, and only one nobler,—the waging of an unrelenting war, with every form and color of *charlatanerie* in his time. Descending among the details of life, he holds up to ridicule and scorn, although mainly to ridicule, the prevalent follies and vices of society in those centuries—the parasite, the way-layer of legacies, the sounding but vacant *bell*, the vender of morality, these, it seems, and multitudes like them, had, even in early days, appeared. But Lucian revels most, and displays greatest courage, in his contest with the widest spread—the most general forms of iniquity. The ancient religions were then tottering; and ancient wisdom had shrunk into a withered sham and formality. The vulgar had lost insight into the spiritual sense of the mythologies, and took the stories of the gods in the stupidest way, believing them without evidence, moral or historical, desecrating nothing of their poetry or beauty, but dogmatizing well! To this vulgar superstition a large proportion of the dialogues are addressed; and truly they helped to shatter it! But our author wrote yet more earnestly, and developed his highest power, when his turn with the philosophers had come. It is grievous to think of it, but apparently so it was, that wisdoms and morals were then professed by men who knew no wisdom, and understood nothing of morals: the dialectic of golden-mouthed Plato had passed into sheerest pedantry, and the virtues of the Stoics were to be had at so much per head. Could a Society with such men for its wise men, endure long upon the Earth? If pen could have shamed it, that pen had been Lucian's. But no such salvation was in store: emptiness having once seized upon a philosophy, as pharisaism on a religion—there is neither hope nor help for it under the sun! Perhaps Lucian's best dialogue, in scourge of the philosophers, is 'The Angler.'—A function of this kind—assumed and unflinchingly carried out, implied boldness indeed; but, sad for the contemporary reputation of the Scornor of Samosata! Βάλλε, ἐπιβάλλε, προσεπιβάλλε,—no quarter to him by whom quarter was never given! But at this other extremity of a long interval of time, and in an age like ours, we may descry the sense, believe in the patriotism, and even doubt the 'infidelity' of Lucian. The vices he warred with, are none of *ours*, so that we can afford to be temperate, and may hope to be impartial. The experience of sixteen centuries having discredited superstition, and extinguished insincerity—men may now enjoy the wit, and admire the polish, for surely they cannot be offended by the satire of the Dialogues of the Dead.

LCRETIA, one of the noblest names in Roman history, was the wife of Collatinus, a near relation of Tarquin the Proud, king of Rome. The story, as related by Livy, is to the effect that Sextus Tarquinius, the king's eldest son, was inspired with a passion for her, moved by her extreme beauty; and becoming a guest at her house during the absence of Collatinus, succeeded in dishonoring her person. Entering her chamber in the night with a drawn sword, and finding himself resolutely repulsed, he threatened to slay her, and place the body of a slave in her bed, to make it appear that he had killed them both in the act of adultery. The dread of being thought so infamous induced Lucretia to yield, but with a resolve that the honor of her husband and her own innocence should be avenged. She summoned her father and her husband from the camp, who came accompanied by their kinsmen, Valerius Publicola and Brutus, and having recounted the events of the night, she suddenly stabbed herself to the heart with a concealed dagger. The bloody poniard was snatched from the wound by Brutus, and the witnesses of this sad tragedy swore by the 'once pure blood' of Lucretia, not to rest till they had expelled the Tarquins from Rome. This event, which occurred B.C. 509, was the signal of Roman freedom, the kingly government being abolished, and a republic established by the conspirators, of whom Junius Brutus became chief. Poets and artists have vied with each other in celebrating the heroism of Lucretia, and her name, like that of Penelope, has furnished the most significant expression for all that is noble and chaste in the female character. LCRETIVS, the commonly received name of TITUS LCRETIVS CARUS, an eminent philosopher and poet, born at Rome about 96 B.C., and said to have died by his own hand in the forty-fourth year of his age, about 52. He is admitted to be one of the greatest of Roman poets for descriptive beauty and elevated sentiment, while his philosophy is subject to the errors inevitable to the state of science at that time. His poem, which is entitled 'De Rerum Natura,' embodies accurately the Epicurean doctrine on the nature of things, and was first published in 1486. It has been translated into English by Creech and Mason Good.

**LUCULLUS**, **LUCIUS LICINIUS**, a naval and military commander of Rome, born about B.C. 115, and distinguished in the war with Mithridates from the time of Sylla to B.C. 66, when he was supplanted by Pompey. He lived about twenty years longer, in an elegant retirement on the coast of Campania, and his costly habits have rendered his name a bye-word for all that is luxurious and extravagantly refined in taste. He was at the same time a great master of literature, and his house was enriched with a valuable library and works of art, which were opened to the curious and the learned, among whom was his friend Cicero.

**LUDEKE**, C. W., a Prussian *savant*, 1737–1805.

**LUDEWIG**, J. P. DE, a Ger. jurist, 1668–1743.

**LUDICAN**, a king of Mercia, 823–825.

**LUDIUS**, a Roman painter, age of Augustus.

**LUDLOW**, **EDMUND**, one of the principal chiefs of the republican party in England during the civil war, born about 1620, distinguished at the battle of Edgehill 1642, successor of Ireton in the government of Ireland 1660, died in exile 1693. Ludlow is the author of curious and valuable 'Memoirs,' published 1698.

**LUDLOW**, **ROGER**, deputy-governor of Massachusetts and Connecticut in 1634, born in England, but came to America in 1630. He compiled the first code of Connecticut laws. Died in Virginia, to which colony he had emigrated.

**LUDOLPH**, **JOB**, a German Orientalist, distinguished for his researches in Ethiopian history and the Ethiopic dialects, 1624–1704. His two nephews—**HENRY WILLIAM**, distinguished as a Greek and Russian scholar, 1655–1710; and **JOB**, as a mathematician, 1649–1711. The son of the latter, **JEROME LUDOLPH**, a physician, 1677–1728.

**LUDOLPH**, an ascetic writer, about 1300–1370.

**LUDOVICUS**, or **LUDWIG**, **GODFREY**, a philologist and literary *savant* of Prussia, 1670–1724.

**LUDOVICUS**, **C. GUNTHER**, a professor of Leipzig, author of a 'Plan for a History of the Philosophy of Wolf,' and 'of Leibnitz,' 1707–1778.

**LUDWIG**, **C. F.**, a phys. of Leipzig, 1757–1823.

**LUDWIG**, **C. T.**, a Germ. botanist, 1709–1773.

**LUGO**, **JOHN DE**, a Spanish cardinal and theologian, 1583–1660. His brother, **FRANCIS**, a Jesuit and theologian, 1580–1652.

**LUINI**, **BERNARDIN**, an Italian painter, 16th ct.

**LUKE**, the evangelist, said to have been a Jewish proselyte, converted by the preaching of Paul, and a physician by profession, was a native of Antioch, and probably wrote his gospel, as well as the Acts of the Apostles, while a prisoner in Rome A.D. 63. He was a companion of Paul in many of his journeys, and is understood to have been acquainted with the family of Mary, and even to have seen the Saviour in his youth. He died at the age of eighty-four, and was never married.

**LULLI**, **ANTHONY**, a French grammarian, died 1582.

**LULLY**, **JEAN BAPTISTE**, born at Florence in 1634, showed such a remarkable taste for music that a cordelier, from no other consideration than the hope of his some time becoming eminent in art, undertook to teach him the guitar. While under the care of his kind guitar master he attracted the attention of the Chevalier Guise, a French gentleman, who took him at ten years of age to Paris, to be page to the Mdle. de Montpensier, niece of Louis XIV. While in this menial capacity, he used to spend his leisure time in practising upon an old violin, and his taste in music having reached the ear of the princess, she immediately procured a master to

teach him the violin, and in the course of a few months he was elevated to the rank of a court musician, and afterwards admitted into the king's band, which was styled the 'Les Petits Violons,' of which corps he soon afterwards became the head. From this time Lully's fame as a performer and composer was fully established and recognized. At this time one who could read music at sight was esteemed as a great musician, and not one-half those then living in France were so far accomplished as to be able to play an accompaniment on the harpsichord or theorbo to the exercises of the scholars. Lully in this respect contributed greatly to the progress of musical science, and in his compositions introduced many of the improvements which have since become inseparable from compositions of the slightest kind. In the year 1686 the king having recovered from a serious indisposition which threatened his life, Lully was required to compose a *Te Deum*. Accordingly he wrote one, which was as remarkable for its excellence as it was for an unhappy accident which befel the composer during its performance, which he conducted. In the midst of one of the movements of this work, Lully struck his foot with the cane with which he was beating time. This caused considerable inflammation, and the injury was so untractable that his physician advised him to have his little toe cut off; and, after a delay of some days his foot; and at length the whole limb. At this juncture an empiric offered to effect a cure without amputation. Two thousand pistoles were to be his guerdon if he succeeded; but, as might have been expected, Lully became one more victim to the popular faith in quackery. He died in 1687, and was interred in the church of the Discalcent Augustines, at Paris, where an elegant mausoleum was erected to his memory. Lully's fame now chiefly rests on his overtures, a species of composition of which he is said to have been the inventor. He wrote several operas, motets and other compositions for the church, besides a number of symphonies in three parts for violins. He had two sons, **LOUIS** and **JEAN**, also musicians. They in conjunction composed the music to an opera named 'Zephire et Flore,' which was performed at the Academie Royale in 1688. [J.M.]

**LULLY**, **RAYMOND**, a great theurgist and philosopher of the middle ages, was of Catalonian descent, and was born at Palma, the capital of Majorca, 1235. He commenced life as a courtier and man of pleasure, but was converted, when about thirty years of age, to the religious life, chiefly by the exhortations of a married lady, to whom he had professed the most ardent devotion. For about ten years, 1265–1275, he lived more or less in a solitary place, and became the subject of remarkable ecstasies and visions—the end being, that his prayers for wisdom to convert the heathen were answered, he says, by a singular illumination of his mind, in which the principles of things became manifest to him. In this light, with the aid of his investigations in Arabian philosophy, he conceived a new system of dialectics, which may be consulted in his 'Ars Generalis Ultima,' first published 1480; the 'Ars Brevis,' published 1481; and the 'Arbor Scientiæ,' 1482. The first of these (of which the second is an abridged method) proposes a universal art, or science of sciences, in the principles of which all others are supposed to be comprehended, and by the aid of which Lully maintained they could all be demonstrated. The 'Arbor Scientiæ,' or tree of knowledge, contains a demonstration of the love of God and the neighbor, traced from its root to its fruit. It is impossible to enumerate all his works, but their general object is to de-

monstrate by an infallible method, all the primary truths of religion, including the existence and life of Christ; and they embrace in their scope, the physical and metaphysical sciences; and, as a necessary consequence, the doctrines of the alchemists, who claim Raymond Lully as one of their greatest masters. His practical means to attain the end of his life were as large in their scope as his system of logic; and he embodied them in three proposals, which he urged upon the pope and Philip the Fair, making many journeys to effect his purpose. These were—1. That all the existing military orders should be formed into one body. 2. That the works and schools of the philosopher Averrhoes, should be absolutely suppressed. 3. That monasteries should be built in all parts of the world, to instruct in strange languages and in the new dialectic, such as should enter into vows for the conversion of infidels. It must be admitted that this was a magnificent political design, and there is nothing in history to compare with it, except the achievements of Loyola. Raymond Lully, disappointed, after the most indefatigable efforts to procure the adoption of his system, embarked for Turin, to commence his apostleship single-handed, and there, it is believed, he found the death of a martyr, 1315. His works acquired great celebrity, and were often reprinted in the 16th century. The best of his apologists is the French priest Ant. Perroquet. Naudé ridicules his pretensions, and calls him an ignorant friar, but without exhibiting any apprehension of what he really teaches. [E.R.]

LUTHER, the great German reformer, was born at Eisleben, 10th November, 1483. As he was born on St. Martin's Eve, and baptized the next day, he received his Christian name of Martin. His father, who was a poor miner, left Eisleben for Mansfield, when the infant Martin was scarcely six months old. Here the hardy laborer so prospered, as to have at length two blast furnaces of his own, and to be thus enabled by a benignant Providence, to give his son a good education. After getting such tuition as the place of parental residence could afford, Martin was sent at the age of fourteen to school at Magdeburg, where his poverty forced him, with other boys, to traverse the neighboring villages and to sing hymns as a means of procuring a supply of victuals. Re-

moving next year to Isenach, he was pressed by similar difficulties, and compelled to a similar means of relief, till a benevolent family took him under their roof. His father was anxious that his son should study law, and Martin entered the university of Erfurt in 1501. The fashionable scholastic philosophy occupied him here for a series of years, and 'the whole university admired his genius.' During the second year of his studies at Erfurt, being a laborious reader, and in the habit of ransacking the college library and devouring its volumes, he found a copy of the Latin Bible, a book he had never seen before, and which on his reading it, stirred up strange and rapturous sensations within him. Not long afterwards his severe studies produced an alarming illness, which brought him face to face with death, and created serious and permanent religious impressions, which were so deepened by the death of a very intimate friend and fellow-student by a stroke of lightning, that he at once resolved to become a monk, and leaving all his property behind him, but a Virgil and Plautus, and giving his astonished friends a hearty farewell banquet, he entered the monastery of the hermits of St. Augustine. Here the ambitious scholar soon felt the crushing despotism of those monkish brothers, for he was forced to do the most menial and disgusting offices, and the master of arts was made a servant of all work—sweeper, porter, and beggar, for the lazy drones who buzzed in the convent. Still, he did not neglect his studies, and he strove earnestly all the while to obtain that spiritual peace and sanctity which he had imagined must be easily found in a religious establishment. Alas! he watched, fasted, prayed, read, and did penance on himself in vain. His melancholy could not be relieved by such ghostly mechanism. His was not a mind to be cheated into quiet by monastic routine, or degraded and hushed by morbid asceticism. But the conversations of Staupitz, his vicar-general, at length led the young Augustinian to feel the freedom and peace of the gospel, and he was ordained to the priesthood, and celebrated his first mass, in his twenty-fourth year. By the influence of Staupitz, Luther was, in 1508, called by Frederick, elector of Saxony, to be a professor of philosophy in the university of Wittenberg. Here in a short time he taught also biblical theology, and obtained more internal serenity, and a deeper view of the divine plan of redemption. He began to preach too with that vigor, impetuosity, and eloquence which soon attracted immense crowds. About 1510 he was sent to Rome on ecclesiastical business, and his mind received a terrible shock by what he witnessed of the idleness, profanity, and sensuality of the Romish clergy and laity, and the grief and indignation he experienced during this visit to the city of the pope, caused the veil to fall from his eyes. On returning from the Italian metropolis, he was, in 1512, made doctor of divinity, and he continued to preach boldly, attacking the scholastic philosophy, and basing his arguments more and more on the Holy Scriptures. The court of Rome, to supply its luxuries, and aid in building St. Peter's, had commissioned indulgences to be sold in Germany. The traffic was carried on with the utmost effrontery, and under a regular tariff, and Tetzels was a fit instrument for the nefarious commerce in the souls of men. Some of the people of Wittenberg, who had confessed to Luther, refused to abandon their sins, and pleaded the indulgences which they had bought. The spirit of Luther was fired—the spark was laid to the train which ended in so mighty an explosion. He preached and remonstrated, and on the 31st October, 1517,

nailed to the door of the castle church his ninety-five theses, and sent a copy of them to the archbishop of Magdeburg. The consequent discussions with Tetzel at Wittenberg, and his debates upon the same subject at Heidelberg, only increased and deepened the agitation, and added to Luther's popularity. By and by he was summoned to appear and answer at Augsburg before the papal legate, Cardinal Cajetan. At the several interviews he stood firm and resolved, and the friar Martin returned in triumph to his cell and his lecture-room. The excitement was now so prodigious that the courteous Elector wished him to leave the city—the idea of a capital penalty for him was loudly talked of, and the unquailing Luther at last appealed from the pope to a general council. But Militz, another legate, was appointed, and at a meeting which took place at Altenburg in 1519, Luther was so far cajoled as to write a humble and apologetic letter to Leo. The letter was unheeded—the reformer became more and more alive to the errors of the church—the disputation with Eckius still forced him onwards, and, being too honest to conceal his convictions, he took advantage of the press, and his works found a wondrous and immediate circulation. Rome became seriously alarmed, and Leo at length issued a bull of excommunication, which Luther publicly and contemptuously burnt before an immense assembly at Wittenberg. The German mind was thoroughly roused, and prepared to throw off the yoke of Rome. Luther's separation from Rome was now complete. Leo urged the new emperor, Charles V., to apprehend and punish the turbulent and daring heretic, but by the influence of the elector of Saxony, the reformer's cause was tried at Worms. On his way to Worms, Spalatin, apprehensive for his safety, despatched a messenger to forewarn and dissuade him from continuing his journey, but the magnanimous champion replied, 'Go tell your master, that though there were as many devils in Worms as tiles upon the housetops, I will enter it.' On the 16th of April he reached the city, attired in his friar's cowl; multitudes met him, and he entered it attended by 2,000 persons. Before his 304 august judges, the emperor and his nobility, his courage did not fail, for clearly and fully did he vindicate his past procedure, and he steadily appealed to the authority of Scripture. The result was, that Charles issued a rescript 'against the evil fiend in human form,' 'the fool,' and 'the blasphemer,' and put him under the ban of the empire. Luther had already left the town, pursuing the road that took him to Mora, that he might see his aged grandmother. He resumed his journey the next day, but as he passed through the depths of the Thuringian forest, he was roughly seized by five horsemen, and carried to the castle of Wartburg, and a whole year he lay there in solitude, while his friends mourned his absence or death. But his powerful patrons had in this way provided for his safety. This period of forced retirement was not mis-spent, and though he had to wrestle with morbid and nervous sensations, produced by his confinement and sedentary life, he translated the New Testament into German, which was published in 1522. Leaving his Patmos, and returning to Wittenberg, his undaunted energy carried all before it, the reformation was ushered in, and in 1524 Luther abandoned the monastic dress—the last symbol of his connection with Rome. He crushed his fanatical opponents, who did more injury to his cause than his papal adversaries, gallantly entered the lists with Henry VIII. of England, and fought stoutly with Erasmus on the Freedom of the Will. In 1525, he was married

[Luther's Chamber at Wittenberg.]

by Pomeranus, to Catherine von Bora, who had left her convent about two years before, and 'his dear and lovely Ketha' proved a kind and affectionate wife to him. The labors of Luther were at this period incessant, for the care of all the churches was upon him, and many of the states of Germany embraced his doctrines. From 1517 to 1526, every year saw him publish a book or books against some form of papal error. The anabaptists were a sad thorn in his side, and by their wretched excesses brought great scandal upon his works. The translation of the Bible occupied a large portion of his time, for it was the mainstay of the reformation; and commentaries on almost all the books of the Bible proceeded from his unwearied pen. Councils were in those days reckoned a grand specific for healing ecclesiastical discord, and there were not a few in the life of Luther: Worms in 1521, Nuremberg in 1522-23, when the German princes presented a list of 'a hundred grievances;' another at the same place in the following year, at which the members resolved to work out as far as possible the decisions of that of Worms, and that of Augsburg in 1525, adjourned to Spire in 1526, at which a general council was demanded. Another diet was convoked to meet in February, 1529, and the imperial and popish party having the mastery, decreed to suppress the reformation by force. Against this bloody decree the deputies solemnly *protested*, and the reforming band received from this circumstance the appropriate name of *Protestants*. Luther and Zwingli now quarrelled about the nature of the Lord's Supper, and maintained a worse than idle contest, nay, met personally for disputation at Marburg. The diet of Augsburg met in 1530, the confession prepared by Melancthon was submitted to it, and protestantism, in spite of all obstacles, was firmly established among the German nations. Amid many interruptions and incessant labors, Luther continued at Wittenberg during his remaining years. In his sixty-second year his health began to give way—the strong man was bowed down. After an altercation with the lawyers about clandestine marriages, and certain female fashions in dress, he indignantly left Wittenberg for Eisleben in the month of January, 1546. The river Issel being swollen, he was five days upon the road. On the 17th of February he complained of oppressive pain in his chest. Momentary relief from it was soon obtained; but he was again attacked in the night, and after brief but earnest religious exercises, and thrice repeating the inspired words, 'Into thy hands I commit my spirit—God of truth thou hast redeemed me,' he expired between two and three o'clock in the morning. His disease is supposed to

have been *angina pectoris*, but some say, cancer in the stomach. On the 19th his body was enclosed in a leaden coffin, and carried into the church ere it was removed for burial; and on the 22d the hearse arrived at Wittemberg, where the whole city stood around the gates in deepest sorrow and lamentation. Luther was buried in the Schloss-kirche, and many a traveller has read the simple inscription that still stands over his tomb.—No one will deny that Luther was one of the mighty. He had an earnest and honest nature—a stranger alike to cowardice and dissimulation. Whatever he did, he did with his might. That he sometimes spoke roughly and wrote harshly, no one knew better than himself—‘I was born,’ said he, ‘to fight with devils and storms, and hence it is that my writings are so boisterous and stormy.’ It required a leonine temperament to do the work of Martin Luther. Yet he was a man of a loving and generous heart—playful and happy with his wife and family or friends. He liked hilarity, and his great mind rejoiced to unbend. Intellect and passion were alike powerful within him, for with all his clearness of reason and conscientious decision, he was often swayed by impulse. In those moments he uttered or wrote those expressions, that have so often the semblance of inconsistent paradoxes. So much was he formed to lead opinion, that he could not easily bear contradiction. His labor was incredible, as his remaining works attest. Luther had great natural capabilities for music, and he had sedulously studied its theory. He wrote very many hymns and set them to music. In 1523 he published his first hymn with music in a single sheet; the next year he wrote seventeen with a similar accompaniment, and in other subsequent years his muse was not idle. Forty-two original tunes were composed by himself and his associates. But amidst all his literary labors, his translation of the Scriptures stands pre-eminent. Fully aware of the difficult and responsible task, he craved assistance in every form and from every available quarter. When the Hebrew terms belonging to botany and zoology perplexed him, he consulted the physician Sturciad, and he also obtained useful information from his friend Spalatin, who not only instructed him in natural history, but sent him specimens from the superb collection of gems which belonged to the elector of Saxony. Nay, he even employed butchers to dissect animals in his presence, that he might be able to discriminate and render accurately the various sacrificial terms of the Levitical code. But especially did he summon erudite and skilled professors of theology to his aid. They met from time to time, each having prepared himself for the interview by a thorough elaboration of the literary materials belonging to his department of investigation. At those repeated and prolonged consultations, Luther invariably presided, and he had always spread out before him, his own manuscript, the ink of which was scarcely dry, the Hebrew Bible, and the Latin Vulgate. On his one hand sat Melancthon, with the Greek Scriptures before him, and on his other was placed Casper Cruciger, with his notes made from the Chaldee Targums. Bugenhagen, usually called Pomeranus, from the country of his birth, was also by their side, ready with his suggestions from the rabbinical writings and the old Greek versions. These scholars did their work with marvellous precision and fidelity, for they sometimes returned fourteen successive days to the reconsideration of a doubtful clause or word.—In short, Martin Luther was one of the few men whom Providence occasionally endows, prepares, and raises up for gi-

gantic enterprise. He lived to see his work of religious emancipation immovably rooted among the German nations—the work of one man and one age. He sowed the seed in tears, but he saw the harvest gathered with joy. Luther was a man of a compact physical frame, with broad shoulders, a large and massive brow, and a firm set mouth. His works have been often reprinted. The best edition of his correspondence is that of De Wette, Berlin, 1825–28, 5 vols. 8vo. His Table Talk, all of which is not authentic, is one of the foundations of his *Memoires* by Michelet, Paris, 1837. A good edition of his works was published at Halle, in 24 volumes, 1737–53, and another edition in 12mo. is in course of publication at Erlangen, 1826–53; 51 volumes have already appeared, and the whole is to occupy 60 volumes. There are many separate lives of the reformer, among which may be enumerated those of Pfizer, Meurer, Jürgen, König, Weydman and Wildenhahn. [J.E.]

LUTI, or LUTTI, B., an Ital. artist, 1666–1724.

LUTMA. J., a Dutch engraver, 1609–1685.

LUTTEREL, H., an Irish engraver, born 1650.

LUXDORF, B. W., a Danish *savant*, 1716–88.

LUXEMBOURG, FRANCIS HENRY DE MONTMORENCI BOUTEVILLE, Duc De, one of the greatest generals of the age of Louis XIV., was a posthumous son of the count de Bouteville, and a pupil in war of the great Condé. He was constantly opposed to William III., and was successful against him in the battle of Nerwinde 1695, when 20,000 men were left on the field. Born 1628, commander-in-chief in Holland 1672, marshal 1675, died 1695. One of his sons, CHRISTIAN LOUIS, served in the Austrian war of succession, 1675–1746. The nephew of the latter, C. F. FREDERIC, was also a French marshal, 1702–1764. His wife MADELEINE, widow of the duke de Boufflers, was celebrated at the court of Louis XV., 1707–1787.

LUYKEN, JOHN, a Dutch engraver, 1649–1712. His son and pupil, N. GASPARD, d. before him, 1660.

LUYNES, CHARLES D'ALBERT, Duc De, descended from a noble Florentine family named Alberti, who established themselves in France in 1413, was born at Pont St. Esprit 1578, and was godson of Henry IV. In the reign of Louis XIII. he became prime minister, and at length constable of France; died 1621. His son LOUIS CHARLES, an ascetic writer, and one of the Port-Royal *savants*, author of many works published under the name of ‘Laval,’ flourished 1629–1690.

LUZAN, IGNATIUS, a Spanish poet, 1695–1754.

LUZATTO, S., a Venetian rabbi. 17th century.

LYCON, a Greek philosopher, 4th century B.C.

LYCOPHRON, a Greek poet, 2d century B.C.

LYCURGUS, the great legislator of the Lacedæmonians, was the son of Eunomus, king of Sparta. His history commences with the year 898 B.C., when he might have usurped the throne on the death of his brother, but preferring to guard the kingdom for the unborn child of the latter, he devoted himself to the study of legislation. On his nephew becoming of age, Lycurgus travelled into Crete, Egypt, and Asia, and thus prepared himself to give Sparta the laws which have rendered his name immortal. His object was to regulate the manners as well as the government, and to form a warrior nation, in which no private interest should prevail over the public good. It is said that Lycurgus persuaded the Spartans to swear that they would observe these laws till his return from another journey, and that he then departed, and they never heard of him more. One account states that he starved himself

[Lycurgus, from an antique bust.]

to death, but it is more probable that he retired to private life, and died naturally, as Lucian records, at the age of eighty-five. [E.R.]

LYCURGUS, an Athenian orator and political functionary, about 408–325 B.C.

LYDGATE, JOHN, an old English poet, who flourished soon after the time of Chaucer, and is known to have been living in the middle of the 15th century. His history is very obscure, but he was a monk of Bury St. Edmunds, and was ordained a priest 1397. His principal works are 'The Siege of Troy,' 'Story of Thebes,' and 'The Fall of Princes.'

LYDIAT, THOMAS, an English divine, distinguished as a chronologist and mathem., 1572–1649.

LYDIUS, B. L., a German protestant divine, established at Dort as a refugee in 1603, died 1629. His son, JAMES, a divine and critic, was also a minister at Dort, dates unknown.

LYE, EDWARD, an antiquarian *savant*, au. of an 'Anglo-Saxon and Gothic Dict.,' &c., 1704–69.

LYELL, CHARLES, father of the well-known geologist, a Scotchman, disting. as a discoverer in botany, and translator of Dante, 1767–1849.

LYFORD, WILLIAM, a wr. of practical divinity, rector of Sherborne, in Dorsetshire, 1598–1653.

LYMAN, PHINEAS, an American Colonial major-general, born in Conn. in 1716. Fought under Sir Wm. Johnson, Abercrombie, Lord Howe and Amherst in the various colonial wars with the French in Canada, and commanded the provincial troops in an expedition against Havana. Died in 1775.

LYMAN, WILLIAM, an Am. brigadier-general, member of Congress and consul to London, d. 1811.

LYNAR, ROCH FREDERIC, Count De, a Danish statesman and scholar, author of political works and travels, 1708–1781. His son, C. GOTTLÖB, disting. as a publicist and ascetic writer, 1748–96.

LYNCH, J. an Irish polemic, died about 1680.

LYNCH, THOMAS, an American revolutionist, and a signer of the Declaration of Independence, was born in South Carolina, 1749. Fought in the revolutionary war, and was a member of the first congress. Lost at sea in 1779.

LYNDE, SIR HUMPHREY, an English magistrate, known as a writer in favor of protestantism, 1579–1536.

LYNDE, BENJAMIN, chief justice of Mass., 1666–1745. His son, of the same name, became also chief justice of Mass. in 1770.

LYNDON, JOSIAS, governor of R. I. in 1768. Died 1778.

LYNDSAY, SIR DAVID, one of the most famous of the old Scottish poets, was probably born in or soon after the year 1490. He is usually described

as 'of the Mount,' which was his paternal estate in Fifeshire. He received instruction at the university of St. Andrews; and, in 1512, when he may have been a little above twenty years old, was placed about the person of the new-born prince, who afterwards became James V. of Scotland. He first appeared, both as a public servant and as an author, in 1528, when the young king knew of his subjection to the Douglasses. In the next year he was appointed Lyon-king-at-arms; and he was employed afterwards on embassies and other charges, both before and after the death of his royal patron. He sided with the Reformers, to the extent, at any rate, of desiring and promoting purification of ecclesiastical polity and discipline; but he never figured very prominently in the fierce quarrels of his time, and spent his latest years so quietly that it is not known when he died. He can be traced positively till 1555. His poetical works have nothing of high or fine poetical inspiration; but they abound in poetical good sense and sagacity, show great observation of society and manners, and are written with remarkable force of language, and tremendous strength of sarcastic and satirical invective. The most interesting of them is his 'Satire of the Three Estates,' a huge dramatic piece, hovering between the allegoric moralities, and those more modern plays in which individual personages were introduced. His 'Monarchy, a Dialogue between Experience and a Courtier,' is his largest composition, but very heavy; and his 'Squire Meldrum' is an indifferent attempt at poetizing the adventures of a noted contemporary. The most successful of his attempts besides many passages of his plays, are his small pieces of satire on the court, on politicians, and on churchmen; and chief of these are two early productions, 'The Dream,' and the 'complaint of the Papingo.' [W.S.]

LYNDWODE, or LINDGOOD, WILLIAM, an ecclesiastical lawyer and statesman, in the reign of Henry VI., and bishop of St. David's, died 1446.

LYON, J., an English physician, 1734–1817.

LYON, RICHARD, a poet and preacher, born in England about 1620, but came early to America; was the editor of Eliot's 'Bay Psalms.'

LYONNET, P., a Ger. naturalist, 1707–1789.

LYONNET, R., a medical writer, 17th century.

LYONS, ISRAEL, son of a Polish Jew, distinguished as an astronomer, mathematician, and botanist, 1739–1775.

LYRA, NICHOLAS DE, in Latin *Lyranus*, a Scripture commentator of Normandy, died 1340.

LYS, the name of several painters—1. JOHN VANDER LYS, a Dutch genre painter, born at Breda 1600. 2. JOHN LYS, flourished at Oldenburg, 1570–1629. 3. Du Lys, of the family of Joan Darc, called *Nicoletto* by the Italians, died at Nanci 1732.

LYSANDER, a Lacedæmonian general, who put an end to the Peloponnesian war by his victory over the Athenians 405 B.C. He established the 'thirty tyrants' at Athens, and was killed in a battle with the Thebans 395.

LYSCHANDER, or LYSCANDER, JOHN, a Danish antiquarian, died 1582. His brother, CL. CHRISTOPHERSON, an historian, 1557–1623.

LYSERUS, POLYCARP, a Lutheran divine of Ger-

many, 1552-1601. JOHN, of the same family, a writer on Polygamy, died 1684.

LYSIAS, a famous orator of Athens, 4th c. B.C.

LYSIAS, a general of Antiochus Epiphanes, king of Syria, vanquished by Judas Maccabæus.

LYSIMACHUS, one of Alexander's lieutenants, who became master of Thrace on the division of his conquests, was killed B.C. 282.

LYSIPPUS, a Greek sculptor, lived B.C. 350.

LYSIS, a Pythagorean philosopher, B.C. 388.

LYSISTRATUS, a Greek sculptor, 4th c. B.C.

LYSONS, DANIEL, an English physician and medical writer, died 1800. His son, SAMUEL, a writer on typography and the Roman antiquities of Great Britain, appointed keeper of the records in the Tower, 1763-1819.

LYTE, HENRY, an English botanist, 1529-1607.

LYTTLETON, GEORGE LORD, an author and statesman, was born in January, 1709, at Hagley, in Worcestershire, the seat of his father, to whose estate and baronetcy he was heir. He showed early in life the same qualities which he afterwards displayed,—fluency of diction, and justness of taste. He never rose above an easy mediocrity either in literature or statesmanship, but his popular amiable manners, his thorough chivalrous liberality of sentiment, and his good moral principles, justly made him an object of affectionate admiration among the men of genius of the age, and he thus occupies a more conspicuous position than his talents alone could have achieved. He is ranked among the converts from infidelity, but his religion did not become fanatical, and it may be questioned if it displaced anything beyond a dissatisfied partial scepticism. He was twice married, and the object of his earlier choice, from the deep affection with which he regarded her when alive, and his grief for her death, made the contrast with her successor, from whom Lyttleton found it necessary to separate, a matter of much sad remark among his contemporaries. Though his father was in office, he joined the young 'Patriots'

who drove Walpole from power. He held several secondary offices, and preceded Mr. Legge as Chancellor of the Exchequer. He was created a baron in 1757, and died in 1773. His miscellanies, in prose and verse, are now forgotten, and his laborious but feeble history of Henry II., is only known to historical inquirers. [J.H.B.]

[Hagley, Seat of Lord Lyttleton.]

LYTTLETON, CHARLES, younger brother of the preceding, born in 1714, became bishop of Carlisle in 1762, and was distinguished for his antiquarian learning; died 1768. THOMAS LYTTLETON, the son of Lord George, and his successor in the peerage, was a young nobleman of dissipated manners, who possessed, however, much of his father's genius. He is the subject of a well-authenticated ghost story, which relates that he was warned of his death three days before it happened, in 1779, when he was in good health, and only thirty-five years of age. MABOUL, J., a French prelate, died 1723.

MABUSE, JAN DE, one of the most celebrated painters of the old Flemish school of Bruges, is the earliest master of any consideration who practised the art in England. His family name appears to have been Gossaert, but he signed himself Joannes Malbodius, that is, of Mabuse, his birth-place. Mabuse was born about 1470; he studied in Italy, and about 1499 visited England, where he was employed by Henry VII.; there is a picture of this king's family, by him, at Hampton Court; he died

at Antwerp in 1532.—Mabuse was a painter of extraordinary ability; his best works are generally brilliantly colored, well drawn, and finished with extreme delicacy; his masterpiece is also in England—the adoration of the kings, at Castle Howard, originally painted as an altar-piece for the abbey of Grammont, it afterwards fell into the possession of Prince Charles of Lorraine, from whose collection it was brought into England.—(Van Mander, *Leven der Schilders*, &c.; Walpole, *Anecdotes of Painting*, &c.) MACHAULT, JOHN DE, a learned French Jesuit, 1561-1629. JOHN BAPTISTE DE MACHAULT, another Jesuit writer, 1591-1640. JAMES, a third of the name, author of 'Missions to Paraguay,' &c., 1600-1680.

[Machiavelli.]

MACHIAVELLI, NICOLÒ, whose name is so well known by the English abbreviation Machiavel, was born at Florence in the year 1469. Less seems to be known of his education than might be expected from the interest created by his distinguished place among political philosophers. At the age of thirty, he is found deep in the perplexed Italian politics of the period, having been secretary of the board of 'The Ten.' In whatever light his works may be dealt with critically, there is no doubt that they were founded upon the closest practical observation of political movements, as well as on a scholarly acquaintanceship with history. But it must also be remembered, that however deeply he was engaged in Italian conflict and diplomacy, and however the Peninsula, with its multitudes of republican, monarchical, and aristocratic states, along with the hierarchy ruling so large a portion of it, may have furnished an epitome of the politics of the world, yet, as in other departments of inquiry, the narrowness of the field should be considered in estimating the conclusions of the inquirer. It is true, however, that one possessed of his acuteness would add to his Italian experience a consciousness of the machinations of France and the German empire, along with the rising Spanish kingdom, to get possession of Italy. The events of his life would not be fully told, without a narrative

of the very complicated history of Italy during his active career. He had to conduct some extremely critical negotiations for the Florentine republic with the perfidious and rapacious Cæsar Borgia, and the thought has perhaps been often repeated, that never could there have been more ferocity and guile condensed within the compass of two human bosoms, than when Borgia and Machiavelli met in the same cabinet. The political and critical disputes about Machiavelli have centred round his essay or discourse on the prince, intended not for publication, but for the private instruction of the young princes of the Medici family. It has been maintained that he wrote to caricature the principles he professes, but this is an unnecessary theory. It is easy to see that he meant what he says, and his opinions are not wonderful, considering the school in which he was taught. He wrote two other and more extensive works, one on the several books of the first decade of Livy's history—another, a curious dialogue on the art of war. He died on the 22d of June, 1527.

MACHIN, J., an English astronomer, 18th cent.

MACINTOSH, JOHN, an Amer. revolutionary officer and general. Died 1826.

MACINTOSH, LACHLAN, an Amer. general and officer in the revolutionary war. Subsequently a member of Congress and Indian Com. Died 1806.

MACK, CHARLES, BARON VON, an Austrian general, who rose to distinction during the wars of the French revolution, and was at the head of the army of Naples opposed to the French in Italy, 1798. The most remarkable incident in his career, was his surrender with 28,000 Austrian troops to Buonaparte, for which he was tried by court-martial at Vienna. Born in Franconia 1752; died, obscure and disgraced, 1828.

MACKAY, ALEXANDER, an English journalist, for some time connected with the London Morning Chronicle. He was devoted to the study of political economy, and a strenuous advocate for reform. He had travelled in the United States, and published the result of his observations in an excellent work, entitled the 'Western World.' Died on his way to England from India in 1854, at the early age of 33.

MACKAY, AND., a dist. mathemat., died 1809.

MACKENZIE, SIR ALEX., was a native of Inverness, and at an early period of his life settled in Canada. After having been eight years in the service of the North-West Fur Company, he was sent from Fort Chipewyan, 3d June, 1789, on an exploring expedition towards the north, in which he traced the great river named after him, and reached the Arctic Ocean in lat. 69°. Some time previously (1771) this great barrier had been first gained, at the mouth of the Coppermine River, by Samuel Hearne, an agent of the Hudson's Bay Company. On another expedition, undertaken 10th October, 1792, Mackenzie was the first to cross the Rocky Mountains and reach the Pacific. He published an account of his travels, London, 1801; and soon after had the honor of knighthood conferred upon him. [J.B.]

MACKENZIE, ALEXANDER SLIDELL, was born in New York, April 6, 1803. His father was John Slidell, and he added his mother's name of Mackenzie at the request of his maternal uncle, by an act of the legislature in 1837. He entered the navy early, was employed in various services, until a second attack of yellow fever compelled his return home, and led to his visit to Europe in 1825, the result of which was his much admired book, the 'Year in Spain.' He returned to the naval service, and again visited Europe in 1835, writing on his return his 'American in England,' and 'Spain Revisited.' His other chief

literary labors were his biographies of Paul Jones and Decatur. In 1841 he attained the rank of commander in the navy, and in 1842 made his cruise on board the *Somers*, in which the mutiny of Spencer and his associates occurred, which resulted in the hanging of the former, and two of his comrades, from the yard-arm of that vessel. On his return home a high Court of Enquiry, composed of Commodores Stewart, Jacob Jones, and Dallas, approved of his conduct, and the case was further at his own request submitted to a court-martial at New York, composed of Com. Downes as president, and twelve of his brother officers, who came to a similar decision. During the war with Mexico he commanded the *Mississippi*. He died at home, Sept. 13, 1848. In his personal character, he was a man of rigid integrity and devotional feeling. His writings show fine descriptive powers.

**MACKENZIE, GEORGE**, a physician of Edinburgh, author of a biography of eminent Scotchmen, published 1708-1722.

**MACKENZIE, SIR GEORGE**, a Scotch lawyer and miscellaneous writer, whose judicial career in the time of the covenanters procured him the appellation of 'the blood-thirsty advocate;' born at Dundee, 1636, died 1691. His relative, **GEORGE MACKENZIE**, Viscount Tarbat, and first earl of Cromarty, secretary of state in the reign of Queen Anne, and a writer on prophecy, &c., 1626-1714.

**MACKENZIE, HENRY**, born in 1745, survived till 1831. Though the writings which made his name popular were of a highly romantic and sentimental cast, his life was one of steady routine. He was the son of a physician in Edinburgh; and there was obtained for him, very early, an appointment as one of the attorneys in the Scottish Court of Exchequer; a respectable, easy, and well-paid place. He held it till 1804, when the interest of his friends, and the value attached to pamphlets he had written in support of the government, gained for him the very lucrative office of comptroller of taxes for Scotland. His earliest novel, which was also his best, was 'The Man of Feeling,' published in 1771. 'The Man of the World' appeared in 1783, and was succeeded by 'Julia de Roubigné.' He edited the periodical called 'The Mirror,' in 1779 and 1780; and 'The Lounger' in 1785 and 1786. He furnished to each of these a large number of papers, among which were some pleasing stories: and he wrote also plays, translations from the German, and critical and other essays. [W.S.]

**MACKENZIE, J.**, a medical writer, died 1761.

**MACKENZIE, SIR KENNETH DOUGLAS**, a British officer, who was in active service from 1781 to 1815, died 1833.

**MACKESON, COLONEL**, an East Indian officer and political agent of the British government, distinguished during the last twenty years in all the important transactions connected with British policy and military operations in the Punjab, including the late war with Afghanistan, d. in the prime of life, 1853.

**MACKIE, JOHN**, a Scotch physician, 1748-1831.

**MACKINNON, DANIEL**, lieutenant-colonel of the Coldstream Guards, famous for the occupation and defence of Hougumont at Waterloo; born 1791, died, after writing a history of his corps, 1836.

**MACKINNON, HENRY**, a general in the peninsular war, uncle to the preceding, born 1773, killed at the storming of Ciudad Rodrigo, 1812.

**MACKINTOSH, SIR JAMES**, was born near Inverness, in 1765. From his father he inherited a small estate, the sale of which brought him several thousand pounds; but in the early part of his life he

[Sir James Mackintosh.]

had to seek for maintenance by professional labor. Medicine was his first pursuit, which he studied in Edinburgh, after having gone through the academical course of arts at Aberdeen. Going to London in 1788, he occupied himself much with literature, wrote for the press, and, in 1791, published the 'Vindiciæ Gallicæ,' a vigorous but over-sanguine reply to the attacks of Burke on the French Revolution. Mackintosh had now turned to legal studies, and delivered with great approbation Lectures on the Law of Nature and Nations. In 1803, he distinguished himself by his defence of Peltier, a French emigrant, charged with a libel on Napoleon. In 1804, after having been knighted, he went to India as Recorder of Bombay. Having entitled himself, by seven years' service, to a retiring allowance of twelve hundred a year, he returned to England. He sat in the House of Commons from 1813, acting on the Whig side, and making some impressive speeches, especially on reforms in the criminal law; but he was both too philosophical and too indolent to be a great parliamentary orator or debater. His power of conversation was highly celebrated; and he was not less esteemed for his candor and amiability, than for his clearness and comprehensiveness of thinking and the great diversity of his knowledge. His writings, though valuable, scarcely came up to the expectations that were entertained of him. The best of them is his fine 'Dissertation on the Progress of Ethical Philosophy,' contributed to the *Encyclopædia Britannica*, and since edited separately by Whewell. He wrote likewise a good many articles for the *Edinburgh Review*, and an able but not animated 'History of England' for Lardner's *Cabinet Cyclopædia*. His 'History of the Revolution' of 1668, which was to have been his masterpiece, was delayed by his indolence and fastidiousness, and left unfinished at his death in 1832. [W.S.]

**MACKLIN, CHARLES**, an eminent actor and dramatist, in the opinion of some, the first, in order of time, of stage-artists. He was born at Westmeath, in Ireland, 11th May, 1690, and was for some time employed at Trinity College, Dublin, as a badgeman. He came to England in 1711, and attempted the stage, but returned to his old occupation until 1716, when he again became a candidate for histrionic honors, as an actor in the London theatre, *Lincoln's-Inn-Fields*. He continued on the stage until 1789—*Shylock* being the part in which he was most distinguished, and to which he first gave the tragic reading which has been ever since retained. He was a man of great determination of character, and stood up for the professional rights of his brother actors, frequently to his own detriment. But his

vigorous intellect at last gave way, his understanding being impaired before his death, 11th July, 1797. Considering his great age, 107, this, however, was not remarkable. What his mind had been remains proved by his works, yet popular, 'The Man of the World,' and his 'Love à la Mode,' two comedies of great merit. [J.A.H.]

MACKNIGHT, JAMES, a Scottish divine, author of a 'Harmony of the Gospels,' &c., 1721-1800.

MACLAINE, A., an Irish divine, 1722-1804.

MACLAURIN, COLIN, a very eminent Scottish mathematician, born at Kilmodan, Argyllshire, in February, 1698; died at Edinburgh, 14th June, 1746. Distinguished for mathematical talent at a very early age—having, it is said, discovered many of the propositions of his *Geometria Organica*, when only sixteen—he gained, after a competition of ten days, the chair of mathematics at Marischal College, Aberdeen, in his nineteenth year; and in 1725, he was appointed to assist and succeed James Gregory in the same chair at Edinburgh. Maclaurin's separate works are these:—1st. *Geometria Organica*, a work on the description of Curves by the intersection of moving straight lines:—2d. *A Treatise of Fluxions*, in 2 vols. 4to. of which it may be safely said, that it is the best ever produced, with the view of expounding logically the principles of Fluxions. It is prolix, although full of interesting matter: its value now is simply historical:—3d. *A Treatise on Algebra*; and 4th. The posthumous work—*An Account of Sir Isaac Newton's Discoveries*,—a model of a popular exposition. Maclaurin wrote many separate memoirs, and he had the honor of dividing the prize of the Academy of Sciences, for an essay on the Tides, with Daniel Bernouilli, Euler, and Cavalieri. During the residence of this mathematician in Edinburgh, the irruption of the Highland Clans under Prince Charles Edward occurred. Maclaurin planned and superintended the works thrown up for the defence of the city, and exerted himself in every possible way on the side of the Government. He was obliged on this account to take refuge in England for a time, but he returned with Law and Order. His practical ability showed itself also in efforts to organize several public societies in Edinburgh. There are few scientific names that ought, in Scotland, to be held more in honor.

MACLAURIN, J., son of the preceding, was educated for the bar, and in 1787 became a judge under the title of Lord Dreghorn. He is au. of 'Arguments and Decisions in Remarkable Cases;' d. 1796.

MACLEAN, MRS. L. E. L. See LANDON.

MACLEAN, JOHN, an Amer. physician and chemical professor at Princeton, and subsequently of William and Mary College of Va. B. in Sc.tl., d. 1814.

MACLEOD, JOHN, a Scotch physician, who accompanied Lord Amherst's embassy to China, author of 'The Voyage of the Alceste,' 1782-1820.

MACLEOD, SIR J., a Brit. general, 1752-1834.

MACLIAU, a duke of Brittany, 560-577.

MACLOU, or MALO, a Welch saint, died 565.

MACMICHAEL, W., an Eng. phy., au. of a 'Journey from Moscow to Constantinople,' 1784-1839.

MACNALLY, L., an Irish dramatist, 1752-1820.

MACNEVIN, WM. JAMES, an Irish refugee to America, was born at Ballynahound in Ireland 1763, and having been educated in Germany as a physician, practised his profession in Dublin. In the Irish rebellion of 1791 was one of the united Irishmen, and in 1798 was arrested and imprisoned. Being set free after an imprisonment of four years, he travelled on the Continent, and wrote an account of his travels in Switzerland. He then joined the French army, having received a commission as captain of the

Irish brigade, but not being sent to Ireland, as he hoped, he threw up his rank in disappointment, and came to N. Y. in 1805, where he practised as a physician, and received the appointment of chemical professor in the medical college. He was the author of various med. and scientific works. Died 1841.

MACNICOL, REV. DR. DONALD, a Scotch minister, and master of Gaelic lit. and antiq., 1735-1802.

MACNISH, ROBERT, a physician of Glasgow, known as a contributor to magazine literature, under the appellation of 'the Modern Pythagorean,' author of 'The Anatomy of Drunkenness,' 'The Philosophy of Sleep,' &c., 1802-1837.

MACOMB, ALEX., commander-in-chief of the Amer. army, was born at Detroit in 1782. Having entered the army in 1799, he rapidly rose to the highest rank. During the war of 1812, he was a colonel, and was distinguished for his conduct at Niagara and Fort George. In 1814, he commanded as brigadier-general, the forces which co-operated with Macdonough on Lake Champlain, and gained the victory of Plattsburgh. In 1835 he became commander-in-chief of the U. S. army. Died 1841.

MACON, NATHANIEL, an Amer. politician, and distinguished member of Congress from N. C. He served for the long period of 37 years as Senator, from 1791 to 1828; as representative to Congress, was speaker of the lower House for a succession of years. He was attached to the political principles of Jefferson and Madison.

MACPHERSON, JAMES, was born in Inverness-shire in 1738, and received an academical education at Aberdeen. At the age of twenty, while he was a country schoolmaster, he published an indifferent heroic poem, 'The Highlander.' Soon afterwards, having gone southward as a family tutor, he excited the interest of the poet Home, Blair, and Adam Ferguson, by exhibiting pieces purporting to be translations of old Celtic poems. In 1760 he published a few specimens of these, entitled 'Fragments of Ancient Poetry, translated from the Gaelic or Erse Language.' After an excursion which he made to the Highlands to collect other metrical relics, there appeared the series of poems which, ascribed by Macpherson to Ossian, have raised so much controversy as to their genuineness; and which, through their strange union of genius and defect, have divided the critics nearly as much in regard to their literary merit. The epic poem of 'Fingal,' with smaller pieces, was published in 1762; the epic of 'Temora,' accompanied by other poems, in 1763. The translator and poet now turned to business, and obtained official appointments in Florida and in the West Indies. After this he resumed literary employment, chiefly historical, and was, in pamphlets and newspapers, an active and efficient partisan of the ministry. His political services procured for him the lucrative place of agent for the nabob of Arcot; and he sat in parliament for several years from 1780. He died in 1796, at an estate which he had purchased in his native district of Strathspey. [W.S.]

MACPHERSON, SIR JOHN, an employé of the East India Company, whose judicious management of affairs in the time of Hyder Ali and the Mahratta war, saved the presidency of Madras from ruin, 1767-1821.

MACQUARIE, gov. of N. S. Wales, 1762-1824.

MACQUART, J. H., a French physician, and editor of the 'Journal des Savants' after Barthez, 1726-1768. His son, L. C. HENRY, a physician and mineralogist, 1745-1808.

MACQUER, PETER JOSEPH, a French chemist of Scotch descent, known as a writer on natural philo-

sophy in the 'Journal des Savants,' 1718-84. His brother, PHILIP, an advocate and hist., 1720-70.

MACQUIN, A. D., a French poet, 1756-1823.

MACRET, C. F. A., a Fr. engraver, 1750-1783.

MACRIANUS, MARCUS FULVIUS, an Egyptian general, proclaimed emperor 260, k. in action 261.

MACRINO D'ALBA, an Ital. painter, 1460-1520.

MACRINUS, M. O., a Roman emperor, 217-218.

MACRINUS, SALMONEUS, the literary name of JOHN SALMON, a French poet, 1490-1557. His brother, CHARLES, also a Latin poet, killed in the massacre of St. Bartholomew, 1572.

MACROBIUS, AMBROSIUS AURELIUS THEODOSIUS, a Latin grammarian, author of the 'Saturnalia,' &c., 5th century.

MADALINSKI, A., a Polish general, 1739-1804.

MADAN, MARTIN, an English divine, who became a highly popular preacher at the Lock Hospital, author of several theological works, and of a plea for polygamy, in his book entitled 'Thelyphthora,' 1726-1813. His brother, Dr. SPENCER MADAN, bishop of Bristol and Peterborough, d. 1813.

MADDEN, SAMUEL, an Irish clergyman, whose name is held in honorable remembrance as the institutor of premiums for encouraging the useful and fine arts, from which the society for the encouragement of arts and sciences in London took its rise. Dr. Madden, besides his poems, and a drama entitled 'Themistocles, or the Lover of his Country,' published a singular volume of 'Letters and Biographical Memoirs,' relating to events and persons of the twentieth century, nearly the whole edition of which was bought up and destroyed as soon as it appeared. This distinguished benefactor of his country was of French descent; lived 1687-1765.

MADDOX, ISAAC, successively bishop of St. Asaph and Worcester, author of a 'Vindication of the Church of England in Answer to Neal,' 1697-1759.

MADDOX, WILLES, an Eng. paint., d. 1853, aged 40.

MADELEINE OF FRANCE, queen of Navarre, famous for the defence of her state against the enterprises of Ferdinand, king of Arragon, 1443-1495.

MADELENET, G., a Latin poet, 1587-1661.

MADER, J., a German philologist, 1626-1680.

MADERNO, C., an Italian architect, 1556-1629.

MADERNO, S., an Italian sculptor, 1576-1636.

[Madison.]

MADISON, JAMES, fourth president of the United States, was born in Virginia 1758, and, being edu-

cated for the bar, became a member of the Virginia convention in 1776. In 1784, he opposed the bill for a national system of worship; assisted in preparing the constitution, and, in 1789, became a member of the first Congress. His career as president dates from the retirement of Mr. Jefferson, 1809 to 1817, and is marked by the war with Great Britain 1812-1814, at the conclusion of which the northern limits of the United States were fixed at Lake Huron and Lake Superior. Mr. Madison died in 1836. His works have been published in 6 vols. 8vo.

MADISON, JAMES, an episcopal bishop of Virginia, appointed in 1788. Died 1812. His son, George, an officer in the war of 1812, and governor of Kentucky in 1816, d. 1816.

MADOC, or MADOG, a Welch prince, said to have discovered the American continent, and settled a colony there in 1170. A tribe of white Indians, inhabiting, as it is said, the country about the northern branches of the Mississippi, and speaking the Welch language, are supposed to be his descendants. Some account of him will be found in Owen's British Remains, and Powell's History of Wales.

MADOCKAWANDO, an Indian chief of the Malecites, engaged in the American border warfare of 1676.

MADOX, THOMAS, a famous master of legal antiquities, author of numerous published works, and of a mass of MSS. in the British Museum, last century.

MADRID, J. F. DE, an American statesman, born 1789, president of Colombia 1816, died 1830.

MÆCENAS, CAIUS CILNIUS, whose name is imperishably associated with the Augustan literature of Rome, was descended from the ancient kings of Etruria, and flourished in the 1st century B.C. He was the companion of Augustus in nearly all his campaigns, and his most trustworthy counsellor in political matters. For the three years 18-15 B.C., he was invested with the government of Italy, and he was always sent to Rome on any emergency, either with the senate or the people, in case he was absent with Augustus. His great glory, however, was the happy influence that he exercised over the emperor as a patron of learning, and his own munificence and taste in the same direction. Virgil, Horace, and Propertius, are best known to us as the guests of his hospitable mansion on the Esquiline hill, but many others enjoyed his protection and friendship. Some poetical fragments of his remain to this day. D. B.C. 8.

MAES, or MAAS. See MAAS.

MÆSTLINAS, MICHAEL, a German astronomer, 1542-1590.

MAFFEI, or MAFFÆUS, the name of several noted Italians:—1. VEGIO, a native of Lodi, distinguished as a scholar and poet, 1407-1459. 2. RAPHAEL, a *savant* of Tuscany, died 1506. 3. BERNARDIN, a learned cardinal and antiquarian, 1513-1553. 4. GIOVANNI PIERO, a learned Jesuit of Bergamo, author of a 'Life of Loyola,' &c., 1535-1603. 5. FRANCESCO, a painter of Vicenza, in the manner of Paolo Veronese, died 1660. 6. JAMES, a painter and musician of Venice, known to be living in 1663. 7. The Marquis ALBERTO, a field-marshal of Bavaria, distinguished against the Turks before Belgrade, author of 'Memoirs,' 1662-1730. 8. FRANCESCO SCIPIONE, brother and companion-in-arms of the latter, but more distinguished as an antiquarian and dramatic author, 1675-1755. To him a statue has been erected in the principal square of Verona, in testimony of the honor that his genius has conferred upon the city.

MAFFIOLI, J. P., a Swiss jurist, 1752-1833.

MAFFIT, J. N., an eccentric methodist divine,

born in Ireland, but settled in the United States, where he was known as a popular preacher, d. 1850.

MAGALHAENS, FERNANDO, to whose boldness, sagacity, and skill, we owe the first circumnavigation of the globe, was born in the province of Alemtejo, in Portugal about the year 1470. Having entered the Portuguese navy, and served with distinction in the East, he was so dissatisfied at his merits being overlooked, that on his return home he sought employment (1517) in the service of Spain. These two nations were now engrossing maritime discovery, England having scarcely entered the field; and so numerous and active were the navigators of the respective Services, that the claim of priority was often difficult to settle. An amicable arrangement had hence been come to in 1494, whereby all the new lands west of a meridian passing down the Atlantic, 370 leagues west of the Azores, were to belong to Spain, and those to the east of it to Portugal. The length of a degree had not yet been correctly measured, and consequently the dimensions of the earth were imperfectly known. (See COLUMBUS.) It was thus uncertain how far  $180^{\circ}$ , measured either way from the upper, or Atlantic, semi-meridian, would reach upon the Asiatic lands: in other words, what part of those lands would be intersected by the lower semi-meridian. Now the Moluccas, or Spice Islands, had been lately discovered; and great value was set upon them by both nations. Some held that they should belong to Portugal. Magalhaens maintained the opposite view, that they could most easily be reached by sailing west, and should, therefore, be the property of Spain; and he even offered to conduct a fleet thither by a western route, so fully was his mind occupied with the bold conception of passing round to the south of the American continent into the great ocean, laving its western shores, which in common with Columbus, he regarded as the Indian or Eastern Ocean. To the practicability of such a passage many late discoveries were pointing; there was the analogy of Africa, whose southern cape had been doubled by Diaz in 1486; a council of able navigators, assembled under royal authority in 1507, had recommended the south American shores as the most promising field of discovery, and seem even to have pointed to the accessibility of India by that way: and in 1509 two members of this very council, Pinzon and Solis, had acted so vigorously on the recommendation, as to push discovery to the lat. of  $40^{\circ}$  south on the Brazilian coast; mutual misunderstandings alone having prevented them from gaining perhaps Cape Horn itself. Besides, the stirring intelligence had recently arrived, that Nunez De Balboa had discovered the great southern ocean, the existence of which had been so nearly made out by Columbus himself. Already correct charts were numerous; and doubtless, though here authority is wanting, a comparison of the Brazilian coast, rapidly trending to the south-west, with the tapering form of Africa, would suggest a like speedy termination of the land southwards, although the western coast was entirely unknown. But even with these suggestive circumstances thus known to him, the enterprise of Magalhaens must ever be regarded as one of surprising boldness, and second only to the grand conception of the discoverer of the New World. Magellan, as he is generally called, was put in command of a fleet of five ships, two of 120 tons, two of 90, and one of 60; and the crews in all amounted to 236 men. He sailed 20th September, 1519, from San Lucar de Barrameda in the South of Spain, and reached a safe harbor in lat.  $50^{\circ}$  on the American coast, to which he gave the name of Port St. Julian,

in the following April. This was the beginning of winter, which lasts with great severity till October, and he determined, therefore, to remain inactive during this period. His hands, however, were soon full enough; discomforts produced by the limited supply of provisions, and the rigors of the climate, ripened into loudly expressed discontent, and a demand for an immediate return home; and at length broke out into open mutiny, headed by the officers of the other ships, and in a great measure indeed confined to them. The ringleader, Luis de Mendoza, captain of the Vittoria, having granted a conference to a messenger sent by Magellan, was treacherously stabbed by him, according to the instruction which he had received. Resistance was not offered, and next day another captain was executed, and a third put ashore upon the inhospitable coast. Magellan pursued his course in October, and by the end of the month had entered the strait, which bears his name. He cleared it on the 28th November, and flushed with the feelings of triumphant success, stood boldly out into the unexplored expanse of the vast Pacific. He had now but three ships; one had been wrecked before entering the strait; the other had parted company in the strait, and returned home. On the 16th March, 1521, Magellan reached the Philippine isles, having fallen in with only two islands, which probably have not been since visited. He enjoyed such constant fair weather, and favoring winds, that he gave to the ocean the name which it still bears. The king of Zebu, one of the islands, was easily induced by a promise of assistance against his enemies, to embrace Christianity, and, with a great number of his people, to receive baptism. Magellan was soon called upon to fulfil his rash promise, and undertake an expedition against a hostile chief, the king of the Island of Mattan. Here he and his men were bravely opposed by the natives, and Magellan, after a protracted struggle, fell in the contest. Towards the close of the day, when the Spaniards were giving way, he was felled by a stone: a second broke his thigh-bone, and he was speedily pierced by many lances. The baptized king immediately forgot his vows, and put to death all the Spaniards who were on shore. Those who remained on board were too few in number to manage three ships; one accordingly was burnt, and in the other two, the Trinidad and Vittoria, they pursued their voyage in search of the Moluccas. At these they safely arrived, and were kindly received by the king of Tidor. The Trinidad remained to repair, and afterwards strove to reach America by crossing the Pacific; but was driven back, and her crew made prisoners by the Portuguese. The other ship, the Vittoria, under the command of Sebastian del Cano, who had come out in the Conception as lieutenant, returned home by the Cape of Good Hope, and reached San Lucar, 6th September, 1522, thus completing the first circumnavigation of the globe. The good ship was drawn ashore, and long preserved as a monument of this most remarkable voyage. The day on which Sebastian arrived was, according to his reckoning, the 5th September, a day having been lost in consequence of the westward motion of the vessel, that is, the time was reckoned *in longer days*.—There had not, of course, been any previous opportunity of noticing such a circumstance, and as it does not seem to have occurred to any one that such an effect would be produced, no little difficulty was felt at the time in offering a satisfactory explanation. It is easy to see that the time was reckoned *in longer days* than those at San Lucar; and, therefore, there were *fewer* in the

given time. If a ship had arrived the same day, having circumnavigated the globe by sailing eastward, her captain would have called it the 7th of September; and the reckonings would have differed from one another by two days. [J.B.]

MAGALLON, C., a Fr. diplomatist, 1741-1820.

MAGALLON, F. L., a French commander, 1754-1825.

MAGALOTTI, LORENZO, Count, an Italian naturalist and philosopher, who cultivated poetry and the Belles Lettres under the name of Lindoro Elateo; he was a great experimental philosopher, and as eminent for his piety and munificence as for his love of literature, 1637-1712.

MAGANZA, the name of three Italian painters; —GIOVANNI BAPTISTA, whom the Italians call *Il Magnano*, from the title under which he exhibited himself as a poet, 1509-1589. 2. ALESSANDRO, his son, a pupil of Fasolo, 1556-1630. 3. GIOVANNI BAPTISTA, 'the younger,' son of the latter.

MAGATI, C., a writer on surgery, 1579-1647.

MAGGIO, F. M., an Ital. Orientalist, 1612-86.

MAGINI, G. A., an Ital. astronomer, 1555-1617.

MAGINN, WILLIAM, was born in 1794, at Cork, where his father had an academy. He was barely half through his teens when he completed his academical course at Trinity College, Dublin, whence he afterwards received the degree of LL.D. He very soon took his father's place as head of the school, which he continued to conduct for several years, embarking, however, in the mean time, in periodical writing. From November, 1819, he was a frequent contributor to *Blackwood's Magazine*, for which he invented and usually sustained the character of Morgan O'Doherty, and wrote some of the most spirited and audacious of the papers that appeared in it. His prose was masterly in irony; and in verse he was equally happy in English parodies and in Latin macaronics. In 1823 he gave up his school and threw himself on the press in London. His union of various scholarship with remarkable talent for popular writing, especially in satire, speedily procured him employment. He was much trusted by Murray the bookseller; and for a while he was joint editor of the *Standard* newspaper. But he had an unlucky facility of getting into misunderstandings with his employers: he was, indeed, the most capricious and unsteady of writers, as well as one of the most thoughtless and unthrifty of literary men; and his fondness for society soon degenerated into lamentable sottishness. In 1830, he was the founder, and for some years continued to be the cleverest writer, of *Fraser's Magazine*. But his irregular habits were rapidly increasing, and pecuniary difficulties gathering about him. He sank to accepting engagements with such newspapers as the *Age*; and, in the beginning of 1842, he was thrown into the Fleet prison for debt. He speedily obtained his release by passing through the Insolvent Debtor's Court; but he died of consumption, at Walton-on-the-Thames, in August of the same year. He was then in absolute beggary, from which the munificence of Sir Robert Peel, exercised as soon as he was made aware of the case, came too late to relieve him. He dictated for *Blackwood* on his death-bed the close of the last of

his 'Homeric Hymns,' the most ambitious of his serious efforts in verse. [W.S.]

MAHMOUD, the *first* of the name, sultan of the Turks, born 1696, reigned 1730-1750. The *second*, father of the present sultan, born 1785, was placed on the throne by the janizaries after the murder of his predecessor 1808, sustained a war with Russia, which cost him Bessarabia, and the provinces of Servia, Moldavia, and Wallachia, as settled by the treaty of Bucharest, from 1809 to 1812; the war of Greek independence, which ended in the separation of that country, and the annihilation of the Turkish fleet at the battle of Navarino, 1820-1828; exterminated the janizaries 1826; treaty of Adrianople with the Russians, who were on the point of entering Constantinople, 1829; independence of Egypt under Mehemet Ali, and the new treaty of Unkiar-Skelessi with the Russians, 1832-1833; defeated at Nezib by Ibrahim Pasha, and died the same year, 1839.

MAHMOUDY, sultan of Egypt, 1412-1421.

MAHOMET. Under this name we have to compress within a few lines the history of a man, who, by the mere force of his genius and his convictions, subdued to his religion, his laws, and his sceptre, whole nations; and whose authority, after the lapse of twelve centuries, is acknowledged by nearly two hundred millions of souls. We shall endeavor to perform this task conscientiously, stating only what we really believe to be the significance of the facts, however widely we may differ from writers of acknowledged repute—from a Carlyle, on the one hand, who can see but little difference between Mahomedanism and Christianity; and from Schlegel,

on the other, who only discerns in it a 'Dead Theism, which began and terminated in the most unbounded sensuality.'—MAHOMET, or MOHAMMED, as the Arabians call him, was a child of the Koreish, the tribe which had been intrusted for five generations with the care of the sacred temple of Mecca, containing the black stone, and which claimed a lineal descent from Ishmael. He was born in 570, or according to other accounts, in the spring of 571, and was only two months old when he lost his father, Abdallah. In the sixth year of his age his mother died, and the care of the orphan devolved on his paternal grandfather, at that time chief priest, and he also dying two years afterwards, on his son and successor Abou Taleb, with whom Mahomet, while a youth, was engaged in several commercial adventures, and made many journeys. These excursions afforded the opportunity for developing his military talents and his superior address: and the esteem procured for him by such qualities was greatly heightened by the sincerity of his words and actions, the regularity of his life, and the precision of his judgment. When twenty-five years of age, he married a rich widow named Khadijah, whose commercial affairs he had previously managed, and during the whole of her lifetime, a period of twenty-five years, he is admitted to have been faithful to her. When about forty years of age, say in the year 610, Mahomet began to announce his apostleship to his own family, having previously passed much of his time in a solitary cave near Mecca, exercising himself in prayers, fastings, and pious meditations. At this period, the Arabs roved over their native deserts in a state of barbarian independence, neither the Assyrians, the Persians, the Macedonians, nor the Romans, having been able to bring them under their yoke; and the only common object which united them was the pursuit of gain in some pillaging excursion, or the annual pilgrimage to their idolized black stone. They were equally destitute of fixed principles and laws, licentious in their manners, and gross in their religious sentiments; they possessed, however, the wild virtues of clansmen, they were generous and imaginative, full of rude moral strength, and overflowing with animal energy. For four years Mahomet limited his communications to his own immediate relatives. In the fifth he invited them to a banquet, announced his determination to assume the office of a prophet and lawgiver by command of God, and demanded which of them would be his first minister. His cousin, Ali, accepted this office with enthusiasm—the people of Mecca began to speak of Mahomet as a new prophet—many reviled him as an impostor, others opposed him for political reasons—and the most part demanded miracles of him in proof of his mission. Mahomet answered them by producing his 'Koran,' leaf by leaf, as occasion demanded, and by the emphatic declaration that his mission was to restore truth and virtue *by the sword*. He reasoned with his objectors, preached to the pilgrims flocking to Mecca, and as years passed away, his fame became widely spread, and his proselytes might be numbered in all the tribes of Arabia. In the tenth or eleventh year, 620, Abou Taleb, Mahomet's uncle and protector, died, and the enmity of the tribe began to manifest itself more openly. In the same year he lost his wife Khadijah. In the twelfth year it became clear to him that he could only defend himself by force of arms, there being at Mecca one man out of every tribe sworn to take his life. This state of things ended in a civil commotion, from which, on the 16th of July, 622, Mahomet fled to Medina, then called Yathreb, a journey

for his life, over the sands and rocks of the desert some 200 miles. All the Mahomedan nations date their years from this epoch, which is called the year of the 'Hegira,' the prophet's triumphant reception at Medina fairly marking the commencement of his conquests. On arriving in this city, he assumed the legal and priestly office which had belonged to his family at Mecca, and his proselytes flocking to him from all parts, he was soon in a condition to take the field against the Koreish, though with greatly inferior numbers. He gained his first battle on the 14th of March, 624; and in the course of seven years more had become master of all Arabia, and was at the head of an army of 30,000 men who idolized him. The particulars of his lightning-like progress and victories in this brief period must be passed over, it being more important to state by what attractions he had united these scattered bands into one phalanx. We read of the 'Sensual Eudaimonism to which his creed opens so free a scope, both in this world and the next,' yet, the fact is, compared with the previous practices of the Eastern nations, the supposed indulgences of Mahomet are rigidity itself. Frequent prayers, ceremonies of purification, almsgiving, the prohibition of wine and of all games of chance, are marks of an austere system; and though he defined the extent of their sexual indulgences, and gave them within certain limits a religious sanction, the existence of such evils is no more chargeable on Mahomet than the Arabian complexion. His religion was not spiritual, but it was consistent and practical, and it was laid down like a firm highway across a mere quagmire of superstition and gnosticism, wherein the Christian name was profaned, and the morality of nature put to the blush. Mahomet succeeded, not because his theory of religion possesses any thing in common with the theory of Christianity, but because it was well calculated to deliver the Eastern nations from the hybrid monstrosities, both of faith and practice, generated between a corrupt Christianity and the old heathen pantheism. It was simply the first initiation of those nations into the design of Providence, and the Koran was neither an inspiration like the Bible, nor an imposition. Its metaphysics were exactly suited to its practical business—a God unknown and unknowable, and his decrees as cold and stern as fate. Such a creed could become the symbol of unity among the Eastern nations for the very reason that it reposed in a depth beyond the subtlety of their intellects, and assumed no intelligible form till it reached the region of their fiery passions. It was 'Islam,' *Salvation*, to those whose imaginations had defiled whatever they had apprehended. We require space to be more particular, and will therefore only add, that Mahomet expired in the arms of his favorite wife, Ayesha, on the 8th of June, 632. The scattered fragments of the Koran were collected two years afterwards by his father-in-law, Abubeker, who succeeded to his authority, and took the title of caliph. [E.R.]

MAHOMET I., emperor of the Ottoman Turks, born 1375, reigned 1413–1421, in which period he conquered Servia and Bosnia. MAHOMET II., born 1430, began to reign 1451, subdued Thrace and Macedonia, and took Constantinople 1453; defeated at the siege of Belgrade 1456, conquered Central Greece 1458, put an end to the empire of Trebizond 1461, gained Lesbos 1462, Wallachia and Bosnia 1463, Caramania and Ægropont 1464, defeated the Persians who had invaded Cappadocia 1472, subdued Georgia, Circassia, Moldavia, Albania, and the Isles of the Adriatic, 1475, died 1481. MAHOMET III.,

[Mahomet II.]

born 1568, reigned during the troubled period of 1595–1603. MAHOMET IV., born 1642, began to reign 1649, deposed after a disastrous reign 1687, died 1691.

MAHON, P. A. O., a French medical writer, 1752–1801.

MAHNDEL, N., a Fr. antiquarian, 1673–1747.

MAIANO, JULIEN LA, an Italian architect, 1377–1447. His brother, BENEDETTO, a sculptor and architect, 1424–1498.

MAIEN, MICHAEL, a Gr. alchemist, 1568–1622.

MAIGNAN, E., a Fr. philosopher, 1601–1676.

MAIKOF, B. I., a Russian poet, 1725–1778.

MAILLA, or MAILLAC, JOSEPH ANNE MARIE DE MOYRIAC DE, a celebrated French Jesuit and missionary to China, where he resided forty-five years, and translated the annals of the empire into French, 1679–1748.

MAILLARD, J., a chief of the royalist party at Paris during the captivity of King John, and the supposed assassin of Marcel in 1356.

MAILLARD, OLIVIERO, an eccentric preacher of the reign of Louis XI., famous for his daring reproofs of the vices of the court, 1440–1502.

MAILLARD, S., an Austr. general, 1746–1822.

MAILLARD, STANISLAS, generally called Huisier or Usher Maillard, was a person of considerable notoriety in the French revolution, who commenced life as the lacquey of a nobleman, and was afterwards a soldier. His first appearance was at the storming of the Bastille 1789, when he crossed the moat on a plank to receive the written terms of the besieged in the midst of the combat. His next feat was to head the insurrection of women, whom he conducted by beat of drum to Versailles, and preserved in some kind of order, preventing them, in fact, from committing many excesses, when Lafayette and the authorities were really powerless. He was an active party in the movements of the Champ de Mars when the national petition was signed for the king's deposition. In September, 1792, he acted as president of the fearful tribunal at the Abbaye prison, and, during the reign of terror, was an agent of the Committee of Public Safety. After the fall of Robespierre he is supposed to have changed his name, and the date of his death is unknown. To a ruthless disposition he added singular presence of mind and fertility of resources among the savage bands,

whose excesses he at once shared and moderated. He is one of those warning instances with which the revolution abounds, of a certain talent and courage among the lowest classes of the people, which may easily degenerate to ferocity when not directed by education and religion. [E.R.]

MAILLY, CHEVALIER DE, a godson of Louis XIV., famous as a writer of scandal, died 1724.

MAILLY, F. DE, archbp. of Rheims, 1658–1721.

MAILLY, J. B., a French historian, 1744–1796.

MAILLY-D'HAUCOURT, JOSEPH AUGUSTINE DE, camp-marshal of France, and one of the four supreme generals appointed by Louis XVI., with the sanction of the French assembly, to preserve order in 1790. His colleagues were Bouillé, Rochambeau, and Luckner. He perished on the scaffold as a royalist at the age of eighty-six, on the 25th March, 1794. Louise Julie de Nesle, countess de Mailly, and her three sisters, who were all mistresses of Louis XV., belonged to the same family.

MAIMBOURG, LOUIS, a French Jesuit, author of a 'History of Arianism,' 'History of the Iconoclasts,' 'History of the Crusades,' and 'History of Calvinism,' &c., 1610–1686.

MAIMON, S., a Jewish philosopher, 1753–1800.

MAIMONIDES, the name by which Rabbi Moses Ben Maimon is generally known, was a Spanish Jew born at Cordova, most probably in 1139. He is regarded by the Jews as the prince of their philosophers and theologians, and his treatise 'Moreh Nebuchim,' which illustrates some of the most difficult words and things in the sacred writings, is greatly valued among Christians. When the work was translated it created a violent controversy, and divided the Jews into two parties, between whom the celebrated David Kimchi was appointed arbiter. Maimonides died in Egypt, 1209.

MAINARDI, ANDREW, an Italian painter, whose works date from 1590 to 1613. MAINARDI, LACTANTIUS, a youthful painter known at Rome in the time of Sextus Quintus.

MAINARDI, P. A., an Ital. mission., 1713–1767.

MAINE, L. AUG., Duc Du. See MONTESPAN.

MAINE DE BIRAN, MA. F. P. GOUTHIER, a French philosopher and statesman, whose philosophical works were published in 1841 by M. Cousin, flourished 1766–1824.

MAINO, GIASONE, an Italian jurist, 1435–1519.

MAINS, or MAY, J. H., a Ger. div., 1653–1719.

MAINTENON, MADAME DE, was the granddaughter of Henry the Fourth's friend Theodore Agrippa D'Aubigné. She was born in 1635, in the prison of Niort in Poitou, where her father, a profligate adventurer, was then confined. Left quite destitute on his death in her tenth year, Mademoiselle D'Aubigné spent her youth in dependence on her rich relatives, one of whom educated her as a Calvinist, while another afterwards persuaded or compelled her to become a Catholic. Her harassing position made her glad to contract a nominal marriage with the famous wit Scarron, a deformed, old, and infirm man. Her beauty, liveliness, and propriety of conduct, gained for her powerful friends among those who frequented her husband's house; and, on being left in poverty on Scarron's death, she was intrusted

with the charge of the children born to Louis XIV. by Madame de Montespan. She assumed this office in 1669, and attended her pupils to court as they grew up; and, though the king was at first prejudiced against her as a learned lady, the royal debauchee began by-and-by to be wearied of sensual amours and quarrelling mistresses, and to respect and esteem the prudent and well-informed governess of his children. She played her cards dexterously, and was zealously seconded by the clerical directors of his Majesty. The king married her privately, probably in 1685, when her age was fifty, and his own forty-seven. For the remaining thirty years of his life she was his most confidential adviser, and shared in the obloquy of some of his worst acts, such as the Revocation of the Edict of Nantes. She was a virtuous woman, and a devout and bigoted Catholic, ambitious and resolute, but disinterested and charitable. Her published letters give her a creditable place in French literature. She died in 1719, at the nunnery or school of St. Cyr, which she herself had founded. [W.S.]

MAISTRE, ANTHONY LE, a French advocate and *savant* of Port-Royal, author of the lives of several catholic saints, &c., 1608-1658.

MAISTRE, COUNT JOSEPH DE, born at Chambéry, 1st April, 1753; died at his seat in Piedmont, 26th February, 1821. De Maistre, having passed through the overthrow of Europe, and seen his native state the subject of most opposite fortunes, had his mind naturally turned to public affairs; and, as he was a man of unquestionable energy and superior genius, and gifted at the same time with unusual powers of written expression, we are not surprised to find him one of the distinguished literateurs of that strange but exciting period: he was the main stay, if not the founder of a peculiar but influential school. Associated in purpose with DE BONALD, D'ECKSTEIN, BALANCHE, and at first with LA MENNAIS—De Maistre may be held the most powerful advocate and representative of a system, to which the history of the Revolution and Empire, as well as events in France still more recent, have given much authority and colorable support: it is the System that societies and the world must be governed by absolute and unquestioned power,—founded, in this case, on the theological tenet that *terror* is the confessed and principal arm of the Supreme Governor. The logical foundations of a scheme, far from wanting in partisans, may be seen best in the *Soirees de St. Petersbourg*, a work displaying to the best advantage De Maistre's remarkable talent, and executed, while, at the northern capital, with the austerity and dignity of a Stoic, he represented the court of Piedmont—reduced to that of the poor isle of Sardinia. The *Soirees de St. Petersbourg*, are volumes which it is salutary to read. They carry out without hesitation or shrinking, even to their utmost consequences, doctrines that partially influence a large number even of not unreflecting minds: 'Sovereignty and chastisement,' he says, 'are the two methods by which God mainly reveals himself to mankind:' he tells us that the hangman is only a delegate of Providence, and that the way to Order, is, force and absolutism pure and simple: it is very painful to add, that the God he worships, or rather the Idea

on which he has bestowed apotheosis, is a being under the ceaseless dominion of irritation and vengeance, and with no relations to that august Spirit, whose reality is imprinted on the abstract forms of our human Intelligence, and the Instincts of the human Heart, as well as bodied forth by that Religion in the enjoyment of which we live. It were very unjust to attribute these revolting practical dogmas, to personal hardness in De Maistre; neither is their origin wholly, in the disgust and apprehension caused by the excesses and confusion of which he had been a deploring witness. Much more likely, in the present case, they sprang from that impatience as to the existence of evil, which in minds of a certain order, takes the place of impatience with evil itself, and inclines them, alike in their politics and theology, to cherish what appears the strongest and speediest means—no matter how impracticable—for its eradication. With reference in the first place to secular politics, no doubt the method of authority has the merit of simplicity; but the gist of the question is, *where* is the beneficent authority? De Maistre unhesitatingly replies—THE POPE!—a solution not likely to be accepted in some countries. Neither, in those cases of History, in which we have seen great men spring up, and suddenly possess themselves of power, is the example germane; for in by far the majority of instances—nay, in every instance in which their functions were beneficent—with Cæsar, with Cromwell, with Napoleon, these men were powerful not because they wore the diadem, but because they at once *led* and *obeyed*: their Genius grasped the tendencies and comprehended the necessities of the Age, and so could give utterance to the WILL of the People. We protest, equally, against all such conclusions, in their bearing on the providence of God. The mystery of the existence of evil we cannot fathom; we venture on no *Theodiccæ*: but it is not true that the Almighty Sovereign rules by Terror, or that man's salvation can come otherwise than through the depths of his Love.—Like all persons of one idea, the writers of whom we speak are dogmatists: to which they owe no slight portion of their influence and apparent force. But although a cause of momentary success, energy of this kind involves no enduring power: the world rests on more than one idea, and as it rolls, makes sad havoc with the pedantries of Dutch gardening.—Two volumes of De Maistre's letters, chiefly from St. Petersburg, have been published since his death. They are worth more than all his philosophy. They are instinct with acuteness, and offer the opinions of a keen observer, on the men and events of that great period of history: his relations with Napoleon, are especially interesting. They unveil, too, the private character of De Maistre; and how the rigidity and gloom of the Creed utterly failed to obliterate the soft affections of the Man. [J.P.N.]

MAISTRE, LOUIS ISAAC LE. See SACI.

MAITLAND, SIR FREDERICK LEWIS, rear-admiral, commander of the Bellerophon, sent to watch the French coast, and prevent the escape of Napoleon after the battle of Waterloo, was born 1799, and greatly distinguished himself in the Egyptian expedition under Sir Ralph Abercromby. He received Napoleon on board the Bellerophon, after refusing all conditions, on the 15th of July, 1815. Died, commander-in-chief in the East Indies, on board his flag-ship, the Wellesley, 1839.

MAITLAND. The noble Scotch family of this name boasts of several celebrated persons:—1. SIR RICHARD MAITLAND, a poet, and keeper of the privy seal in the reign of Queen Mary, known as one of

the extraordinary lords of Session by the title of Lord Lethington, 1496–1586. 2. SIR WILLIAM MAITLAND, his eldest son, secretary to Queen Mary. 3. JOHN MAITLAND, lord of Thirlstane, second son of Sir Richard, secretary to James VI., and chancellor of Scotland, known also as a writer of Scottish and Latin poetry, born about 1537, died 1595. 4. JOHN, grandson of the latter, duke of Lauderdale, a partisan of Charles II., appointed secretary of state and high commissioner of Scotland after the restoration, 1616–1682. 5. JAMES, earl of Lauderdale, eldest son of James, the seventh earl. See LAUDERDALE.

MALACHI, ST., archbp. of Armagh, 1094–1148.

MALACHOWSKI, STANISLAUS, a Polish statesman, and fellow patriot of Kosciusko, born 1735, president of the diet 1788–1792, president of the senate after the peace of Tilsit 1807, died 1809. His brother, HYACINTH, a partisan of Russia, distinguished in promoting the ruin of Poland 1793.

MALAGRIDA, GABRIEL, an Italian Jesuit and missionary to Brazil, who was accused of conspiring against the king of Portugal, and, finally, condemned by the inquisition as a heretic, and burnt alive in 1761. Malagrida laid claim to visions, and published 'The Life of St. Anne, composed (as the title reads) with the assistance of the Blessed Virgin and her Most Holy Son;' 1689–1761.

MALALA, J., a Greek historian, 6th century.

MALAPERT, C., a learned Jesuit, chiefly dist. by his mathematical writings, 1581–1630.

MALAVAI, F., a French violinist, 1627–1719.

MALAVAI, J., a French surgeon, 1669–1758.

MALBONE, EDWARD, an American portrait painter, was born in Newport, R. I., died 1807.

MALCOLM, the *first* of the name, king of Scotland, succeeded 943, and was killed in an insurrection 928. The *second* reigned about 1003–1033. The *third*, called St. Malcolm, son of Duncan who was murdered by Macbeth, recovered his throne 1057, and was killed in battle with the English, 1093. The *fourth* reigned 1153–1165.

MALCOLM, JAMES PELLER, an engraver and antiquarian, born in America, and brought to London in the eighth year of his age, where he died 1815. He is known for his works descriptive of the ancient state of the metropolis, &c.

MALCOLM, SIR JOHN, an East India officer and diplomatist, distinguished as the founder of our po-

litical relations with the court of Persia, governor of Bombay from 1827 to 1831, author of a 'History of Persia,' 'A Sketch of the Sikhs,' and other works relating to Indian affairs, 1769–1833.

MALDEGHEM, P. DE, a Flem. poet, 1540–1611.

MALDONAT, J., a Spanish Jesuit, 1534–1583.

MALEBRANCHE, NICHOLAS, born in Paris 1638, died 13th October, 1715: author of *Meditations*, and the *Recherche de la Vérité*: through the clearness and surpassing beauty of his style, and the originality of his conceptions, deservedly ranking among the foremost *litterati* of France: one of the most famous, and at the same time among the least sound metaphysicians of that country. Starting from that fundamental mistake, which misled a far greater man—SPINOZA, viz.: the error of Des Cartes regarding the idea of *Substance*, (article LEIBNITZ), he fell into a scheme quite as fantastic as Spinoza's, although wholly idealistic; and likewise altogether fatal to the personality, liberty, and responsibility of Man. Defining *Body*, by the qualities of extension and mobility, and *Spirit*, by those of understanding and will; conceiving them equally incapable of independent action,—the Frenchman was forced to the conclusion, that in neither body nor spirit could changes occur unless through immediate operation by the First Cause. No action of Matter on Mind being possible, how can we recognize an External Universe? Only, says Malebranche, because the Ideas of the Divine Mind act upon us; we see every thing in God, who is thus our only intelligible world. The idealism of Malebranche approaches nearest to BERKELEY's: it is wholly opposed to that of FICHTE, who makes the Ego the *cause* and *creator* of every idea. The writings of this philosopher are interesting, from their acuteness, and the amount of truth incidentally brought out; but unless as illustrative of one phase of the Cartesian error, they are valueless to History; they produced no school, and scarcely had appreciable consequence. [J.P.N.]

MALEC-BEN-ANAS, chief of one of the four orthodox sects of Mussulmans, flourished 713–795.

MALERMI, or MALERBI, NICOLÒ, an Italian monk, remembered as the first translator of the Bible into Italian, and author of 'Lives of the Saints,' born 1430. Date of his death unknown.

MALESHERBES, CHRETIEN GUILLAUME DE LA-MOIGNON, was born at Paris on the 16th December, 1721. He belonged to the class called the noblesse of the robe, his father being chancellor of Paris. He passed through several grades of office, and was in 1750 made president of the Court of Aids. His functions were suspended by the temporary abolition of the parliament in the reign of Louis XV., and were restored with its revival under Louis XVI. He held office along with Turgot, and resigned on his retirement. He belonged to the same school as his colleague—a school between the wild scepticism of the philosophers, and the bigoted, or selfish pertinacity of the priests and nobles. Had it been strong enough, the Turgot and Malesherbes party might have saved France, but it was obliged to give way before the pressure of the established interests, until both parties were swept away by the hurricane of the revolution. Malesherbes wrote in favor of the liberty of the press, and in his own practice in office he was charged with giving it a dangerous license. He is the author of some miscellaneous works, but his name is now solely remembered for the genuine devotion with which he sacrificed himself to protect a king to whose defects he was sufficiently alive. Aided by Tronchet and Desèze he acted as leading counsel for Louis XVI. Acts of loyalty far less de-

cided were in that day the sure road to destruction. He was condemned to death, and guillotined on 22d April, 1794. [J.H.B.]

MALET, CLAUDE FRANÇOIS, General De, is the name of a French officer, memorable for one of the most daring and well-managed attempts to overthrow a powerful government recorded in history. He was born in Franche-Comté, 1754; and, in 1812, at the period of Napoleon's absence in Russia, was living at Paris under the surveillance of the police, after a long imprisonment occasioned by his republican principles. On the night of the 22d of October, having prepared the necessary documents, and put on the habit of a general officer, he went to the quarters of several regiments, accompanied by a single individual attired as his aid-de-camp, announced that Napoleon was dead, that the senate was assembled, and that a provisional government was declared. His martial appearance and firm address imposed on the officers, woke up in the dead of the night to receive this startling intelligence, and in a short hour or two he had a large military force actually marching under his orders to occupy the several posts that he had assigned to them. At this critical moment, the incredulity and firmness of one man, General Hullin, the military commandant of Paris, saved the empire. Unable to reply to his interrogations, Malet discharged his pistol in his face. The real situation was instantly suspected by two other officers present, who threw themselves upon Malet and took him prisoner. He was condemned and shot a week afterwards, October 29, 1812.

MALET, SIR CHARLES WARRE, an East India diplomatist, provisional governor of Bombay in 1798, and author of an account of the temples of Ellora, published in the 'Asiatic Researches,' 1752-1815.

MALEZIEU, N. DE, a Fr. teacher, 1650-1727.

MALHERBE, FRANÇOIS DE, whose name, according to La Harpe, marks an epoch in the French language, was born at Caen, 1555, and died 1628. He was the *protégé* of Henry IV., and is admitted to be the father of French lyric poetry. His ruling passion was purity of diction, and many anecdotes are recorded in illustration of his nicety in this respect. His eulogy was thus written by Boileau:—

"Enfin Malherbe vint, et le premier en France  
Fit sentir dans les vers une juste cadence."

MALHERBE, J. F. R., a Fr. *savant*, 1733-1827.

[Tomb of Malibran in the Cemetery of Lacken, Germany.]

MALIBRAN, MARIA FÉLICIA, one of the most highly gifted vocal performers of modern times, was

the eldest daughter of Manuel Garcia, a Spanish tenor singer, and was born in Paris, 1808. She made her *debut* in 1825 at the opera in London, and the following year came to New York, where she married M. Malibran, a French banker, from whom she was divorced by the French courts in 1836, and shortly afterwards married the celebrated violinist, M. de Beriot. She died the same year, during her engagement at the musical festival in Manchester, regretted by all classes both for her fine endowments and her generous disposition.

MALINGNE, C., a French historian, 1580-1653.

MALLET, DAVID, whose proper family name was Malloch, known as a poet and miscellaneous writer, was born in Perthshire about 1700, and becoming the friend of Pope and Bolingbroke, was brought under the notice of Frederick prince of Wales, who kept a rival court at that time, and made him his under-secretary. He was occasionally employed as a public writer by the government, and Bolingbroke made him a bequest of his works in MS., which he published in 1754. It was Johnson, we believe, who said of this transaction, that 'the scoundrel, Bolingbroke, had loaded his blunderbuss against the peace of society, and, like a coward, had left Mallet to pull the trigger.' His ballad of 'William and Margaret,' has been much admired, but he is now only kept in remembrance as one of the fossils of literary history. It may be worth mentioning, that Gibbon's father married one of Mallet's relatives when the historian was about ten years old; d. 1765. [E.R.]

MALLET, EDMUND, a French divine, and master of the Belles-Lettres, translator of Davila's History of the Civil Wars, and a writer in the Encyclopædia, 1713-1755.

MALLET, F., a Swedish mathematician and astronomer, born of a family of French refugees, 1720-80.

MALLET, J. A., a Swiss astronomer, 1740-90.

MALLET, J. R., a French economist, died 1736.

MALLET, P., a French military engineer, known as the author of a new orthography, born 1630.

MALLET, PAUL HENRY, a famous antiquarian writer and historian, first professor of history in his native city of Geneva, afterwards professor of the Belles Lettres at Copenhagen, &c., author of the 'Northern Antiquities,' translated by Bishop Percy, and several histories of the northern kingdoms, 1730-1807. His son, H. MALLET-PREVOST, a geographer, 1727-1811.

MALLET-DUPAN, J., a native of Geneva, known as a royalist and political writer at the period of the French revolution, when he was part conductor of the 'Mercure de France.' On seeking an asylum in London, he edited an anti-Gallican paper, entitled the 'Mercure Britannique,' published in 1798 and 1799. He is the author of works also in history and polite literature. He died at the house of his friend, Lally-Tollendal, at Richmond, in 1800.

MALLEVILLE, CLAUDE DE, a French poet, and member of the Academy, 1597-1647.

MALMESBURY, JAMES HARRIS, earl of, son of James Harris, the author of 'Hermes,' known as a servant of the English court from 1767 to the close of the century. He is author of 'Diaries and Correspondence,' published in 1844. Born at Salisbury 1746, died 1820.

MALMSBURY, WILLIAM OF, a famous English historian of the 12th century, was born in Somersetshire about 1096, and is known to have been living in the year 1143. He held the office of librarian and precentor in the monastery of Malmsbury, of which he had become an inmate. His works are a general history of England from the arrival of the

Saxons to 1126, a church history, 'Antiquities of Glastonbury,' &c., which are all highly esteemed as trustworthy chronicles.

MALO, VINCENT, an Italian painter, 1625-1670.

MALOMBRA, P., a Venet. painter, 1556-1618.

MALONE, EDMUND, the well-known editor of Shakspeare, was the son of an Irish judge, and was born at Dublin, 1741. He was called to the bar in 1767, but possessing an ample fortune gave his attention to literature. He was the coadjutor of Stevens in an edition of Shakspeare, but having quarrelled with him, published an edition of his own in 11 vols. 8vo., 1790. Died 1812.

MALOUET, P. V., a Fr. statesman, 1740-1814.

MALOUIN, P. J., a French chemist, 1701-1778.

MALPIGHI, MARCELO, an eminent anatomist and physiologist, more especially distinguished for his researches in vegetable physiology, was born near Bologna in 1628. He died in 1694. He studied medicine at Bologna, took his degree there, and in 1656 was appointed professor of physic in that university. He afterwards successively filled the chairs of medicine at Pisa and Messina, and ultimately was called to Rome by Pope Innocent XII., and was made his physician and chancellor. Malpighi lived at a time when physiological inquiries were prosecuted earnestly and with success; when nature had begun to be studied instead of books; and when the dreams of the schools were giving place to practical inquiries and observations. He had early in life learned the necessity of making experiment the foundation of true philosophy, and was the first to use the microscope in anatomical observations. While prosecuting his anatomical inquiries connected with the animal kingdom, he was led to pay attention to the anatomy and physiology of vegetables. The structure and physiology of plants had hitherto been but little attended to. On these subjects, however, Malpighi has shown himself an original as well as a profound observer; and his excellent work, on the Anatomy of Plants proves him to be possessed of merit of the highest kind. Succeeding botanists have not failed to draw largely upon his rich store of facts and observations, for his illustrations of the anatomy and external configuration of plants were found to be no less faithful than original. Plumier has named a genus of plants after him, Malpighia.

MALTBY, ISAAC, an American officer and writer on military subjects, d. 1819.

MALTE-BRUN, CONRAD, or MALTE-CONRAD BRUN, one of the most distinguished geographers of modern times, and almost equally famous as a writer in favor of free institutions, was born in Jutland, 1775, and died in Paris, a political exile from his country, 1826. Besides his important geographical works, and contributions to the 'Biographie Universelle,' he edited the foreign politics of the 'Journal des Debats,' and acquired some reputation as a poet.

MALTHUS, THOMAS ROBERT, was born at the Rookery near Guildford in 1766. He studied at Jesus College, Cambridge, where he took a master's degree in 1797. He took orders soon afterwards, and held a small living in Surrey. He married in 1805, and was soon afterwards appointed professor of history and political economy in the East India College at Haileybury, an office which he held till his death. Few men have lived a more calm and quiet personal life, and few have created a greater storm of conflicting opinion in the world without. It was in the year 1798 that he first published the views with which his name is ever associated, in his

'Essay on the principle of Population, as it affects the future improvement of Society.' He improved and matured the work in subsequent editions, and interwove its special opinions with a general view of political economy. Now that the controversial storm has passed away, his doctrines may be dispassionately appreciated. No one doubts his fundamental principle that the amount of the human race must be in a proportion to the amount of food which can be procured for their support. But instead of drawing from this an injunction to mankind to throw their energies into productiveness, and prepare for an increasing population an increased and sufficient provision, the tone of his argument seemed to tend to the necessity of preventing increase, from the dread that it might outdo the production of food. In truth, though a very sagacious writer in general, he omitted the influence of free trade, which puts all the world at the command of an increasing and producing people. Malthus published several pamphlets, and other works of temporary interest. He died on 29th December, 1834. [J.H.B.]

MALTON, THOMAS, an English artist and writer on geometry and perspective, author of 'A Picturesque Tour through London and Westminster,' &c., 1726-1801.

MALUS, STEPHEN LOUIS, a French physician and natural philosopher, celebrated as the discoverer of the polarization of light, 1775-1812.

MALVASIA, C. C., an Ital. art-writer, 1616-93.

MALVEUDA, T., a Span. Hebraist, 1566-1628.

MALVEZZI, VIRGILIO, marquis of, a Spanish statesman, and comment. on Tacitus, 1599-1654.

MAMBRUN, PETER, a learned French Jesuit, known as a Latin poet and critic, 1600-1661.

MAMMEA, JULIA, empress of Rome, and mother of Alexander Severus, murdered 235.

MAN, C. DE, a Dutch painter, 1621-1706.

MAN, JAMES, a learned schoolmaster of Aberdeen, editor of an edition of the works of George Buchanan, and party to a controversy with Ruddiman, another editor of the poet, died 1761.

MANAHAM, a Galilean adventurer, killed 66.

MANAHEM, a famous disciple of the Essenes, who predicted the reign of Herod the Great.

MANAHEN, or MANAHEM, the sixteenth king of Israel, reigned ten years, 11th century B.C.

MANARD, P., an Italian poet, 1714-1800.

MANARDI, G., an Italian physician, 1462-1536.

MANASSEH, the eldest son of Joseph, and father of one of the tribes, about 1740 B.C.

MANASSEH, a king of Judah, 968-913 B.C.

MANASSEH, the high priest of the Jews, who went over to his father-in-law, Sanballat, and built the rival temple at mount Gerizim, 6th c. B.C.

MANASSEH-BEN-ISRAEL. See MENASSEH.

MANASSES, a Greek writer of the 12th century.

MANBY, PETER, an Irish catholic writer, d. 1697.

MANCHESTER, EARL OF. See MONTAGU.

MANCO CAPAC, the founder and legislator of the Peruvian empire, supposed to have flourished in the 12th century. Another inca of Peru, name Manco, succeeded his brother, who was put to death by Pizarro, 1533, and after some years of warfare was killed by the Spaniards.

MANDAR, JEAN FRANCOIS, a French priest of the Oratory, author of several pleasing poems in Latin and French, and distinguished for his virtues and talents as a pastor, 1732-1803.

MANDAR, MICHEL PHILLIPE, generally called 'Theophilus,' was nephew to the preceding, and is worthy of honorable mention beyond many of the most noted characters of the French Revolution.

He was born in 1759, and acquired great influence among the popular societies, by devoting his powerful oratory to the cause of progress. During the massacres of September, 1792, he was vice-president of the section of the Temple, and did all in his power to prevent the effusion of blood. He went to Danton's house on the evening of the 3d, and, nearly all the leading men being assembled there, including Petion, Robespierre, Manuel, Fabre D'Eglantine, and Camille Desmoulins, he urged upon them the immediate creation of a Dictature, and offered to take the risk of the proposal on himself. Jealousy of one another prevented the adoption of this suggestion, and Mandar reproached Robespierre with his hatred of Brissot. In 1793 he was appointed Commissary to the executive power. He survived the Republic, but refused to accept any place under the imperial government. The fame of his writings, and his political independence induced the emperor Alexander to procure an interview with him in 1814, and observing Mandar's short stature he could not avoid expressing his surprise. 'Sire,' replied this republican fire-eater, 'Il n'y a rien de si petit que l'étincelle.' (There is nothing smaller than a *spark*.) He is author of many political, historical, and miscellaneous works, and of some poems, evincing great genius and strength of expression. Died 1823. [E.R.]

MANDER, C. VAN, a poet and paint., 1548-1606.

MANDEVILLE, BERNARD DE, born at Dort, in Holland, about 1670, was a physician by profession, who came to England and acquired great notoriety by his work entitled 'The Fable of the Bees, or Private Vices made Public Benefits.' This book created quite a sensation by its immoral tendency, and was replied to by several eminent writers, among others, by Bishop Berkeley, Mr. Hutcheson, and William Law. The dates of the works published on either side range from 1723 to 1732. Mandeville died 1733.

MANDEVILLE, SIR JOHN DE, was born at St. Albans about the year 1300. His family was of considerable note, and his education liberal for the times. He seems to have practised the healing art as a profession, till in 1327 he left England and entered upon his travels. These, he tells us, extended through thirty-four years, and to every country of the East; but the account which he has given contains so many inaccuracies, contradictions, and childish absurdities, that discredit attaches to the whole, and it is now generally held as of no value. His descriptions, however, like those of Marco Polo, had a powerful influence on the mind of Columbus.

MANES. See MANICHAÆUS.

MANESSEE, J., a French naturalist, 1743-1820.

MANETHO, an Egyptian historian, who was high priest of Heliopolis, in the reign of Ptolemy Philadelphus, about 304 B.C. Only fragments of his work, as cited by Josephus in his book against Apion, are now extant. These are collected by Cory, and they consist of an account of the invasion and expulsion of a body of foreigners who were called Hycsos, or shepherd kings, supposed to be Jews, besides several tables of ancient kings.

MANETTI, G., an Italian historian, 1356-1459.

MANETTI, R., an Italian painter, 1571-1639.

MANETTI, X., an Italian naturalist, 1723-85.

MANFREDI, B., an Italian painter, 1572-1605.

MANFREDI, EUSTACHIO, an Italian geometrician, astronomer, and literary *savant*, 1664-1739. His brother, GABRIEL, a mathematic., 1681-1761.

MANFREDI, or MAINFROY, king of Naples and

Sicily, was a natural son of the emperor Frederic II., who usurped the kingdom of which he had been appointed regent in 1255, and was killed fighting against his rival, 1266.

MANGEART, T., a Fr. numismatist, 1695-1762.

MANGENOT, L., an ecclesiast. wr., 1694-1768.

MANGET, J. J., a medical historian, 1652-1742.

MANGEY, T., an English divine, 1684-1755.

MANGIN, C., a French architect, 1721-1807.

MANGIN, CL., a French politician, 1786-1835.

MANGOU-KHAN, emperor of the Moguls, succeeded 1250, killed in China 1259.

MANICHAÆUS, MANES, or MANI, was a Persian of the third century, and educated in the religion of Zoroaster. Some affirm that he derived the germs of his doctrine from a Saracen merchant named Scythianus. His object was to incorporate Zoroastrian dualism with Christianity. In the fervor of his fanaticism he gave himself out to be the Paraclete promised in the gospel of John, by which he understood, not the Holy Ghost, as many have erroneously imagined, but a teacher commissioned to diffuse and perfect Christianity, and free it from the vile corruptions of the evil genius Ahriman. This dualism, common in the East, was a mystic attempt to account for the origin and perpetuation of moral evil. See (MARCION). Manes appeared as a religious teacher under Sapor I. As a man of multifarious accomplishment he attracted great attention; but the hostility of the magi forced him to a speedy exile. He wandered into distant countries still pursuing his mission, and in the East his contact with Buddhism gave new shape and tinge to his eclectic views. On his return to Persia with a collection of painted Oriental symbols, Hormisdas received him and his theosophic pictures with welcome, but under his successor Varanes, Manes was apprehended, and according to an Oriental form of punishment, flayed alive, while his skin was stuffed and hung up before the gate of the city. His system spread over various portions of the church, and Augustin was for a season fascinated by its speculations. [J.E.]

MANIGAULT, GABRIEL, an American revolutionist, and a wealthy merchant of Charleston, S. Carolina, was born there in 1704, of Huguenot parents. Died 1781.

MANILIUS, CAIUS, a Roman tribune, B.C. 68.

MANILIUS, MARCUS, a Roman poet, 1st cent. B.C.

MANLEY, JAMES R., a New York physician, who attended Thomas Paine in his last illness; he was professor in the Medical College of N. York. Died 1851, aged 70.

MANLEY-DE-LA-RIVIERE. The authoress of this name was a daughter of Sir Roger Manley, the reputed author of 'The Turkish Spy,' and was born at Guernsey, of which her father was governor. Besides her dramatic writings and romances, or the libels she penned in that form, she was employed as a political writer by the ministry of the day, and continued the 'Examiner' when it was relinquished by Swift. Died, after a life of intrigue and pleasure, 1724.

MANLIUS. Four illustrious Romans of this name are mentioned:—1. MARCUS MANLIUS CAPITOLINUS, a patrician general, who saved the capitol when surprised by the Gauls about 390 or 392 B.C., and was thrown from the Tarpeian Rock 370 B.C. 2. LUCIUS MANLIUS IMPERIOSUS, named dictator, and compelled to abdicate for his despotism, B.C. 363. 3. TITUS MANLIUS TORQUATUS, son of the preceding, famous for his magnanimity and courage, was appointed military tribune B.C. 362, and dictator 352,

and again 348, without passing through the inferior dignity of consul. The latter office, however, he filled in 347, 344, and 340, but finally lost his popularity by the rigor of his administration. 4. A second TITUS MANLIUS TORQUATUS, who was appointed consul B.C. 235 and 224, and, in the latter period, closed the temple of Janus after subjugating Sardinia. He refused a third consulate in 212, but was censor in 209.

MANLY, JOHN, an American naval officer during the Revolution, died 1793.

MANN, A. T., a Flem. antiquarian, 1740-1810.

MANNERS, GEORGE, an English writer and British consul at Boston from 1819 to 1836. Died 1853.

MANNERS, JOHN, marquis of Granby, a British officer, who distinguished himself in Germany under Prince Ferdinand of Brunswick, and was afterwards a member of the government, and commander-in-chief of the army, 1721-1770.

MANNERT, C., a Bavar. historian, 1756-1834.

MANNI, D. M., an Ital. antiquar., 1690-1788.

MANNING, O., an English antiquarian, 1721-1801.

MANNING, T., a disting. linguist, 1774-1840.

MANNOZZI, G., an Italian painter, 1590-1636.

MANRIQUE, A., a Spanish prelate, 1577-1649.

MANRIQUE, S., a Spanish missionary, 17th ct.

MANSART, FRANCIS, a celebrated French architect of Italian origin, 1598-1666. His nephew and pupil, JULES HARDOUIN, called MANSART, architect of Versailles, &c., 1645-1708.

MANSFIELD, JARED, professor of the United S. Military Academy at West Point, and surveyor-general of the United States, born in Connecticut. Died 1830. Author of various essays on Mathematics and Physics.

MANSFIELD, PETER ERNEST, count of, an Austrian statesman and soldier, governor of the Low Countries after the death of the duke of Parma, 1517-1604. His natural son, ERNEST, also count of Mansfield, and an enemy of the Austrian empire, called the Attila of Christendom, 1585-1626.

MANSFIELD, WILLIAM MURRAY, earl of, was born in Perthshire on the 2d of March, 1705. He was the fourth son of Viscount Stormont, and the vehement jacobitism of his family, some members of it being deeply involved in the rebellion of 1745, not only cast difficulties in the way of his early career, but was often successfully employed in debate by Chatham and his other opponents. He studied at Westminster and Christ's Church, Oxford. He was called to the bar in 1731. He wrote in his youth some poetry justly forgotten, but perhaps common tastes and pursuits may have been the foundation of that intimacy with Pope, with seems to have had a material influence on his prospects. Though no poet, he was essentially a man of genius. He cast entirely away the conventionalities of a Scottish jacobite, and entered the arena of English politics and professional ambition, with a talent and energy which gave him the full advantages of his aristocratic rank and signal personal graces. A new class of business—that of appeals of the Court of Session in Scotland, to the House of Lords, fell largely into his hands; and Pope has noticed him in a line more distinct than poetic, as 'so known, so honored, in the House of Lords.' He became Solicitor-General in 1743, but it was not until 1754 that he took the next step in promotion as Attorney-General. In 1756, he was made Chief-Justice of the King's Bench. He clung tenaciously to this office, and would not take the risks and responsibilities

of the Chancellorship at the demand of public or party spirit. His name has not been popular as a judge, and he has generally been contrasted with Camden as one who inherited the despotic spirit of the Stuart dynasty. The prejudice was confirmed by his courageous conduct in the Wilkes' outrage and furnished a text for the savage attacks of Junius, who spoke of him as a fitting Pretor for Justinian. But, however narrow some of his opinions may have been, others partook of a large liberality, and in the anti-catholic fervor connected with the outbreak known as Lord George Gordon's riots, he showed a humane, generous, and courageous toleration. He was a very great lawyer, not merely in a technical sense, but as one who could direct the practice of the courts towards broad principles of jurisprudence. Many departments in the mercantile law of England and Scotland were created by him, and among others the law of marine insurance was made and systematized by his decisions. He retired from office in 1788, and died in 1793. [J.H.B.]

MANSI, J. D., an Italian *savant*, 1692-1769.

MANSION, COLARD, a writer and printer, celebrated for introducing the art into Bruges, d. 1484.

MANSTEIN, CHRIS. HERMAN DE, a Russian general, author of a 'Memoir' on Russia, 1711-1757.

MANT, RICHARD, a famous Irish prelate, was born in Southampton, where his father held a living in the church, 1776, and began his ecclesiastical career as vicar of Coggeshall, in Essex, in 1810. In 1820 he became bishop of Killaloe; in 1823 bishop of Down and Connor; and in 1842 was translated to the see of Dromore. He died in 1848. The works of Dr. Mant consist of a vast number of sermons and tracts, but his celebrity rests on an edition of the Bible, which he prepared in conjunction with Dr. D'Oyley.

MANTEGNA, ANDREA, an eminent painter of Mantua, whose two sons, one of whom was named FRANCESCO, and his father, CARLO, were also artists, and fellow-workers with him, 1430-1505.

MANTELL, GIDEON ALGERNON, a distinguished English geologist and scientific author. The 'Medals of Creation,' 'The Wonders of Geology,' and 'Thoughts on a Pebble,' were three of his most popular works. Died 1852, aged 62.

MANTICA, F., an Italian cardinal, 1534-1614.

MANTON, T., a nonconformist divine, 1620-77.

MANTOVANO, BAPTISTA SPAGNUOLI, an elegant Latin poet, better known as Battista, 1448-1516.

MANU, the supposed author of the *Mánava Sástra*, one of the sacred books of the Hindoos, containing a code of laws, is supposed by Sir William Jones to be the same as Minos in the Grecian mythology. There are fourteen Menus, of whom this one is the seventh. The name belongs to mythology rather than biography.

MANUEL COMNENUS, fourth son of John Comnenus, born 1120, succeeded his father as emperor of the East 1143, died 1180. See COMNENUS.

MANUEL PALÆOLOGUS, born 1349, succeeded his father, John Palæologus, as emperor of the East 1391, died 1425.

MANUEL, F., a Portugese poet, 1734-1819.

MANUEL, JAMES ANTHONY, a famous leader of the opposition in the French chamber after the restoration, was born in Provence 1755, and after serving with distinction in the republican armies raised by the levy *en masse*, adopted the profession of the bar. He was a member of the chamber convoked by Napoleon during the hundred days, 1815, and with all his eloquence and power resisted the re-establishment of the Bourbons by the allied armies.

Returned to the chamber in 1818, his patriotic fervor in the tribune, his high spirit, and his brilliant oratory, marked him out as the champion of French liberty, and kept the party of the ministers in continual terror. His first speech in the session of 1823 was on the iniquity of the Spanish war, in which he reminded the crown that when the French territory was invaded under similar circumstances, the country had defended itself by the adoption of new forms and another energy! This allusion to the destruction of royalty in 1793, exploded the mine which had long been prepared for his expulsion from the chamber, and, on refusing to depart, he was led out into the street by the military. His walk home, followed by the whole of his party, was a popular triumph; and though he returned, with the simplicity and dignity of a Cincinnatus, to his own occupations, he was elected again in 1824. Manuel died three years before the triumph of his cause in the fall of Charles X., 1827. [E.R.]

MANUEL, LOUIS PETER, born 1741, acted as attorney-general to the commune of Paris at the revolution, and was executed November 14, 1793.

MANUEL, N., a Swiss fresco painter and satiric and dramatic poet, 1484-1530.

MANUTIUS, or MANUZIO, is the name of an Italian family famous in the history of printing for their beautiful editions of learned works, and the invention of the *Italic* or *Aldine* letter, said to have been formed in imitation of the handwriting of Petrarch. ALDO PIO MANUZIO, the elder, flourished at Venice, 1447-1515. PAOLO, his son, distinguished like his father both as a classical scholar and printer, 1512-1574. ALDO, the younger, son of Paolo, distinguished like his progenitors, and greatly favored by the pope, Sextus Quintus, who gave him apartments in the Vatican, was born at Venice 1547, and died childless 1597.

MANVEL, FRANCIS. See MANUEL.

MANWOOD, SIR ROGER, an English judge of this name flourished in the reign of Elizabeth, and is said by Fuller to have written a book on the forest laws. He died 1593. Such a book was first published in 1598 by JOHN MANWOOD, who is supposed to be the son of Sir Roger.

MANYOKI, A. DE, a Hungarian painter, 17th century.

MANZI, W., an Italian *savant*, 1784-1821.

MANZOLI, P. A., a Latin poet, 16th century.

MANZUOLI, T., an Italian painter, 1536-1575.

MAPES, WALTER, an English poet, 12th century.

MAPLET, JOHN, a learned naturalist, 1615-70.

MAPLETOFT, J., a medical writer, 1631-1721.

MAPLETOFT, R., a learned divine, 1610-77.

MAPP, M., a French botanist, 1632-1701.

MARA, ELIZABETH, a fam. singer, 1750-1833.

MARA, W. DE, a Latin poet, 1470-1530.

MARACCI, J., an Italian painter, 1637-1704.

MARACCI, L., an Ital. Orientalist, 1612-1760.

MARAIS, H., a French engraver, 1764-1800.

MARAIS, M., a French composer, 1656-1728.

MARALDI, J. P., an Italian mathematician, astronomer, and natural philosopher, 1665-1729. His nephew, GIOVANNI DOMENICO, also distinguished as an astronomer, 1709-1788.

MARAN, P., a French theologian, 1683-1762.

MARANA, J. P., an Italian historian, 1642-73.

MARANGONI, J., an Italian antiquarian, 1673-1753.

MARANTA, B., an Italian botanist, 16th cent.

MARAT, JEAN PAUL, was born of parents unknown to history, at a place called Baudry, in Neuchâtel, Switzerland, 1746. Before his sinister ener-

gies were directed to political ends, he had been ambitious of rising by his talents, had travelled a good deal in England, Scotland, Holland, and France, and published several works in experimental science and philosophy. Some of these had brought his name into repute, and even subjected him to the sarcasms of Voltaire, who took the pains to analyze his philosophical treatise on man—a work in which Marat had endeavored to illustrate the principles and laws of the soul's influence on the body, and those of the body on the soul. The year 1789 found him in the position of veterinary physician to the Count D'Artois, thoroughly disgusted with his failure to rise in society, and with the 'quacks,' as he called them, 'of the corps scientifique.' He began his political career by the composition of his 'Offrande à la Patrie,' followed by the issue of his journal 'Le Publiciste Parisien,' two months after the promulgation of the 'Rights of Man' by the constituent assembly. The club agitation was just commencing, and Marat joined the cordeliers, formed in Oct., 1789, the most reputable members of which were Danton, and Camille Desmoulins. His thirst for glory, if it were only in the excess of his hatreds and crimes, provoked him to measures and proposals, which it was physically impossible any of his rivals could surpass in atrocity, and gave to his denunciations a kind of barbaric magnificence. Such was his proposal 'to hang the 800 deputies on 800 trees of the Tuileries—Mirabeau on the first of them,' for which he was denounced by Malouet. From this period to the 10th of August, 1792, he was hunted by his accusers from one wretched abode to another—always contriving to issue his journal, the title of which was presently changed to 'Friend of the People.' On the date just mentioned, the Tuileries was besieged, the royal family imprisoned, and the new 'commune,' or municipality, formed by the republicans; Marat also emerged from his obscurity, and filled the prisons with the 'suspect,' who were disposed of by the massacres of September. On the evening of the 3d the famous circular was issued, calling upon the departments to imitate the example of the Parisians; it was signed by Marat, the chief promoter of these horrors, and his colleagues, ten in all, members of the Comité de Surveillance, afterwards the Committee of Public Safety. The convention being elected Marat became a deputy, and his appearance in that assembly was the signal for Vergniaud and Boileau to denounce his atrocities, and they read from the tribune his demand of 270,000 heads as a means of appeasing the country. The turbulence of such a sitting may easily be imagined. Marat made no attempt to deny the charge. *Such was his opinion*, the result of the most rigid computation he could make, and he was willing to shed a few drops of guilty blood to save millions of the innocent! After the execution of the king, the battle of Norwinden was lost by Dumouriez, 18th March, 1793, and Marat, always gigantic in his conceptions, accused all the generals of the army of treason, and sought to bring them to trial *en masse*. Meantime his struggles with the Girondins had increased in virulence, and they succeeded at last in summoning their terrible adversary before the revolutionary tribunal. This court was one of the instruments set in action by his own party on the 10th of August: Marat went to his trial attended by vast crowds of the populace, and his acquittal followed as a matter of course—not only so, but the people carried him back to the convention in triumph, elevated on a kind of rude palanquin, and covered with garlands as he proceeded on his way. He now assumed the dictatorship, that he had

always advocated, though he still resided in his squalid apartment with the wife of his printer, who had been seduced by him, and who seems really to have loved him. On the 31st of May, 1793, he sounded the alarm bell, and with the aid of his seditious worshippers arrested the Girondin deputies, whose fall was avenged on the 13th of July following, by the hand of Charlotte Corday. (See BRISSOT, CORDAY.) The death of Marat was only hastened a few days by his assassination, for he was already consumed by a disgusting malady: and it is melancholy to add, that he was almost adored after his decease; his remains being deposited in the Pantheon with national honors, and an altar erected to his memory in the club of the cordeliers: these fanatics also claimed his heart, and preserved it in a golden urn. Our sketch would be essentially incomplete if we did not add that Marat was perfectly sincere, and, in fact, that he made his convictions his sole religion. He sold his bed to bring out the first numbers of his journal, and lived in poverty at a time when he could have amassed wealth by merely selling his silence. Such a life is far more instructive, even as an example of depravity, when facts like this are properly understood. There is such a thing as consistency, and a kind of devilish virtue, in guilt, which is as rare as heroism in well-doing, and history might be ransacked for a more striking instance of it than the brief political career of Marat. MARBACH, J. R., a Ger. actress, 1805-1837.

MARBECK, JOHN, organist of St. George's Chapel, Windsor, and the first composer of the cathedral service of the Church of England. He was author also of a Scripture Concordance, for which he narrowly escaped the stake, time of Henry VIII.

MARCA, the name of two Italian painters, the earliest, J. B. LOMBARDELLI DELLA MARCA, flourished 1532-1587. The later, LACTANTIUS DELLA MARCA, born about 1553.

MARCA, PET. DE, a Fr. historian, 1594-1662.

MARCANTONIO, the most renowned of the Italian engravers, was born about 1480, Bologna, and was the pupil of the celebrated painter and goldsmith Francia; his family name was Raimondi. Some of Marcantonio's earliest efforts were made at Venice, where he copied Albert Dürer's prints of 'The Life of the Virgin,' and of the 'Passion;' for up to this time no Italian engraver was to be compared with Dürer, whose prints became known in Italy after 1500. From Venice, Marcantonio went to Rome, where he attracted the notice of Raphael, who largely employed him in the engraving of his designs: it is to his prints after Raphael that Marcantonio owes his present great reputation. There is a very fine collection of them in the British Museum. After the death of Raphael in 1520, Marcantonio was employed by Guilio Romano, and it was for engraving some lascivious designs by this painter that he was imprisoned by Clement VII. After the sack of Rome in 1527 he returned to Bologna, where he is supposed to have died about 1539, that being the last date on any of his prints; but the dates both of his birth and death are quite uncertain. Marcantonio's prints are distinguished for their delicate outlines and execution, and generally fine drawing; some of the original impressions, before the plates came into the hands of Barlachi and Salamanca, have realized enormous prices,—those with the names of these dealers are also valuable, the later are retouches and inferior. The 'Murder of the Innocents,' after Raphael, is perhaps the most celebrated of his plates, more than

half of them are anonymous, but are marked M. or M.A., and M.A.F., joined as a cipher. Bartsch, in his *Peintre Graveur*, describes 383 prints by this engraver, but several of them are doubtless by his distinguished pupils, Agostino Veneziano, and Marco da Ravenna. Nagler, in his *Künstler Lexicon*, describes 395 prints. The original account of Marcantonio, of whom we know so little, is in Vasari's *Lives*, &c.; nothing biographical concerning this great engraver has been ascertained since Vasari. [R.N.W.]

MARCELLIS, O., a Dutch painter, 1613-1673.

MARCELLO, BENEDETTO, was born of noble parents at Venice in 1686. His father, Agostino Marcello, was a Venetian senator, and his mother, Paolina, was of the honorable family of Capello. Benedetto, having in early life received a thorough classical education, was committed to the care of his elder brother, Alessandro, who was a student of the mathematical sciences, natural philosophy, and music. Under this brother, the young Benedetto applied himself to music and poetry, and soon made such progress that he was placed under Francesco Gasparini, to receive instructions in the principles of musical science. In 1716 the first son of the emperor Charles VI. was born, and at the celebration of the event, which took place at Vienna, a grand serenata, composed by Marcello, was performed with great applause. After this he composed a mass, which was first performed in the church of Santa Maria della Caestia, on the occasion of his brother's daughter taking the veil. He composed many other sacred works for the church of Santa Sophia, and was at the pains of instructing the clergy in the manner in which they were to be performed. In 1724, and the three following years, he wrote music for one, two, and three voices, for a paraphrase of the first seventy-five psalms, which are still remarkable for

the scientific knowledge shown in their construction. Marcello was for many years a judge in the Council of Forty, and was for some years chamberlain and treasurer to the city of Brescia, where he died in the year 1739. He was buried with great pomp in the church of the fathers Minor Observants of St. Joseph of Brescia. [J.M.]

MARCILIUS, T., a German critic, 1548-1617.

MARCILLA, W. DA, a Fr. painter, 1475-1537.

MARCION, was born at Sinope in Pontus, about the middle of the second century. His father, according to some reports, not, however, well authenticated, was a bishop of the church in that place. His belief in Oriental and dualistic gnosis, encrusted with other and similar speculations, was deemed by him compatible with belief in Christianity, and he attempted to form a heterogeneous theology out of both materials. He assumed as articles of his creed, the eternity of matter—the existence of a benign and holy Deity—and of a Demiurgus little less than God in might, but dark and malignant, and having his appropriate sphere in an attempted dominion over matter, for he created man, was the actual God of the Jewish race, and was to be finally overcome by the Messiah. Jesus, according to Marcion, had not, and could not have a real humanity, for all matter is essentially sinful. These notions are the crude effects of an earnest mystic mind to resolve inscrutable mysteries by the creation of figments not only incomprehensible, but inconsistent and baseless. Marcion received as canonical only the writings of the apostle Paul, though he had a gospel which appears to have been an interpolated copy of that of Luke. To this heresy was joined an austere and vigorous asceticism, by which victory over appetite was to be finally secured. [J.E.]

MARGARET. The queens and Princesses of Great Britain of this name are—1. ST. MARGARET, queen of Scotland, sister of Edgar Atheling, married to Malcolm 1070, died 1093. 2. MARGARET OF YORK, sister of Edward IV., married to the duke of Burgundy. 3. MARGARET OF ANJOU, daughter of René, titular king of Sicily, Naples, and Jerusalem, born 1425, married to Henry VI. 1443, died, after a life of extraordinary vicissitude consequent on the wars of York and Lancaster, 1482. 4. MARGARET OF SCOTLAND, daughter of James I., born 1425, died, after an unhappy marriage with Louis XI. of France, 1444. 5. MARGARET TUDOR, eldest daughter of Henry VII. and Elizabeth of York, and sister to Henry VIII., was born at Westminster 1489. This princess was betrothed in her infancy to James IV. of Scotland, then of adult age, and married to him in 1503. In 1506 she gave birth to a son, afterwards James V., and became regent of Scotland after the death of her husband at the battle of Flodden, 1513. In 1514 she married Archibald, earl of Angus, of the family of Douglas. This match surrounded her with strife and trouble for the rest of her days, the first outburst of which was the arrival of the duke of Albany, supported by the French king in 1515, soon after which Margaret took refuge in England. She died in 1541. Her life has been recently published by Miss Strickland.

MARGARET. The saints of this name are the queen of Scotland, and a virgin martyr of Antioch, known as the patroness of Cremona, 3d century.

MARGARET. The queens and princesses of France are—1. MARGARET, daughter of Raymond Berenger, count of Provence, born 1219, married to Louis IX. 1234, died, after acquiring a famous name by the defence of Damietta, 1285. 2. MARGARET OF BURGUNDY, married to Louis X., king of France, 1305, strangled for adultery 1315. 3. MARGARET OF VALOIS, sister of Francis I., born 1492, married in 1509 to the Duke of Alençon, and in 1527, two years after the death of her first husband, to the king of Navarre, by whom she had Jeanne D'Albret, mother of Henry IV., died 1530. 4. MARGARET OF FRANCE, daughter of Henry II., born 1552, married to the prince of Bearn, afterwards Henry

IV., 1572, divorced for her licentiousness 1599, died 1615. 5. MARGARET OF FRANCE, duchess of Savoy, daughter of Francis I., born 1523, married to Emmanuel Philibert 1559, died 1574.

MARGARET, queen of Norway, Denmark, and Sweden, who is often called 'the Semiramis of the North,' was the daughter of Waldemar III., king of Denmark, and was born at Copenhagen, 1353. In 1363 she was married to Haco, king of Norway, youngest son of Magnus Ericson, in whose person the governments of Sweden, Norway, and Scania, had been invested many years before. The marriage of Haco with Margaret took place under circumstances of great political difficulty, and it occasioned the banishment of twenty-four of the most powerful of the Swedish barons, by whom Magnus and his son were afterwards deposed, and Albert of Mecklenburgh placed on the throne. While the country was suffering from the oppression of this foreign government, Margaret lost, in 1375, her father, Waldemar; in 1380, her husband, Haco; and in 1387 her son, Olave—events which left her queen regnant in Norway, regent in Denmark, and in a situation to receive overtures from the Swedes. With a spirit and ambition natural to her, Margaret at once furnished her adherents with troops, and supplies of war, and the victory of Felkoepping won by the high marshal of Sweden, Eric Kiellzon, Sept. 21, 1389, threw open the kingdom to her. The union of the three kingdoms was concluded by the treaty of Calmar, where the spiritual and temporal barons assembled for that purpose, on the 20th of July, 1397; Eric of Pomerania, the grand-nephew of Margaret, being elected her successor as the future sovereign of Sweden. She died in the port of Flensburg, on board a vessel in which she had embarked for Denmark, October 28, 1412. Her memory has been execrated in Sweden, where the union was never popular, in about the same measure that her political virtues have been extolled in Denmark. The words of Geijer, the great Swedish historian, are sufficiently remarkable to be quoted on this point:—'The fate of the throne and the country was decided by the holders of power, from the casual motives of temporary interests, and by such was the famous union of the three northern kingdoms produced—a mere incident, which bears some resemblance to a design; but of a consciousness of what such a union was, or of what it might become, no glimpse is to be perceived, either among its founders or in any other quarter.' [E.R.]

MARGARET OF AUSTRIA, daughter of the emperor Maximilian I., born 1480, married successively to the Infant of Spain 1491–1497, and to Philibert, duke of Savoy, 1501–1506, became ruler of the Netherlands 1506, died 1531.

MARGARET OF CONSTANTINOPLE, daughter of Baldwin IX., became countess of Flanders and Hainault 1221, died 1279.

MARGARET OF PARMA, a natural daughter of Charles V., married successively to Alexander de Medicis and Octavian Farnese. The latter event took place in 1540. From 1559 to 1568 she was ruler of the Low Countries, and was succeeded by Alva. She then retired into Italy, and d. 1586.

MARIA. See MARIE, MARY.

MARIA. The queens of Spain of this name are—MARIA DE MOLINA, queen of Castile and Leon, married to Sancho IV. 1282, regent of Castile 1295 and 1312, died 1322. MARIA LOUISA, daughter of the duke of Orleans, brother of Louis XIV., and of Henrietta of England, married to Charles II., king of Spain, 1662–1689. MARIA LOUISA, daughter of Victor Amadeus II., duke of Savoy, and wife of Philip V., 1688–1714. MARIA LOUISA, wife of Charles IV., and mother of Ferdinand VII., 1754–1819.

MARIA II., queen of Portugal, daughter of Pedro I., emperor of Brazil, died 1853, aged 35.

MARIA, empress of Germany, called MARIE ROI, first wife of the emperor Sigismund, and daughter of Louis I., king of Hungary, born 1370, began to reign 1382, died 1395.

MARIA CAROLINE, queen of Naples. See CAROLINE.

MARIA FRANCES ELIZABETH, queen of Portugal, born 1734, became mistress of the kingdom at the death of her husband, Peter III., 1786, suffered by mental aberration 1790, died 1816.

MARIA LOUISA, second wife of Napoleon Buonaparte, daughter of Francis I., emperor of Austria, and Maria Theresa of Naples, was born 1791. In 1810 she was married to the emperor; in 1811 she presented him with an heir, who was hailed king of Rome; on his fall, in 1814, she deserted him for the company of her chamberlain, Count Neipperg, and became duchess of Parma and Placentia. Died 1847.

[Maria Theresa.]

MARIA THERESA, born in 1717, was the eldest daughter of Charles VI. of Austria, who died

in 1740. The succession of Maria Theresa to the hereditary dominion of the House of Hapsburg had been guaranteed by the principal states of Europe; but, on her father's death, she found herself assailed by the kings of Prussia, France, Spain, and Sardinia, and the electors of Bavaria and Saxony. Each of these princes laid claim to some part of the Austrian territory; and Maria Theresa, at the age of 23, was called on to make head against the armies of all her neighbors, except the Turkish sultan, who alone acted towards her with fairness and good faith. Maria Theresa had been married in 1737, to Francis of Louvain, grand duke of Tuscany, but he was a prince of little intellect or energy; and it was to the spirit of Maria Theresa herself, and the loyalty of her Hungarian subjects, that Austria owed its rescue from destruction. When driven from her capital by her enemies, Maria Theresa repaired to Presburg, and summoned the Hungarian Diet. She appeared in the midst of the martial assembly with her infant son in her arms. She addressed them earnestly and eloquently in Latin, (a language long currently used in Hungary); and when she came to the words, 'The kingdom of Hungary, our persons, our children, our crown, are at stake,—forsaken by all, we seek shelter only in the fidelity, the arms, the hereditary valor of the renowned Hungarian nobility,' the Hungarian nobles, and all present, with one unanimous burst of chivalrous loyalty, drew their swords, and shouted, 'Let us die for our king Maria Theresa.' [Moriatur pro rege nostro Maria Theresa.] This was no transient demonstration of zeal. The whole military force of Hungary was soon in the field: the current of invasion was checked, and by degrees the foes of Maria Theresa made peace with her, and ceased to reckon on their shares in the dismemberment of Austria. She was obliged to cede Silesia to Frederick of Prussia; but with this exception she was left in full possession of her dominions, when the war of the Austrian succession was closed by the treaty of Aix-la-Chapelle in 1758.—The loss of Silesia was a deep mortification to Maria Theresa, and the hope of recovering that province made her take an active part in the seven years' war against Frederick of Prussia. That contest, however, closed in 1763, leaving Prussia in possession of Silesia, and with no gain on either side to Maria Theresa or Frederick. Maria Theresa's husband had been elected emperor of Germany in 1745, and on his death in 1765, their son Joseph was chosen to succeed him. But Maria Theresa retained in her own hands, throughout her life, the administration of her vast dominions, which were generally governed by her in a wise and enlightened spirit. Her private character was irreproachable, and the morals and manners of her court formed a bright exception to the gross profligacy by which the courts of nearly all the other sovereigns of the age were disgraced. She was sincerely pious, and Botta, the Italian historian, passes on her the high eulogy, that 'during a forty years' reign she always showed a love of justice and truth.'—Her share in the first partition of Poland is the great stain on the character of Maria Theresa. But she came unwillingly into this plot, which was urged on her by the sovereigns of Prussia and Russia, and by her son the emperor Joseph. She is said to have left a written record that she consented to this measure out of deference to the opinions of others, and that she foreboded evil consequences to Europe from this act of injustice to one of its states. Maria Theresa died in 1780.

MARIAMNE, an unfortunate Jewish princess,

grand-daughter of Aristobulus, and of Hyrcanus the high priest, and wife of Herod the Great. Her history is related by Josephus in his Antiquities, commencing at book xv., from which it appears that Herod was excessively fond of her. She was condemned to death, by the machinations of Salome, her husband's sister, on a false charge of adultery, B.C. 28. She met her fate with an air of grandeur and intrepidity worthy of her noble ancestry, and was bitterly lamented by the king after her decease. Another MARIAMNE, wife of Herod, was the daughter of Simon, the high priest, and mother of Herod-Philip, who married Herodias.

MARIE. The queens of France of this name are —1. MARIE DE BRABANT, married to Philip 1274, died 1321. 2. MARIE D'ANGLETERRE, daughter of Henry VII., who became the third wife of Louis XII. 1514, died 1534.—See GREY, LADY JANE. 3. MARIA STUART.—See MARY. 4. MARIE DE MEDICIS.—See article next page. 5. MARIE THERESE, daughter of Philip IV., king of Spain, married to Louis XIV. 1660, died 1683. 6. MARIE LECZINSKA, daughter of Stanislas, king of Poland, born 1703, married to Louis XV. 1725, died 1768. 7. MARIE ANTOINETTE.—See following article. 8. MARIE LOUISE, wife of Napoleon. See MARIA LOUISA.

MARIE-ANTOINETTE, the unhappy queen of Louis XVI., was the daughter of Francis I. and the empress Maria Theresa of Austria, and was born at Vienna, 1755. Though only fifteen years of age when she married the Dauphin, she was accomplished in the French, Italian, and Latin languages, besides her native German; and was also a proficient in music and drawing. The goodness of her heart, her noble carriage, and the sweet expression of her countenance, easily won the hearts of a people to whom enthusiasm is as natural as the air they breathe. Marie-Antoinette, becoming queen in 1774, was applauded to the skies whenever she appeared in public, and often had to stand on the steps of her carriage to show herself to the people. Her popularity was greatly augmented when she became the mother of a family, and especially when, in 1785, she presented the nation with an heir to the throne. Soon, however, the expensive luxury of the court, the exhaustion of the public finances, and the distresses of the people, had prepared the way for scenes far different from these popular ovations, and the first shock was given to her popularity by a transaction involving both money and character. It had become known to the countess de la Motte, that the queen's jeweller had offered her a diamond necklace, which she declined on account of its enormous price, no less than 1,800,000 livres. To obtain this treasure, the countess pretended she was authorized to negotiate for the queen, and not only concluded the bargain, but made the cardinal de Rohan a party to it, who was persuaded that Marie-Antoinette had given him a midnight meeting in the park of Versailles. The fraud was not discovered till the first payment was demanded, and though the countess, in May, 1786, was condemned to be whipped and branded for her infamous conduct, the queen never

recovered the good opinion of her subjects; add to which, there was a certain levity in her conduct, which continually exposed her to scandal, though no one now supposes that she was guilty of the crimes laid to her charge. When the revolution broke out in 1789, she became an object of the popular suspicion and hatred, chiefly on account of her Austrian connections; but, in a great degree, also, by reason of her high spirit and superior capability of resistance and action when compared with her husband, Louis XVI. It would be inconsistent with our limits to describe the incidents which marked the progress of this hatred on the one side, and of scornful defiance on the other. Marie-Antoinette was imprisoned in the Temple after the triumph of the populace, on the 10th of August, 1792; and there is reason to believe that the willingness of the royal family to submit themselves to their jailers, was owing to the persuasion that they had secured the interest of Danton, and that they were really embracing the means provided for their safety. The fanaticism of the populace, excited by Marat and his myrmidons, and the coalition formed against France by the neighboring powers, rendered such a compromise, if it existed, of no effect. The king was executed on the 21st of January, 1793, and the 'Widow Capet,' as Marie was called in the indictment, was tried by the revolutionary tribunal in the following October. She was only thirty-seven years of age, but her hair had turned white during her imprisonment, and her only articles of dress had become damp and ragged in the cell she occupied. Her eyesight was injured, and her beauty marred by care and long suffering. Her trial was only a form and mockery, but one of heartless brutality, which it is impossible to read without a feeling of infinite disgust and indignation. Her hours of suffering developed the best traits of her character; and Marie-Antoinette, on her way to the scaffold, commands the respect which might be challenged for her in vain as the adviser of the feeble king, whose counsels she swayed, often but too fatally, yet always courageously. She was guillotined Oct. 16, 1793. [E.R.]

MARIE DE MEDICIS, queen of France, was the daughter of Francis II., grand duke of Tuscany, and of Joan, archduchess of Austria. She was born at Florence in 1573. In 1600 she was married to Henry IV., and the year following gave birth to a son, who became Louis XIII., and whose deplorable weakness was the principal cause of her misfortunes. The amours of her husband rendered her life a most

wretched one, and being of violent temper, she would frequently have struck him, had not the great Sully interposed between them. Her anxieties as a wife, and the absolute temper of Henry, prevented her from taking any part in state affairs during his lifetime; and when, towards 1610, he contemplated taking the field against the house of Austria, and proposed making her regent in his absence, she manifested the greatest repugnance to the subject, always saying that it foreboded some great misfortune. In the year just mentioned, Marie agreed to the regency, on condition of being formally crowned; a ceremony which the king had always deferred; and this being done, the latter was stabbed on the day following, by Ravallac, when preparing for the queen's entry into Paris (article NAVARRE). The queen regent had lately acted under the advice of Concini, an Italian favorite, whom she presently created a marshal of France, and honored with the marquisate of d'Ancre; and she also retained among her advisers the duke d'Epernon, who was suspected of being privy to the assassination. Her apathy in regard to the investigation of this deed of blood, has stained her memory with the suspicion of being implicated in it, but there is really no other ground for supporting such a charge, and the hatred of the French would seem to have magnified all her faults. From 1610 to 1614 the court was a focus of intrigue and anarchy, which the queen had too little statesmanship, and too much of passion to rule; and parties were arraying themselves for the struggle which all foresaw in the estates-general. That body assembled in October, of the last mentioned year, and now the afterwards famous Richelieu placed himself at the head of the clergy, and began to feel his way to power. The boy king, this year, was declared of age, and the factious nobles, who surrounded him, filled his ears with rumors of Italian treachery, the issue of which was, that the queen relied entirely on Concini, who raised troops for her defence, and created a natural jealousy of Italian domination in France. Thus strengthened, in 1616, Marie de Medicis imprisoned Condé, the most turbulent and daring of her enemies, in the Bastille, and hurled defiance at the nobles in full assembly. In 1617, Concini was assassinated, and soon afterwards the queen was compelled to retire to Blois, where the wily Richelieu joined her as a pretended friend, and, in 1620, effected an accommodation which enabled her to return to court. The cardinal found the queen a good trump card in the game he was playing for absolute power, and even when she became aware of his treachery, her hot Italian blood was no match for his cool sagacity. Eleven years of struggle ended in the triumph of Richelieu, and, in 1631, the poor queen became, first a prisoner at Compiègne, and then a wanderer in foreign lands. The close of her life is the saddest part of her story. Abandoned by all her family, and her own son on the proudest throne of Europe, the widow of Henry of Navarre died in want of the commonest necessities. She breathed her last in a poor apartment at Cologne, the furniture of which she had disposed of for the means of supporting life, in 1642. To the faults of her Italian character, she joined the refined taste of her house for arts and letters, and France is indebted to her for the Luxembourg palace. Her excess of passion over judgment, and the anarchy around her make a sad contrast with the wisely regulated and prosperous ambition of great sovereigns. In her best moments Marie de Medicis was only the mistress of a faction. [E.R.]

MARIUS, CAIUS, one of the greatest soldiers and dictators of the Roman republic, was born of parents in humble circumstances, probably at Ceretinum, about 157 B.C. Having entered the army, he became known to Scipio Africanus, and acquired so much repute that he was elected tribune B.C. 119 or 120, prætor 116, and governor of Spain 115. In 109 he joined Metellus as one of his lieutenants in the Jugurthine war, and two years afterwards supplanted him in the command of the army. He brought the war to a close in 106, when Jugurtha, the king of Numidia, was treacherously delivered into his hands by his ally, Bocchus. Marius remained in Africa a year longer, and was then recalled to take the field against the Cimbri and Teutones, at that time menacing the Roman empire.

These barbarians numbered 300,000 men in arms, and had defeated the consul Manilius, and the proconsul Cæpio, at a cost to the Romans of 80,000 soldiers, and 40,000 camp followers. Marius had been appointed consul in 107, when the conduct of the Jugurthine war was intrusted to him, and in sight of this new danger he was not only re-elected, but continued in the consulate four successive years, though contrary to law, B.C. 104-100. In 102 he defeated the combined forces of the Ambrones and Teutones, near Aix; and in 101, having joined his forces with those of Catulus, he obtained an equally decisive victory over the Cimbri, in the neighborhood of Verceilæ. He was now hailed 'The Third Founder of Rome,' and rewarded with a fifth consulate,—followed by a sixth, which, it is said, was gained by corrupt practices, as the possession of power had become too sweet to be easily laid down. Perhaps another and more patriotic reason also influenced him. Marius was the avowed chief of the plebeians—the natural successor of the Gracchi, who had shed their blood that the rights of Roman citizens might be extended to the rest of Italy. In B.C. 90 this social war broke out afresh, provoked by the murder of Drusus, who renewed the proposal, and Marius and Sylla became the respective chiefs of the plebeians and patricians. The latter, flushed with his recent success against the army of Mithridates, refused to yield the command to Marius, but marched against his party in the capital, and disputed the city street by street. Marius was defeated, and finally lodged in prison, where a Cimbrian soldier was sent

to behead him, but let the sword fall from his hand on meeting the stern glance of the captive, who demanded of him *how he dared to kill Caius Marius!* The magistrates of Minturnæ, where this occurred, impressed by the strange circumstance, favored the flight of Marius, and he sought refuge in Africa, from whence, in 87 B.C., he was recalled by Cinna, at that time consul, to take arms against his old adversary. The combined forces of Marius, Cinna, Sertorius, and Carbo, soon entered Rome, and the bloody proscriptions which have consigned the name of Marius to infamy, now took place, exceeding all that was previously recorded in Roman history. Caius Marius now served as consul for the seventh time, with his new ally, and the same year, B.C. 86, on hearing that Sylla was approaching, he endeavored to drown care in wine, and is supposed to have killed himself with excess. His character marks him out as the type of the class for whom he acted as the armed chief in the social war, as that of Sylla places him in the foremost rank of the patricians. They were equally relentless and guilty of blood. [E.R.]

MARIUS, CAIUS, the younger, son of the preceding by adoption, served in the army of his father, and became consul with Carbo, 82 B.C. He was defeated by Sylla, and caused himself to be killed by one of his officers.

MARLBOROUGH, JOHN CHURCHILL, afterwards duke of Marlborough, the greatest general England ever produced before the duke of Wellington, and one of the greatest of modern Europe, was born at Ashton, in Devonshire, on July 5, 1650. His father was a gallant cavalier, who had drawn the sword in behalf of Charles I.; by his mother's side he inherited, by collateral descent, the same blood which had flowed in the veins of Sir Francis Drake. In early youth, when at school in Devonshire, he evinced a decided turn for warlike pursuits, and was often found studying *Vegetius* on military affairs. At sixteen he received a commission in the Guards,

counterbalanced the victories of his uncle, the duke of Marlborough, when in command of the armies of the allies in the wars of the succession. Thus the same English family furnished, at the same time, the deadliest enemy and the acknowledged saviour of the French monarchy.—During his early life in the Guards, young Churchill, who was uncommonly handsome in person, as well as fascinating in manners, was involved in the usual dissipations of the court of Charles II.; and even inspired a passion in the breast of one of the royal mistresses, the countess of Castlemaine, who presented him, as a token of her regard, with £5,000, which formed the commencement of his fortune. Soon after he was sent to the coast of Africa, and made his first essay in arms in warfare with the Moors; and on his return from thence, he was despatched with the English auxiliary force in 1672 to co-operate with the French army in Flanders, in their campaigns against the Dutch. He there distinguished himself so much, that he was publicly thanked by Louis XIV., at the head of his army; and Marshal Turenne, who commanded it, prophesied that 'the handsome Englishman,' as he was termed, 'would one day make a great general.' He made four campaigns under Turenne; and it was there, as he ever after admitted, that he first learned the art of war. Thus, by another of the strange revolutions of fortune in this extraordinary man, it was under a French marshal that he was taught the art which, matured by his genius, all but brought the French monarchy to destruction.—When the war in Flanders was over he returned to London, furnished with the strongest possible recommendation from Louis XIV. and Turenne to the king of England. In consequence of this support, and the increasing suavity and fascination of his manner, he rapidly rose in the Guards, and ere long was promoted to the command of a regiment in them; while there his charms of manner and personal beauty won the heart of Sarah Jennings, one of the maids of honor to the Princess Anne, who afterwards became queen, whom he married in 1678, and who exercised an important influence on his life and fortunes. Beautiful, high-spirited, and ambitious, with great talents as well for conversation as intrigue, she was unhappily, at the same time, arrogant, overbearing, and irascible; so that it was hard to say whether she aided her husband's fortunes in after life most by her influence at court, or marred them by the supercilious demeanor which involved her in continual quarrels, and at length entirely alienated the affections of his sovereign. Though a courtier, and indebted for his first rise to the favor of the duke of York, who continued his kindness to him when he became king on the demise of Charles II. in 1685, Churchill was a staunch protestant, and saw as clearly as any one the inevitable result of the headlong course which James II. pursued soon after his accession to the throne, in order to re-establish the Romish faith in his dominions. He did his utmost to dissuade him from the insane attempt, but in vain. The result was, that when the nation was driven to desperation, and forced to invite William prince of Orange over in 1688 to change the sovereign on the throne, Churchill felt himself constrained to espouse the side opposite to that of the reigning sovereign. He did this in a way which forms the only, but is, in truth, an indelible blot on his memory. He did not resign his appointment under the sovereign whom he felt himself constrained to desert, and then appear in arms against him; he retained his commission of the regiment of Guards, and exerted his influence to induce them to pass

[Marlborough.]

chiefly owing to the influence of his sister, Sarah, who was the favorite of the duke of York, brother to Charles II. She transmitted the military genius of the family to her offspring, for her son, by the duke, who entered into the French service, afterwards became duke of Berwick, and by his great abilities, in command of the French armies in the Peninsula,

over to the enemy; he did what Marshal Ney afterwards did to Louis XVIII., and honor can plead no apology for either. After the dethronement of James II., Churchill, who of course was immediately taken into favor with William III., who succeeded him, was employed in the South of Ireland in command of the royal forces, and there he rendered good service to the cause he espoused, by the reduction of Cork, Bandon, Kinsale, and other strongholds in the south of Ireland. He soon found, however, that it is an easier thing to dispossess a sovereign than render his successor acceptable to the nation. He was disgusted with the preference shown to the Dutch troops, and the insensibility of William to the real national concerns of England. These feelings were too warm to be concealed, and the result was that he fell into a correspondence with some of the Jacobites abroad, which led to his being arrested in 1691 on a charge of high treason, and deprived of his honors and employments. He was soon after liberated, as no evidence was found sufficient to authorize his detention, far less bring him to trial; but he labored for a long time under the suspicion of the court, and it was not till 1698 that he was restored to his rank as a privy councillor, and appointed to the important situation of preceptor to the duke of Gloucester, the heir apparent to the monarchy. 'Make him like yourself,' said William III., in conferring on him the appointment, 'and you will leave me nothing further to desire.'—The death of the king of Spain, who, being childless, had bequeathed his immense dominions to the duke of Anjou, grandson of Louis XIV., having involved Europe in a general war, Churchill, who by this time had been created earl of Marlborough, was called to act on a greater theatre, on which he acquired immortal renown. Even before the death of William III., he had been appointed to the important situation of plenipotentiary at the Hague, where the negotiations were carried on; and when the decease of that monarch led to the accession of his early and steady friend, the Princess Anne, to the throne, he was appointed commander-in-chief of the allied armies. War having been declared in May, 1702, he repaired to the camp near Numigen, where the allied army, 60,000 strong, was retiring before the superior armies of Louis XIV. The arrival of Marlborough, however, soon altered the state of affairs. Pointing to the dense French battalions, he said, 'These men will soon be our prisoners;' and he was as good as his word. He instantly took the initiative, threw the enemy into retreat, and followed up his successes by the capture of four of their most important strongholds before the campaign was over, in the very teeth of their superior forces. Such was the vigor of his measures, and the skill with which they were taken, that he succeeded in capturing the strong fortresses of Rusmonde, Liege, and Maestricht, in a few months; the last of which being situated on the river Meuse, which is navigable up to it, gave him the entire command of that river, and the inestimable advantage of a water communication into the very heart of Flanders. The campaign of 1703 was not equally prolific of great events; chiefly from the 'Dutch deputies,' who were invested with a negative on all measures of the English general, absolutely refusing their consent, now that the danger was removed from their doors, to any measures which seemed in the least hazardous. One incident, however, of great interest with reference to future events did take place. The French had, with vast labor, constructed a set of lines, covering the approach to Brussels from the

side of Maestricht, from whence it was now threatened by Marlborough. He contrived by a sudden nocturnal attack, however, to force these celebrated lines, and this brought him to the field of Waterloo, in the exact reverse position of that occupied by Napoleon and Wellington, one hundred and eleven years afterwards. The French, thrown back on the forest of Soignies, had their backs to Brussels and their faces towards Paris; the allies stood on the ground occupied by Blucher and Napoleon, and threatened the French lines from the wood of Ohain. The fairest opportunity of finishing the war at a blow was prevented, for Marlborough had got between the French and Paris, and defeat to them was ruin. He earnestly besought the Dutch deputies to take advantage of it, but they would not. Such was his vexation at this crossing, that next day he said, 'To-day I am *ten years older* than I was yesterday.'—The aspirations of the English hero were amply gratified in the following year. Louis XIV. had determined to stand on the defensive in Flanders, and make a great effort in Germany, with a view to intimidate Austria, and from it to conclude a separate peace. His efforts were well nigh attended with entire success. Supported by Bavaria, with whom they were in close alliance, the French armies, 80,000 strong, poured down the valley of the Danube,—Munich was passed, Vienna threatened: the cabinet of Vienna, menaced with an Hungarian insurrection in rear, was in an agony of apprehension. But the hour of deliverance was at hand. Putting himself at the head of 30,000 of his best troops, Marlborough, who had previously secured a solid footing on the Rhine by the reduction of the strong and important city of Bonn, crossed over into Germany, stormed the intrenched camp at Scholomburg, with the loss to the enemy of 12,000 men, and defeated them at BLENHEIM with the loss of 15,000 prisoners, 80 guns, and 100 standards. Marshal Tallard, the French general, and their chief officers were made prisoners. Before they recrossed the Rhine, the French were weakened by 40,000 men. Germany was delivered, Austria saved, and France threatened, by a single victory. The annals of Napoleon have no more decisive triumph to exhibit; and the result was, that the French armies, reflux on all sides, were driven back into, and reduced to the defence of their territory. The campaign of 1705 was not productive of any memorable events, from the Dutch deputies again interposing, and preventing all the daring measures projected by the English general. But he renewed his triumphant career in 1706. Assailing the French army, 60,000 strong, at RAMILLIES, he totally defeated them after a hard struggle, with the loss of 15,000 men in killed, wounded, and prisoners. The effect of this great victory was the immediate capture of Brussels and liberation of all Austrian Flanders. Antwerp, Oudenarde, Ghent, Bruges, and many of its chief towns declared for the allies; others, such as Menin, Ath, Donismond, and Ostend, were reduced after bloody sieges by force of arms. Before the campaign ended, the whole of Austrian Flanders, bristling with strong fortresses, was recovered; the Dutch had obtained the barrier for which they had so passionately longed; and the French armies, which had so recently threatened Vienna, were every where thrown back on their own frontier.—Early in the following year, the allied arms sustained a serious reverse, by the surprise of Ghent and Bruges, which was effected by Prince Vendome, the French general, who was at the head of 100,000 men. But if the treachery of these towns had induced danger, the vigor of Marlborough

soon restored affairs. Suddenly wheeling round, when in the course of retreat towards Brussels, he attacked and totally defeated the French at OUDENARDE, with the loss of 9,000 prisoners and 11,000 killed and wounded. Boldly then resuming the offensive, he carried his victorious arms into France, besieged and took Lille, though garrisoned by Marshal Boufflers with 15,000 men of the best troops in France; in the face of Vendome, at the head of 100,000 men, relieved Brussels, which had been threatened in the interim, and concluded his triumphant career by the recovery of Ghent and Bruges, the former garrisoned by 1,800 men. The annals of war can afford no parallel of the skill and resolution of that immortal campaign, which, to the end of the world, will be the subject of study and admiration of military men. The last of Marlborough's great victories was that of MALPLAQUET in 1709, which was by far the most bloody and hard fought, and was only gained after prodigies of valor had been performed on both sides. The last resources of France had been brought forth, and 90,000 brave men, intrenched to the teeth, stood to receive the assault of an equal number of the allies, under Marlborough and his noble rival, Prince Eugene. But nothing could withstand the skill of their attacks, and the heroic courage they had inspired into their troops. The whole French works were at length carried, though at a cost of 20,000 men to the victors, and the important fortress of Mons, commanding the high road to Paris, was the reward of the victory.—This was the last of the great victories of Marlborough; for thenceforward he ceased to be a free agent. The Tory party at home, who were jealous of his fame and envious of his power, never ceased their efforts to effect his downfall; and at length, through the agency of Mrs. Masham, a dependant and niece of the duchess of Marlborough, who supplanted her mistress and benefactor in the royal favor, they effected it. Marlborough's proposed measures were all examined by a hostile cabinet, and the requisite supplies refused to him. Still he worked on with patriotic zeal, and in a noble spirit, against all his difficulties. Again, by an unparalleled exertion of military skill he passed the French lines; besieged and took Bethune, Aisne, and other places of strength on the French frontier, and he was making preparations for the siege of Arras, the last stronghold on the road to Paris, when he was, by domestic faction, interrupted in the career of victory, by being deprived of the command of the army, and even threatened with a parliamentary impeachment for alleged and wholly fabricated malversations when in command. The consequences were soon apparent. The allies, deprived of his military arm, and of the aid of the English contingents, were defeated at Denain, and the disgraceful treaty of Utrecht was concluded, which left the crown of Spain in possession of the house of Bourbon, and deprived the nation of the whole fruits of Marlborough's victories. A more deplorable instance of the triumph of faction over patriotism, of envy over generosity, of jealousy over heroism, is not recorded in history.—Before this disgraceful coalition against him took effect, Marlborough had obtained princely rewards from the nation. He was made a duke after the battle of Blenheim, and a sum voted to build the palace of the same name on the demesne of Woodstock, which had been bestowed on him by Queen Anne. After his fall, the usual annual grants from the treasury were stopped by the malignity of the Tory ministry, and the magnificent pile was only finished by £60,000 which had been advanced

from the private fortune of the duke. Marlborough remained in privacy, but firm in his principles, till the accession of the Hanoverian family in 1713, when he was made commander-in-chief; and by his admirable measures, contributed much to the almost bloodless suppression of the rebellion in Scotland in 1715. This was his last public service. He was soon after struck with a stroke of palsy, from which he only recovered to drag on a precarious and enfeebled existence, which was terminated in serenity and hope, on 6th August, 1722, in the seventy-second year of his age.—Napoleon had the very highest opinion of Marlborough, whom he always spoke of as one of the first captains of any age or country. His career was indeed astonishing, and may well have excited the admiration of his immortal successor. He never besieged a town he did not take, and he never fought a battle he did not gain. Never superior, generally inferior to his opponents; at the head of a multifarious army of six nations, he communicated a united spirit to the whole mass, and rendered them invincible. Had he not been thwarted at home he would have taken Paris, and terminated, in his next campaign, the rivalry of four centuries. Humane, beneficent, and generous; in private life he dignified his warlike virtues by the graces and charities of peace. Factions assailed him violently during his life, as it in general does all who rise to extraordinary power and influence; but history has revised its verdict, and pronounced him, but for the desertion of James II., as perfect a character as the frailty of humanity will permit.

MARLIANI, B., an Italian antiquarian, b. 1650.

MARLORAT, AUGUSTINE, a French protestant divine, executed by order of Montmorency, 1506–62.

MARLOT, D. W., a French *savant*, 1596–1667.

MARLOWE, CHRISTOPHER, was by far the most distinguished, and may indeed be said to have been the only man of great and original genius, among the English dramatists who immediately preceded Shakspeare. As to the events of his short life, we know hardly any thing beyond the fact that it was as irregular and unhappy as that of most play-writers of his time. The date of his birth is not certain; but he was perhaps about thirty years old in 1596, when he was killed at Deptford in a discreditable brawl. Several of the plays which pass under his name were probably not his. But we are at least safe in attributing to him three of the most striking dramas in our language; the energetic and harrowing 'Jew of Malta;' 'Edward II.,' a worthy precursor of Shakspeare's dramatic histories; and the magnificently imaginative and finely thoughtful

tragedy of 'Faustus.' Marlowe's versified translations, or rather paraphrases, from Ovid, Lucan, and the pseudo-Musæus, are likewise very beautiful, both in imagery, in diction, and for their rhythmical sweetness. [W.S.]

MARMION, S., an Eng. dramatist, died 1639.

MARMONT, AUGUSTUS FREDERICK LOUIS VIEPE DE, duc de Ragusa, the last survivor of Napoleon's marshals, was born of noble parents 1774, and commenced his military services in the army of the monarchy. He attracted the attention of Napoleon by his excellence as an artillery officer, and greatly distinguished himself at the battle of Marengo. He fought in all the campaigns from 1805 to 1807, and was created marshal of France after the battle of Wagram. He shared the fate of all Napoleon's generals opposed to Wellington in Spain, his crowning defeat being at Salamanca. He surrendered Paris to the allies in 1814, and afterwards became a steady adherent of the Bourbons. After the revolution of 1830 he was struck from the list of the army. Died at Venice 1852.

MARMONTEL, JEAN, was born of poor parents, at Bort, in the Limousin, in 1723. Educated chiefly in Jesuit schools, and at first intending to enter the order, he was able, when no more than eighteen years old, to teach philosophy at Toulouse, with such success as enabled him to contribute to the support of his father and mother. In 1745, having come into correspondence with Voltaire, and abandoned the idea of being a priest, he sought his fortune in Paris. He distinguished himself by poems and plays, which are long since forgotten; and he enjoyed reputation also as a critic, contributing to the 'Encyclopédie' many articles, which he collected under the title of 'Elements of Literature.' His best works, however, were those easy and graceful sketches of life and manners, which he was pleased to called 'Moral Tales.' The morality of the most serious of these is equivocal; that of others is positively bad. His longer novels, 'Bélisaire' and 'Les Incas,' are, in a literary point of view, much inferior to his short stories. Several appointments which he successively received, made his circumstances easy till the outbreak of the Revolution. He died in the neighborhood of Evreux on the last day of 1799. [W.S.]

MARNE, J. B. DE, a Fr. historian, 1699-1755.

MARNE, LOUIS ANTHONY DE, a French architect, author of 'Histoire Sacrée,' 1673-1755.

MARNIX, PHILIP DE, baron of Saint Aldegonde, a famous Calvinist and enemy of the inquisition, the defender of Antwerp in 1584 against Alexander Farnese, author of 'Controversial Theses,' a translation of the Psalms into Dutch verse, 'The Beehive of the Romish Church,' &c. 1538-1598.

MAROLI, D., an Italian painter, 1612-1676.

MAROLLES, M. DE, a Fr. translator, 1600-81.

MAROT, FRANCIS, a French painter, 1667-1719.

MAROT, JEAN, secretary and poet of Anne of Brittany, flourished 1463-1523. CLEMENT, his son, valet of Francis I., distinguished for his graceful poetry, 1495-1544.

MAROT, JEAN, a French architect and professional writer, 1630-1695. His son, DANIEL, a refugee in England, and architect to the prince of Orange, born 1660.

MAROUTH, a Syrian prelate and writer, 4th century.

MAROZIA, a patrician lady of Rome, whose beauty and intriguing disposition, aided by her great wealth, gave her immense influence about the close of the 9th century. She was married successively

to Alberic, marquis of Camerino, who was killed 925; to Guy, or Guido, duke of Tuscany, who died 929; and to Hugh of Provence, whom she and her last husband had made king of Italy, in 932. She placed four popes on the throne:—Sergius III., one of her lovers, by whom she had a son, in 904; Anastasius III. in 911; Lando in 913; and her son, John XI., then in his twenty-first year, in 931. Marozia had a sister, Theodora, and a mother of the same name, one of whom was mistress of the pope John X. Both these ladies were partakers in her licentiousness and influence, as they were in her beauty and address. She was virtual sovereign of Italy, and may be considered pope or queen as the reader pleases. (See JOAN, POPE.) About 928-9, her soldiers entered the palace of the Lateran, slew the brother of John X., and took the pope prisoner, who died soon afterwards. After her third marriage, her husband struck one of her sons, who stormed the king's guard with a party of young Romans, drove the offender from the city, and finally imprisoned his mother in a monastery, or perhaps in the castle of St. Angelo, where she ended her days. [E.R.]

MARPURG, F. W., a Ger. musician, 1718-95.

MARQUET, F. M., a Fr. botanist, 1687-1759.

MARQUETTE, J., a Fr. missionary, died 1675.

MARQUEZ, S., a Spanish painter, died 1720.

MARQUIS, A. L., a Fr. botanist, 1777-1828.

MARRACCI, HIPPOLYTE, a learned Italian bibliographer, author of 'Bibliotheca Mariana,' 1604-1675. His brother, LUIGI a famous Arabian scholar and editor, 1612-1700.

MARRAST, ARMAND, a famous French journalist and popular agitator, formerly editor of the 'National,' and an active supporter of the popular cause in the revolution of February, 1848, when he was made mayor of Paris, and a member of the provisional government. The French Constitution of 1848 is attributed to him. Died 1852, in the prime of life.

MARRE, J. DE, a Dut. dramatist, 1696-1763.

MARRIER, M., a French ecclesiastic, 1572-1644.

MARRON, P. H., president of the reformed church of Paris, and a partisan of the Girondins, born at Leyden of French refugees, 1754, died 1832.

MARRYAT, FREDERICK, the son of a West India merchant, was born in 1792, and died in 1848. Entering the navy in his fourteenth year, he served with distinction during the war, and afterwards in the Burmese campaign; and he became a benefactor to the naval profession by the invention of his well-known Code of Signals. He rose to be a post-captain and C.B. In the latter half of his life he was active as an author and as a magazine editor. His 'Diary in America' was the occasion of much acrimonious discussion. Of his many naval stories, whose dashing liveliness and coarse vigor made them so popular, the earliest was 'Frank Mildmay;' and among the rest it is enough to name 'Peter Simple' and 'Mr. Midshipman Easy.' [W.S.]

MARRYAT, JOSEPH, son of Dr. Thomas Marryat, a merchant and M. P., known as a speaker on West Indian affairs, and on insurance, banking, and similar topics, 1757-1824.

MARS, A. J., a French juriconsult, 1777-1824.

MARS, MDLLE., a Fr. comedian, 1779-1847.

MARSAIS, CÆSAR CHESNEAU, DU. See DUMARSAIS.

MARSAND, A., a Venetian *savant*, 1765-1842.

MARSAY, a French mystic writer, author of a work entitled 'Le Temoignage d'un Enfant de la Vérité,' publ. anonymously in 9 vols. 12mo, 18th c.

MARSDEN, WILLIAM, an eminent Orient. scholar,

son of a merchant of Dublin, born 1754, appointed in 1795 secretary to the admiralty, died 1836. He is author of a grammar and dictionary of the Malay language; of a description of Eastern coins, under the title of 'Numismata Orientalia'; of an essay on the East Insular Languages; a translation of the 'Travels of Marco Polo,' &c. In 1831 he voluntarily relinquished his retiring pension of £1,500 per annum, and, in 1834, presented his Oriental coins to the British Museum, and his books and Oriental MSS. to King's College.

MARSH, CHARLES, of Vermont, a lawyer of distinction. Died 1849, aged 83.

MARSH, EBENEZER GRANT, an Amer. divine and theological writer of Conn. Died 1803.

MARSH, RIGHT REV. HERBERT, D.D., successively bishop of Llandaff and Peterborough, known as the translator of Michaelis, and author of a Systematic Theology, was born 1758. He finished his education in Germany, and while resident there transmitted some valuable information to the British government, for which he was rewarded with a pension; died 1838.

MARSH, JAMES, president of the University of Vermont, was born at Hartford, Conn., 1794. Educated at the theological school of Andover, he was soon after appointed classical professor at Hampden Sydney College, Va. Subsequently made president of the University of Vermont. He won for himself the reputation of an elegant scholar and profound thinker. His introductory essay to Coleridge's 'Aid to Reflection,' shows an intelligent sympathy with the subtle thought of his master, and indicates a deep philosophic insight. Died 1847.

MARSH, NARCISSUS, successively bishop of Leighlin and Ferns, Cashel, Dublin, and Armagh, author of 'Institutiones Logicæ,' 1638-1703.

MARSHAL, A., a Scotch anatomist, 1742-1813.

MARSHAL, W., a nonconformist divine, author of 'The Gospel Mystery of Sanctification,' a work recommended by Hervey; died 1690.

MARSHALL, HUMPHREY, an Amer. botanical writer, au. of 'Arbustum Americanum.' Died 1805.

[Residence of Chief Justice Marshall, Richmond.]

MARSHALL, JOHN, a chief justice of the U. S., was born in Va., 1755. During the revolutionary war he bore a distinguished part, and reaped his share of the laurels won by the victors of Brandywine, Germantown and Monmouth. He, however, never rose to a higher rank than that of captain in the army. His destiny was eminence in civil, not

military life. His first political prominence was in the position of a member of the Virginia Convention for the ratification of the Constitution of the U. S., where he was distinguished for his argumentative power and eloquence. Subsequently he was a prominent member of the legislature of his State. He was one of the three envoys of whom General Pinckney and Mr. Gerry were the other two, sent to the Court of France. Having returned thence in 1798, he was in the succeeding year elected a member of Congress. In 1800, he was a member of the cabinet as secretary of war, and shortly after as secretary of State. On the 31st of January, 1801, Adams nominated him as chief justice of the U. S., to succeed Ellsworth, which nomination having been duly confirmed by the Senate, he entered upon the duties of that high office, and continued to fulfil them with great dignity and ability until his death in 1836. He found time in the midst of official business to engage in literary pursuits, and wrote his well-known life of Washington.

MARSHALL, NATHANIEL, a learned minister of the Church of England, author of an edition of St. Cyprian, &c., last century.

MARSHALL, S., a presbyterian divine, d. 1655.

MARSHALL, THOMAS, a learned divine of the Church of England, known as a Saxon and Oriental scholar, 1621-1685.

MARSHALL, W., an agricult. wr., 1745-1818.

MARSHAM, SIR JOHN, a learned writer on Egyptian history and antiquities, known in the 17th century as a royalist and M.P., 1602-1685.

MARSHMAN, JAS., a baptist missionary, who became a proficient in the Eastern languages, and translated a part of the Scriptures into Chinese. He produced also an English version of the works of Confucius, and a 'Dissertation on the Characters and Sounds of the Chinese Language,' 1799-1837.

MARSTON, JOHN, a dramatic writer and satirist of the age of Elizabeth and James I. The dates are uncertain, but he can be traced to 1633.

MARSY, BALTHASON and GASPARD, brothers, natives of Cambray, both excellent sculptors; the former lived 1624-1674, the latter 1628-1681.

MARSY, C. S. DE, a French author, 1740-1815.

MARSY, F. MA. DE, a Fr. historian, 1714-1763.

MARSYLI, LUIGI FERDINANDO, count of, a learned geographer and naturalist, distinguished in the service of Austria, 1658-1730.

MARTEL, F., a writer on surgery in 1601.

MARTEL, S. A., a Fr. architect, 1569-1641.

MARTELLI, LUDOVICO, and VICENZO, Italian brothers and poets, the former 1499-1527; the latter died 1556.

MARTELLO, P. J., an Ital. dram., 1665-1727.

MARTELLY, R., a French actor, 1751-1817.

MARTENE, E., a learned ecclesiast., 1654-1739.

MARTENS, F., a German traveller, 17th cent.

MARTENS, or MERTENS, THIERRY, surnamed 'the Aldus of the Low Countries,' divides the honor with some others of introducing printing into the Netherlands. He is celebrated for his fine editions of the Greek authors, and was highly esteemed by the learned men of his age; among others, Erasmus, who lodged with him, 1450-1534.

MARTENS, WILLIAM FREDERIC VON, a native of Hamburg, dist. as a diplomat., 1756-1821.

MARTHA, SISTER, a benevolent female of Besançon, whose real name was ANNE BIGET, and whose virtues and humanity place her among the most distinguished women of our epoch, was born in 1748, and was in early life the inmate of a convent. She devoted herself from her youth upwards, to the

relief of the poor and afflicted; and though she was nearly seventy years of age, in the campaign of 1814, she made almost incredible efforts to relieve the wounded. Every mark of honor was shown her by the allied sovereigns, and she had previously been presented with a medal by her country, inscribed 'Homage to Virtue.' She died in 1824.

MARTI, EMMANUEL, a Span. poet, 1663-1737.

MARTIALIS, MARCUS VALERIUS, a well-known Latin epigrammatist, generally called MARTIAL, born about 40, at the present Arragon in Spain. His poems, which consist of some 1,500 pieces, are interesting for their allusions to the persons and manners of the times, but abound with indelicacies. In the Delphin edition of 1680, these were omitted from the body of the work, and published all together at the end. Martial went to Rome when about twenty years of age, and obtained the favor of Domitian. Died 104.

MARTIANAY, J., a Fr. ecclesiastic, 1647-1717.

MARTIANO, P., an Italian physician, 1567-1622.

MARTIGNAC, JEAN BAPTISTE SILVERE ALGAY, Vicomte De, minister of Charles X., author of an essay upon the Spanish revolution and the intervention of 1823, 1776-1832.

MARTIGNAC, STEPHEN ALGAY DE, a French scholar, born at Brives la Gaillarde 1620 or 1628, died 1698, author of 'Memoirs of Gaston,' &c.

MARTILIERE, COUNT DE LA, a dist. French artillery officer, made a peer in 1814, died 1819.

MARTIN, the name of several SAINTS:—1. A bishop of Tours, born in Pannonia, now Hungary, 316, died 397. He is considered the apostle of the Gauls. 2. An archbishop of Braga, in Portugal, an Hungarian by birth, known as an ecclesiastical writer, and a great preacher in Galicia, died 580. 3. MARTIN-DE-VERTON, or MARTINUS VERTAVENSIS, founder and abbot of the monastery of Verton, born of noble parentage at Nantes 527, died 601. 4. The first pope of the name.

MARTIN, the *first* of the name, pope and saint of Rome, whose memory is also honored in the Greek church, reigned 649-655. The *second*, called also Martinus I., in whose time Photius was condemned, 882-884. The *third*, called by some Martinus II., 942-946. The *fourth*, in whose time the Sicilian vespers date, who supported Charles of Sicily against Peter of Arragon, and excommunicated Michael Palæologus, 1281-1285. The *fifth*, who put an end to the schism of the West, presided at the council of Constance, and laid his ban on the partisans of John Huss, 1418-1431.

MARTIN, a king of Sicily, died 1409.

MARTIN, —, a French botanist, born 1729.

MARTIN, AIME, a French scholar and miscellaneous writer, the pupil and friend of Bernard St. Pierre, whose widow he married. Born at Lyons, 1786, died 1847.

MARTIN, ANDREW, a Fr. Cartesian, 1621-95.

MARTIN, BENJAMIN, a famous optician and mathematical writer, who was originally a ploughboy in Surrey, and contriving to educate himself, gave lectures on experimental philosophy, and carried on the business of an optician and globe maker in London, 1704-1782.

MARTIN, BERNARD, a Fr. classic, 1574-1639.

MARTIN, BERNARD, a Fr. chemist, b. 1629.

MARTIN, C., an East India officer, 1732-1800.

MARTIN, PETER, a Fr. admiral, 1752-1820.

MARTIN, R., a Spanish monk, died 1286.

MARTIN, R., a Fr. mathematician, died 1811.

MARTIN, SARAH, distinguished by her philanthropical efforts for the reform of criminals, and the education of the poor, was born in the neighborhood of Yarmouth, 1791, and supported herself by dress-making. She began her career by requesting permission to read the Scriptures to prisoners, and became at last a great moralist and prison reformer. She died in 1843. A small volume of poems, written by her, has since been published.

MARTIN, THOMAS, an antiquarian, born at Thetford, of which place he wrote a history, 1697, died 1771.

MARTIN, THOMAS, a Roman Catholic dignitary, one of the six commissioners appointed to conduct the process against Cranmer, died 1582.

MARTIN, THOMAS IGNATIUS, a French laborer, remarkable for his visions concerning Louis XVIII., to whom he communicated on the subject in 1816. Died suddenly, 1834.

MARTIN, V., an Italian composer, 1754-1810.

MARTIN, W., an Eng. naturalist, 1767-1810.

MARTINEZ, G., a Spanish painter, 16th cent.

MARTINEZ, H., a Mexican mathematician, 17th c.

MARTINEZ, J. L., a Spanish painter, 1612-1682.

MARTINEZ, PASQUALIS, the founder of the theological sect of Martinists, and presumed to be a Portuguese Jew. He commenced his institution in the masonic lodges of France, 1754, and died at St. Domingo, 1779. Saint-Martin, often confounded with him, was his disciple. See SAINT-MARTIN.

MARTINEZ, S., a Spanish painter, 1602-1667.

MARTINEZ, T., a Spanish painter, died 1734.

MARTINI, F. H. W., a Ger. naturalist, 1729-78.

MARTINI, G. H., a Sax. numismatist, 1722-94.

MARTINI, GIUSEPPE SAN, an admirable composer and hautboy player, was born at Milan. He went to England in 1723, and even at the time when the works of Handel, Corelli, and Geminiani were all the fashion, the compositions of Martini gained a remarkable degree of popularity. He was appointed director of the chamber music to Frederick, prince of Wales, in which situation he continued till about the year 1740, when he died.

[J.M.] MARTINI, J. P. E., a Rhen. music., 1741-1816.

MARTINI, M., a Ger. theologian, 1572-1630.

MARTINI, M., a Chinese missionary, 1614-61.

MARTINI, PADRE GIAMBATTISTA, an erudite

musician and composer, was born at Bologna in 1706. He was much celebrated as a teacher during his life. His chief compositions were for the service of the church. His fame, however, principally rests on his works on the theory and practice of music. He died of dropsy in the chest in 1784. [J.M.]

MARTINI, S., an Italian painter, 1280-1341.

MARTINIERE, ANTHONY AUGUSTIN BRUZEN DE LA, a French writer and compiler, secretary to the king of Naples, and author of a 'Geographical, Historical and Critical Dictionary,' 1662-1746.

MARTOS, IVAN PETROVITCH, a famous Russian sculptor, counsellor of state, and director of the Academy at St. Petersburg, 1755-1835.

MARTYN, HENRY, a celebrated missionary, was born at Truro, in Cornwall, 18th February, 1781. His father, though a miner, was a very superior person,—distinguished by his piety and intelligence. Henry was educated at the grammar school of his native town, and surpassed all his school-fellows in classical acquirements. At the age of fourteen he became a candidate for a scholarship in Corpus Christi College, Oxford, but failed. Having resolved to continue a year longer at school, he afterwards became a student in St. John's College, Cambridge, to which he was led, chiefly to enjoy the society of an intimate and valued friend, whose pious character and conversation produced a complete revolution in the views of Martyn in regard to religion. But his conversion, so far from interfering with his preparations at the university, tended to increase his ardor in literary pursuits, by leading him to regard time as a talent, for the right improvement of which he was accountable. Stimulated to diligence by this high motive, he became an indefatigable student, and his industry was rewarded by the highest academical honors being adjudged to him, for he was declared 'Senior Wrangler,' in January, 1801, before he had completed his twentieth year. He now engaged in superintending the studies of some pupils, while, at the same time, he was assiduously preparing for the election in March, 1802, when he was chosen Fellow of St. John's, and almost immediately after carried off the highest prize for Latin prose composition which the University had to bestow. Unseducd, however, by the splendor of these academical successes, Mr. Martyn's desires strongly ran in a totally different direction, and he resolved on dedicating his life and energies to the service of God in the missionary cause. He opened a communication with the Church Missionary Society. This part of his plan, however, having been abandoned, in consequence of some family losses, which made his sister dependent on him for support, his friends applied, and at length succeeded in obtaining for him a chaplaincy in the East India Company's service. Shortly after his arrival in Calcutta, where he was to wait for his appointment, he was overtaken by fever which nearly terminated his life; but the long interval of leisure afforded him, before he was completely convalescent, was industriously improved in acquiring a knowledge of Hindostanee, and making himself acquainted with the state and feelings of the English residents in India. After a lapse of five months he received his appointment to Dinapore, and his duty there was to read prayers to the soldiery at the barracks—the only service he was allowed to perform—for as there was no accommodation for their sitting, a sermon was dispensed with. But not content with this abridgment of his work, he extended his labors by commencing to preach to the natives in the vernacular language of India,

and to this, at the time, novel service, a great crowd—chiefly of women—repaired. This service he continued, at the same time superintending five schools which he had planted at Dinapore, visiting hospitals, and affording religious instruction to all who came to him. In addition to these public labors, he was privately engaged in revising the sheets of the Hindostanee version of the New Testament which he had executed, superintending the Persian translation which had been committed to the care of Sabot, and prosecuting the study of Arabic, in which language he already meditated another translation. In the spring of 1809, he removed to Cawnpore, where he labored under many disadvantages, being without a church, and having to preach in the open air, exposed to the violence of the heat. Towards the end of that year, he began his ministrations to the heathen. 'A crowd of mendicants, whom, to prevent perpetual interruptions, he had appointed to meet on a stated day for the distribution of alms, frequently assembled before his house in immense numbers, presenting an affecting spectacle of extreme wretchedness. To this congregation he determined to preach the Word of Life. The following Sunday he preached again to the beggars, in number about five hundred, and on the last day of the year he again addressed them to the amount of nearly six hundred. Afterwards Martyn, having become proficient in the knowledge and use of the Persian, resolved to extend his missionary labors to Persia. He accordingly established himself at Shiraz, with the immediate view of revising his Persian and Arabic translations of the New Testament with the aid of some learned natives. In that place he remained ten months, improving the time that was not occupied on his version in religious discussions with the Moolahs and Soofis. In crowded assemblies of those literary Persians, he appeared the single unassisted advocate of the Christian faith, and yet by his zeal, tempered by judgment, he excited great stir and interest in religious inquiries. In that place besides the complete version of his New Testament, he completed, also, a Persian translation of the Psalms, 'a sweet employment,' as he says, 'which caused six weary moons that waxed and waned since its commencement to pass unnoticed.' He had contemplated the presentation of his New Testament translation to the Shah in person, and for this purpose he went to Tabriz, where the king was sojourning in his summer camp. But the British Ambassador being absent, an introduction could not be obtained, and for want of that indispensable formality, admission was denied. At Tabriz he was seized with malignant fever, on the abatement of which, it was judged essential for the preservation of his life, that he should immediately remove beyond the enervating influences of an Eastern climate. By hurried movements he endeavored to reach Constantinople; but at Tocat his sickness assumed an alarming appearance, and in that place, on the 16th October, 1812, this pious, devoted, and learned man fell asleep in Jesus, having earned a reputation which placed him in the foremost ranks of modern missionaries. MARTYN, JOHN, F.R.S., professor of botany at Cambridge, author of a 'History of Rare Plants,' 'The Grub Street Journal,' an edition of 'Virgil's Georgics,' &c., 1699-1768.

MARTYN, THOMAS, F.R.S., son of the preceding, distinguished as a botanical and antiquarian author, 1736-1825.

MARTYR, PETER, one of the early protestant reformers, was born in 1500 at Florence. At first an

Augustine monk, and even priest of a convent, he was so shaken in his religious views by studying the writings of Luther and Zwingli, that he abandoned Romanism, and was obliged for this honest change of opinion to seek personal safety in exile. On the invitation of Edward VI., he came over to England, and occupied a chair of divinity at Oxford. In the reign of Mary he quitted England, and took up his abode in Zurich, where he died in 1562. He has written a number of theological treatises, among which his 'Locī Communes,' and some of his Commentaries, are best known at the present day. As a proof of the bigotry of the age, it may be added, that the remains of his wife, who had died and been buried at Oxford, were dug up in the reign of Mary, and ignominiously thrust beneath a dunghill. MARUCELLI, G. S., an It. painter, 1586-1646.

MARVELL, ANDREW, a statesman and poet, was born at Hull on the 15th of November, 1620. Little is known of his education and early history, and in after life he was more distinguished by his firmness and honest adherence to constitutional principle, than either by his genius as a poet or his eminence as a statesman. He began his parliamentary career in 1660, as representative of his native town. He was deeply imbued with the spirit of the long parliament, and brought its constitutional principles, and wonderful aptness for the transaction of collective business, into the parliaments of the restoration, in a great measure consisting of men of a totally different stamp. He was the first great practical advocate of the important principle that the constituency should know the conduct of its representative, and that although he need not be a delegate merely to do what they require, yet he must be so far responsible that he is to be removed when he ceases to represent their sentiments. He wrote a series of letters to his constituents, describing the proceedings of parliament, and accounting for his own conduct; and the electors on their part adhered to him with zealous steadiness. There is a well-known anecdote of his declining a bribe from the lord treasurer because he had enough for a frugal dinner. Some of his pamphlets on the affairs of the day are valuable for their clearness and correctness; but his poetry is seldom read. The only office ever held by him was that of secretary of an embassy to the northern powers. He died on the 16th of August, 1678.

MARX, JACOB, a Ger. physician, 1745-1789.

[Sawston Hall, Residence of Queen Mary during the reign of Lady Jane Grey.]

MARY, queen regnant of England, daughter of Henry VIII. and Catherine of Arragon, was born at

the commencement of 1516, and succeeded her brother, Edward VI., in 1553. Her adherence to the Church of Rome gave occasion to the proclamation of her cousin, Lady Jane Grey, who was shortly afterwards beheaded, and the party who had elevated her to the throne completely subdued. In 1554, Mary was married to Philip of Spain. Devoting herself to the restoration of the Roman Catholic religion, nearly 300 persons suffered at the stake as heretics in the short space of three or four years. Happily for the nation, she died soon after the loss of Calais, November 17, 1558, and was succeeded by her half-sister, Elizabeth.

[Costume of Queen Mary, from prints of the time.]

MARY, companion of William III. on the throne of England, was the eldest daughter of James II. by Ann Hyde, daughter of the lord chancellor Clarendon. She was born 1662, married to William, prince of Orange, in 1677, and came to the throne in the interest of the protestant religion after the Revolution of 1688. She died in the thirty-third year of her age, 1694.

MARY BEATRIX OF ESTE, queen consort of James II., was married to him in 1673. She gave birth to a son in 1688, who was acknowledged as James III., by Louis XIV. Died 1708.

MARY OF LORRAINE, queen consort of Scotland, and mother of Mary Stuart, was the daughter of Claude, duke of Guise. She was married to Louis II. of Orleans in 1534, and to James V., king of Scotland, in 1538. In 1542 she was left a widow, and became regent for her infant daughter. Died 1560.

MARY, queen of Scotland, was born in the year 1542. The day of her birth, like the more important events of her history, has been matter of controversy, but it takes no wider range than between the 8th and the 12th of December. Her father, James V., who died on the 13th, just heard of her birth ere he expired. The time was a gloomy and critical one for royalty in Scotland, but the frail infant survived contests and convulsions, in which one strong enough to take part in them might have been sacrificed. While she was yet in infancy, it was part of the policy of Henry VIII. to unite the kingdoms by marrying her to his son Edward. He set about the accomplishment of this scheme with a characteristic rash haste, which roused the spirits of the Scots against it. The young queen's mother, Mary of Lorraine, strengthened that alliance with the French court which political events had created in Scotland, and the Scottish statesmen settled the difficulty with England by sending the child to France in her

sixth year. Her education was essentially that of the French court, and it affords a general solution of some of the moral difficulties connected with her career, to collect from the sad history of the times the principles which she must have then imbibed. She was early affianced to the Dauphin, and as he became King Francis II. in 1559, she then was queen of France and Scotland. On the ground of Elizabeth's illegitimacy, the Romish party claimed for Mary the sovereignty of England as a descendant of the sister of Henry VIII., and the union of the French and Scottish crowns in her person, made the claim formidable. The death of Francis, however, after reigning for a few months, broke the main element of strength in her pretensions. She was now only Queen of Scotland, a country poor and turbulent. Leaving with bitter regret the brilliant court of France in 1562, she was received with a rude joy scarcely calculated to reconcile her to the change in the sordid and dreary chambers of Holyrood. Nor even were important national affairs in a condition to gratify her, for in the previous year protestantism having been established, her religion had been suppressed, and its profession rendered a crime. She had many contests with Knox and 'the lords of the congregation,' in which earnestness, zeal, and rugged determination on the one side, were met by feminine wit and the overawing influence of royal rank on the other. It was on the 29th of July, 1565, that she celebrated her unhappy marriage with her worthless connection, Henry, Lord Darnley. The next great event in her strange career, was the murder in her presence of her humble friend David Rizzio, the musician, her husband leading on the assassins. It was on the 10th of February, 1567, that Darnley himself was murdered, and the house in which he lived blown up after the deed was accomplished. Many volumes have been written, and many are evidently in preparation on the question of Mary's accession to the deed, and it would be useless to attempt its discussion within such limits as the present.

[Tomb of Mary in Westminster Abbey.]

On the 15th of May, in the same year, occurred Mary's marriage to Bothwell the chief assassin, a fact, round which the main circumstances adduced by her opponents cluster. On the 17th of June, she was forced to a retirement, which was virtually an imprisonment, in Lochleven Castle. She escaped on 2d May, 1568, and defeated on the field of Langside, sought refuge in England. She was received as a prisoner by the jealous queen to whose throne

she had asserted pretensions, and lived nineteen years a captive. If Elizabeth is to be vindicated for this harshness by the recurrence of efforts to assert Mary's right to the English throne, yet it is ascertained that the English queen threw out inducements, which tending towards secret assassination, admit of no vindication. After a trial under the treason law of England, she was beheaded at Fotheringhay Castle on the 8th of February, 1587. [J.H.B.]

MASACCIO, the name by which TOMMASO GUIDI is commonly known, Masaccio being a nickname, the short for Tommassaccio, slovenly Thomas, was born at San Giovanni in the Valdarno, in 1402. His earliest performances were in the Brancacci chapel, in the church del Carmine, at Florence, where he assisted his master Masolino da Panicale at a very early age, and after Masolino's death, continued the series left incomplete by him. The frescoes of Masaccio in this chapel, which contains also his most celebrated works, were executed apparently at two distinct periods, before 1430 and after 1434, when the Medici returned to Florence, and during this interval Masaccio may have visited Rome. He was admitted into the company of St. Luke in 1423, and the earlier or more conventional works may have been executed about 1425, comprising—'The Expulsion from Paradise,' 'The Tribute Money,' and perhaps 'Peter Baptizing;' the others probably ten years later, supposing they were not all completed before 1430, which is quite possible. These works show the state of painting as compared with that of sculpture, exemplified in the gates by Lorenzo Ghiberti, executed at the same time, 1425 being the mean date of the two gates. Masaccio was not behind Ghiberti, but may have owed much to his example, as also to the example of Donatello and Brunelleschi, with the last of whom he studied perspective. The association of so many men of remarkable ability is perhaps the chief cause of the great advance evident in all the arts in the early part of the 15th century; their intercourse developed criticism, the soul of art. Vasari gives us a good example: when Donatello exhibited his Crucifixion (now in the church of Santa Croce), Brunelleschi remarked that he had attempted the impersonation of the Son of God, while he had made only a vulgar peasant. The works of the Brancacci chapel mark the era of the second epoch of Italian painting, and as the whole, or at least the greater portion, of these frescoes were till lately assumed to be the work of Masaccio, his reputation was second only to that of Raphael for developing the progress of art; but modern criticism appears to have rectified a common misunderstanding of the text of Vasari, certainly through Vasari's want of precision.—The chapel was commenced by Masolino da Panicale, continued by Masaccio, and completed by Filippino Lippi, the son of Masaccio's pupil, Fra Filippo Lippi; and it appears that Vasari's original account in the first edition of his *Lives* was correct, (the statement was left out in the second,) that besides other portions—'Paul Visiting Peter in Prison,' and 'Peter and Paul before the Proconsul,' the two most lauded compositions of the whole chapel, were the work of Filippino, and executed about forty years after the death of Masaccio. The chief argument is founded on the fact of there being several portraits of men in these frescoes which can only have been executed at the later period; still, the authenticity of these very portraits seems to rest solely upon the fact of their being published as such by Vasari, and until their authenticity is thoroughly established, the subject is not indisputably settled. It is a very diffi-

cult and interesting question, very important if true, and we owe its revival to a German and a Dane, Rumohr and Gaye; but the editors of the new Florentine Vasari (1848) have taken up the argument on the same side with great intelligence: still the main point to be decided is the authenticity of the portraits. The Brancacci chapel now contains fifteen distinct subjects, eight of which only are attributed by Gaye to Masaccio. The completion of the chapel by Filippino raises another question, the date of Masaccio's death. Vasari and Baldinucci state that he died in 1443, not without suspicion of poison; at the same time it was currently reported, and it is repeated by Vasari and others, that Masaccio died in his 26th year. This, as we know for certain that he was born 1402, would place his death in 1428, before the death of Masolino, whom he succeeded, and it interferes with other statements, though it is well reconcilable with the incomplete state of the frescoes of the chapel at his death, which is generally admitted to have been sudden and early: supposing he died in 1443, as Vasari and Baldinucci state, the incompleteness of the chapel is not so well accounted for. Rumohr gives an extract from the cathedral accounts of Florence, which seems to show that Masaccio was living in 1446. The works of Masaccio are of a high order as regards general technical qualities, well drawn, of a fine general character, and dramatic in composition; and his figures are conspicuous for a simple and grand treatment of drapery, similar in character to those of the now familiar cartoons of Raphael. The differences between these celebrated cartoons and the fresco of Peter and Paul before the Proconsul, by Filippino, is not so much in style, as the great name of Raphael and the intervening forty years would lead one to suppose; but this chapel was notoriously the principal school of Raphael, and nearly every other great painter at the commencement of the sixteenth century. But of course such glory as accrues to Filippino from his restored position is detracted from the reputation of Masaccio. The celebrated figure of Paul in the cartoon of Paul Preaching, is taken from the figure of Paul in the fresco Visiting Peter in Prison, in this chapel, by Filippino, as is now generally assumed; Rosini, however, in his *History of Italian Painting* adheres to the old traditions.—Vasari, *Vite*, &c., ed Flor. 1846, Seqq; Rumohr, *Italienische Forschungen*; Gaye, *Carteggio Inediti d' Artisti*; Rosini, *Storia della Pittura Italiana*, Pisa, 1848. MASANIELLO, the commonly received name of TOMASO ANIELLO, a fisherman of Naples, who headed the populace in their revolt against the Spanish viceroy, 1647, when only twenty-five years of age. His career lasted but nine days, in which time he had 150,000 men under his orders, and was elevated to sovereign authority. He was murdered by four assassins, armed with arquebuses, and as the resistance he commenced never ceased till the Spanish yoke was broken, he has since been venerated as the liberator of his country.

MASHAM, LADY DAMARIS, daughter of Dr. Ralph Cudworth, and wife of Sir Francis Masham, father-in-law of the preceding, remarkable for her skill in arithmetic, geography, chronology, history, philosophy, and divinity, author of moral and religious discourses, 1658–1708.

MASINISSA, an African prince, died B.C. 149.

MASIUS, or MAES, A., a Belgian Orientalist, and theological writer, 1527–1573.

MASKELYNE, NEVIL, LL.D., born in London, 1732; died February, 1811, aged seventy-nine: a very eminent British astronomer and mathematician: he filled the important office of Astronomer Royal with the highest credit for forty-six years. To Maskelyne are owing many important improvements in practical astronomy—especially in its application to Navigation: his exertions brought into general use the method of lunar distances. Maskelyne was unfortunately obstructed by cloudy weather, in his attempt to observe the transit of Venus over the sun's disc, on 6th June, 1761, for which purpose he had gone to St. Helena. We owe him, however, the planning and successful carrying out of the effort to determine the mean density of the Earth, by the observed deflection of the plummet at the mountain mass Schellion. There have been very few British practical astronomers who are entitled to rank with Maskelyne. [J.P.N.]

MASON, JOHN, a nonconformist minister, born at Dunmow, in Essex, 1706, died 1763, known as a moralist, and miscellaneous writer by his works, entitled 'Self Knowledge,' which has been frequently republished, 'Practical Discourses,' 'Christian Morals,' 'Essay on Elocution,' 'Essay on the Power of Numbers, and the Principles of Harmony in Poetical Compositions,' 'Essay on the Power and Har-

mony of Prosaic Numbers,' &c. A Life of the author, by his relative, John Mason Good, was prefixed to an edition of the 'Self-Knowledge,' published in 1811.

MASON, SIR JOHN, a famous statesman in the reigns of Henry VIII., Edward VI., Mary, and Elizabeth, died 1566.

MASSON, WILLIAM, was born in 1725, and educated at Cambridge. Entering the church, his father's profession, he held several preferments, and was a canon of York long before his death, which occurred in 1797. He is now remembered chiefly for having been the editor and biographer of the poet Gray. In his life-time, however, he was not only esteemed for his accomplishments, especially in music and painting, but likewise famous in no small degree as a poet. His 'English Garden,' amidst much dulness, contains some pleasing bits of scenery; and he showed great courage, not unsupported by power of language and passion, in the attempt he made to naturalize the Greek chorus in the modern drama. His first play, 'Elfrida,' is inferior to his second, 'Caractacus,' on which his contemporary fame mainly rested. [W.S.]

[Massena.]

MASSENA. ANDRE MASSENA was born of humble parentage at Nice in 1758. He entered the French army as a common soldier, and rose to be duke of Rivoli, prince of Esslingen, and marshal of France. He highly distinguished himself in the early Italian campaigns of Napoleon; and in 1799 he was commander-in-chief in Switzerland. He saved France by the victory of Zurich, which he gained over the Austrians and Russians in the autumn of that year. In 1800 he defended Genoa with remarkable obstinacy and skill against the Austrians, but was ultimately starved into capitulation. In 1805 Massena commanded in Italy, and defeated the archduke Charles at Caldiero. In 1809 he signal-

ized himself greatly at the battle of Esslingen (or Aspern) in Germany, and by his firmness saved the French imperial army from utter destruction. In 1810 Napoleon sent Massena with a powerful force to conquer Portugal, and 'to drive the English and their Sepoy general into the sea.' But the genius and firmness of Wellington proved too much for the 'Spoiled child of Victory,' as Massena was called in the French armies. The lines of Torres Vedras were a barrier that the French marshal dared not assail, and he retired from Portugal in 1811, showing consummate military skill in the conduct of his retreat, and equal barbarity in his treatment of the unhappy country which was the scene of the war. Massena was in command at Toulon at the time of Napoleon's first abdication in 1814. He promptly acknowledged Louis XVIII.; but joined Napoleon in the next year on the return from Elba. He commanded the national guard of Paris during the hundred days. Marshal Massena died in 1817.

MASSIEU, J. B., a French prelate, 1743-1818.

MASSIEU, W., a Fr. archæologist, 1665-1722.

MASSILLON, JEAN BAPTISTE, the most celebrated pulpit orator of France, was the son of a notary public, and born in 1663, at Hières, in Provence. When only nineteen, he entered into the congregation of the Oratory, and immediately attracted notice by the elegance of his manner and the general style of his elocution. The first public displays of his eloquence were made at Vienna, where he performed the duties of Theological Tutor, and the grand occasion on which his powers of oratory were strongly enlisted, was on the death of Henri de Villars, archbishop of that place. The magnificence of his funeral oration called forth universal admiration, and his fame being widely extended, he was invited to one of the principal churches in Paris. Although several preachers of eminence were already stationed in that capital, Massillon determined to reach the summit of fame by striking into a new path by himself, and he accomplished his design; for his pulpit addresses were in so novel a style, and so irresistibly attractive, so plain and level to every understanding, yet so replete with pathos, and so distinguished for profound and accurate knowledge of human nature, his language was so copious, and his mastery over the passions so consummate, that he was acknowledged, with universal consent, to surpass all his contemporaries. Having frequent opportunities of preaching before the Court, he on one occasion had the finest compliment paid him that a preacher ever received. 'Father,' said the Monarch, 'when I hear other preachers, I go away much pleased with them, but when I hear you, I go away much displeased with myself.' One sermon, described by Voltaire in the Encyclopédie, produced an extraordinary impression. The subject was 'The small number of the elect,' and so overpowering was the picture he drew of the scenes of the last judgment, 'that the hearers involuntarily started from their seats, and such a general murmur of surprise and acclamation arose as disconcerted the preacher himself.' But the effect was in consequence greatly increased, and the excitement of the audience was carried to the highest pitch of intensity. The celebrated actor, Barron, having gone to hear him, shortly after his settlement in Paris, waited on him in the vestry, and told him to continue as he had begun; and, at another time, said to a brother actor, who accompanied him, 'my friend, that is the true orator, we are mere players.' Massillon was raised to the see of Clermont, in 1717—a promotion for which he was indebted to the Regent, who, after attending a course of sermons, was

impressed with the highest ideas of the preacher's merits. The publication of his famous sermons, entitled, 'Petit-carême,' two years after, procured him an honor of a different kind, the highest literary honor that is known in France, that of being elected a member of the Academy. Massillon now resided wholly and in complete retirement, devoting himself to the duties of his diocese, and being held in high and universal estimation, not only for the splendor of his eloquence and the greatness of his talents, but for his moral and religious worth; he was a lively companion, a faithful friend, a kind and condescending master, and full of benevolence and charity to the poor. His death took place at Clermont, in Sept., 1742, when he had nearly completed his seventy-fifth year. His published discourses occupy 14 volumes. [R.J.]

MASSINGER, PHILIP, was born in 1584, at Salisbury, or perhaps at Wilton, the seat of the earl of Pembroke, in whose household his father held some office. He was sent to Oxford in his eighteenth year, probably with a view to his entering the church. He left the university without taking a degree, and, for reasons which are not known, was thrown on the world penniless and unpatronized; his best editor, Gifford, infers from passages in his works that he had become a Catholic. In 1606 he went to London; and he was always afterwards a play-writer, conferring on our language some of its dramatic masterpieces, but bearing even more than his share in the poverty which was suffered by almost all the dramatists of that brilliant and singular era. The particulars of his history are very obscure. We know, however, that he wrote jointly with others, especially Fletcher, Middleton, and Rowley. A melancholy letter, written about 1613 to Henslowe the theatrical manager, shows him to have been then in great pecuniary distress; he himself, in a dedication, dated 1632, thankfully acknowledges that the bounty of one or two men of rank had kept him alive; and the obscurity of his sad career, at its close, is proved by the register of St. Saviour's in Southwark, which, in 1640, notes the burial of 'Philip Massinger, a stranger.' The famous collection of manuscript plays, which the cook of the herald Warburton used for covering pies, contained twelve attributed to Massinger. Gifford names thirty-seven plays as being his in whole or in part, and prints eighteen of these. Some critics insist on placing Massinger next after Shakspeare; and it is at least indisputable that he is one of the very best of the Old English dramatists. He wants comic humor, but has prodigious vigor, more, indeed, than almost any of his contemporaries, in the conception and delineation of character; his representations of society abound in traits of keen observation, and boldly independent thinking; his situations and incidents are devised with great originality and force; and his serious passages, though often wanting in natural pathos, have a lofty melancholy both of imagery and feeling, and a peculiar grace and melody of expression. He is known to play-goers by 'A New Way to Pay Old Debts'; his 'Maid of Honor' also has been restored to the stage; and Rowe's 'Fair Penitent' is a plagiarism from his 'Fatal Dowry.' Among his other works may be named especially the gloomy tragedy of 'The Unnatural Combat,' and 'The City Madam,' an extraordinarily spirited picture of actual life, idealized into a semi-comic strain of poetry. MASUCCIO, a famous architect and sculptor of Naples, flourished 1230-1305.

MATANI, A., an Italian mathematician, 1730-79.

MATHER, RICHARD, a native of Lancashire, who took orders at Oxford, but was suspended for non-conformity in 1633, and afterwards settled in New England. Died there 1669. SAMUEL, his eldest son, born in Lancashire 1626, accompanied his father to America 1635, but returning to England in 1650, was actively employed as a minister in various parts of the three kingdoms, and died 1671. INCREASE, youngest son of Richard, born in New England, 1635, took his degree of B.A. at Harvard college, 1656, and joined his brother in Ireland, 1657. He was afterwards known as a deputy to the English government in the cause of colonial freedom, and takes rank in literature as a religious essayist and historian, died 1723. COTTON MATHER, D.D., son of the preceding, and the most eminent of the family, was born at Boston, 1663, died 1728. His works are very numerous, but the principal of them are 'An Ecclesiastical History of New England,' 'The Christian Philosopher,' 'Psalterium Americanum,' and 'The Wonders of the Invisible World,' which is an account of the trials of witches, with observations on the operation of spirits in association with men.

MATHIAS. See MATTHIAS.

MATHIAS, an emperor of Germany, 1557-1619.

MATHIAS, C., a German *savant*, 1584-1655.

MATHIAS-CORVINUS, one of the greatest kings of Hungary, was son of John Hunniades, born in Transylvania 1443, succeeded Ladislaus V. 1458, crowned in 1464, after he had advanced nearly to the walls of Vienna, and compelled the emperor to recognize him, became king of Bohemia 1469, conquered Austria 1485, died 1490.

MATHIAS, THOMAS JAMES, a writer in the department of polite literature and criticism, who became a fellow of Trinity College, Cambridge, in 1776, and died at Naples 1835. Besides 'The Pur-

suits of Literature,' and other publications in English, he is the author of several works in Italian, which he wrote with great facility.

MATHILDA, MATHILDE. See MATILDA.

MATHON-DE-LA-COUR, JAMES, a French mathematician and experimental philosopher, 1712-1790. His son, CHARLES JOSEPH, a scholar and miscellaneous writer, b. 1738, exec. at Lyons 1794.

MATIGNON, JAMES GOYON DE, a marshal of France, distinguished at the battles of Jarnac, Rochefort, and Montcontour. He was one of the first to recognize Henry of Navarre after the death of Henry III., and officiated as constable at his coronation, 1525-1597.

MATILDA. The queens and princesses of this name are—1. SAINT MATILDA, wife of Henry the Fowler, and queen of Germany, died 968. 2. MATILDA, countess of Tuscany, born 1046, succeeded her father, Boniface III., 1054, married successively Godfrey Le Bossa, son of the duke of Lorraine, and Guelph, son of the duke of Bavaria, died 1115. This princess is remarkable in history for her devotion to the papacy, which she endowed with vast possessions, and thereby laid the foundation of long-continued wars between the popes and the emperors. 3. MATILDA, wife of William the Conqueror, daughter of Baldwin V., count of Flanders, and of Adela, princess of France, married to the duke of Normandy 1054, crowned queen of England 1068, died 1083. She had eleven children, the best known of whom are—Robert, William Rufus, and Henry Beaufort. 4. SAINT MATILDA, daughter of Malcolm king of Scotland, and queen consort of Henry I. of England, to whom she was married in 1100, died 1118. 5. MATILDA, or MAUD, daughter of the latter, born 1100, was married to Henry V., emperor of Germany, 1111, Henry dying in 1125, she was united two years afterwards to Geoffrey Plantagenet, earl of Anjou, and in 1135 succeeded to the throne of England by the death of her father. She was crowned, after vanquishing her rival Stephen, 1141, but afterwards suffered a reverse, and took refuge in France, where she died 1167. After the death of Stephen, her son by Geoffrey Plantagenet, succeeded as Henry II. 6. MATILDA, countess of Angoulême and la Marche, flourished 1179-1233. 7. MATILDA CAROLINE, daughter of Frederick Louis, prince of Wales, granddaughter of the princess Sophia of Zell, and sister of George III., born 1751, married to Christian VII., and became queen of Denmark in the year of his succession 1766, divorced upon a charge of adultery with Count Struensee, 1772, died, after much suffering, in the twenty-fourth year of her age, 1775.

MATSKO, J. M., a Hungarian astron., 1721-96.

MATSYS, or MESSIS, QUINTIN, a Flemish painter, known as 'the blacksmith of Antwerp,' having been originally a blacksmith or farrier, was born in 1460. He is the subject of an interesting love story which relates that he fell in love with the daughter of an artist, whose hand was only to be obtained by a master of the same profession; died 1529. He had a son, named JOHN, who painted in the same style.

MATTATHIAS. See MACCABÆUS.

MATTEI, L., an Italian poet, 1622-1705.

MATTEIS, P. DE, a pain. of Naples, 1662-1728.

MATTHÆUS, A., a Dutch jurist., 1635-1710.

MATTHESON, J., a Dutch music., 1681-1764.

MATTHEW, the writer of the gospel so called, was a publican or collector of the taxes imposed by the Romans, who became one of the twelve apos-

ties. He wrote his gospel from 30 to 40 years after Christ, some writers say in the Hebrew or Syriac. The probability is, that one was written in Hebrew, A.D. 37 or 38, and another in Greek for the Gentiles 61. Tradition states that he died in Ethiopia. He is sometimes called Levi.

MATTHEW, the first of the name, duke of Lorraine, and a companion-in-arms of Frederick Barbarossa, reigned 1139-1176. The second, dates 1220-1251.

MATTHEW, TOBIAS, successively bishop of Durham, and archbishop of York, distinguished for his learning and virtues, was born in Bristol 1546, died 1628. His son, of the same name, was a courtier, accomplished as an artist and man of letters, and acted the part of a Jesuit spy, 1578-1655.

MATTHEW OF WESTMINSTER, one of the most venerable, and most scrupulously accurate fathers of English history, was a Benedictine monk of the Abbey of Westminster, and lived at an uncertain period in the 14th century. His history modelled on the style of Matthew Paris, extended to 1307, and was continued seventy years later by another hand.

MATTHEWS, CHARLES, an English comedian, with powers of mimicry never excelled, was born in 1776. His talents were various, and he had the rare capacity of creating characters out of slender materials given by the writers of his entertainments, which he denominated 'Matthews at Home.' To these monologues the comedian resorted, in the first instance, to occupy the intervals that occurred between his stage-engagements; but they proved so successful as to command ultimately his undivided attention. He died in 1837. [J.A.H.]

MATTHEWS, T., an English admiral, died 1751.

MATTHIAS, supposed to have been one of the seventy disciples, and the one chosen by lot to fill the place of Judas as an apostle, is said to have preached in Cappadocia, and to have died there. His history is uncertain.

MATTHIAS, the name of several high priests of the Jews, commencement of the Christian era.

MATTHIEU, P., a French historian, 1563-1621.

MATTIOLI, P. A., an Ital. naturalist, 1500-77.

MATTOCKS, ISABELLA, an actress, 1746-1826.

MATURIN, CHARLES ROBERT, descended from a French family, who fled their country on the revocation of the edict of Nantes, was born in Dublin, 1782. He was educated for the church, in which he became a curate, and wrote some discourses directed against the errors of Rome. He acquired somewhat more celebrity, however, as a novelist and writer for the stage, and is said to have been an eloquent preacher, died 1825.

MATURIN, HENRY, an Irish clergyman, author of 'Bertram,' and other tragedies and novels, 1772-1842.

MATURINO, an Italian painter, died 1527.

MAUPEOU, RENE CHARLES DE, born in Paris 1688, became vice-chancellor in 1763, died 1775.

MAUPEOU, RENE NICHOLAS CHARLES AUGUSTIN DE, son of the preceding, was born 1714, and became chancellor of France 1768. His character was that of a low and corrupt intriguer, and he preserved his influence with Louis XV., by paying the most servile court to the king's mistress, Dubarry. In 1771 he banished the parliament of Paris, and substituted a royal council for it, called in derision 'the Maupeou parliament.' He was exiled to his own estates on the recall of the parliament by Louis XVI., 1774, and died peaceably in 1792. His last act was a gift of 800,000 francs to the nation.

MAUPERCHE, H., a French painter, 1606-86.

MAUPERTIUS, P. L., MOREAU DE, one of the most celebrated mathematicians and astronomers of France, 1698-1759.

MAUR, Sr., a French Benedictine of the 6th century, whose name was adopted by a congregation of religious persons in the period between 1618 and 1627. This order soon acquired authority over more than a hundred religious houses, and is famous for the number of learned men it has produced.

MAUREPAS, JEAN FREDERIC PHILIPPEAUX, Count de, a French statesman, born 1701, flourished at the court of Louis XIV., from 1715 to 1749, when he was banished by the intrigues of Madame de Pompadour. He was recalled to the ministry by Louis XVI., in 1774, and it was by his advice that the French government aided the Americans in their war of independence; died 1781.

MAURICE, elector of Saxony, celebrated as the founder of German protestanism, born 1521; killed in battle, 1553.

MAURICE, A., a Swiss minister, 17th century.

MAURICE, F. W., a Swiss agricul., 1750-1826.

MAURICE OF NASSAU, prince of Orange, one of the founders of the Dutch republic, was the son of William I., prince of Orange, and was about eighteen years of age when the latter was assassinated in 1584. It is explained in the article WILLIAM how the revolt of the Netherlands against Spain was occasioned by the resolve of Philip to domineer over the protestant freedom of the country by the introduction of the inquisition. It is sufficient to add here, that the death of the stadtholder was followed by the re-annexation of the southern provinces to the Spanish crown, while the northern raised Maurice to the stadtholdership, and refused the treacherous peace that was offered to them by the duke of Parma. From his accession to power in 1584 till 1609, Maurice continued the war of independence, the commanders opposed to him being Count Mansfeldt, the duke of Parma, the archduke Albert, or, strictly speaking, Albert's wife, Isabella ('the only man in her family'), and last of all Spinola. After the capture of Ostend on the one side, and the strong fortress of Sluys on the other, and repeated proofs that, in the persons of Maurice and Spinola, two of the greatest masters of war were opposed to each other, Spain offered to treat with the united provinces on the basis of their independence, and in 1609 a truce of twelve years was agreed upon. In this interval

the Dutch republic made immense progress, but all the fruits of liberty were distasteful to Maurice, whose tendencies were to absolute authority, supported by his religious zeal for the strictest form of Calvinism. Accordingly, in the Arminian controversy it suited his purpose to favor Gomarus, and in 1618, the synod of Dort being convened, which determined in favor of 'Predestination,' he arrested the chiefs of the opposite party, and sent Barneveldt, the popular statesman, to the block, while Ledenberg escaped the rack by stabbing himself, and the learned Grotius was consigned to perpetual imprisonment. The remainder of Maurice's life was such as the Neophyte of blood deserved. The two sons of Barneveldt stirred up popular commotions to revenge the death of their aged father, and followed him to the scaffold in 1623. In 1621, also, the truce with Spain had expired, and Spinola renewed the war with such superior strength, that he compelled Maurice, weakened by intestine divisions, to act on the defensive. He now sunk under his mortifications, and died at the Hague, while Breda was invested by the enemy, in 1625, leaving the conduct of the war to his brother and successor, Frederick, whom he advised with his last breath to recall the Arminians. [E.R.]

MAURICE, THOMAS, an Oriental scholar and historian, was descended from a respectable Welch family, and was born at Hertford 1753. He was a minister of the Church of England, and assistant-librarian at the British Museum, where he died 1824. His principal works relate to the history and antiquities of Hindostan.

MAURISIO, G., an Italian chronicler, 13th cent.

MAURUS, H., an Ital. ecclesiastic, 1632-1724.

MAURUS, T., a Roman poet, 1st century.

MAURY, JEAN SIFFREIN, a French cardinal, political orator and literateur, was born of a poor family in 1746, and was distinguished for his eloquence as a preacher and eulogist before the revolution. In 1789 he was sent to the estates-general as deputy for the clergy of Peronne, and took part with the noblesse and the Gallican church against Mirabeau. In 1791 he retired to Rome, and in 1794 was made a cardinal. In 1806, he returned to Paris, and having tendered his submission to Napoleon, became, four years afterwards, archbishop of Paris. He again sought safety in Rome on the fall of the emperor in 1814, and died there 1817. [E.R.]

MAUSSAC, P. J. DE, a French hellenist and classical critic, 1590-1650.

MAUVILLON, ELEAZAR, an Italian historian, secretary to Frederick Augustus, king of Poland, 1712-1779. His son, JAMES, an historical writer and friend of Mirabeau, 1743-1794.

MAVOR, WILLIAM FORDYCE, a Scottish clergyman of the Church of England, author of many works, the subjects of which are addressed to the education of youth, 1758-1838.

MAWE, JOSEPH, a master of the sciences of mineralogy and conchology, author of a 'Treatise on Diamonds and Precious Stones,' 'Familiar Lessons on Mineralogy and Geology,' 'The Linnæan System of Conchology,' &c., born about 1755, died 1829.

MAXENTIUS, MARCUS AURELIUS VALERIUS, one of six contemporary emperors of Rome, reigned 306-312.

MAXIMIANUS, GALERIUS VALERIUS, a shepherd of Dacia, who became emperor of the East, 305-311.

MAXIMIANUS, MARCUS AURELIUS VALERIUS HERCULIUS, a Roman soldier, who became colleague of Diocletian in the empire 286. He endeavored to murder his rival Constantine, to

whom he had given his daughter Faustina in marriage, and being frustrated by the fidelity of the latter, strangled himself 310. He was the father and contemporary of Maxentius.

MAXIMILIAN, a saint, martyred 295.

MAXIMILIAN I., emperor of Germany, son of the emperor Frederic III., and of Eleonora of Portugal, was born 1459. He first became an independent prince by his marriage with Mary of Burgundy, the daughter of Charles Le Téméraire, who was killed 1477. This match involved him in a war with Louis XI., king of France, in which he was successful, though he was defeated at a later period by the Milanese. In 1486 Maximilian was elected king of the Romans, in 1493 emperor. He died in 1516, and was succeeded by his grandson Charles V. MAXIMILIAN II., son of Ferdinand I., was born at Vienna 1527, elected king of the Romans 1562, and succeeded his father as king of Hungary and Bohemia, and emperor of Germany, 1564. Died 1576.

MAXIMILIAN, a duke of Milan 16th century.

MAXIMILIAN, the name of three sovereign princes of Bavaria. 1. EMMANUEL MAXIMILIAN, duke and elector, known to history from 1685 to his death in 1726. 2. LEOPOLD MAXIMILIAN, duke and elector, succeeded 1746, died 1777. 3. MAXIMILIAN JOSEPH, king of Bavaria, born 1756, crowned 1799, married his daughter to Eugene Beauharnais, son of Josephine, and had his duchy raised to a kingdom 1806, joined the league against France 1813. Died 1825.

MAYRE, J., a Jesuit and poet, 1628–1694.

MAZARIN, JULIUS, an ecclesiastic and statesman, was born at Piscina, in the Abruzzi, in the year 1602. He was educated for the church, and in 1641 received a cardinal's hat. His name is conspicuous in the history of Europe as prime minister of France in the middle of the seventeenth century. But he merely occupied a place created by the powerful genius of Richelieu, who in crushing the aristocracy, left to whoever should be prime minister of France during the minority of Louis XIV., one of the most important positions in Europe. Mazarin had to support the crown and the cause of Anne of Austria, during the miserable war of the Fronde, and he was at one juncture obliged to flee for personal safety. Had he been even as able a man as his predecessor, it could not have been expected that he should govern as a native Frenchman could, and perhaps nothing better proves how effectively Richelieu had subdued the discordant elements in France, than that an Italian should be able to govern the country. Mazarin died on the 9th of March, 1661. [J.H.B.]

MAZDAK, a Persian communist, who commenced his agitation about 501, and was put to death after making a convert of the king Khobad.

MAZEPPA, JOHN, the famous hetman of the Cossacks, whose name has been rendered familiar as one of Byron's heroes, was a native of the pala-

tinat of Podolia, and for some time a page at the court of John Casimir. Being discovered in an intrigue with the wife of a Polish gentleman, the latter bound him on the back of one of the wild horses of the Ukraine, which carried him to the country of the Cossacks, with whom he remained, and in 1687 became their chief commander. He was a favorite of Peter the Great, who gave him the title of prince, but growing tired of the Russian yoke, Mazeppa allied himself with Charles XII. of Sweden, and advised him to fight the disastrous battle of Pultowa. After his defeat he retired to Wallachia, and thence to Bender, where he died 1709.

MEDICI. The illustrious Florentine family of this name begins with SALVESTRO, who enjoyed the rank of gonfalonier from 1378 to his banishment in 1381. JOHN, his son and successor, distinguished for his commercial enterprise, and for promoting the interests of the republic, flourished 1360-1428. COSMO, one of the sons of the latter, born in 1389, and known as 'the father of his country,' acquired immense wealth and influence, and laid the foundation of his reputation by the munificent patronage of letters, and the conjunction of consummate statesmanship with his commercial enterprise. Many of the first Tuscan families combined against him, but he overcame all rivalry, and was for thirty-four years the sole arbitrator of the republic, and the adviser of the sovereign houses of Italy; died 1464. PETER I., his son and successor, was born 1414, and became the victim of a revolt in 1469. LORENZO THE MAGNIFICENT, son and successor of Peter, was born 1448, and governed the state in conjunction with his brother Julian, till the latter was assassinated by the Pazzi in 1478. Escaping from this massacre he sustained a war with Ferdinand of Naples, with whom he signed a definitive peace in 1480. He then devoted himself to the prosecution of plans for the advancement of learning and the arts, revived the Academy of Pisa, founded another at Florence, collected a vast treasure of literature, and founded a gallery of art, in which the taste of Michelangelo was formed under his patronage. He died universally beloved and honored, in the zenith of his renown 1492. His life has been written by ROSCOE. He had three sons, John, who became pope, (see LEO X.), Julian, and Peter. The latter, PETER II., succeeded Lorenzo, and was deprived of his estates when the French invaded Italy in 1494. He finished his career in the service of France, and was drowned 1504, leaving two sons, Lorenzo and Cosmo. Julian II., brother and successor of Peter, abdicated in favor of Lorenzo 1513, and became duc de Nemours by his marriage with the aunt of Francis I. He

died 1516. **LORENZO II.**, eldest son of Peter II., came to power by the abdication of his uncle, and governed under the influence of Leo X., who invested him with the duchy of Urbino. He died 1519, leaving an only daughter. (See **MARIE DE MEDICIS**.) After some reverses we find the family re-established in the sovereignty of Florence, under the influence of Charles V., with the title of *dukes*. The first was **ALEXANDER**, proclaimed duke 1532, stabbed by his relative Lorenzino, after poisoning his cousin Hippolytus 1537. **LORENZINO**, murderer of Alexander, was assassinated at Venice by order of Cosmo I., 1548. (See **CATHERINE DE MEDICI**.) **COSMO I.**, called 'The Great,' duke of Florence, and grand duke of Tuscany, was the son of John the Invincible, descended from Lorenzo, and was born 1519. He was raised to power by the influence of Charles V., and abdicated in favor of his son 1564. In 1569 he became grand duke of Tuscany, and died 1574. **FRANCIS MARIA**, son and successor of Cosmo, flourished 1541-1587. **FERDINAND I.**, brother and successor of the latter, was also cardinal and grand duke of Tuscany, 1551-1609. **COSMO II.**, son and successor of Ferdinand, 1590-1621. **FERDINAND II.**, son and successor of Cosmo II., 1610-1670. **COSMO III.**, son and successor of Ferdinand II., 1642-1723. **JOHN GASTON**, son and successor of the latter, was the last of the Medici who reigned over Tuscany, being compelled to abdicate and make way for Francis II., duke of Lorraine, by the great powers. He flourished 1671-1737. His daughter, **ANNE**, wife of John William, elector Palatine, was the last of the family. She died 1743.

**MEDICI, THE CHEVALIER DON LUIGI DE**, a statesman of Naples, was born 1754, and in 1791 became director of the police. From this post he made his way to the ministry, and in the time of Joseph Buonaparte, followed the fortunes of the Bourbons. The arrest of Murat, the public debt of Naples, and the struggles with the Carbonari, were among the circumstances in which he became a distinguished actor. In 1818 he became a fugitive at

Rome, but was in power again in 1824, and assisted in delivering the kingdom from the Austrian occupation. Died 1830.

**MEDICUS, F. C.**, a Bavar. botanist, 1736-1808.

**MEDINA, G. B.**, a Flemish painter, 1660-1711.

**MEDINA, J. DE**, a Span. ecclesiastic, d. 1556.

**MEDINA, SIR J.**, a portrait painter, 1659-1711.

**MEDINA, M. DE**, a Spanish friar, 16th century.

**MEDINA, P. DE**, a Span. mathematic., 16th cent.

**MEDINA, S. J. P. DE**, a Span. poet, 17th cent.

**MEDINA-SIDONIA, GASPARD ALONZO PEREZ DE GUZMAN**, duke of, governor of Andalusia in the reign of Philip IV., noted for his attempt to render himself independent in 1640. For others of the family, see **GUZMAN**.

**MEDYN, ABON**, an Arabian *savant*, died 1193.

**MEEL, J.**, a Flemish painter, 1599-1644.

**MEEN, H.**, a div. and class. scholar, 1745-1817.

**MEEREN, or MEER, JOHN VAN DE**, called 'the Old,' a Dutch painter of sea-pieces, landscapes, and battles, 1627-1691. Another painter of the same names, called 'the Younger,' and famous for his pastoral scenes, 1665-1698.

**MEGASTHENES**, a Ger. historian, 3d cent. B.C.

**MEGERLIN, D. F.**, a Ger. theologian, d. 1778.

**MEGISER, J.**, a Germ. philologist, 1555-1616.

**MEHEGAN, WILLIAM ALEXANDER DE**, descended from an Irish family who went into France with James II., distinguished as an elegant miscellaneous writer, 1721-1766.

**MEHEMET ALI**, born in 1765 at Cavalla, in the part of European Turkey which was formerly Macedonia. He entered the Turkish army, and served in Egypt against the French. He rose by degrees in military rank and political importance in that country; and at length in 1806 he purchased the post of pacha of Egypt from the sultan's government. He finally broke the power of the Mamelukes; and by treacherously inviting them to a festival as friends, he obtained an opportunity, of which he mercilessly availed himself, to massacre the last of these formidable cavaliers in 1811. He carried on by his sons several campaigns in behalf of the sultan against the Wahabite rebels in Arabia; and he afterwards sent troops under his son, Ibrahim Pacha, to the Morea, who gave important aid to the Turks in the Greek war of independence. In 1830 he obtained from the

[Mehemet Ali.]

sultan the government of the island of Candia; and next endeavored to make himself master of Syria, which Sultan Mahomed had refused him. He sent a large army to that important province, and he

was thereupon declared a rebel by the Porte, and the Turkish armies were sent against him. Mehemet Ali's troops had been carefully trained by European officers, and they beat the sultan's in every encounter. Peace was made between the powerful viceroy of Egypt and his humiliated sovereign in 1833, by the intervention of the chief states of Europe. Hostilities broke out again between them in 1839; and, as before, the Egyptian forces were uniformly victorious over the Turkish. The armed interposition of the English, and the capture of Acre and the other fortresses on the Syrian coast by the English fleet, under the guidance of Admiral Napier, compelled Mehemet Ali to come to terms again with the Porte. He was obliged to give up Syria; but the hereditary pashalic of Egypt was secured to him and his children.—Mehemet Ali was free from bigotry; he was an earnest admirer of European civilization, and he strove to introduce it among his Egyptian subjects. He showed a rare degree of high-mindedness and generosity in 1840, by allowing the English mails and travellers to and from India, to pass unmolested as usual through his dominions, at the very time the English fleet were blockading his capital, Alexandria, and were destroying his fortresses and garrisons in Syria. Mehemet Ali died in 1848. [E.S.C.]

MEHEMET-EFFENDI, a Turkish statesman, known as plenipotentiary of the Sublime Porte at the treaty of Passarowitz 1718, and ambassador to France 1720. He was exiled after the deposition of Achmet III., 1730. His son, SAID, ambassador to France in 1742, introduced the printing press, which he established at Scutari.

MEHUL, S. H., a French composer, 1763–1817.

MEHUS, L., an Italian philologist, died 1791.

MEIBOM, or MEIBOMIUS, the name of several learned Germans:—1. JOHN HENRY, a publicist and annalist, 1555–1625. 2. His son, of the same names, a physician and professional writer, 1590–1655. 3. HENRY, son of the latter, a physician and historian, 1638–1700. 4. MARK, a relative of the preceding, an antiquarian and Hebraist, 1630–1711.

MEIER, J., a Prussian philologist, 1661–1732.

MEIGRET, L., a Fr. grammarian, born 1510.

MEIGS, RETURN JONATHAN, an Amer. revolutionary officer born in New England. A brilliant enterprise against Long Island in 1777, won for him a sword and the public thanks of Congress. After the war, he emigrated to Ohio, where he was one of the first settlers. Died 1823. His son, RETURN JONATHAN, was governor of Ohio, from 1810 to 1814, and subsequently postmaster-general of the U. S., d. 1825.

MEINER, J. W., a Bavar. philologist, 1723–89.

MEINERS, C., a German historian, 1747–1810.

MEINTEL, J. G., a Ger. theologian, 1695–1775.

MEISNER, B., a German divine, 1587–1626.

MEISSNER, A. T., a Ger. novelist, 1753–1807.

MELA, POMONIUS, a Roman geographer, 1st c.

MELANCHTHON, PHILIP, was born at Bretheim, in the lower Palatinate, in 1497. His father was an armorer, and his original German name was Schwartzerd, which, in imitation of Reuchlin and other learned men, he Grecized into Melanchthon, or as he used, especially in his latter days, to spell it, Melanthon. Both names denote 'black earth.' After having studied at Pfortzheim for two years, Philip removed to Heidelberg, where he became bachelor of arts; and on being refused a mastership, on account of his youth, he repaired to Tübingen, where he became a lecturer. In 1518 he received the high encomium of Erasmus, and, at the instigation of Luther and Reuchlin, he was the same year invited by Frederick, elector of Saxony, to fill the chair of

Greek in the recently founded University of Wittemberg. At this seat of learning he was at once under the mighty spirit and influence of his intrepid colleague Luther. His agency in the Reformation has been overshadowed by that of Luther, but he was ever active and industrious in his own humble and unostentatious mode. In 1519 he accompanied Luther to Leipzig, in order to dispute with Eckius, and in 1521 he published his famous *Loci Communes*, a treatise which in his own lifetime went through sixty editions. In 1520 he married the daughter of one of the burgomasters of Wittemberg, and by her had two sons and two daughters. During the progress of the Reformation he visited many cities, and was active in patronizing seminaries of learning. Nor was his pen idle in the cause; and though his compositions had not the overwhelming torrent of Luther's rhetoric, yet their quiet, elegant, and self-possessed tone were not the less useful in aiding the emancipation and progress of Germany. He was as earnest as Luther to free theology from scholastic subtleties. There is no doubt that many of the plans carried out by the Reformers were the result of Melanchthon's wise suggestions. His Greek scholarship was also of continued and inestimable advantage to Luther in his work of translating the Bible. His own commentaries also show how his erudition qualified him to be a lucid, accurate, and elegant expositor. In 1530 Melanchthon was appointed to draw up the general Confession which was presented to the emperor at Augsburg, and he also wrote the Apology for it. He was invited to dispute with the Sorbonne in 1535, but refused this invitation, as well as a similar and subsequent one from England. After Luther's death, Melanchthon was often sadly perplexed and harassed. The famous measures of the Interim did not find him disinclined to look upon it with a kindly eye. Men of bolder character

[House of Melanchthon.]

rallied him on his irresoluteness, and pointed to his failures at Worms, Ratisbon, and Bonn. His orthodoxy was suspected, and he was blamed for the approximation of his views on the Lord's Supper to those of the Swiss Reformers. These rough and unceremonious assaults often plunged him into grief. Melanchthon died at Wittemberg, 19th April, 1568, aged sixty-three. The amiability, gentleness, and benignant purity of Melanchthon; his zeal, learning, and ingenuity, have placed him next to Luther as an agent in the work of the Reformation. He sometimes fretted at Luther's overbearing vehemence, but

he venerated its grounds; and Luther, though he might doubt the propriety of Philip's procedure in some cases, and stigmatize it as mere expediency, was won by his gentle demeanor and unquestioned sincerity. These qualities, like the 'still small voice,' often commended the new doctrine where the whirlwind and thunder had only produced terror and revulsion. Melancthon wrote on many topics besides theology, such as commentaries on various Greek and Latin classics, and some historical and philosophical treatises. His works were published at Wittenberg in 4 vols. folio, in 1562 and subsequent years, and were reprinted several times. There had been a previous edition printed at Basle in 1541. A new edition has been in course of preparation and publication for many years under the editorial care of Bretschneider and Bindseil. The general title is *Corpus Reformatorum*, and eighteen quarto volumes have already appeared. [J.E.]

MELANTHUS, a Greek painter, 4th cent. B.C.

[Viscount Melbourne.]

MELBOURNE, WILLIAM LAMB, Viscount, the Whig statesman whose name and career is so familiar to the present generation, was born in 1779, and commenced his political life in parliament in 1805. The same year he married the Lady Caroline Ponsonby, known to literature as Lady Caroline Lamb, whose tastes were congenial with his own, and who shared with him the classical studies in which they were both proficient. In 1827 he became secretary for Ireland, and the next year, succeeding to his father's title, entered the House of Lords. In 1830 he joined the administration of Earl Grey as home secretary, and in March, 1834, succeeded him as premier. From the autumn of the same year to the spring of 1835, he was supplanted by the duke of Wellington and Sir Robert Peel, but at the latter period returned to power, and retained the premiership, with the exception of a brief retirement in 1839, till the close of his public life in 1841. Great difference of opinion prevails as to the statesmanship of Lord Melbourne, but he held office during that most trying period when the Reform Bill was in agitation, and it required no mean talents, however well supported by party, to compete with such a statesman as Sir Robert Peel during subsequent years. He was an accomplished gentleman, an agreeable companion, and a finished speaker. Died 1848. [E.R.]

MELCHTHAL, ARNOLD OF. See WINCKELRIED.  
MELDOLA, DR. RAPHAEL, principal of the Jewish rabbis in England, celebrated as a theologian and philosopher, died 1828.

MELLO, P. DE, a Portug. statesm., 1760-1830.

MELLON, HARRIET, a country actress, who was introduced on the London stage by Richard Brinsley Sheridan, and became celebrated by her marriage in 1814 with Thomas Coutts, Esq., the wealthy banker, and in 1827 with the duke of St. Albans. She died in 1837, leaving the bulk of her immense property to the granddaughter of her first husband, and youngest daughter of Sir Francis Burdett, now known as Miss Burdett Coutts.

MELMOTH, WILLIAM, a learned bencher of Lincoln's Inn, chiefly remembered as the author of a religious work entitled 'The Great Importance of a Religious Life,' 1666-1743. His son, of the same name, a classical transl. and poet, 1710-99.

MELOZZO, F., an Italian painter, 15th cent.

MELVIL, SIR JAMES, a Scottish statesman and historian, attached to the person of Mary Stuart, au. of 'Memoirs,' pub. in 1683, 1530-1606.

MELVILLE, ANDREW, was the youngest of nine sons of Richard Melville of Baldov, near Montrose, and was born on the 1st August, 1545. When only two years old he lost his father, who was killed at the battle of Pinkie, but his eldest brother took an affectionate charge of him. Placed first at the grammar school of Montrose, where he made great progress, especially in Latin, he entered St. Mary's College, St. Andrew's, in 1559, in his fourteenth year. Having finished the usual course of study, he left the university in 1564, with a distinguished reputation, departed to the continent, attended for two years the university of Paris, and was then appointed a regent in the college of St. Marceon, when he was only twenty-one years of age. Leaving the place after a siege, he travelled to Switzerland in a state of great fatigue and destitution, and on arriving at Geneva, obtained the chair of humanity in its academy. On his return to Scotland in July, 1574, he was immediately chosen principal of Glasgow college by the General Assembly. His zeal, assiduity, and skill in this high position, were of vast profit to the dilapidated seminary. In 1580, he was translated to the principality of St. Mary's College, St. Andrews, where his labors were very abundant in the reform of academic training and discipline. But

his attention was also, and chiefly, devoted to ecclesiastical affairs, and he heartily and vigorously prosecuted his convictions. On the subject of church government his views were strictly presbyterian, and the establishment of this form of ecclesiastical administration in Scotland was mainly owing to his exertions and influence. Being moderator of the General Assembly, which met at St. Andrews in 1582, he proceeded with an act of discipline in defiance of a royal message to desist. Preaching at the next meeting of Assembly, he inveighed severely against the tyrannous measures of the court, and against those who had brought into the country the 'bludie gullie' of absolute power. This fearless charge led to a citation before the privy council for high treason, and though the crime was not proved, he was sentenced to imprisonment. Apprehensive that his life was really in danger, he set out for London, and did not return to the north till the faction of Arran had been dismissed. At length he took his former place in St. Andrews, and continued in hearty warfare for the liberties of the church. For his share in the trial of Adamson, the king dismissed him from the principality, and charged him to confine himself beyond the Water of Tay. The suspension, however, was only brief. On the arrival of James with his queen from Denmark, Melville pronounced, and afterwards published, a Latin poem of high merit, named 'Stephaniskion.' In 1590 Melville was elected rector of the university. In 1594 he was again moderator of the General Assembly. There was evidently after this time a strong desire on the part of the king to make the kirk a mere tool of political power, or to restore episcopacy. Melville strenuously resisted every such attempt, whether made in an open or clandestine form. A tumult in Edinburgh was taken advantage of, its ministers were severely dealt with, and by and by Melville was prohibited from attending church courts, and soon after confined within the precincts of his college. After King James's accession to the throne of England, Melville was summoned to London, with several of his brethren, and severely catechised and reprimanded by the royal pedant. Melville enraged the king by some verses he happened to write on the furniture of the royal altar, was found guilty of scandalum magnatum, finally imprisoned in the Tower, and deprived of his principality. At length, after four years' confinement, he was liberated, principally at the request of the duke of Bouillon, who wished him to occupy a chair in the university of Sedan. Melville arrived there in 1611, entered on his work with zeal, boldly refuted the Arminianism of one of his colleagues, and in his seventy-fourth year wrote a beautiful Epithalamium on occasion of the marriage of a daughter of the ducal house. Episcopal government had now been restored in Scotland; but the old man was still such an object of terror that he was not recalled from exile. In 1620 his health, which had been seriously impaired during his incarceration in the Tower, failed him, and he died at Sedan in 1622, at the age of seventy-seven. Melville's Latin poems, such as his 'Carmen Mosis,' and those mentioned already in this article, are classical productions of a high order. He was a scholar and divine also of no common attainments. He was active, cheerful, bold, candid and devout, and his impetuosity often arose to sublimity, when he appeared in excited vindication of his church and country. Dr. Mc'Crie concludes his two interesting volumes of Melville's life with the declaration:—'I know of no individual, after her Reformer, from whom Scotland has received greater benefits, and to whom she owes

a deeper debt of gratitude and respect, than Andrew Melville.' [J.E.]

MELVILLE, HENRY DUNDAS, Lord Viscount, son of Robert Dundas, Lord Arniston, was born in 1740, and joined the administration of Mr. Pitt when he obtained the reins of government, after the death of the marquis of Rockingham. Lord Melville followed the fortunes of his leader, in or out of office, as home secretary, secretary of war, and first lord of the admiralty. He was impeached for neglect of duty in the latter capacity, at the instance of Mr. Whitbread, in 1805, but acquitted of the charges by his peers. He retired from office, however, and died in privacy 1811.

 MENDELSSOHN, DR. FELIX BARTHOLDY, was born at Hamburg, on the 3d of February, 1809. His father, who was an eminent merchant, is reported to have said that he was nothing more than the son of one great man and father of another. And this was in a great measure true. The grandfather of the musician was Moses Mendelssohn, who passed the greater part of his early life in making copies of the Bible. The poor copyist, by means of his talent, his indomitable perseverance, and his incredible energy, soon became one of the most illustrious philosophers in Germany. His works, which were devoured with eagerness, soon procured him a large fortune, which, bequeathed to his family, insured

them all the luxuries of life, but did not corrupt their native goodness. Before young Felix, the subject of this memoir, was six years old, he gave extraordinary indications of a genius for music. He astonished all Berlin by his precocious intellect, his docility, his obedience, and his eagerness for the acquisition of knowledge of all kinds, but most especially of that art in which he afterwards made himself so consummate a master. At eight years old he became a pupil of Berger on the piano, and of Zelter for composition and harmony. Even at this early age, he read at first sight the most difficult works of Handel, Sebastian Bach, Haydn, Mozart, and Beethoven. He afterwards studied the piano under Klein, Hummel, and Moschelles. And he subsequently studied counterpoint under Cherubini, who augured the greatest things of his pupil. Before he was nine years old, his performance on the piano-forte was so astonishing that his friends advised him to play in public; and, in consequence, he made his *debut* at Berlin in 1819, where his success was most triumphant. At ten years of age he knew all the great works of the masters named above; and at twelve he improvised upon a given theme in a style so masterly, that old Goethe, the poet, shed tears and embraced the young artist. In 1824 he first published his compositions, which were four quartets and a sonata. In 1827, his opera, *Die Hochzeit de Camacho*, was performed at Berlin, from which period, up to the day of his death, he produced all sorts of compositions with the most wonderful rapidity, and all perfect in their kind, from the 'Songs without Words,' to duets, songs, piano-forte works, and up to the Oratorio. But all this while Mendelssohn did not devote his time exclusively to the study of music. He was well acquainted with natural philosophy, was an able draughtsman, and a proficient in almost all modern languages. With English he was intimately acquainted, and, like all well-informed Germans, he was passionately fond of the works of Shakspeare. And this devotion and profound knowledge of the great poet were reflected in the supplemental music which he composed for the 'Midsummer Night's Dream,' of which it is not too much to say that it is in all respects worthy to be wedded to the immortal poetry which inspired it. This work was performed in London, in 1830, when Mendelssohn conducted the orchestra. It caused an immense sensation. In 1833, Mendelssohn was appointed musical director at Dusseldorf, which place he held for two years, when he resigned and accepted the post of director of the Gewanhouse concerts at Leipzig. At the musical festival at Dusseldorf, on the 22d of May, 1836, his grand Oratorio, *St. Paul*, was first produced, which marked a new era in the history of music. In 1835 he was in London, when he, at the Philharmonic Society, conducted the performance of his Symphony in A major. During one of his visits to Britain, he made a tour to the West Highlands of Scotland, and immortalized his impressions of those wild and romantic islands, lochs, and mountains, by his overture to 'The Isles of Fingal.' His last and greatest work, 'Elijah,' was first produced in England, having been performed at the Birmingham Musical Festival, in August, 1846. It was subsequently performed at Exeter Hall, London, in April, 1847, and afterwards at Gloucester Musical Festival in the same year. While in England, he had the honor of an invitation to visit the queen, on which occasion he received the most marked proofs of the esteem in which he was held by her Majesty and her royal Consort. It was at the suggestion of the queen, who furnished him with

the theme, that Mendelssohn composed his Scottish Overture. Soon after this he went to Switzerland, to repose from the fatigues of study, and while there he heard of the death of a dearly beloved sister, which event preyed hard upon his mind, and was the beginning of those ailments which finally brought him to an early grave. Whilst languishing in grief in Switzerland, he wrote the first act of an opera, 'Lorelei,' which, with some other posthumous works, has been published since his demise. During this period he was advised by his medical attendants to abstain from all mental labor. He had been afflicted with two strokes of paralysis, and his physician feared that a third would prove fatal, but he could not pause. Work was with him a law of his being. Mendelssohn could not live and be idle, and there is now no doubt that the labor he imposed upon his brain had a large share in the cause of his death. Mr. Moschelles published in the *Morning Post* of Thursday, November 12, the following interesting account of the last moments of Mendelssohn, which will appropriately close this brief sketch of the life of one of the greatest and most original musicians that ever lived:—'Mendelssohn felt the first approach of the malady which ultimately terminated his life on the 8th of October (1847). It was an attack of an apoplectic nature. From that day until the 28th he experienced moments of ease and relapses. During this period he felt sufficiently well to take several carriage airings. On the 28th, when in full convalescence, a second attack occurred, but this was of short duration. He promptly recovered his senses, and his strength returned. Notwithstanding this, he felt severe attacks of headache, and could not sleep for three or four days. During the nights of the 2d and 3d of November his sleep returned, and he slept seven hours consecutively. Upon his awaking on the morning of the 3d, he felt quite well, and his family had sanguine hopes of his recovery. He remained thus during the forenoon; but at two o'clock he had a relapse, and a third attack supervened more violent and more prolonged than any of the former ones. He recovered consciousness but slowly, after bleeding, application of leeches, and vigorous friction. He was attended by Dr. Claurus and Dr. Hammer of Leipzig. Messengers had been sent for Dr. Schönbein of Berlin, whose arrival was waited for with intense anxiety, but he did not come. The night passed in alternations of agitation and tranquillity. Mendelssohn recognized all persons present, but spoke little. On the morning of the 4th his state caused the most vivid inquietude. The directors of the 'Gewanhouse' decided on putting off the concert which was to have taken place that evening. At the second hour the sufferer became insensible, and gave no other signs of life than a strong and equal respiration. All the efforts of the medical men to restore sight and hearing were useless. From six till eight o'clock blisters and violent frictions were exhibited, but without success. In the meantime his features changed with frightful rapidity. At half-past eight his respiration became feebler—it was evident that his end was near. At last, at nine o'clock on the 4th, a lengthened sigh announced that Mendelssohn had rendered up his soul to his Maker. Near his bed were his wife, his brother, the two doctors, Mr. Schleinitz, Mr. David, and myself. All Leipzig is in mourning.' On the afternoon of the 7th of November, 1847, his funeral ceremonies were performed with great pomp in the St. Paul's church at Leipzig, preparatory to the removal of his remains to their last resting-place at Berlin. The works of Mendelssohn, which were pub-

lished previous to his death, were one opera, four overtures, two symphonies, three quartetts, two quintettes, two sonatas, a concerto for the piano-forte, a psalm, 'Non nobis,' an 'Ave Maria' for eight voices, six books of songs without words, two phantasias, three chorales, and numberless varied themes, songs, duets, capriccios, &c., for the piano-forte, and his two imperishable oratorios 'St. Paul' and 'Elijah.' Among his MSS., many of which have been published since his death, were an overture and symphony, several chorales, the 'Wal-purgis Night,' cantatas, an operetta, 'The Son and Stranger,' some sacred pieces, and music adapted to 'Antigone,' and the 'Œdipus Colonnus.' Mendelssohn left behind him a wife and five children. His loss was mourned wherever music was studied, and wherever his works were known. And every hour since his death his greatness is becoming more and more appreciated, and his works bid fair to become what they ought to be, the most prized and popular of all the classical works of the great masters.

French and Indians he served under Washington. He accompanied Braddock in the campaign of 1755. In the engagement at Fort Du Quesne, he was severely wounded, and almost exhausted, reclined under a fallen tree. An Indian in pursuit sprung upon the very tree, but did not observe him. On escaping this imminent risk he, with difficulty, made his way to a neighboring brook, where, having revived himself with a draught of fresh water, he was enabled to make an effort to find his way out of the surrounding wilderness. He travelled on foot for more

than a hundred miles, and during the trials of his journey, he was forced to the extremity of feeding upon a rattlesnake. He at last reached Fort Cumberland. During the revolution he distinguished himself at Trenton and Princeton; at the latter, his horse was killed under him, and he himself surrounded by the enemy, who pierced him with their bayonets, and knocked him down with the stocks of their muskets, leaving him for dead upon the field. He died soon after, of his wounds, in the year 1777.

MERZ, PH. P., a German theologian, born 1754.

MESCHINOT, J., a French poet, 1430-1509.

MESMER, FREDERICK ANTHONY, the first great promoter of animal magnetism, was a German physician, born at Mersburg in Suabia, 1734. His name belongs to that select class of 'Charlatans,' so called, who have the misfortune to announce principles which they do not really understand themselves, but which are yet found in nature, and who get abused beyond measure, because they point out more than they can either explain or support to the satisfaction of science. The career of Mesmer is soon related. In 1773-4 his attention as a physician was called to the convulsive movements by which a young lady named Oesterline was *periodically* affected, and in 1776 he published the theory, first suggested by this case, in a treatise entitled 'De Planetarum Influxu.' A slight verbal inaccuracy in the statement of this theory may easily make it appear, at first view, extravagant, but fairly stated it is this:—The heavenly bodies, but especially the sun and moon, act upon all the elastic elements; thus, as it is well known, they cause and direct the flux and reflux of the sea and the atmosphere. The whole universe, however, is pervaded by an element more subtle than the air, which penetrates all bodies, to which the nervous systems of all animals as naturally respond as the eye to light, and by the periodical sway of which, the body is necessarily affected. Mesmer seems to have considered this subtle medium to be one and the same with the magnetic element, and consequently to be capable of concentration, trans-

mission, and direction, according to the established laws of the magnet, and he soon found in practice that he could magnetize animal bodies as well as inert matter, by employing the same agencies. At this time one Father Hell was professor of astronomy at Vienna, and Mesmer employed his workmen and probably consulted the astronomer himself, to procure the most suitable magnets for his experiments. Whatever their respective shares may have been in this matter, they were shortly at issue before the public, Hell claiming the discovery as his own. This led Mesmer to take higher ground, declaring that the magnets were not at all necessary to the effects, but that they resulted from an action that was proper to animal bodies themselves. Disengaged from his adversary by this step in advance, our discoverer memorialized the Academy of Sciences at Paris, the Royal Society of London, and the Academy of Berlin: the two former did not condescend to reply, and the latter in their answer treated him as a visionary. About this time, in 1777, it was alleged that he had performed a cure, almost amounting to the miraculous, upon a Mademoiselle Paradis, who was suffering from gutta serena and convulsive movements of the eyes—the case however has been disputed, it being known that the lady was quite blind in 1784; the probability is, that the effects were really produced, but were not permanent. Disregarded by the learned bodies to whom he had addressed himself, and treated as a juggling impostor by his professional brethren, Mesmer removed from Vienna to Paris in 1778, and soon acquired a prodigious popularity by his marvellous cures, and received large sums of money subscribed by his admirers. It must be supposed that his determination was to rise by his discovery, and to establish himself in a position which he might be able to retain as the master of a school devoted to the new art, and to effect this he allowed it to be understood that there was an esoteric doctrine of animal magnetism, with which even his most ardent disciples, Bergasse and Deslon, were not acquainted. In the same spirit, and partly, we must add, to produce a *crisis* favorable to his own action upon a great number of persons together, Mesmer established the *baquet*, a kind of magnetic battery, around which his patients assembled, and when the crisis took place (manifested in a great variety of startling effects), the arch-magician appeared, to moderate and direct the action in each case. The scenes at these reunions drew the attention of the French government to Mesmer's proceedings, and in 1784 a commission of *savants* was appointed, with instructions to examine the means employed by Mesmer and the results obtained. The members of this commission consisted of four physicians, one of whom was Dr. Guillotin, and five members of the Academy, Franklin, Leroi, Bailly, De Bory, and Lavoisier. The result of their inquiry was announced in a report drawn up by Bailly, and is well known to have been unfavorable not only to the truth of animal magnetism, but to its morality. Though Mesmer and his disciples endeavored to keep their ground, and succeeded in establishing many societies of magnetizers, and though, soon afterwards, clairvoyance became popular, and was introduced as a new degree in freemasonry, the discoverer found it necessary to quit France, and going to England, resided there some time under a feigned name. Mesmer passed the remainder of his life in comparative obscurity, and died in his native place 1815, doubtless much happier in knowing that his doctrine had been accepted by the learned, and had found such advocates as Deleuze and Puysegur, than

in coquetting with governments, and aggrandizing his name with a worthless popularity. In regard to his supposed secret, and his refusal of any intelligible explanation of his process, we may repeat here what he himself urges in his '*Mémoire sur la Découverte du Magnétisme Animal*,' namely, that no reasoning can clear up the difficulties of such a subject, but only *experience*. There is also another consideration. Public opinion in the time of Mesmer was influenced widely and deeply by the philosophy of the encyclopedists, and any explanation that involved the recognition of spiritual laws would be received as empirical. At the present day the acknowledged head of curative Mesmerism in England, prefers total ignorance on the part of his operators, and to treat animal magnetism as a material force only. That it is force operating between substance and substance there can be no question, but then, is matter any thing more than one form or condition of substance? If not, how are healings by prayer, and when the operator is far distant from his patient, to be accounted for? The truth is, neither Mesmer himself, nor any of his disciples down to the present hour, have been able to demonstrate the principles of the art, so as to include all its phenomena, because they cease to follow nature, and bow down before those false idols of the mind, against which they have been warned by Bacon, as soon as another condition of being is indicated. The Saviour himself generally healed by the touch, yet always from the spirit of love, and if the former is found successful when the latter is not recognized, and if these touchings can be traced to their connection with material forces, it is only a proof that the material world is clothed over the spiritual, and that magnetism, gravitation, or any other term by which we designate *force*, is nothing but the manifested law of the Supreme Will, acting through the least things and the greatest, with or without a thankful recognition, in this condition of being, which we choose to call material. Certain we are, that this whole subject is treated most unphilosophically, both by its friends and enemies, and that we must in this, as in all other cases, court and encourage nature to discover herself if we would have her secret.—The system of Mesmer was published in German at Berlin by the famous Nicolai, under the title of '*Mesmerismus, &c.*' 1815.

[E.R.]

MESSALA, a Roman general and orator, who commanded a legion under Brutus and Cassius at Philippi, died about the year 11, aged seventy-two.

MESSALINA, STATILIA, a Roman lady, who had for her fifth husband the emperor Nero, who had murdered her fourth husband, Atticus Vistimus. After the death of the emperor in the year 68, she devoted herself to literary pursuits.

MESSALINA, VALERIA, daughter of Valerius Messalinus Barbatus, was a Roman lady, who became the wife of Claudius, and shared with him the imperial throne. Her licentious conduct is unparalleled in history, for she not only made her husband's palace the scene of her debaucheries, but often quitted it at night, and acted as a common prostitute. When summoned by the enraged emperor, after some fresh extravagance in the year 48, she attempted to kill herself, but wanted courage, and her enemy Narcissus, who dreaded the result of the interview, caused her to be despatched by a soldier.

MESSENIUS, JOHN, a Swedish *savant*, author of '*Scandia Illustrata*,' 1584–1637. His son, ARNOLD, historian of the Swedish nobility, executed 1648.

MESSIER, CH., a French astronomer, 1730–1817.

MESSHEIMER, FRED. VAL., and his son, were

American naturalists. The latter published a catalogue of the insects of Pennsylvania. Died 1814.

MESSIS, QUENTIN, a Flem. painter, 1450-1529.

MESTON, W., a Scottish poet, 1688-1745.

METASTASIO, PIETRO, the son of a pastry cook named Trapassi, was born at Rome in 1698. When he was no more than ten years old, his talent for extemporaneous versification attracted the notice of the accomplished lawyer, Gravina, who adopted and educated him, and, with a whim savoring of the taste of the Italian academies, made him exchange his family name for its Hellenic synonyme Metastasio. The youth became celebrated as an improvisatore before completing his eighteenth year. Soon afterwards he inherited from his benefactor a considerable fortune; but he spent it in no long time, chiefly through kindly but careless benevolence. He now began to write for the stage, gained in this field great fame but little profit at Naples and Rome, and, in 1729, was appointed Imperial Laureate at Vienna. His duties consisted in writing the Italian text for operas; and this continued to be his occupation for the remainder of his life, except during the closing of the theatre at Vienna on the breaking out of the first war between Austria and Prussia in 1741. He died at Vienna in 1782. The 'libretto' of the operas, usually quite worthless, and treated merely as an adjunct to the music, became, in the hands of Metastasio, genuinely and beautifully poetical. The lyrical turn of his genius fitted him admirably for giving expression in words to the sentiment of the airs interspersed through the recitative of the dialogue; and many of the songs in his operas, with some separate compositions of the sort (such as 'La Partenza'), are exquisite for the delicacy and fanciful charm both of their feeling and of their diction. He gave similar excellences, in a wonderful degree, to the conception and design of his dramas, and to many passages of the dialogue. His works have a monotonous sweetness, an utter want of characterization, and a great deficiency in reality and practical interest. But the best of them, such as 'L'Olimpiade,' breathe a romantic air which is very delightful. [W.S.]

METCALFE, ———, Governor of Kentucky, was a native of Fauquier County, Virginia, where he was born on the 20th of March, 1780. When he was quite young his parents emigrated to Kentucky and settled in Fayette, where he had the restricted advantages of a few months' attendance on a country school. At the age of sixteen he was apprenticed to his elder brother, a stone-mason, but his father dying in three years after, the indentures were cancelled, and he set about making a livelihood for his mother and sister. These he continued to support as long as necessity required; it being the proudest satisfaction of his life that, to the mother who bore him, and the sisters who were the companions of his infancy, he had always been kind, even at times beyond his means. Fond of study, the young mason made use of all his leisure hours, and soon were developed those strong attributes of intellect, always his characteristics. In 1809 he first appeared as a public speaker, the country then being agitated by the prospect of a war with England. But his passion for the tented field had to be restrained until 1813, when he commanded a company at the battle of Fort Meigs, and distinguished himself by his prowess in the presence of an Indian force double the size of his. While absent on this campaign he was re-elected to the Legislature, receiving every vote in the county but thirteen. He served in this body for several years, and was first elected to Congress in

1818, defeating Hon. Joseph Desha, afterwards governor. He continued a leading member of the national legislature until 1827, when he was chosen the National Republican candidate for governor. In this contest the Hon. Wm. T. Barry, a man of great genius and fine address, was his opponent, representing the Jackson interest. The canvass was one of intense excitement, the entire state being then visited for the first time by rival candidates. At the election Governor Metcalfe came out victorious by a majority of only seven hundred and nine votes. In Congress and the executive chair Governor Metcalfe greatly distinguished himself by his ability and firmness. He was equal to all occasions, and shrank from no responsibilities. In 1834 Governor Metcalfe was chosen to the State Senate, and in 1840 made president of the Board of Internal Improvement. In 1848 he was appointed to fill Mr. Crittenden's unexpired term in the Senate. After that he chiefly confined himself to his farm. He died on the 18th July, 1855.

METCALFE, CHARLES THEOPHILUS, Lord, an East Indian officer and diplomatist, who was appointed governor of Jamaica after the emancipation of the negroes, and subsequently governor of Canada, 1785-1846.

METELLI, AGUSTINO, an Ital. artist, 1607-60.

METELLUS, the name of several illustrious Romans:—1. CAIUS CÆCILIUS, the conqueror of Macedonia and proconsul of Spain, known from 148 to 141 B.C. 2. QUINTUS CÆCILIUS, his son, conqueror of Jugurtha in Numidia, exiled B.C. 100 by the influence of Marius and Saturninus. 3. QUINTUS CÆCILIUS, son of the latter, and a partisan of Sylla against Marius, distinguished in the Spanish war, died B.C. 63. 4. QUINTUS CÆCILIUS, son of the last named, distinguished in the war against Cæsar, killed himself after the defeat of Thapsus, B.C. 46.

METELLUS, H., a Latin poet, 1080-1157.

METEREN, E. VAN, a Flemish hist., 1516-1612.

METHODIUS, the name of three personages in ecclesiastical history:—1. SAINT METHODIUS, author of a poem written against Porphyry, and some theological treatises, only fragments of which remain; supposed to have died a martyr about 311 or 312. He was successively bishop of Olympus and Tyre. 2. METHODIUS, surnamed 'the Confessor,' patriarch of Constantinople in 842, known as a partisan of the image-worshippers, died 847. 3. A METHODIUS, who is remembered along with his brother, CYRILLUS, as the first preachers of Christianity among the Slavonians, 9th century.

METIUS, ADRIAN, a Dutch mathematician, son of an engineer, of the same names, 1571-1635. His brother, JAMES, said to have invented telescopes, died 1636.

METKERKE, A., a Flem. scholar, 1528-1591.

METECHITA, T., a Gr. historian, died 1332.

METON, an Athenian astronomer, 5th ct. B.C.

MEYER, J., a Flemish historian, 1491-1552.

MEYER, JER., a German painter, 1735-1789.

MEYER, J. D., a Dutch jurist, 1780-1834.

MEYER, PHILIPPE, was born at Strasburg, in Alsatia, in the year 1737. At an early age he went to college to study for the protestant church, but the love of music interfered greatly with his theological studies. At twenty years of age he by accident became possessed of an old harp, and having made some proficiency upon this instrument, he forthwith devoted himself exclusively to the study of music. Some time after this he studied the science of music under Mûthel, a pupil of the great Bach, and here Meyer's style may be said to have been formed. He soon after this went to Paris, and thence to London, where he resided for several years. Having returned to France, he was induced to compose for the opera, where his style procured for him the *sobriquet* of the *Young Gluck*. Several circumstances tended soon after this to render Meyer unpopular; he returned to London about the year 1784, where he gave up all pretensions as a performer, and lived upon his reputation as a composer. He died in 1819, leaving two sons musicians and composers, viz., Philippe, jun., and Frederick Charles. [J.M.]

MEYER, THEODORE, a painter and engraver of Zurich, 1572-1658. His son, RODOLPH, an engraver, died 1638. His second son, CONRAD, a painter and engraver, 1618-1689.

MEYTENS, M. DE, an Austr. pain., 1695-1779.

MEZERAI, FRANCIS EUDES DE, one of the most celebrated of French historians, who flourished in the time of Richelieu and Colbert, was born in 1610, and commenced his career as a political writer. He was some time attached to the army as commissary, but more lately received a pension from the court as a man of letters, which he lost 'for writing what he thought to be the truth,' died 1683.

MEZERAY, J., a French actress, 1772-1823.

MEZIRIAC, CLAUDE GASPARD BACHET DE, a French archæologist and mathematician, 1581-1638.

MIANTONIMO, a chief of the Narragansetts, flourished about 1636.

MICAH, the name of two Jewish prophets, the elder of whom flourished in the 9th cent. B.C.; the latter, au. of the book of that name, in the 8th c. B.C.

MICHÆL I., emperor of the East, successor of Nicephorus, 811, abdicated on occasion of a military sedition, in favor of Leo the Armenian, 813, died 846. MICHÆL II., succeeded Leo the Armenian 820, died 829. MICHÆL III., succeeded in the third year of his age, 842, under the guardianship of his mother, Theodora. In 859 he was persuaded by his uncle, Bardas, to assume the power himself, and his mother shortly after died of grief in a convent. In 866 he put Bardas to death, and made Basil, the

Macedonian, his associate in the empire, who killed him, 867. MICHÆL IV., was raised to the throne by Zoe, after she had poisoned her husband, Romanus Argyrus, 1034; died 1041. MICHÆL V., nephew of the preceding, occupied the throne a few months after his death, and was dethroned by Zoe and Theodora, 1042. MICHÆL VI., succeeded Theodora 1056, and was dethroned by his officers, who elevated Isaac Comnenus to the imperial dignity, 1057. MICHÆL VII., son of Constantine Ducas and Eudoxia, succeeded his father 1067; and, being dethroned by Nicephorus Botoniates in 1078, retired to a monastery, and died archbishop of Ephesus.—MICHÆL (Palæologus) VIII., became regent for John Lascaris 1258, and emperor in 1261, after deposing and putting out the eyes of his *protégé*; died, after a troubled reign, 1282.

MICHÆL, patriarch of Constantinople, 1043-57.

MICHÆL, vaivode of Wallachia, 1595.

MICHÆL, king of the Bulgarians, 1245-1258.

MICHAELIS, J. B., a German poet, 1746-72.

MICHAELIS, JOHN DAVID, a famous Orientalist and biblical critic, was born at Halle, 1717, where his father, Christian Benedict Michaelis, was professor of divinity and the Oriental languages. He entered the university in 1733, and was admitted master of philosophy, and became assistant lecturer under his father in 1739. In 1746, he was appointed extraordinary professor of philosophy in the university of Göttingen, having previously visited England, and officiated as preacher at the German chapel, St. James' palace. During the remainder of his life he was associated with the principal learned societies of Europe, and was raised, in 1786, to the rank of Aulic Counsellor in Hanover, besides being employed in many affairs of moment requiring the exercise of his statesmanship. His religious opinions were unsettled, but the strictest integrity formed the basis of his conduct. Died 1791.

MICHAELIS, JOHN HENRY, great uncle of the preceding, born 1668, was a teacher of the Oriental languages at the university of Halle, and in 1699 became professor of Greek in the same institution; in 1707 keeper of the university library; and in 1732 senior of the faculty of divinity, and inspector of the theological seminary. Died 1738.

MICHAULT, P., a French poet, died 1467.

MICHAUX, ANDRE, a French traveller, and writer on the botany of foreign parts, born at Versailles 1746, died at Madagascar 1802. His son, FRANCIS ANDRE, a writer on the forest trees of North America, &c., 1746-1802.

MICHEL, C. L. S., a Fr. statesman, 1754-1814.

MICHEL, J., a Gascon poet, died about 1700.

MICHELANGELO BUONARROTI, was born at Castel Caprese in the diocese of Arezzo in Tuscany,

6th March, 1475. He was apprenticed for three years to Domenico Ghirlandajo on 1st April, 1488. His earlier studies were made in the so-called academy of Lorenzo de Medici, a garden containing sculptures near the church of St. Mark, and he was early patronized by that prince, after whose death in 1492, Michelangelo removed to Bologna; he returned to Florence in 1494, and now attained, by a statue of the 'Sleeping Cupid,' a great reputation. This statue was sold as an *antique* at Rome, which led Michelangelo to try his fortunes there, and he then executed his celebrated *Pietà*, now in St. Peter's. He returned to Florence at the commencement of the sixteenth century, and further distinguished himself by his colossal David, now on the Piazza Granduca, and appeared for the first time in the character of a painter; being commissioned by the Gonfaloniere Soderini to paint one end of the Council Hall, the other end being awarded to Leonardo Da Vinci. Though Michelangelo made his cartoon known as the world-celebrated 'Cartoon of Pisa,' he never commenced the painting; the cartoon was exhibited in 1506, and created a great sensation among the artists of Florence; it became, says Benvenuto Cellini, 'The School of the World.' Michelangelo had visited Rome a second time during its progress by the invitation of Julius II., and at Bologna in 1507 he made the famous colossal statue of that pontiff, which was afterwards converted into a cannon and used against the pope by the Bolognese. In 1508 commences the great career of Michelangelo as a painter; he then visited Rome for the third time, and was commissioned by Julius II., to paint the ceiling of the Sistine chapel; Raphael was ordered at the same time to decorate the Stanze, or dwelling rooms of the Vatican palace. The ceiling was finished on All-Saints' Day, 1st November, 1512, the actual painting of the frescoes having occupied only twenty months, the cartoons occupying the greater portion of the interval. These frescoes represent—the creation of the world, and of man; his fall; and the early history of the world with reference to man's final redemption and salvation: they are the grandest productions of modern art, greatly superior to the 'Last Judgment' executed on the altar wall upwards of twenty years afterwards. Michelangelo was occupied also during the progress of this ceiling with the monument of Julius, which was, however, finally suspended by the death of the pope in 1513; what was done of the monument was arranged and put up in the church of San Pietro in Montorio; the celebrated statue of Moses was one of the sculptures for the intended mausoleum. Michelangelo was now for twenty years kept from the carrying out of his great design of the history of man in the Sistine chapel. Leo X. occupied him for nine years in selecting marble in the quarries of Pietra Santa for the façade of the church of San Lorenzo at Florence, and he was employed in the Medici chapel of the same church during the pontificate of Adrian VI., and part of that of Clement VII., but finally in the tenth year of this pope, 1533, he was ordered to go on with the frescoes of the Sistine, and he completed the 'Last Judgment' in 1541, in the pontificate of Paul III. His last works in painting were the frescoes of the Capella Paolina, executed for Paul III., finished in 1549; he is said never to have painted in oil-colors. This extraordinary man had appeared in a third character when seventy years of age, he was then, 1546, appointed to succeed Antonio da San Gallo as architect of St. Peter's, and he continued architect during five pontificates, carrying the building out to the base of the

cupola. (See BRAMANTE.) This great artist was also a poet: he was never married. Michelangelo died 17th February, 1564, having very nearly completed his eighty-ninth year; his body was carried to Florence and deposited in a vault in the Church of Santa Croce. There is little space, in a limited work of this character, to enter upon any details of the extraordinary works of Michelangelo, spreading as they do, over four provinces of the fine arts; most opinions concerning him are uniform in their expressions of praise: his name was the last word pronounced by Sir Joshua Reynolds in the Royal Academy, and even his great rival, Raphael, is said to have exclaimed that he thanked God he was born in the days of Michelangelo. His most extraordinary achievement is doubtless the ceiling of the Sistine chapel; the Prophets and Sibyls of this great work are, for sublimity and grandeur, indisputably the triumphs of modern art. The element of his style, whether in painting or in sculpture, is an abstract impersonation of dignity, which sentiment prevails under whatever emotion the subject may be represented. A similar uniformity of style in design, is of such constancy as to amount to manner, and this mannerism of form is the chief defect of all the works of this great artist; but one overcharged muscular standard of form is evident for man, woman, or child, of every age and of every degree.—(Conditi, *Vita di Michelangelo*, &c.; Vasari, *Vite*, &c., ed. MICRELIUS, J., a Lutheran divine, 1597–1658.

MIDDLETON, ARTHUR, an Amer. revolutionist, and a signer of the declaration of independence, was born in S. Carolina, in 1743. He was a delegate to the Continental, and member of the U. S. Congress. Died 1787.

MIDDLETON, CONYERS, well known as a polemical writer and critic, was the son of William Middleton, a Yorkshire clergyman, and was born at York 1683. In 1717 he was created a doctor of divinity by the mandamus of George I., on his visit to Cambridge, and his refusal to pay the fees demanded by Bentley, the regius professor of divinity, involved him in a lawsuit, and, finally, in an action for libel brought against him by that gentleman. The enmity thus established between them, issued in a literary and critical controversy, which was interrupted by Middleton's going to Italy in 1724, for the benefit of

his health. In 1729, after a controversy with Dr. Mead, concerning the condition of the medical men of ancient Rome, he published his 'Letter from Rome,' showing the similarity between the Roman Catholic religion and the pagan rituals of antiquity. This work acquired a great popularity, but it laid its author open to the suspicion of being at heart an unbeliever; and, two years later, his animadversions on Dr. Waterland, who had written against Tindal, created such a feeling against him that he had nearly been deprived of his degrees. The line of argument adopted by Middleton, who professed to show a better method of dealing with the freethinkers, will speak for itself; and it is stated thus succinctly in Taylor's 'Retrospect.'—He shows from history the inadequacy of the simple religion of reason to the necessities of the multitude, and that, in every civilized community, there has always been a traditional system of faith and worship adapted to them, distinct from the speculations of philosophical minds; that where such a system was already established, though mixed with much superstition and folly, it would be wrong to attempt its overthrow, without being prepared to put something better fitted for the purpose in its place; that Socrates and the wisest of the heathen, always acted on this principle; and that, consequently, it must, *à fortiori*, be much more absurd and mischievous to endeavor to substitute the simple inferences of reason for a belief in Christianity, which is the best of all traditional religions, the best contrived to promote peace and the good of society, and acknowledged by deists themselves to come the nearest of all others to their perfect law of reason and nature. Such a book of course exposed Middleton to a fresh controversy, in the course of which, 1731, he was appointed to the professorship of mineralogy, then recently founded by Woodward. In 1734 he abandoned this uncongenial appointment for that of librarian to the university. In 1735 he wrote, controversially as usual, concerning the origin of printing in England. In 1741 he published his greatest work, the 'History of Cicero,' in 2 vols. 4to, which was the signal for a scholastic controversy on the authenticity of certain documents adopted by him. In 1749, having thrown out an 'Introductory Discourse' on the same subject two years previously, he gave to the astonished quidnuncs of the period his 'Free Inquiry into the Miraculous Powers which are supposed to have subsisted in the Christian Church from the earliest ages.' For their replies to this work, Dodwell and Church obtained the degree of D.D. from the university of Oxford. Middleton, however, published his 'Vindication,' and, the year following, made an attack on Dr. Sherlock, endeavoring to show that there is no uniform chain of prophecy pointing to the Saviour. With such views as we have indicated, this singular divine could yet accept the living of Hascomb, in Surrey, which he held at his death in 1750. The only excuse we could imagine for such a career as Middleton's must be found in the unsettled state of the Church of England at the commencement of last century—in all the circumstances, to speak briefly, by which we should account for the rise of Wesleyanism, and the various movements of dissent and free inquiry, which marked the period. [E.R.]

MIDDLETON, ERASMUS, a methodist scholar of Oxford, author of a 'Dictionary of Arts and Sciences,' last century.

MIDDLETON, SIR HUGH, a citizen and goldsmith of London, celebrated for bringing a supply of water to the metropolis, was a son of Richard Middleton,

Esq., governor of Denbigh castle. The date of his birth, and the early events of his life, are unknown, with the exception of the fact that he had been engaged in mining adventures in Wales. This costly enterprise for supplying London with the fresh streams of Hertfordshire, dates from 1608 to Michaelmas-day, 1613, when the water was admitted into the reservoir at Pentonville, at a cost of nearly half a million sterling. Middleton was subsequently reduced to the necessity of occupying himself as an engineer. He was created a baronet in 1622, and died 1631.

MIDDLETON, HENRY, an American statesman, governor of South Carolina, and minister to Russia during the administration of President Monroe. Died 1846, aged 75.

MIDDLETON, T., a dramatic writer, d. 1627.

MIDDLETON, THOMAS FANSHAWE, the first English bishop of Calcutta, was born at Redleston, in Derbyshire, where his father was rector, in 1769, and consecrated at Lambeth in 1814. He departed for the East the same year, and in 1820 founded a college at Calcutta for the education of clergymen and missionaries devoted to the English Eastern possessions. His principal work is an erudite dissertation on the Greek article, which has given rise to some controversy. Died 1822.

MIDDLETON, W., a Welch poet, 16th century.

MIEL, EDMUND, F.A.L., a French author, 1775–1842.

MIEL, JAN, a Flemish painter, 1599–1664.

MILIZIA, F., an Italian architect, 1725-1798.

MILL, JAMES, born in Kincardineshire on 6th April, 1773; died at Kensington, 23d June, 1836; one of the three or four remarkable minds which, in the generation just past, have vindicated the title of Scotland to a place of high glory in the annals of Inquiry and Thought. Mr. Mill was originally designed for the Scottish Church; but reflection inclined him to abandon a purpose of life, which, however honorable, was not suited to his peculiar intellectual tendencies; and after some intermediate passages, he settled in London as a literary man in 1800, where he resided ever afterwards, and gained his very distinguishing name. The work by which Mill earliest rose into notice is the *History of British India*, one that through the profundity of its general views, and its liberal spirit, will remain a classic among our English Histories. It is not, in merely literary characteristics, on a level with the remarkable productions of HUME or GIBBON; nor did Mill aim at the peculiar excellencies of these writers. But he aimed at the discovery of pure historic Truth, as earnestly as Gibbon; he had a stronger feeling of Justice, and less regard for the morals of Authority: nor when high occasion called them forth, were his powers to appreciate character and narrate stirring events, ever defective. How admirably and incisively he delineates CLIVE,—the man, to whose audacious, unscrupulous, cruel, but successful *coups d'état*, the British empire in India owes its first stability: and we rarely find among descriptive writers, a clearer presentation of rapid and brilliant events in war, than Mill, in his fifth volume, has given of the operations before Seringapatam. It must be recorded, to the high honor of the East India Company, that on the publication of this great History, they secured the services of its author, and always retained them. Few governments—certainly not the English one—have been politic enough, to evince so large an appreciation of ability, if coupled with obnoxious opinions. From the commencement of his public life to its close, Mill was an English Radical of the broadest stamp; he was the friend and associate of Jeremy Bentham,—he may be termed *par excellence*, the theorist and philosopher of the Bentham school: and in all he wrote—especially in his memorable systematic treatises, in the Supplement to the Encyclopædia Britannica, there is proof in every line of the presence of a lofty Intellect that could seek Truth for its own sake, and dare to speak it. The subjects of these essays are *Government, Education, Jurisprudence, Law of Nations, Liberty of the Press, Colonies, and Prison Discipline*. Published afterwards in a separate form, they have had an extensive circulation, and have produced great influence on current political and social speculation. They evince an ability alike in analysis and ratiocination, belonging only to first-rate minds; and their tone and leanings are what might be called ultra-liberal. They are of the same class as the Author's celebrated article on the *Ballot* in the *London Review*.—Mill's greatest work, in the estimation of many of his admirers, is the *Analysis of the Phenomena of the Human Mind*; an effort at once original and bold, to give extension to the analytic system of Hartley,—resolving every feeling and idea belonging to the human mind, into simple sensations, and

the products of these, as manufactured by the principle of 'Association.' It is impossible to miss the evidence of Power in every step of this remarkable analysis; although in the view of the writer of this notice, the speculation is based on an imperfect psychology—an imperfect review of the actual characteristics of the beliefs and ideas of which the Analyst takes account. One important fallacy, however, of the opponents of Mill, must be noticed. Although an author traces, or supposes he can trace, many of our moral feelings—gratitude, benevolence, &c.—to simple elements, it does not follow that he disowns either the existence of such feelings, or their high import in practical life. The question at issue, is not a *practical* but a *theoretical* one; and its real bearing is this—Are certain feelings and ideas part of the Mind's primal constitution, and evolved by its own inherent force; or, is the External Universe so constructed, that Mind cannot come into contact with it—supposing Mind a *tabula rasa*—without those feelings and ideas arising in it potentially, and conquering sway over its movements?—Mill's last work was anonymous—the *Fragment on Mackintosh*; a remorseless criticism on a 'Dissertation' by Sir James, concerning the 'History of Ethical Philosophy.' There is little doubt, we fear, that the name of Mackintosh must be added to the long list of writers, who to high aspirations have not joined the industry and honesty required to realize them; nor did he resist as he ought, the temptation constituted by a high popular reputation, apart from adequate performance, to *seem* to know, when he did not know. Mill's code of morality could brook neither pretence nor deceit. The vice that appeared hugest in his eyes, was Treachery in any form, to TRUTH; and it cannot be denied, that through the ordeal to which his Critic has subjected him, the popular Whig Potentate, has not escaped without serious damage. Mill's indignation could not fail to be especially aroused by the superficial, but withal supercilious remarks, of the 'Dissertation' on his favorite—the illustrious although unpopular HOBBS.—This fertile and powerful writer also contributed to the literature of Political Economy. To an intellect as abstract as *Ricardo's* he joined a more rigid Logic; and his 'Elements' are accordingly our best and most easily read Manual of the scheme of Thought on that important department of social speculation, prevailing among the Reflecting, in his day. It cannot be claimed for Mill, that the bases of his views were always the most enlarged; but the fabric he built on these, was ever compact and strong. As to strength and reach in Speculative Intellect, his native Country has only one Name that can be placed beside Mill's.—It were wrong to omit, that Mr. Mill left a son, whose position in Philosophy is even higher than his own. The author of the '*System of Logic*,' and the '*Principles of Political Economy*,' has already attained a name which must last in the history of English Thought; and if that scheme of Psychology, which seems so congenial to British idiosyncrasy, could be saved by any intellect, certainly it will be saved by his. His sympathies are wider than his father's, and he has the same independence and love of truth. To a command of our native tongue, which none save the purest Thinkers acquire, he conjoins the Wisdom of the Philanthropist, and the Sagacity of the Statesman.

MILL, JOHN, a learned divine of the Church of England, author of an edition of the Greek Testament, 1645-1707.

MILL, W. H., an English divine and oriental scholar, d. 1853, aged 62.

MILLAR, JAMES, a Scotch physician and chemist, editor of the fourth edition of the 'Encyclopædia Britannica,' to which he contributed many articles in chemistry and natural philosophy. This industrious writer was also a minister of the Scotch Church. Born at Ayr, 1762, died 1827.

MILLAR, JOHN, a native of Lanarkshire, was educated at Glasgow. In early life he was tutor in the family of Lord Kames, through whose influence he obtained the professorship of law in the university of Glasgow, which he held for about forty years; he is the author of 'The Origin of the Distinction of Ranks,' &c., 1735-1801.

MILLE, A. S., a French historian, born 1750.

MILLER, SAMUEL, an American presbyterian divine and theological writer, professor in the Theological Seminary at Princeton, d. 1850, aged 91.

MILLER, SAMUEL J., an American divine, and missionary to Africa, and agent of the Colonization Society, d. 1818.

MILLER, JAMES WILLIAM, an American poet and miscellaneous writer, died 1829.

MILLER, WILLIAM, the founder of the Millerites, was born in Pittsfield. During the war of 1812 he served as a volunteer with the rank of captain. In 1833, he began his career as an apostle of the new doctrine, which taught that the world was coming to an end in 1843. For ten years he held forth to this purport, and succeeded in gathering a large number of followers, which is said to have reached fifty thousand, who awaited, with credulous expectation, the appointed day. The result, however, turning out contrary to the teaching of their apostle, the deluded fanatics gradually returned to reason, and left Miller without a disciple. Died 1849.

MILLER, SIR T., a Scotch lawyer, 1717-1789.

MILLES, JEREMIAH, a divine and antiquarian, published an edition of the poems of Chatterton, for the pretended antiquity of which he was a great advocate, 1714-1784. His uncle, THOMAS MILLES, a learned prelate, author of a life of his father, the

MILNE, JOSHUA, a famous writer, on annuities and assurances, more than thirty years actuary to the Sun Assurance Company, 1773-1851.

MILNER, JOHN, a Roman Catholic divine, famous for his researches in ecclesiastical history and antiquities, and for his zeal and acuteness in theological controversy, was born in London, 1752, and commenced his career as a priest at the catholic chapel in Winchester, 1779. In 1803 he was appointed vicar apostolic of the midland district, with the title of bishop of Castabala, and, in 1808, became agent to the Irish hierarchy. He died in 1826. Dr. Milner's works are a 'Dissertation on the Modern Style of Altering Cathedrals,' 'History, Civil and Ecclesiastical, and Survey of the Antiquities of Winchester,' 'Treatise on the Ecclesiastical Architecture of England during the Middle Ages,' and some others.

MILNER, JOHN, one of the nonjuring divines of the Church of England, author of several learned works, 1628-1702.

MILNER, JAMES, an American episcopal clergyman, settled for thirty years as a pastor of St. George's Church, New York, admired for his Christian liberality, and beloved for his kindness of heart and practical charity. He was originally a lawyer, and became a member of Congress in 1812 for the city of Philadelphia; died 1845, aged 70.

MILNER, JOSEPH, best known for his 'History of the Church of Christ,' was born at Leeds, 1744, and became vicar of Trinity Church at Hull, where a monument is erected to his memory; died 1797. His brother, ISAAC, born 1751, became a dignitary of the church, and is author of many papers in the Philosophical Transactions. He also edited the fourth volume of his brother's history; died 1820.

MILTIADES, the famous Athenian commander at the battle of Marathon, was grandson or nephew of a Grecian leader of the same name, who established a colony of Athenians in the Chersonesus of Thrace. His father was Cimón, and his elder brother Stesagoras, whom Miltiades succeeded as governor of the Chersonese, and is then said to have made a conquest of Limnos, in the interest of Athens; but this part of his history is doubtful. Soon after the

[Miltiades, from an ancient Bust.]

expedition of Darius against the Scythians, Miltiades consulted his safety by returning to Attica, having advised the Greek colonists to break down the bridge of the Danube, as a means of harassing the Persians, and of course merited their resentment. His military talents, in fact, were now needed to meet those formidable invaders at home, an army of 300,000 men, led by Datis and Artaphernes, being soon afterwards set in motion for the conquest of all Greece. Miltiades animated the Athenians, and mustered all the men capable of bearing arms. The Spartans were not prepared to take the field, and their only allies were the inhabitants of the little town of Plateæ. When these forces were drawn forth they amounted to no more than 10,000 men, commanded by ten generals, and this was the army that awaited the shock of battle on the plain of Marathon. They were arrayed ten deep, and presented a front of 1,000 men to the enemy, who made a fierce attack on their centre, which gave way, and immediately the two wings closed in, and this with such quickness and impetuosity, that they may be said to have crushed the unwieldy host between them. More than 6,000 Persians were left dead on the field, with a loss to the Grecians of less than 200 men, the rest were scattered or escaped in their ships, and Athens had obtained a victory, which not only liberated Greece, but raised the city to great importance. Immediately after the victory of Marathon, Miltiades was sent in command of an expedition to the Ægean sea, to reclaim the island conquests of the Persians, and was wounded while laying siege to Paros. The approach of the Persian fleet and other sufficient reasons caused him to raise the siege and return home, when he was condemned to pay a fine of fifty talents, and imprisoned in default. Miltiades died in confinement, as much hurt by the ingratitude of his countrymen as by the wounds, under which he sunk, only a year after his great victory, B.C. 489. The first historian of these events was Herodotus, who wrote about seventy years after the battle of Marathon, and derived his materials from the heroic poem of Choerilus. [E.R.]

MILTIADES, a pope and saint of Rome, 311–314.

MILTON, JOHN, was born in London on the 9th of December, 1608. His father, a man of good family in Oxfordshire, had been educated at the university, and disinherited for embracing protestantism; on which he became a scrivener, and acquired a competent fortune. Milton's education was begun under a private tutor of puritanical opinions, and continued from his fifteenth year at St. Paul's School. He has himself related that his love of letters was deeply rooted before he was twelve years

old, and was sedulously indulged in spite of headaches and weak eyes: he studied languages, both ancient and modern, delighted especially in poetical reading, and cultivated the musical taste which he inherited from his father. In 1623 he wrote his translations of the 114th and 136th Psalms. February, 1625, when he was a little above sixteen, he was admitted a pensioner at Christ's College, Cambridge. In the same year was written his ode 'On the Death of a Fair Infant;' and in his nineteenth year he produced the verses 'At a Vacation Exercise in College.' In the interval were composed several of those elegies, and other poems, which have gained for him the reputation of being one of the best among modern writers of Latin verse. But there is evidence yet more brilliant of the poetic ripeness of his youth. The 'Ode on the Nativity,' one of the noblest of all his works, and perhaps the finest lyric in the English language, was composed about December, 1629, when the poet was twenty-one years old. The particulars of his life at the university are imperfectly known. The tradition of his having been whipped is ill-vouched and improbable; but the fact would not have been irreconcilable with the ideas of academical discipline which were then prevalent. He does appear to have at first excited the displeasure of the authorities, probably for too free expression of opinions, and certainly for no serious moral offence; but he took his degrees of bachelor and master in the regular course, and was pressed by the fellows of his college to remain at Cambridge. He could not resolve to comply with the wish of his parents that he should enter the church; and he declined also the profession of the law, for which, indeed, he had always a great contempt. In 1632, leaving the university, he went to the house of his father, who had purchased an estate at Horton in Buckinghamshire. In this retreat he lived from his twenty-fourth year to his twenty-ninth; a period which was not only very important in the development of his mind, but very fertile in the fruits of his genius. He read the Greek and

[Milton's Cottage at Chalfont.]

Roman classics, bestowing particular attention on the historians; and, while his study of Spenser and Shakspeare, and their contemporaries, had probably begun in boyhood, there is, in his own poems of this stage, much to prove that he now became exactly as well as admiringly familiar with Italian poetry. Not long after his retirement to the country, must have been produced the verses which he contributed to the

masque of 'Arcades;' his exquisite masque of 'Comus,' one of the masterpieces of English poetry, was acted in Ludlow Castle at Michaelmas, 1634; and in 1638 was printed the monody of 'Lycidas,' a refined embodiment of classical fancies in the interwoven melodies of the Italian lyrists. 'L'Allegro,' and 'Il Penseroso,' likewise, the most beautiful of all descriptive poems, had their birth almost certainly in those few years of 'a calm and pleasing solitariness, fed with cheerful and confident thoughts.' Milton, in short, had already achieved immortal fame. The mantle of the Elizabethan poet had fallen on him: and, though his bright career had now been arrested, he would have been illustrious as the last survivor, and one of the most highly gifted of that energetic and fruitful age. Nor is it uninteresting to note how the dramatic turn, which had been taken by poetry in the latter part of Elizabeth's reign, still affected one whose greatness was to reach its climax in works modelled in another form, and breathing ideas of another cast. The most poetical kind of the old dramas was adopted and ennobled by him in the earliest of his sustained efforts; there is extant, in his own handwriting, a memorandum of a hundred stories, from Scriptural and British history, which had presented themselves to him as fit themes for tragedies, and the treatment of which, in several instances, he lays down in outline; and the same paper contains a plan, the most elaborate of all, for working up, into a tragedy or mystery, the incidents which, in the end, took an epic shape in 'Paradise Lost.' In 1638, Milton's father furnished him with the means of visiting the continent, where he remained fifteen months. He first spent a few days in Paris, and there made the acquaintance of Grotius. He then passed two months at Florence, finding his way readily into literary society, to which, indeed, he recommended himself by the remarkable skill with which he composed Italian verses; and at Arcetri, near that beautiful city, he waited on the illustrious Galileo. Two months more were spent in Rome; and, both there and in Tuscany, his classical predilections, and his sense of beauty in form, were richly nourished by the ruins and the scenery, the Greek sculptures and the masterpieces of Italian painting. In Latin verses, addressed to Manso, the patron of Tasso, he hints at a design of celebrating, in an epic poem, Arthur, the mythical hero of early British history. Naples, where Milton became acquainted with this accomplished person, was the farthest point of his travels. He had intended to visit Sicily and Greece: but the news reached him of the outbreak of disturbances in England; and his zeal on public questions (which had shown itself in Rome by somewhat rash talk on matters of religion,) made him immediately resolve to retrace his steps. Returning to Rome, and crossing the Apennines to Bologna and Ferrara, he passed along Lombardy from Venice to Milan, and thence crossed the Alps to Geneva, where he remained a considerable time.—Milton reached England about August, 1639, and took up his residence in London. The next twenty years were the times of the Civil War, the Commonwealth, and the Protectorate. During this stormy and severe period the poet's lyre was mute. In political questions his views passed rapidly into republicanism: and his ecclesiastical opinions, adverse to episcopacy from his youth, were matured by the conflict around him, till he attached himself to the Independents. Always deeply impressed with the importance of the great controversies of his time, and naturally far from being disinclined to polemics, he threw himself promptly and fearlessly into the vortex of the strug-

gle. For a short time after his return from the Continent, he occupied himself quietly in teaching his nephews John and Edward Phillips, and other boys whom he received into his house. Very soon, however, he began that career as a controversialist, which, while it has exposed him to much obloquy from those who dissent from his opinions, has enrolled his name among the noblest and most eloquent of the writers of Old English prose. His polemical writings are keen and sometimes abusive; but they are singularly able. His first work of this sort was a treatise 'Of Reformation,' published in 1641, to aid the attack then made on the bishops. He next engaged in the famous controversy, in which the five writers on the puritanical side wrote under the anagrammatical name of Smectymnuus: to it he contributed four successive treatises, measuring lances with bishops Hall and Usher. It is interesting to see the poet, in the heat of this fiery contest, looking back with regret on the time when he had lived 'in the still and quiet air of delightful studies,' and avowing his design of still executing, in his own proper sphere, some work worthy of immortality, some work nourished by observation and reading, and by 'devout prayer to that Eternal Spirit, who can enrich with all utterance and all knowledge.'—At Whitsuntide in 1643, being then in his thirty-fifth year, Milton married Mary Powell, the daughter of an Oxfordshire gentleman, of the party of the cavaliers. The courtship seems to have been short; and we know little as to the circumstances which, a few weeks after the marriage, led his wife to visit her father's house, and to refuse to return. The husband was vehemently indignant, publicly disowned her, and proceeded to justify the step by the first of four Treatises, in which he maintains the lawfulness of divorce for disobedience and other causes short of matrimonial unfaithfulness. The publication of these works was decidedly the most unpopular as well as the most objectionable step in Milton's controversial career. Before the last two appeared, he gave forth, in 1644, his treatise 'Of Education,' expressing views which, though tending to Utopianism, are very elevated, and are couched in a strain of finely ornate eloquence. The same year gave to the public the grandest of his prose works, an appeal, against all parties, in behalf of the freedom of the press. It was entitled 'Areopagitica: a Speech for the Liberty of Unlicensed Printing: to the Parliament of England.' Soon after this his wife, contriving to obtain an interview with him by surprise, and entreating his pardon, a reconciliation ensued: she lived with him without further separation; and his three daughters were hers. Her parents, also, being dispossessed of their house by the parliamentarians, were sheltered by Milton; and his interest with the ruling party was actively exerted to procure for his father-in-law a favorable composition with the commissioners of the sequestered estates. It is worth notice, also, that the poet's brother, afterwards a catholic and judge under James II., was one of the sequestered royalists. In 1645 Milton superintended a collected edition of his poems, Latin and English, some of which indeed, *Lycidas* being one, had not till now been acknowledged.—Before this publication, Milton's sight had begun to fail. His left eye was almost blind in 1644, or very soon after. His strong feelings, however, made him, instead of sparing himself, enlarge his field of battle: he passed from ecclesiastical to political questions. In February, 1649, a few weeks after the death of Charles I., he published a treatise, defending his deposition and execution, and entitled 'The Tenure of Kings and Magistrates.'

In March he accepted an appointment as 'Secretary for Foreign Tongues' to the Council of State. The extant order-book of the Council, and many letters also preserved, give evidence of his activity and usefulness in his office. By the desire of the Council, too, though without receiving any payment beyond his salary, he composed his 'Eikonoclastes,' an answer to the 'Eikon Basiliké,' which had been published as a work of the unfortunate king. This was followed by two books, written in Latin, being designed for circulation abroad: the 'Defence of the People of England;' and the 'Second Defence.'—In 1652, before the latter of these works was composed, he had become totally blind: and soon afterwards another Latin secretary was appointed to act along with him; Andrew Marvel holding that place for a while. About this time his first wife died in childbed; and the same fate befell his second wife, Catherine Woodcock, within a year of her marriage, which took place in 1656. It was to her memory that he dedicated his fine sonnet. His blindness, though it made him inapt for regular official business, left him able to perform important public duties. In 1655 he drew up the Protector's Manifesto in justification of the war with Spain: and several controversial treatises came from his pen in the last years of the Protectorate. To his literary employments he now returned with redoubled ardor. Some progress was probably made with his History of England, of which four books had been written before his appointment to the secretaryship; he collected large materials (which were used by the Cambridge scholars in 1693,) for a Latin Dictionary, in amendment of the Thesaurus of Stephens; and there is good reason for believing that, during this period of honored repose, he proceeded a considerable way in the composition of his great epic. The Restoration of 1660 consigned Milton, for the last fourteen years of his life, to an obscurity which, wearing no terrors for his firm soul, gave him full leisure to execute the mighty poetical task he had undertaken. At first he thought it necessary to conceal himself: his friends are said to have made a mock funeral for him; and a proclamation was actually issued for the apprehension of him and Goodwin the theologian. But, though the most offensive of his books were burned by the hangman, he was included in the act of indemnity; and it is even asserted that his former office was offered to him, but of course refused. He had in the end inherited but little from his father, had failed in getting payment of the portion of his first wife, had lost money lent, and had had his house accidentally burnt. Accordingly, his circumstances were now indifferent, yet not very low for a man so moderate in his habits. He published, in 1661, a Latin grammar in English. In 1664 he married his third wife, Elizabeth Minshul, of a good Cheshire family.—In 1665, being in his fifty-seventh year, he completed 'Paradise Lost;' and it was published in 1667. It was sold for five pounds to a bookseller, who engaged to pay a like sum for each fifteen hundred copies that should be sold from each of three editions of two thousand each. In two years the first of these additional payments was due and made; a second edition was published in 1674, and a third in 1678. This was a large sale for a serious poem in an age like that of the Restoration; and, though it could not meet with applause from the fashionable debauchees of the court, the hearty and respectful admiration of Dryden was not the only tribute that was immediately paid, by competent judges, to the extraordinary merit of the only great epic in the English language. The poet next published his

'History of England,' down to the Norman Conquest; and in 1671 appeared the 'Paradise Regained,' to which was subjoined 'Samson Agonistes.' His second epic was written with great quickness, perhaps altogether during a retirement of several months which he made to Chalfont in Buckinghamshire, on the breaking out of the plague in London, in 1665. John Milton, one of the greatest of poets, and the very greatest of all poets who have consecrated their genius to the service of Christianity, had now, amidst evil men and evil days, discharged the debt which, many years before, he had proudly said that he held himself to owe to posterity. He had enriched the world of poetry with a host of the noblest images and sentiments, and in his sacred epic had given to English diction and rhythm new and original developments.—His literary labors closed with a Treatise on Logic, very ably written in Latin; a new treatise in controversial theology, 'Of True Religion,' directed against popery; and a Latin collection, published in 1674, of his private letters and academical exercises. To the latest years of his life may have belonged the completion of his Latin treatise 'Of Christian Doctrine,' which, left unpublished till it was disinterred from the State Paper Office in 1823, showed him to have become decidedly an Arian.—In July, 1674, having long been distressed by gout, and thinking himself near death, he gave his brother directions as to the disposal of his property. These throw some light on his domestic position. The facts exhibit traces of those infirmities of temper with which the great poet is traditionally charged. The current account, which represents his daughters as having been trained to read and write for him, appears to be true only as to Deborah, the youngest; and all of them had lived uncomfortably with him and his third wife, and had left his house some years before his death. He was chiefly served in his studies and in composition by Elwood the Quaker, by other young men who were attracted by his genius, and by boys whom he hired. He now intimated his intention (which his widow unsuccessfully attempted to establish as a completed will) of bequeathing all his property to his wife, leaving to his daughters only, besides what he 'had done for them,' a claim on their mother's family for her portion still unpaid. He spoke of them as his 'unkind children,' and said they had been 'very undutiful to him.' He died, so easily that the moment was not perceived, on Sunday the 8th of November, 1675, and was buried beside his father, in the chancel of St. Giles in Cripplegate. [W.S.]

MINA, DON FRANCISCO ESPOZ Y, a distinguished Spanish general, who, for a long time, was commander-in-chief of the Catalonian army, was a native of Navarre, and born in 1782, at Ydocin, near Pampeluna. He first distinguished himself in guerrilla warfare, and the incessant activity and admirable presence of mind he displayed. Having co-operated in the blockade of Pampeluna, and recovered Saragossa and several other places, he had the mortification to find that, at the general peace in 1814, he had been laboring only to re-establish the despotic policy of Ferdinand VII., and he made an ineffectual effort in the cause of freedom to gain over the garrison of Pampeluna. He then sought an asylum in France; but whilst resident in the French capital, he was arrested by a commissary of police, employed by the Spanish ambassador. On this occasion the conduct of Louis XVIII. was most honorable; he dismissed the commissary, insisted upon

the ambassador being recalled, and not only released Mina, but granted him a pension of 1000 francs. When the army of Cadiz, in 1822, unfurled the standard of freedom, by proclaiming the constitution of 1812, Mina hastened to Navarre, and was advancing against Pampeluna at the head of a few hundreds of followers, when he was informed that the king had accepted the constitution. He was subsequently appointed captain-general of the three armies of Navarre, Catalonia, and Arragon; but when, by the intervention of France, Ferdinand was again enabled to discard his professed adherence to the constitution, Mina left Spain for England, and arrived at Plymouth, Nov. 30, 1823. After the accession of Christina, he took an active part against Don Carlos; but many of his measures partook of the general sanguinary character of this unnatural warfare, and tended to tarnish the laurels he had formerly so nobly won. Died 1836.

MINOT, LAURENCE, an English poet, who flourished in the 14th century, whose works lay in obscurity, as well as his name, till accident discovered them to Mr. Tyrwhitt, while he was preparing his edition of Chaucer. A complete edition of them was published by Ritson, in 1794.

MINTO, GILBERT ELLIOT, Lord, born 1751, commenced his political career in the House of Commons 1794, and was governor-general of Bengal, 1807-1812; died 1814.

MINTO, WALTER, a mathematician and natural philosopher, born in Edinburgh but emigrated to America in 1786; was the author of a book advocating the claims of Napier to the discovery of logarithms, of a demonstration to prove the path of the new planet, and on the theory of the planets, died 1796.

MINUCCIO, M., an Ital. prelate, 1551-1604.

MINUCIUS FELIX, MARCUS, a rhetorician and writer of the 3d century, who is said to have been a native of Africa, and a lawyer by profession. He lived at Rome, where he wrote a dialogue in defence of Christianity, entitled 'Octavius,' which possesses very considerable merit, and was long ascribed to Arnobius, till Baudouin discovered the real author in 1560. Another treatise, 'De Fato,' has also been ascribed to him.

MIRABAUD, JEAN BAPTISTE DE, perpetual secretary to the French academy, was at first a member of the congregation of the Oratory, and afterwards served in the army. His works are translations of 'Tasso's Jerusalem,' and 'Ariosto's Orlando,' into French; 'Alphabet de la Fée Gracieuse,' 'Le Monde, son Origine, son Antiquité,' 'Sentimens des Philosophes sur la Nature de l'Âme.' In 1770 was published under his name, but falsely, an atheistical book, entitled the 'System of Nature,' in 2 vols., the real authors being Diderot and D'Holbach.

MIRABEAU, BONIFACE RIQUETTI, Viscount De, known as 'Barrel-Mirabeau,' was brother to the great tribune, and appeared in the estates-general as his adversary, being deputy from the noblesse of Limousin. He was born in 1754, and having emigrated to Germany in 1790, he died there two years afterwards, commander of a legion which he had raised for the service of the king, and with which he joined the army of Condé.

MIRABEAU, VICTOR RIQUETTI, Marquis De,

father of the preceding, was born in Provence 1715, and died 1789. He was a great political economist, and was called 'the friend of men,' from the title of one of his works. His principles were those of Du Quesnay, and he suffered an imprisonment for them in the Bastille.

MIRABEAU, HONORE GABRIEL RIQUETTI, Comte DE, one of the greatest orators of France, and the first leader of the revolution, was son of Victor Riquetti Marquis de Mirabeau, and was born at Bignon, near Nemours, 1749. Though his family was established in Provence, it was of Italian origin, and Mirabeau derived from his ancestry all the genius and passion which mark the race. At the age of seventeen, his father endeavored to curb his spirit and reform his manners, by a two years' imprisonment in the Isle of Rhé, consigned to the fortress there, under the authority of a Lettre de Cachet. On being liberated he joined a regiment of dragoons, and after serving a year in Corsica, returned to Provence involved in pecuniary difficulties, as a means of extrication from which, he married the heiress of the Marignane family. This lady was already engaged to another, and the attempt to gain her hand was beset with difficulties, all which were overcome by the daring spirit and intriguing policy of Mirabeau, who used the most cruel means to accomplish his purpose. His extravagance, and his old debts still pressed upon him, and his life was so scandalous, that he became the terror of the peasantry around Aix, and is said to have treated his wife with great brutality. An opportunity being afforded the elder Mirabeau, he contrived in 1774 to place his son once more under arrest, first in the castle of If, situated on a rock in the gulf of Marseilles, and afterwards in a fortress of the Jura mountains. In the first named place Mirabeau seduced the only woman it contained, the sutler's wife, and in the latter carried off Sophia de Ruffey, wife of the marquis de Monnier, the only being he ever really loved, and whose loss embittered all his after life, if it did not fire his genius, and render him the reckless man known to history. The lovers took refuge in Holland, where Mirabeau commenced writing for the booksellers as a means of subsistence, and while thus engaged they were both seized by a stratagem, Madame de Monnier being shut up in a convent, and Mirabeau conducted to prison in the castle of Vincennes, where he remained three years and seven months. Previous to his arrest he had been condemned by the parliament of Dijon, *par contumace*, and beheaded in effigy; and all his endeavors to obtain a trial during this long imprisonment were in vain; as were his efforts, pleading with surprising eloquence in his own cause, to recover his wife by law, who procured a divorce from him. The works which he had written up to this period were chiefly licentious productions, but he used the interval of his freedom in 1776 to publish an 'Essay on Despotism,' the fruit of which he had so bitterly tasted. Between the recovery of his liberty and the convocation of the 'Estates-General' in 1789, Mirabeau occupied himself as a political and historical writer, and becoming known to Calonne the finance minister, went to Berlin on some secret mission. His ambition, at the commencement of the national troubles, was to be returned to the estates-general as a deputy for the noblesse; but being rejected by his own order, he threw himself into the arms of the popular party, and was the first in the assembly to defy the royal authority. The occasion was the famous sitting of June 23d, 1789, when the deputies were charged to separate by the king, to the end that each of the

three orders might meet in its own separate place on the morrow. The noblesse and the majority of the clergy departed after the king and his retinue, but the commons still lingered in uncertainty, and Mirabeau began to address them on the mission with which they were intrusted by the nation. He was interrupted by the marquis de Brézé, master of the ceremonies, who reminded them of the king's orders. The orator, flushed with anger, turned upon him with the glare of a lion—'Go, tell your master that we are here by the will of the people, and no power but the force of bayonets shall send us hence!' The commons rallied to his voice as to the call of a trumpet, and instantly decreed the inviolability of the people's representatives, and being joined by some of the noblesse and the clergy, formed themselves into the national assembly, of which body, in January 1791, Mirabeau became president, only two months before his death. We have not space to follow his career in the assembly, and the great questions decided by the magic of his eloquence. His characteristic was *irresistible power*, not only expressed in the deep bass of his voice, but represented in his defiant looks, his large head, his massy black hair, which he shook from his brow like the mane of a lion when he ascended the tribune, and his tall thick-set frame. 'His gestures were commands; his movements coups d'état,' his sonorous phrases became the proverbs of the revolution.' He compared himself to Marius, 'less great for having exterminated the Cimbri than for having prostrated the Roman aristocracy.' The most graphic writers of every shade of opinion have exhausted their skill in words to reproduce him as the people's tribune, 'In fiery rough figure, with black Samson-locks under the slouch-hat, he steps along there,' writes Carlyle in *The Procession*, 'roughest lion's whelp ever littered of that rough breed!' After the first burst of passion as the orator, Mirabeau devised rationally, and intended honestly as the *statesman*. In less than two years from the commencement of his political career, it was terminated by his death, and it cannot be doubted that he foresaw clearly, and was prepared to resist strenuously, the evil designs of those who involved France in such calamities afterwards. It is difficult to believe that a man could be devoid both of shame and virtue in private life, and at the same time act sincerely as a politician, and yet it is highly probable that such was the case with Mirabeau. A man of wild ungovernable passions, he had only just discovered the arena in which he could devote them to *one sufficient end*, and therein lies the whole secret. Like Danton, he took money from the court to support his extravagances, and still pursued his own purposes. When cut off by a sudden illness, 2d April, 1791, he was in all likelihood preparing to dissolve the national assembly, and to undertake the guidance of the nation as minister. He was honored with a magnificent public funeral, and his remains deposited in the pantheon, from which, two years afterwards, they were removed and replaced by those of Marat. [E.R.]

MIRANDA, DON FRANCESCO, a general in the service of the French republic, and the earliest martyr in the cause of freedom in South America, was born at Caraccas, of an ancient Spanish family. He presented to different courts plans for the emancipation of the Spanish American colonies, and with this view went to Paris in 1792, where he connected himself

with Petion and the Girondists. While waiting for an opportunity to commence operations in America, Miranda was appointed general of division under Dumouriez. Some time after he was imprisoned in consequence of his political intrigues. In 1794 he was liberated, but a few months only had elapsed before he received orders to quit France for renewed machinations. This order he evaded; but a second sentence of deportation, in 1797, obliged him to take refuge in England. In 1803 he returned to Paris, and was again banished, for taking part in an opposition to the first consul. Miranda now devoted himself, with all the energy of his character, to the accomplishment of a long cherished scheme, for overthrowing the Spanish dominion in America. Having procured some secret assistance, he sailed from New York in 1806, with one ship and a number of volunteers, and landed in Venezuela; but his attempts to rouse the inhabitants were altogether unsuccessful, and he found himself compelled to re-embark. In 1810 he renewed his attempt with more success, but was finally obliged to capitulate to the Spanish general Monteverde, who, in violation of the articles of surrender, treated him as a prisoner. Miranda was sent to Spain, and confined in the dungeons of the Inquisition at Cadiz, where, in 1816, he died, after an imprisonment of four years.

MIRANDOLA, the name of a distinguished family in Italy, was first borne by FRANCESCO PICO DELLA MIRANDOLA, a chief of the Ghibellines, and prince of Modena, 1312–1321. The next, and most illustrious of the family, mentioned by biographers, was GIOVANNI PICO DELLA MIRANDOLA, one of the greatest lights of his age (next article). After him are mentioned,—GIOVANNI FRANCESCO, his nephew, a great theological and philosophical writer, massacred, with his son, by Galeotto, 1533. GALEOTTO, the nephew and murderer of the preceding, succeeded to the principality, and died 1551. LOUIS, son and successor of the latter, died 1574. MARIE, the last of the dukes of Mirandola, was born 1688, and despoiled of his estates by the emperor Joseph I., in the Spanish war of succession. He retired with his family, who established themselves in France.

MIRANDOLA, JOHN PICO DELLA, was born in 1463. The precocious prince of Mirandola and Concordia showed great accomplishments in his youth, and challenged disputation on abstruse subjects in many of the most famous universities. He had few matches in that age as a finished scholar and acute philosopher, a subtle debater and a polished gentleman, nay, he was deep in theology, and devout in his life. But his sun went down at mid-day, and he died at the age of thirty-two at Florence in 1494. His fond pursuit was an endeavor to harmonize the philosophy of Aristotle and Plato. His works were published at Basel, folio, 1601, and consist of letters, a treatise on the Lord's Prayer, the Kingdom of Christ, the 15th Psalm, and Precepts for a Holy Life, &c. [J.E.]

MIREVELT, M. J., a Dutch painter, 1568–1641.

MIRTECHOND, M., a Persian hist., 1433–1498.

MISSON, MAXIMILIAN, was an eminent Fr. lawyer, who distinguished himself by his pleadings before the parliament of Paris, in behalf of the Protestants. He retired to England on the revocation of the edict of Nantes, and afterwards travelled as tutor to an English nobleman. He published 'A Voyage to Italy,' 3 vols.; 'A Tour in England,' and 'Le Théâtre sacré des Cévennes,' in which the author betrayed his credulity and fanaticism by espousing the cause of the French prophets. He died in London, in 1701.

MITAN, J., an engraver of London, 1776-1822.

MITARK, a chief of the Gayhead Indians, who was converted to Christianity. Died 1683.

MITCHELL, ANDREW, a British admiral, born in Scotland about 1757. In 1776 he accompanied Sir Edward Vernon to India, as a midshipman; and while there his services were such that he was rapidly advanced to the rank of post-captain. On the commencement of hostilities with the French republic, he was appointed to the command of the *Asia*, of 64 guns, and next to the *Impregnable*, of 90. In 1795 he was made rear-admiral; and, in 1799, soon after his promotion as vice-admiral of the white, he joined Lord Duncan off the coast of Holland, and entering the Texel, the Dutch fleet surrendered to him without firing a shot. He was now created a knight of the Bath; in 1802 he was appointed commander-in-chief off the coast of America; and he died, at Bermuda, in 1806.

MITCHELL, SIR ANDREW, English ambassador to Berlin, time of Frederick II., died 1771.

MITCHELL, SIR DAVID, an eminent naval commander in the reign of William III., was descended from a respectable family in Scotland. He commanded the *Elizabeth* of 70 guns at the battle off Beachy Head, where he behaved with great gallantry. In 1693 he was made rear-admiral of the blue, and in 1694 had the honor of knighthood conferred upon him. He was employed in bringing over to England and carrying back Peter the Great, czar of Muscovy, and was also sent on a diplomatic mission to Holland. He died in 1719.

MITCHELL, JOSEPH, a dramatic writer, was born in Scotland, in 1684. He was patronized by Sir Robert Walpole, but died poor, owing to his extravagance and dissipated habits, in 1738. He wrote 'The Fatal Extravagance,' a tragedy; 'The Highland Fair,' a ballad opera; and 'Poems,' in 2 vols.

MITCHELL, JOHN, an Amer. naturalist, author of various ethnological and scientific works, d. 1772.

MITCHELL, THOMAS, a distinguished philologist, was born in London, in 1783, and educated at Christ's Hospital and at Cambridge, and subsequently devoted himself chiefly to private tuition and writing for the press. He contributed several excellent papers to the *Quarterly*, upon subjects connected with Greek manners and literature; and occasionally superintended the classical works that emanated from the Clarendon press; but his chief title to fame rests upon his admirable translation of the Plays of Aristophanes into English verse. Died, 1845.

MITCHILL, STEPHEN MIX, a county judge and U. S. senator, 1743-1837.

MITCHILL, SAMUEL L., an Amer. physician and naturalist, was born in New York, in 1763. He was a professor in the N. Y. College of Physicians and Surgeons, and became widely known for his indefatigable labors in behalf of science. He was the author of various treatises scientific and professional. He rose to some note as a politician, was successively member of the State legislature and of Congress. Died 1831.

MITELLI, A., an Italian painter, 1597-1660.

MITFORD, GEORGE, M.D., a descendant of the ancient house of Mitford, of Mitford Castle, near Morpeth, was born at Hexham, in 1760, and married the only daughter of Dr. Russell, rector of Ashe, Hants. He had one daughter, the celebrated Mary Russell Mitford, the authoress of 'Our Village,' whose truthful and artless delineations of country life and manners have secured for her an enduring fame. Dr. Mitford died Dec. 10, 1842, aged 82.

MITFORD, JOHN, a miscellaneous writer, better

known by the familiar appellation of 'Jack Mitford. At an early age he entered the royal navy, where he attained the rank of lieutenant, fought under Hood and Nelson, and at the end of the war retired on half-pay. But having, during the early investigation into the conduct of queen Caroline, been detected as the fabricator of some letters, and thereby lost not only his rank and emoluments, but also his station in society, he had to depend for support on his literary talents. It appears that his versatility was such, that it was a matter of little consequence to him, whether his theme were grave or gay, while the facility with which he wrote verse was really extraordinary: thus we find him editing the *Scourge* and *Bon Ton Magazines*, and other works of a similar cast, while he edified the world by his contributions to religious periodicals, or charmed it by those lyric effusions, which were graced by the classic typography of a St Giles's press, and rendered popular by the sweet voices of itinerant vocalists. His principal work is entitled 'Johnny Newcome in the Navy,' a poem descriptive of sea life. He died in St. Giles's workhouse, Dec., 1831.

MITFORD, JOHN FREEMAN, Baron Redesdale, an eminent chancery lawyer, member of parliament, and speaker of the House of Commons in 1801, subsequently lord chancellor of Ireland, and one of the privy council, died 1830.

MITFORD, MARY RUSSELL, an English authoress, was born at Alford, Hampshire, in December, 1786. Her taste for literature developed itself in childhood, and she had published a volume of poems before she was four and twenty. Her father was a physician of good family, remarkable for his extravagance and selfishness, and seeking by little and mean devices costly personal indulgences. Miss Mitford's early life was comfortable, but her father contrived to run through half a dozen fortunes, shifted about to half a dozen grand residences, and passed the last 25 years of his life in a cottage where, humble as seemed his mode of life, he could not keep out of debt, and was not ashamed to beg perpetually from the friends whom his daughter had made by her filial piety, her many labors for him, and the ever amiable cheerfulness and contentment of her affectionate disposition. She never could see the faults of her father. At first she wrote merely to please herself, but after surrendering to her parent one legacy after another left to her by opulent relatives on both sides, and after the handsome fortune of her mother had been squandered by her father's folly, she resorted to her pen for the sake of earning money whereby to live. In her poverty she retired to a cottage in the vicinity of Reading, and there she remained during the residue of her father's long and useless life. In describing what she saw around her she produced 'Our Village.' This was first written in separate papers, and Campbell made the mistake of refusing them admission into his magazine. They were published in a collected form in 1823, and from that time Miss Mitford wanted neither literary employment nor remuneration. She toiled for her father's support until his death in 1842, and in 1851 removed to a cottage at Swallowfield, still near Reading, where her last days were more comfortable. Though not gifted with lofty genius or commanding powers of any sort, Miss Mitford has been sufficiently conspicuous in the literary history of her time to claim our notice. Her talents and her character were essentially womanly; and she was fortunate in living in an age when womanly ability in the department of letters obtained respect and observance as sincerely and readily as womanly character commands reve-

rence and affection in every age. She died on the 10th of January, 1855, at the age of 69.

MITFORD, WILLIAM, an eminent historical and philological writer, was born at London, in 1734; studied at Queen's College, Oxford, and then at the Middle Temple; but he early quitted the profession of the law, and obtained a commission in the Hampshire militia, of which he rose to be colonel. He was, successively, M.P. for Newport, in Cornwall, Beeralston, and New Romney. He was professor of ancient history at the Royal Academy; and, besides his principal work, 'The History of Greece,' he published 'An Essay on the Harmony of Language,' 'A Treatise on the Military Force, and particularly the Militia of this Kingdom,' 'Observations on the History of Christianity,' &c. Died 1827.

MITHRIDATES, the *first* of the name, king of Pontus, reigned 402–363. The *second*, 336–302 B.C. The *third*, 302–265 B.C. The *fourth*, 266–222 B.C. The *fifth*, son and successor of the preceding, chiefly known by his war with the inhabitants of Sinope, ended his reign about 184 B.C. The *sixth*, who was the first of the kings of Pontus to form an alliance with the Romans, ascended the throne about 157, and was assassinated B.C. 124. The *seventh*, or the *sixth*, according to some accounts in which our *fifth* is omitted, is the subject of the following notice.

MITHRIDATES, surnamed 'the Great,' king of Pontus, and greatest enemy of the Roman power, was son of Mithridates V., whom he succeeded at the age of eleven, B.C. 123. Soon after attaining his majority, he commenced his career of intrigue and conquest by attacking the Colchi and the empire of the Bosphorus, and, by the year B.C. 90, had openly broken with the Romans, the track of whose power he had often before crossed in Asia. To explain how, in a few years, he became so formidable to the rulers of the world, we ought to mention that the rapacity and corruption of the Roman proconsuls had excited a spirit of hatred and revolt in nearly all their provinces. It was, in fact, the declining age of the patrician republic, when a social war was created by the struggles of the privileged classes to withhold the rights and the very name of Roman citizens from the masses of their subjects. Spartacus in Italy, Sertorius at the head of all Spain in revolt, and the names of Marius and Sylla sufficiently characterize the nature of those critical times. Mithridates found the people of the East ripe for change, and he was hailed as their deliverer by whole populations wherever his standard appeared. In the first flush of his success, the inhabitants of Asia Minor rose against the Roman citizens dwelling among them, and it is estimated at the lowest computation that 80,000 persons, of all ages and of both sexes, were put to death, whether by order of Mithridates, or as a spontaneous act of vengeance, can never be determined. Quick and indefatigable in his movements, Mithridates was soon master of nearly all Asia Minor, besides Greece taken by Archelaus, his lieutenant; and so surprising was his talent for the acquisition of languages, that he was able to converse with the natives of twenty-two different nations subject to him. The fortunes of Rome at this crisis, B.C. 87, were intrusted to Sylla, who led his army through Greece; and, by the capture of Athens and the victories of Chæronea and Orchomena, restored the Roman power in that country. For four years Mithridates disputed possession of Asia, but was at last compelled to succumb, with the loss of more than 200,000 men, and to confine himself to his hereditary dominions,—not, however, without more fighting

during the execution of the treaty, which is sometimes regarded as a second war between him and the Romans. After the death of Sylla, which occurred in B.C. 78, Mithridates levied another army, numbering about 160,000 men, with a determination to expel the Romans from Asia. With this force he awaited his opportunity, and when the kingdom of Bithynia was reduced to a Roman province, which happened on the death of Nicomedia, he invaded the country, and, having beaten the army of Cotta, laid siege to Cyzicum. Obligated to retreat by Lucullus, who was appointed consul B.C. 74, he was followed by the victorious Romans into his own states, and driven to seek a refuge in Armenia, then ruled by Tigranes, who refused to deliver him up. Here, in fact, with the facility of a Buonaparte, Mithridates, raised a third great army, and, in B.C. 67, completely defeated the Romans under Triarius, the lieutenant of Lucullus, who had been recalled; and, following up his success, rapidly recovered the larger part of his dominions. The Romans, whose power was at this time trembling in the balance, were reduced to invest Pompey with absolute power in the East, and by him, in B.C. 76, the forces of Mithridates were completely routed in a night attack near the Euphrates. Far from giving up a struggle which had lasted nearly forty years, this extraordinary man, after remaining some time in concealment, suddenly appeared at the head of another army, with the vast design of marching into Italy, where he had reason to hope his forces would be joined by the Gauls. This gigantic enterprise produced a revolt among his troops, headed by his son, Pharnaces, whom they proclaimed king; and Mithridates, after a single attempt to subdue it at the head of his guards, endeavored first to poison and afterwards to stab himself; and both attempts failing, caused one of his Gaulish mercenaries to put an end to his existence. Thus perished, in B.C. 64, the most formidable enemy that Rome had ever encountered, and, in many respects, one of the most remarkable men of those ages. He was honored with a magnificent funeral by Pompey, and Rome breathed again on hearing of his unexpected and unhappy end. In regard to the charges of cruelty brought against him, it ought to be remembered, as pointed out by a recent historian of the Roman emperors, that the materials for the history of Mithridates are furnished by his enemies, the chief source of them being the memoirs of Sylla. [E.R.]

MITHRIDATES, the *first* of the name, king of Parthia, surnamed 'the Great,' succeeded B.C. 164, died, after conquering Media, Persia, Babylonia, and Mesopotamia, 139. The *second*, reigned 126–86 B.C. The *third*, 61–53 B.C.

MITTIE, J. S., a Polish physician, 1727–1795.

MITZLER, LAURENCE CHARLES DE KOLOF, an eminent German musical composer, was born at Vettleshiem, in 1711; received his education at Anspach; and, in 1731, removed to the university of Leipsic, where he not only perfected himself in musical science, but made a considerable proficiency in mathematics and natural philosophy. He afterwards settled at Warsaw, where he became so great a favorite at the court, as to obtain from the king a patent of nobility. His principal works are, 'A Musical Library,' 3 vols., and 'The Elements of Thorough Bass.' Died 1778.

MIZAULD, A., a Fr. astrologer, 1520–1578.

MOAWIAH, first Ommiade caliph, 661–680.

MOAWIAH II., third Ommiade caliph, 683–704.

MOCHI, F., an Italian sculptor, 1580–1646.

MODEER, A., a Swed. naturalist, 1738–1799

MODIUS, F., a Flemish critic, 1546–1597.

MOEHLER, JOHN ADAM, professor of Romish theology at Tübingen, and author of many learned works in theology and church history, 1796–1836.

MOEHSEN, JOHN CHARLES WILLIAM, physician to Frederic the Great, was born at Berlin in 1722, studied at Jena and Halle, and was a member of various learned institutions. He wrote several works relating to the history of medicine and its professors; and died in 1795.

MOELLENDORF, RICH. JOACHIM HENRY, Count de, a Prussian general, born in 1724. His behavior at the battles of Molwitz and Kotowitz, in the first Silesian war, having attracted the notice of Frederic II., whom he accompanied thither as a page, he was promoted to a company in the guards; became a colonel in 1761, afterwards lieutenant-general, and in 1783, governor of Berlin. During the disgraceful dismemberment of Poland, in 1793, he commanded the Prussian troops, and did every thing in his power to alleviate the misfortunes of the Poles. On his return home he was created a field-marshal and governor of South Prussia; and succeeded the Duke of Brunswick in the command of the Prussian army on the Rhine, in 1794, when he gained the victory of Kaiserslautern. He was present at the battles of Jena and Auerstadt, where he was wounded, and he died in 1816.

MOESER, JUSTUS, an eminent German advocate and author, was born at Osnaburgh, in 1720; was educated at Jena and Göttingen; acquired great popularity on his return to his native place as an advocate and counsellor of justice; and died in 1794.

MOESTLIN, M., a Lutheran divine, died 1650.

MOET, J. P., a French author, 1721–1806.

MOFFAN, N. DE, a Fr. historian, 16th century.

MOGGRIDGE, G., an English writer, author of the popular Series of 'Old Humphrey,' d. 1854.

MOHLER. See MOEHLER.

MOHNIKE, T. C. F., a Ger. *savant*, 1781–1841.

MOHSIN, FANI, a Persian poet, died 1670.

MOINE, P. C. LE, a French *savant*, 1723–1780.

MOIRA, F. RAWDON, earl of, a general and statesman of the period of Fox and Pitt, distinguished in the American war, and more lately in La Vendée, born 1754, died governor-general of the East Indies, 1829.

MOIR, DAVID MACBETH, born in 1798, at Musselburgh, in the county of Edinburgh, settled as a medical practitioner in his native town, and till his death practised his profession there with eminent ability and success. He became known in literature by poetical contributions to *Blackwood's Magazine*, which, beginning about 1817, were soon marked by the writer's signature of 'Delta,' and continued to be furnished very frequently during the remainder of his life. Some of these were collected in two separate volumes: 'The Legend of Genevieve, with other Tales and Poems,' published in 1825; and 'Domestic Verses,' (several of which are very beautiful,) in 1843. Destitute of strong invention and original imagination, the poetry of 'Delta' is yet extremely pleasing, through its refinement of sentiment, its frequent flow of sweetly natural pathos, and its grace and delicacy both of diction and of imagery. He was still more successful in a very different walk, that of familiar comic portraiture in prose. His compositions of this kind, contributed to *Blackwood* at intervals during several years from 1824, were collected and published separately as 'The Life of Mansie Wauch.' This autobiography of a country tailor, though clearly suggested by Galt's Scottish daguerreotypes, has great humor and originality of

its own. Dr. Moir was likewise the author of 'Outlines of the Ancient History of Medicine,' and of a volume of Critical Remarks on Recent English Poetry, which had been delivered as lectures not long before his death. He died in July, 1851, regretted as one whose amiability and uprightness were quite worthy of his fine taste and various accomplishments. [W.S.]

MOIVRE. See DE MOIVRE.

MOJON, J., an Italian chemist, 1776–1837.

MOLA, PETER FRANCIS, an eminent painter, born in 1609, at Coldra, in the Milanese. He was a pupil of Albani, and is distinguished both as a landscape and historical painter. Died 1665.

MOLAI, JAMES DE, last grand master of the Templars, was born of a noble family in Burgundy, and entered the order about the year 1265. He was elected grand master, though absent from the East, on the death of William de Beaujeu, and was present at the recovery of Jerusalem by the Christians in 1299. After fresh reverses suffered in Palestine, Molai found himself in Cyprus, and was mustering his forces for renewing the conflict, when a summons from the pope obliged him to return to France in 1305. The avowed object of his recall was to take measures for uniting the Templars and Knights Hospitalers in one body. The want of union among the different military orders having occasioned much scandal and provoked many hazards in Jerusalem. Our knowledge of the facts is very obscure, but it is certain that the great wealth of the Templars had excited the avarice of Philip the Fair, and this, conjoined with political and religious reasons, produced an understanding between him and the pontiff for their destruction. On the 30th of October, 1307, all the Templars throughout France were arrested by surprise, and their property seized, while the inquisitors proceeded to examine them by torture and parole evidence on various charges of heresy, immorality, and unnatural crimes. As usual in such cases, many confessions were made to escape the agony of the rack, many died under the infliction, many recanted afterwards, and were burnt alive at the stake, and nearly all who suffered, exhibited the devotion and constancy of martyrs. James de Molai, and others of the order, appealed to the judgment of the pope, who held an oecumenical council on the subject in 1311, and in May, 1312, published a bull abolishing the order. The grand master, after a long imprisonment, was cruelly burnt alive, by a slow fire, on the 18th of March, 1314, at Paris. An apology for the Templars was published by Father Lejeune, Paris, 1789, and a history of their condemnation, written by Pierre Dupuy, appeared at Brussels, probably a reprint, 1751. This illustrious order took its name from the temple of Solomon, and inherited the traditions and spiritual symbols connected with its foundation—the same, perhaps, that are faintly recognized in freemasonry. While it cannot be doubted that many such wandering knights were of licentious lives, and that their esoteric doctrines were inconsistent with the papal dominion, it is absurd to suppose that the crimes committed by individuals were the laws of their order. They were just a more chivalrous kind of Illuminati than those of the last century, possessed higher traditions, a more earnest purpose, and that great temptation to their destruction, immense wealth.

MOLARD, F. E., a Fr. engineer, 1774–1829.

MOLE, EDWARD, a French magistrate, time of Henry IV., 1558–1614. His son, MATTHEW, chancellor during the war of the Fronde, 1584–1656.

MOLÉ, FRANCIS RÉNÉ, an eminent French co-

median, born at Paris, in 1734. During the progress of the revolution he became an associate of the Jacobins, and impiously officiated in the church of St. Roch, as the priest of the goddess of Reason. Died 1802.

**MOLE, MATTHEW**, a French magistrate, remarkable for his probity and courage in the most troublesome times, was born at Paris, in 1584; became president of the parliament, and keeper of the seals; and died in 1656.

**MOLE, JOHN**, an Englishman, who was eminent for his skill and knowledge in the science of algebra. Born of poor but respectable parents, Mr. Mole was indebted to a fortuitous circumstance for the discovery of his talent. Having, when a farmer's servant, been sent to a carpenter's shop for a load of timber, a workman asked him whether he could tell how many cubical quarters of inches could be cut out of a solid foot of wood; upon which Mole replied, he could tell how many could be cut out of ten thousand solid feet. He then answered the question—How many farthings there were in a million of moidores, of the value of twenty-seven shillings each. Hitherto Mole had set down his figures in chalk, and asked his fellow-servants to decipher them; but from that period he applied diligently to acquire a knowledge of figures. He died in 1827.

**MOLESWORTH, ROBERT**, Viscount, an Irish statesman, born at Dublin in 1656, and educated at Trinity College. When James II. landed in Ireland, he caused his estate to be confiscated; but, on the settlement of affairs under William III., he was made a privy-councillor, and sent ambassador to Copenhagen, where he had a dispute with the king, which induced him to return home abruptly. He then published 'An Account of Denmark,' which was considered as a libel on the country, and complained of as such by the Danish ambassador in London. In 1714 he was made a commissioner of trade and plantations; and two years afterwards raised to the Irish peerage. He died in 1725.

**MOLEVILLE, ANTHONY FRANCIS BERTRAND DE**, a French statesman, was born at Toulouse, in 1744. He was minister of the marine in the reign of Louis XVI.; and when the revolution broke out, he sought an asylum in England, where he resided twenty-two years, and published 'Memoirs of the Revolution,' and several other works on that subject. During his residence in London he acquired such a command of the English language as to write in it 'A History of England.' Died, at Paris, 1819.

**MOLIERE** is the name which **JEAN BAPTISTE POQUELIN** assumed on becoming a player, and by which he is celebrated as the best comic writer of France. He was born in 1622, in Paris, where his father was a 'tapissier,' or upholsterer, holding also an appointment in the royal household. The poet, designed for his father's trade, was poorly educated till he was fourteen years old; after which, having been inspired by his grandfather with a love both for reading and for plays, he obtained from his parents, with difficulty, the means of studying in the College de Clermont; and there, besides making other acquaintances that gained patronage for him, he attracted the notice and approbation of the philosopher Gassendi. In his nineteenth year, having been appointed to fill his father's place as 'valet-de-chambre tapissier' to the king, he began to attend at court: his taste for the drama was now confirmed by the fashion which had been set by Cardinal Richelieu; and he put himself at the head of a few young persons who, playing at first as amateurs, soon be-

came actors by profession.—From about 1645, Molière's history is lost amidst the wars of the Fronde; but he appears to have wandered in the provinces with his troop, and to have composed slight pieces for them, till 1653, when his first regular comedy, 'L'Etourdi,' was played at Lyons with great success. In Languedoc, next year, he produced 'Le Dépit Amoureux,' and, bent on his favorite pursuits, refused to become the secretary of his old school-fellow, the Prince de Conti. In 1658, Molière and his company, finding their way to Paris, received the patronage of the court: he was by this time an excellent actor; and he immediately showed that he possessed both a power of observation and of original invention, and a skill in dramatic construction, much exceeding any thing that had appeared in his two earlier pieces. His clever satire on literary and accomplished ladies, called 'Les Précieuses Ridicules,' was followed by his humorous farce, 'Le Cocu Imaginaire': 'L'Ecole des Maris,' and 'Les Fâcheux,' made him still more famous as a witty and correct painter of life and manners: and the series of his plays continued to be rapidly increased till 1673, when it was ended with his life, by 'Le Malade Imaginaire.' Some of his comedies, such as that last named, 'Le Médecin Malgre Lui,' 'Le Bourgeois Gentilhomme,' and 'George Dandin,' are chargeable, notwithstanding their liveliness, with degenerating into broad farce. But several of his comedies, though they do not indeed support his fame at the extravagant height to which his countrymen raise it, are yet fully sufficient to justify his rank as at once one of the most brilliant and skilful of all comic dramatists, and as the very best of those that have written comedies on the formal French model. Such praise belongs especially to 'L'Ecole des Femmes' (1662), in which is his famous character of Agnes; 'Le Misanthrope' (1666), of which Wycherly's 'Plain-Dealer' is an imitation, with improvement in management and degradation in morality; 'Le Tartuffe' (1667), so deservedly celebrated for its powerful picture of hypocrisy in the person of the hero; and 'Les Femmes

[Tomb of Molière.]

Savantes' (1672), in which groundless pretensions are ridiculed with great force of humor.—In 1662, being forty years old, he married an actress of seventeen, whose light-minded coquetry embittered his comfort. He is described as having been a thoughtful, generous, and good-hearted man, and more popular with his players than managers are wont to be. He prided himself on his skill in playing low comedy, as much at least as on the fame he won as a dramatic poet. And he all but died on the stage. In acting 'Argon' on one of the earliest appearances of his own last comedy, he was seized with convul-

sions, and soon suffocated by blood from the chest. His body was refused admission to consecrated ground, till the king prevailed on the archbishop of Paris to allow a private funeral. [W.S.]

MOLIERE, F. DE, a French novelist, died 1623.

MOLIERES, JOSEPH PRIVAT DE, a philosophical writer, was born at Tarascon, in 1677; became a member of the congregation of the Oratory; and was a pupil of Malebranche, on whose death he quitted the society, and devoted himself wholly to physics and mathematics. He was afterwards professor of philosophy at the royal college, and died in 1742. His works are, 'Philosophical Lectures,' 4 vols.; 'Mathematical Lectures,' and 'La Premier Partie des Elémens de Géometrie.'

MOLIN, JAMES, usually called Dumoulin, a celebrated French physician, was born in 1666; became chief physician to the army in Catalonia, at the age of 26; and on his return to Paris, in 1706, added to his reputation by his cure of the Prince of Condé. In his medical practice he was so partial to venesection, that it is supposed Le Sage intended to satirise him under the character of Dr. Sangrado. Died 1755.

MOLINA, A. DE, a Spanish philologist, 1496-1584.

MOLINA, J. I., a Mexican naturalist, 1740-1829.

MOLINA, LOUIS DE, a Spanish Jesuit and theologian, was born at Cuenza, in 1535; was professor of theology at Evora for 20 years; and died in 1601. He was the author of a treatise on free will, entitled 'De Concordia Gratiae et liberi Arbitrii,' which gave rise to such a furious contest between the Dominicans and the Jesuits, that the pope found it advisable to issue a bull, in order to suppress it.

MOLINERI, J. A., an Italian painter, 1577-1640.

MOLINET, CLAUDE DU, canon regular and procurator general of the congregation of St. Génévieve, was born at Chalon-sur-Marne, in 1620, and died in 1687. He was the author of 'The Epistles of Stephen, Bishop of Tournay, with Notes,' 'History of the Popes by Medals,' and other works illustrative of ecclesiastical antiquities. He collected a large cabinet of curiosities, and placed the library of St. Génévieve in the state for which it is so celebrated.

MOLINET, JOHN, a French poet of the 15th century; author of 'Fautes et Dits,' &c. He was almoner and librarian to Margaret of Austria, and historiographer to the house of Burgundy. Died 1507.

MOLINIER, WILLIAM, a celebrated troubadour of the 14th century, whose 'Lays-d'Amors,' is a curious monument of the state of literature in the south of France at that period.

MOLINOS, MICHAEL, was born in the neighborhood of Saragossa in 1627, but was chiefly resident in Rome. In 1670 he published in Spanish his famous book, 'The Spiritual Guide,' which was translated into Italian, and published at Rome in 1681. The object of the treatise was to teach that the pious mind must possess quietude in order to its spiritual progress, that for this purpose it must be abstracted from visible objects, that thus drawn within itself, it becomes susceptible of heavenly influence, and that the special functions of intellect and will are merged wholly in God. This species of mysticism was named Quietism. As it was in antagonism with the emphasis laid by the Church of Rome on external ceremonies, it brought down upon its author the hostility of the Jesuits and the higher powers. Molinos was thrown into prison in 1685, and though he re-

canted his errors, yet was he in 1687 condemned to perpetual imprisonment, and he died unreleased in 1696. This system was espoused in France by Madame Guyon, and the good and great Fenelon, bishop of Cambray. [J.E.]

MÖLLER, DANIEL WILLIAM, a learned Hungarian, 1642-1712.

MÖLLER, H., a Lutheran divine, 1530-1589.

MÖLLER, J., a German philologist, 1661-1725.

MÖLLERUS, J. H., a Dutch statesman, minister of war in 1814, 1753-1830.

MOLNAR, A., a Hungarian philologist, b. 1574.

MOLLOY, CHARLES, a political writer and dramatist, was born in Dublin, and educated at Trinity College. He afterwards became a student of the Middle Temple, and was the editor of a political paper, called 'Common Sense.' He died in 1767. His plays are, 'The Perplexed Couple,' 'The Coquet,' and 'Half-pay Officers.'

MOLYN, PETER DE, called 'the Elder,' a Dutch landscape painter and etcher, born about 1600. His son of the same name, called 'Cavaliere Tempestu,' and 'Pietro de Mulceribus,' famous for his storm pieces, 1637-1701.

MOLYNEUX, SIR WILLIAM, a gallant knight in the reign of Henry VIII., who displayed great bravery at the battle of Flodden Field. On his deathbed he gave this advice to his son: 'Let the underwood grow; the tenants are the support of a family, and the commonalty are the strength of a kingdom. Improve this fairly; but force not violently, either your bounds, or your rents, above your forefathers.'

MOLYNEUX, WILLIAM, an ingenious mathematician, was born at Dublin, in 1656. The philosophical society, established at Dublin in 1683, owed its origin to his endeavors, and he became the first secretary. Soon after, he was appointed surveyor-general of the works, and chief engineer. In 1685 he was chosen a member of the Royal Society, and in 1689 he settled with his family at Chester, where he employed himself in finishing his 'Treatise on Dioptrics,' which was published in 1692. In this year he returned to Dublin, and was chosen one of the representatives for that city. Besides the above, he wrote 'Sciothericum Telescopium;' also, 'The Case of Ireland stated, in relation to its being bound by Acts of Parliament in England;' and some papers in the Philosophical Transactions.—SAMUEL MOLYNEUX, his son, was born at Chester, in 1689; became secretary to George II., when prince of Wales; and was distinguished by his skill in astronomy.

MOLZA, FRANCIS MARIA, an Italian poet, was born at Modena, in 1489. He excelled in various kinds of poetry, combining elegance of style with striking imagery and elevated ideas; but he was a man of dissipated manners, and died a victim to his vices and licentiousness, in 1544.—His granddaughter, TARQUINIA MOLZA, who married Paul Porrino, was born in 1542, and died in 1617. Her works consist of translations from Plato, and other classical writers, with Latin and Italian poems, for which her family was honored by the Roman senate with a patent of citizenship.

MONACI, L. DE, a Venetian annalist, died 1429.

MONALDESCHI, MARQUIS DE, a nobleman attendant on Christina, queen of Sweden, whom she caused to be assassinated at Fontainebleau, 1657.

MONARDES, NICHOLAS, a Spanish physician, was born at Seville, and educated at Alcalá; after which he settled in his native place, and died there in 1578. His works are, 'De secunda Vena in Pleuritide inter Græcos et Arabes Concordia,' 'De Rosa, et Partibus ejus,' and 'Dos Libros de las cosas

que se traen de las Indias Occidentales, que sirven al uso de Medicina.' The last work has been translated into Latin, French, Italian, and English; and the name of Monardes is perpetuated by the botanical genus *Monarda*, in the class *Diandria* of *Linnaeus*.

**MONBEILLARD, PHILIBERT GUENEAU**, a distinguished French naturalist, born at Semur, in 1720. He obtained great reputation in the scientific world, by his continuation of the 'Collection Académique,' a work consisting of every interesting circumstance in the memoirs of the learned societies of Europe; afterwards became the associate of Buffon, in his great work on natural history; nor was any difference of style in their writings observed, until Buffon himself announced him in his preface. Died 1785.

**MONBODDO, LORD.** See **BURNETT**.

**MONCE, F. DE LA**, a painter of Munich, died 1753.

**MONCEY, ADRIEN**, duke of Conegliano and marshal of France, was born at Besançon, in 1754. Though he entered the army at 15 years of age, he did not become a captain till 1791, and in 1793 having been sent to the Pyrenees at the head of the 'chasseurs Cantabres,' he so distinguished himself by his gallantry, that in a short time he became successively general of brigade and general of division. In 1795 and 1796 he made a most successful campaign in Spain and Italy; and after the peace of Luneville, he was appointed inspector general of the gendarmerie; in which capacity he rendered such important services to Napoleon, that he was made one of his first marshals of 1804, and soon afterwards created duke of Conegliano. In 1808 he once more took part in the war with Spain, and contributed to the capture of Saragossa in 1809; but, during the last years of the empire, he ceased to take part in military operations which he disapproved, and did not reappear till 1814, when he tried, as major-general of the national guard, to defend the walls of Paris, laying down his arms only after the capitulation was signed. After the 'hundred days,' he refused to preside at the council of war appointed to try Marshal Ney; and for this generous act he was imprisoned in the fortress of Ham for three months, deprived of all his functions, and expelled from the chamber of peers, to which, however, he was readmitted in 1819. In 1823 he joined the Duke d'Angoulême in his invasion of Spain, and finished his military career with a success worthy of his first exploits. He was afterwards nominated governor of the Hotel des Invalides, and in this capacity received the ashes of Napoleon in 1840. Died 1842.

**MONCIEL, T. DE**, a Fr. statesman, 1790–1831.

**MONCONYS, BALTHASAR DE**, a traveller, was born at Lyons. After receiving a liberal education at the university of Salamanca, he visited the East, for the purpose of tracing the remains of the philosophy of Trismegistus and Zoroaster; but returned without accomplishing the object of his mission, and died in 1665. His travels were printed in 3 vols.

**MONCRIF, FRANCIS AUGUSTIN PARADIS DE**, a member of the French academy, was born at Paris, in 1687; became the favorite of fashionable society by his musical, theatrical, and poetical talents; and died in 1770. His principal works are, 'An Essay on the Art of Pleasing,' and a romance, entitled 'Les Ames Rivaless.'

**MONET, PHILIBERT**, a Fr. *savant*, 1566–1643.

**MONETI, F.**, an Italian satirist, 1635–1712.

**MONGAULT, NICHOLAS HUBERT**, a French writer, was born at Paris, in 1674. He became a

member of the congregation of the Oratory; but after teaching with reputation in the college at Mons, he quitted the society, and went to live with the Archbishop of Toulouse, who procured him a priory. He was afterwards tutor to the Duke de Chartres, son of the Duke of Orleans; was made secretary-general to the French infantry, and obtained other places through the interest of his pupil. He was also a member of the French academy, and that of Inscriptions. Died 1746.

**MONGE, GASPARD**, born at Beaune in 1746; died at Paris, 28th July, 1818: one of the very greatest of those illustrious scientific men who graced and exalted the Republic, the Consulate, and the Empire. Educated as a military engineer at the college at Mezières, he was transferred to the school of the Louvre in 1780, and thus was on the spot, prepared to sustain his part in those subsequent stupendous events which stunned Europe. It must not be supposed that in the Revolution Monge figured as a politician; neither at any period of his life did he evince sympathy with the mere struggles of Party; but among the foremost, he came, with all the energy of genius, in aid of the Convention, when France first stood at bay, and then single-handed beat back the Coalition and shivered their Empires. That was indeed a time! The super-human gallantry of the nation, and the prodigious force with which it rose in defiant vindication of its existence and rights, so strike one with amazement, and even at this late day so stir the blood, that, for the moment, one inclines to forget its crimes. It must be recollected, that not only was the enemy on the frontier, but the supply was stopped of all those substances, even to the raw material, which had to be wrought into weapons of defence; the means of procuring iron, steel, saltpetre, gunpowder, and many articles of prime necessity 'were,' says Biot, 'created during the reign of Terror.' The superintendence, or in terms more appropriate, the *creation* of the Engineering, fell in large part to Monge; and it was out of his herculean exertions to man the fortresses and instruct the new army, that those world-famous schools—the *Ecoles Normale* and *Polytechnique*—at that time sprung up. Nor were the ties ever severed that bound him to the fortunes of France. Side by side with their young Buonaparte during the ever-memorable campaigns of Italy, he afterwards formed one of the expeditions to Egypt, whose records his pen has so largely enriched; and he kept the warm friendship of the Emperor, to the close of Napoleon's own career. It will be remembered as one of the earliest and meanest acts of the Restoration—that purging of the Institute, which got rid, by *expulsion*, of several associates to whom it then owed great part of its splendor: surely it is brighter honor to MONGE that he shared the fate of CARNOT, than if he had preferred to repent and be rewarded with Laplace!—Monge's achievements, however, were not merely those of Action. He contributed in many ways to improve analysis, and made important steps in the application of analysis to Geometry: but that which makes his name imperishable, is a stroke of pure genius, constituting an epoch in the Science it advanced. While yet a young officer in the engineers, the happy thought occurred to Monge, that by a new and peculiar method of projection, every solid figure might be represented on plane canvas, so accurately that the relations of its various points might be determined by rule and compass. Applying his idea in the first place to the solid works of fortification, &c., he soon discerned that he held in his hand the principles of a Geometry altogether

new, and of exhaustless capacity; and that remarkable method was elaborated accordingly, which is now known as '*Descriptive Geometry*.' A new Geometry, by every right,—the Method of Monge has already conferred the highest benefits on all departments of practical science; and it has opened to pure Geometry long courses of investigation, to which analysis alone had previously the key. No work yet exists exposing the foundation and nature of Descriptive Geometry as well as Monge's own: through its perspicuity, its taste, its comprehensiveness, it ranks as a classic in mathematics. It is said that the oral expositions of this remarkable person were as fascinating as his books. His pupils considered him the ideal of a philosophic teacher; and a few who still survive, continue to speak of his lessons as among their most delightful recollections.

MONGE, Lieutenant-colonel, a French officer employed by Napoleon, after his return from Elba, to go secretly to Vienna, to bring off Maria Louisa and her son to France. He succeeded, by various disguises, to reach Vienna, and was very near accomplishing his purpose, when the Austrian police got information of the plan, and Monge was compelled to fly. He got back to France, and fought bravely in the battle of Waterloo; but was eventually reduced to such distress as to work as a common laborer, and died in the hospital of St. Louis, in 1829.

MONGELLAZ, MADAME, a French writer, author of '*The Influence of Women upon Manners*,' 1798–1830.

MONGEZ, JOHN ANDREW, a French physician and naturalist, 1751–1788. His brother, ANTHONY, author of several historical works, 1747–1835.

MONGITORE, A., a French antiquarian, 1663–1743.

MONK. GEORGE MONK, general under the commonwealth, and duke of Albemarle after the restoration, was born in Devonshire in 1608. He devoted himself early to a military life, and had acquired some experience in the wars on the continent, when the civil war broke out in England between Charles and his parliament. Monk at first served on the king's side; but he was taken prisoner in 1645, and after lying two years in prison, he consented to take a commission in the parliamentary army. He commanded first for his new masters in Ireland, where he distinguished himself greatly. He afterwards acted as lieutenant-general under Cromwell in Scotland, where he aided much in gaining the victory of Dunbar. Cromwell left him with 5,000 men to complete the subjugation of Scotland, a work which Monk effectually performed. He was next employed as an admiral of the commonwealth's fleet, and he shared in the perils and the glories of the desperate struggle with the Dutch navy, which Blake so successfully conducted. He was taken soon back to command in Scotland; and for five years he kept that kingdom in helpless submission to Cromwell, and in unprecedented order and tranquillity. On the first protector's death, Monk proclaimed Richard Cromwell as Oliver's successor; but he soon discovered the weakness of the new ruler, and determined to follow that policy by which he would both connect himself with the strongest party, and also lay that under the greatest possible obligation to him. He temporized for some months; listening to the advances of all sides, and saying little in return.—He brought his army from Scotland to London, and contrived to dupe the parliamentarians and republicans to the very last. He had made up his mind that the royalist cause was the strongest,

and he carried on negotiations with the Stuart princes, by which he secured high rewards for himself as the price of conducting their restoration. In February, 1660, Monk threw off the mask altogether, commanded the dissolution of the remnant of the long parliament, and ordered a free one to be convened. He introduced a messenger from the king to the new parliament; and on the 3d of May, Monk received Charles II. on the beach at Dover. He was rewarded by the dukedom of Albemarle, and large grants of offices and money. He went to sea again in 1666, against his old enemies the Dutch, and maintained his reputation for courage and conduct. He died in 1670. Monk had strong nerves, strong common sense, a cold heart, an accommodating conscience, a careful tongue, an unchanging countenance, and an imperturbable temper. He showed considerable skill in civil government as well as in military affairs. He had shrewdness enough to see what was best for the nation's interest; and, if it also promoted his own, he had ability and vigor enough to bring it to pass. He was never unsettled by enthusiasm in determining his ends, and he was never checked by principle in choosing his means.

MONK, MARY, daughter of Lord Molesworth, and wife of George Monk, Esq., was celebrated for her poetical genius. She was well acquainted with the Latin, French, Italian and Spanish languages. Died 1715.

MONK, NICHOLAS, brother of the famous duke of Albemarle, became bishop of Hereford, d. 1661.

MONMOUTH, JAMES, duke of, whose attempt to place the crown of England on his head forms an interesting and bloody chapter in our history, was a natural son of Charles II., by Lucy Walters, and was born at Rotterdam, in 1619. He was brought up in France as a catholic, and on the restoration of Charles, was treated with every mark of affection by him, and acquired immense popularity by the possession of qualities which are always dear to the people—generosity and courage, united to a handsome person and affable manners. It was reported that the king had been privately married to Lucy Walters, and the popular dislike of the duke of York, afterwards James II., gave occasion to hopes that her son might succeed to the crown—hopes which were fast ripening into plots under the guidance of such men as Shaftesbury—when the king was prevailed upon by his brother to declare in council that the duke of Monmouth had no claims to legitimacy. In 1679, Monmouth was intrusted with a command in Scotland, and defeated the covenanters at the battle of Bothwell Bridge, 22d June, but was soon afterwards sent beyond seas at the instigation of his uncle. A few months afterwards he returned without leave, and became the centre of the popular movements provoked by the arbitrary conduct of Charles, and the dread of the succession in the person of the duke of York—the same struggle in which the lives of Lord William Russel, and Algernon Sidney were sacrificed. The result to Monmouth was his exile in Holland, where he resided with the Whig refugees until the accession of James presented him with the long desired opportunity of trying the issue with his sword. It is one of the problems of history how far the prince of Orange favored this enterprise. The duke landed in the neighborhood of Lyme, in June, 1685, with only 80 followers, and within twenty-four hours was at the head of 1,500 men, while the royal troops were mustering to oppose him, under the command of Churchill, afterwards the famous duke of Marlborough, and hundreds of per-

sons were arrested for alleged complicity. Before the action took place which terminated this rash enterprise, Monmouth was proclaimed king at Taunton, and had mustered nearly 6,000 men, all colliers and rustics—none of the Whig aristocracy or the regular army joining him, as he had been led to hope. The hostile forces met at Sedgemoor, in Somersetshire, and more than a thousand of the undisciplined followers of Monmouth were killed before they yielded the field. The duke was captured in a miserable condition, near Ringwood, in the New Forest, and was executed on Tower Hill, on the 15th of July. The executioner was John Ketch, who had also beheaded Russel. Monmouth was the idol of the people, who refused for a long time to believe that he was really executed; and it is curious to speculate on what might have been the issue of his enterprise had he deferred it a year or two longer, when the undisguised tyranny of James, and the hopes of the catholics were prostrated by the glorious revolution of 1688. [E.R.]

MONNET, J., a French writer, died 1785.

MONNETT, ANTHONY GRIMOALD, an eminent French chemist and inspector-general of the mines, was born in Auvergne, in 1734. He was one of the very few who cultivated the science, that rejected the great discoveries and theories of Lavoisier, and it consequently lessened his reputation. He wrote a variety of works, besides analyses and memoirs in the *Journal de Physique*; and died in 1817.

MONNIER, L. G., a Fr. engraver, 1733–1804.

MONNIER, P. LE, a French philos., 1575–1657.

MONNIER, SOPHIE DE RUFFY, Marquise De, a French lady of great personal and mental accomplishments, who became the mistress of Mirabeau, and committed suicide after the death of one of her subsequent lovers, 1789.

MONNOT, A., a French anatomist, 1765–1820.

MONNOT, P. T., a Fr. sculptor, 1658–1733.

MONNOYE, B. DE LA, a Fr. poet, 1641–1727.

MONOD, H., a Swiss statesman, 1753–1833.

MONOD, P., a Jesuit of Savoy, 1586–1644.

MONOYER, F. B., a Flemish painter, 1635–99.

MONPON, H., a French composer, 1804–1841.

MONRO, ALEXANDER, an eminent physician and anatomist, of Scottish descent, was born in London, in 1697. After studying under Cheselden, and travelling on the Continent for improvement, he was, in 1719, appointed professor and demonstrator of anatomy to the company of surgeons at Edinburgh; where, soon after, he instituted that course of instruction for which its medical school is so highly celebrated. This was followed by the foundation of an hospital, where he delivered courses of clinical lectures; and also formed a society for collecting and publishing professional papers; the result of which appeared in six volumes of 'Medical Essays,' and two more on 'Physical and Literary Subjects.' Besides the papers contained in these volumes, the doctor published a work, entitled 'Osteology, or a Treatise on the Anatomy of the Bones;' and an 'Account of the Success of Inoculation in Scotland.' Died, 1767.—His eldest son, Dr. ALEXANDER MONRO, succeeded, on the death of his father, to the anatomical professorship; and published numerous works, among which are, 'Observations on the Nervous System,' 'The Structure and Physiology of Fishes,' 'A Description of the Bursæ Mucosæ,' 'Three Treatises on the Brain, Eye, and Ear,' 'Observations on the Crural Hernia,' 'Outlines of the Anatomy of the Human Body,' 4 vols.—His second son, Dr. DONALD MONRO, became a physician in the army; and wrote 'Observations on the Means of

preserving the Health of Soldiers,' 2 vols.; and a 'Treatise on Medical and Pharmaceutical Chemistry,' 4 vol. Died 1802.

MONRO, ALEXANDER, eldest son of the preceding See MUNRO ALEXANDER.

MONRO, DONALD, second son of Alexander, author of a 'Treatise on Medical and Pharmaceutical Chemistry,' 1731–1802.

MONRO, JOHN, a writer on insanity, 1715–1791.

[James Monroe.]

MONROE, JAMES, a president of the United States, was born, in 1758, in Westmoreland County, Virginia. He entered the revolutionary army as a cadet, and, being soon after appointed a lieutenant, marched to New York, where he joined the army under Washington. He was engaged in the battle of Harlem Heights, in that of White Plains, in the retreat through the Jerseys, and in the attack on Trenton. In the last he was in the vanguard, and received a ball through his left shoulder. For his conduct in this action he was promoted to a captaincy. Subsequently he was attached to the staff of general Lord Stirling, with the rank of major, and he fought by the side of Lafayette, when that officer was wounded at the battle of Brandywine. He was afterwards promoted to the rank of colonel; and at the end of the contest, in 1783, he was elected a member of Congress. In May, 1794, he was appointed minister plenipotentiary to France, but recalled from this mission in 1796, by president Washington, with strong marks of dissatisfaction, for having succumbed too much to the overbearing policy of the French directory. He went, however, to London in the same capacity, at a juncture of great importance; and, in 1811, was appointed secretary of state. Six years afterwards, the war department being in a very embarrassed state, he was chosen president, in 1817, as the successor of Mr. Madison; and, in 1821, re-elected by a vote unanimous, with a single exception. He died on the 4th of July, 1831, the anniversary of American independence.

MONS, J. H. VON, a Belg. chemist, 1765–1842.

MONSIAU, N. A., a French painter, 1754–1837.

MONSYING, P. A., a Fr. composer, 1729–1817.

MONSON, SIR WILLIAM, an English naval officer, was born at South Carlton, in Lincolnshire, in 1569; was educated at Baliol College, Oxford; entered the naval service; served in several expeditions in the reign of Elizabeth; and was knighted by the Earl of

Essex, for the conduct in the expedition to Cadiz. In the reign of James I. he distinguished himself against the Dutch, and died in 1643.

MONSTIER, A. DU, a French historian, d. 1662.

MONSTRELET, ENGUERRAND DE, a French chronicler of the 15th century, born about 1390, and died in 1453. He was provost of Cambrai, and bailiff of Walincourt; and wrote a chronicle of events, from the year 1400 to 1453, the year in which he died.

MONTAGU, the name of a noble family, descended from one of the Norman barons who accompanied William the Conqueror to England. The most noted in English history are—EDWARD, who contributed to the overthrow of the duke of Somerset, in the reign of Edward VI., died 1556. EDWARD, earl of Sandwich, a general, admiral, and statesman, who served the commonwealth in company with Blake, and became a royalist of the restoration, born 1625, killed in combat with the Dutch 1672. CHARLES, earl of Halifax, a statesman of the reign of William III., 1661–1715. JOHN, fourth earl of Sandwich, a diplomatist and statesman, author of a voyage round the Mediterranean, 1718–1792. GEORGE, an admiral, 1750–1829. And besides these, three celebrated names in the literary history of England mentioned below.

MONTAGU, BASIL, an English lawyer and writer, died 1851, aged 81. He was the natural son of John, fourth earl of Sandwich, a first lord of the admiralty, and was educated by him. Montagu was the editor of an excellent edition of Lord Bacon's works, and the writer of a life of the celebrated philosopher. He was a strenuous advocate for mitigating the severity of the English penal code.

MONTAGU, EDWARD WORTLEY, son of the preceding, was born at Warncliffe Lodge, in Yorkshire, about 1714. He received his education at Westminster School, whence he eloped, and became a chimney-sweep. His family had given him up for lost, when a gentleman recognized him in the street, and took him home to his father. He escaped a second time, and engaged with a master of a fishing smack; after which he shipped himself on board a vessel bound to Spain, where he served a muleteer. In this situation he was discovered, and conveyed home to his friends, who placed him under a tutor, with whom he travelled abroad. His father being rather scanty in his remittances, owing probably to the son's extravagance, the tutor is said to have committed a curious fraud to obtain a supply. This was the printing a book, entitled 'Observations on the Rise and Fall of Ancient Republics, by Edward Wortley Montagu, Esq.' This work, whether the production of the son or not, gave great pleasure to the old gentleman, who acknowledged it in a handsome manner. On his return to England, he obtained a seat in the House of Commons, where he sat in two successive parliaments. His future conduct was marked by eccentricities not less extraordinary than those by which he had been distinguished in the early part of his life. He went to Italy, where he professed the Roman Catholic religion, and from that he apostatised to Mahometanism. After passing many years in Egypt, and other countries on the Mediterranean coasts, he died as he was about to return to England, at Padua, in 1776.

MONTAGU, G., a naturalist, died 1815.

MONTAGU, LADY MARY WORTLEY, whose family name was Pierrepont, was the daughter of the earl (afterwards duke) of Kingston. She was born in 1690, received a solid and somewhat masculine education, and when she was twenty years old trans-

lated, from the Latin, not the Greek, the *Encheiridion* of Epictetus. Marrying, in 1712, Mr. Edward Wortley Montagu, she became, through her beauty and wit, at once a chief ornament of fashionable society, and a flattered friend of Addison, Pope, and other men of letters. In 1716 she went abroad with her husband, then appointed ambassador to Constantinople. Her residence of two years in the East produced her celebrated 'Letters,' pieces abounding both in liveliness and in observation, and altogether reckoned deservedly among the very best things of their kind. On her return home she was able, not without much opposition, to introduce in England the practice of inoculation for small-pox, to which, seeing it in Turkey, she had submitted her own son. She wrote verses freely for many years, and continued to keep up her intimacy with literary men; but she quarrelled with Pope, and was pilloried by him in some of his bitterest verses. She spent several years on the continent, chiefly residing near Venice: and, coming again to England, died in 1762. Her daughter married George III.'s favorite minister, the earl of Bute. [W.S.]

MONTAGUE, ELIZABETH, an eminent female writer, was the daughter of Matthew Robinson, Esq., of Yorkshire, and was born in 1720. She had an opportunity of prosecuting her studies under the direction of Conyers Middleton, to whom she was probably indebted for the tincture of learning which so remarkably influenced her character and manners. About 1742 she married Edward Montague, a descendant of the first Earl of Sandwich. Mrs. Montague published 'An Essay on the Writings and Genius of Shakspeare,' which obtained a great and deserved reputation. She formed a literary society known by the name of the 'Blue Stocking Club,' from the circumstances that Mr. Benjamin Stillingfleet, a gentleman belonging to it, wore stockings of that color. Mrs. Montague was noticed for another peculiarity, that of giving an annual dinner on May-day to the chimney-sweepers of the metropolis. She died in 1800, and her epistolary correspondence in 4 vols. was afterwards published.

MONTAIGNE, MICHEL, SEIGNEUR DE, was born in 1533, in the French province of Perigord, on the small estate from which his noble and ancient family took their name. The course of his boyish education was very eccentric: among other peculiarities of it, he was taught Latin by speaking it in childhood, to the exclusion of French, which he learned afterwards as a foreign tongue. When we remember that Montaigne was a Gascon by birth and breeding, this fact may account for the comparative purity of his style. He was sent to the college of Guienne at Bourdeaux, at a very early age, before George Buchanan had ceased to be a teacher there. Being a younger son, he studied law, and was for some years a counsellor in the parliament of Bourdeaux: but, succeeding early to his father's moderate property, he was for the remainder of his life a country gentleman. He resided almost constantly at his own chateau, making, however, tours in France, visiting Paris, (where he had an honorary post in the royal household,) and journeying through Italy for his health in his later years. Living in the troubled time of the League, he was, though attached to the royal party, disgusted by many things done on both sides; and, obstinately remaining inactive, and distrusted by both factions, he was once driven from his house, and had his estate ravaged. About 1572, when he was full of horror at the massacre of St. Bartholomew, he began to record the fruits of his desultory reading and musings. His

'Essays' first appeared in 1580, but were repeatedly altered, and very much enlarged, till they reached their complete shape in 1588. They show much of historical and other knowledge, with a great amount of shrewd and original but rambling thought. They are made remarkably amusing and interesting by the garrulous egotism with which the writer keeps himself continually before us; parading, without reserve, all the features of his character, his generous good-heartedness, his love of ease, his triumphant vanity, and his singular and touching combination of devout feeling with sceptical doubts, on points of religion as well as on philosophy. He died in 1592, in the sixtieth year of his age. His observations, embracing the whole circle of human life, have been a rich storehouse of ideas for succeeding authors; and, not long ago, the autograph of Shakspeare was found on a copy of the earliest English translation of the 'Essays.' **MONTALBANI, COUNT J. B.**, an Italian officer in the Venetian service, author of a work on the manners of the Turks, 1596-1646. His son, **MARC-ANTONIO**, a naturalist, 1630-1695. **OBIDIO**, brother Count Montalbani, a naturalist and philosopher, 1601-1671.

**MONTALDI, P. J.**, an Italian Hebraist, 1730-1816.

**MONTALEMBERT, ADRIAN DE**, a military engineer distinguished as a general in the seven years' war, and at the period of the revolution as the adviser of Carnot, 1714-1800.

**MONTALEMBERT, MARK RENÉ**, Marquis de, a French general, was born in 1714, at Angoulême; entered the army early in life; and in the seven years' war was attached to the staff of the armies of Russia and Sweden, to give an account of military operations to the French ministry. He published a work on fortification, besides three volumes of correspondence on military subjects; and papers in the memoirs of the academy of sciences.

**MONTALTO**, the name of two doges of Genoa,—1. **LEO**, reigned 1383-1384. 2. **ANTONIO**, elected 1393, deposed and re-elected 1394, deposed again 1411.

**MONTALVAN, LUIS PEREZ**, a Spanish dramatist, died 1639.

**MONTANO, or DA MONTI, JOHN BAPTIST**, an Italian physician, and translator of some of the Latin classics, 1488-1551.

**MONTANO, J. B.**, an Italian architect, d. 1621.

**MONTANO, R. G.**, a Span. protestant, 16th ct.

**MONTANUS**, the founder of a famous heresy in the second century, lived in the village of Ardaban, on the confines of Phrygia. As Neander remarks, 'the Phrygian temperament' is seen in that form of nature-worship, filled with magic and ecstasies for which the province was already famous. The special supernatural element of Christianity

struck with amazement such a people—its miracles, tongues, and early gifts of knowledge and prophetic rhapsody. The object of Montanus was to subordinate every thing else in the church to those superhuman and brilliant endowments, and to cast into the shade its ordinary teaching and government. Thus he maintained that he was the promised Paraclete—not the Divine Spirit, indeed, but the predicted enlivener, purifier, and Comforter. He threw himself into states of transport, and raved with fluent sublimity. A new church was founded at Pepuza, their New Jerusalem, and visions, tongues, and nervous spasms, were a daily spectacle. The followers of Montanus, among whom were two ladies, caught the infection, and the contagious mesmerism quickly spread. It was thought that the apostolic age was revived, and that the phenomena of Pentecost were to be vouchsafed in augmented and interminable splendor. A transcendental code of morality was also proclaimed, and in which fasts, penances, and celibacy, held a prominent place. Tertullian was fascinated by the delusion, and became the most famous and eloquent advocate of the system. Montanism, in the essence of it, has not been confined to Phrygia, for it has been often witnessed in Europe, and has even crossed the Atlantic. [J.E.]

**MONTANUS, BENEDICT ARIAS**, a Spanish Benedictine, was born at Frexenal, in Estremadura, in 1527, and educated at Alcalá. He was at the council of Trent, and, on his return to Spain, was employed in editing a polyglot Bible, in 8 vols. He was one of the most learned divines of the 16th century, and died at Seville, in 1598.

**MONTAUSIER, CHARLES DE ST. MAURE**, Duke of, was born in Touraine, in 1610, and died in 1690. He was governor to the dauphin, to which office he was appointed in 1668; and such was his character for integrity, and the upright manner in which he always conducted himself, that he was called by the people 'the virtuous man who always tells the truth.' Died 1690.

**MONTBELIARD, LEOP. EBERHART**, Prince De, an officer in the service of Austria, 1670-1725.

**MONTBRUN, C. DUPAY**, Seigneur De, a protestant commander disting. at Jarnac and Montcontour, in the civil wars of France, 1530-1574.

[Montcalm.]

**MONTCALM, LOUIS JOSEPH DE**, Marquis of St. Veran, a distinguished French general, was born of a noble family at Condiac in 1712, and entered the army at an early age. He commanded with distinguished reputation in Italy, Bohemia and Ger-

many. In 1756 he was made a field-marshal, and sent to Canada as the successor of Dieskau. War had at this time, in effect, been carried on between the French and English in America for two years; but no formal declaration was made until England proclaimed hostilities in May, 1756. The command of the British troops in North America was confided to General Abercrombie until the Earl of Loudoun could come over. Montcalm had command of the French, and in August, 1756, besieged and took Fort Ontario at Oswego, and entirely demolished the fortifications in presence of the Six Nations of Indians, in whose territory they had been erected, and whose jealousy had been excited by their construction. In 1757 he marched with an army of 9,000 men against Fort William Henry, and laid siege to it. The garrison consisted of between two and three thousand regulars, besides which General Webb was stationed at Fort Edward, not very distant, with 4,000 men. Montcalm, however, acted with such vigor that in six days Colonel Monroe, commandant of Fort William Henry, was compelled, after an honorable and spirited resistance, to capitulate. The garrison was to be allowed the honors of war, and to be protected from the Indians until within reach of Fort Edward. But no sooner had they left the Fort, than, despite all the efforts of Montcalm to prevent it, the savages fell upon the troops of the conquered garrison and committed the most horrible murders. In 1759 the British resolved on an attack upon Quebec, the conduct of which was confided to Major-General Wolfe, while the French were commanded by Montcalm. Wolfe determined to land his troops at night under the heights of Abraham, and, by climbing a precipice, difficult enough of ascent even in the day-time, to have his army by the morning light upon the summit which overlooked the city. He accomplished his purpose so secretly that Montcalm was incredulous when informed, at the opening of the day, that the enemy was in battle array upon the heights. Soon convinced, however, of the fact, he perceived that a battle was inevitable and instantly prepared for it. Wolfe was equally ready, and the fight soon commenced, and became general. Both commanders were mortally wounded and the minds of both

[Monument to Montcalm and Wolfe.]

were fully occupied with the events of the battle when they were rapidly passing from time into eternity. Victory settled on the side of the English. When dying on the field, the English general heard the words, 'they run,' he exclaimed, 'Who run?' 'The French,' was the answer. 'Then I die happy,' said he, and immediately expired. Montcalm for a

time survived the effects of his wound. When told by the surgeon that his death was certain—'I am glad of it,' said he, 'how long shall I survive?' 'Ten or twelve hours, perhaps less.' 'So much the better, I shall not live to see the surrender of Quebec.' It may be doubted whether France ever had a better soldier, and she certainly never sent to her American possessions a commander at all comparable to him in soldierly qualifications. He died on the 19th of September, 1759.

MONTCHAL, C. DE, a Fr. prelate, 1589–1651.

MONTCHRESTIEN, ANTHONY, a French playwright, and writer on political economy, d. 1621.

MONTEBELLO, DUC DE. See LANNES.

MONTECORVINO, J. DE, a French miner, known as a missionary to Tartary, 1247–1330.

MONTECUCULLI, RAYMOND DE, a celebrated general, was born in 1608, of a distinguished family in the Modenese, and entered into the service of the emperor of Germany. In 1634, at the head of 2,000 horse, he surprised 10,000 Swedes, and took their baggage and artillery; but he was soon after defeated, and taken prisoner. In 1637 he defeated Razolzi, prince of Transylvania; in 1664 he gained a splendid victory over the Turks at St. Gothard; and, in 1675 and 1676, he commanded on the Rhine, and foiled all the efforts of 'Tourenne, and the Prince of Condé by his masterly manœuvres. He died in 1680. Montecuculli wrote some excellent 'Memoirs' on the military art, and a treatise on the 'Art of Reigning.'

MONTECUCULLI, SEBASTIANO DE, a gentleman of Ferrara, put to death on the allegation of having caused the death of the son of Francis I., supposed to have been poisoned in 1536.

MONTEGRE, A. F. JENIN DE, a French physician, and wr. on animal magnetism, 1779–1808.

MONTEMAYOR, GEORGE DE, a Castilian poet, was born in 1520, and took his name from the place of his birth. After serving in the army, he was employed at the court of Philip II., where he died in 1562. He wrote 'Diana,' a pastoral romance, which was continued by Gaspar Polo.

MONTEMERLO, J. S., an Italian poet, 1515–1572. His son, NICHOLAS, histor. of Tortona, 1618.

MONTENAU, C. P., a Fr. wr., died 1749.

MONTERCHI, J., an Ital. antiquarian, 17th c.

MONTEREAU, P. DE, a Fr. architect, d. 1266.

MONTEREUIL, BERNARDIN, a learned Jesuit, born at Paris, in 1569, and died in 1646. His chief works are, 'A History of the early State of the Church' and 'A Life of Jesus Christ,' which are highly esteemed.

MONTESPAN, FRANCES ATHENAIS, Marchioness De, one of the mistresses of Louis XIV., was born 1641, married to the marquis de Montespan in 1663, and supplanted the duchess de la Valliere in the affections of the king, 1668. She maintained her influence over Louis several years, and had three children by him, but was compelled to give way on his marriage with Madame de Maintenon. Died 1717.

MONTESQUIEU, CARL DE SECONDAT, Baron De, was born on the 18th January, 1689, at the castle of La Brède, near Bourdeaux, whence he held another title of nobility. He was a very hard student in his youth. He seems at first to have devoted himself to physical science, but he turned his more mature attention to law, the hereditary profession of his family. In the year 1717 he succeeded both to the family estate and to the perpetual presidency of the parliament of Bourdeaux. While he occupied that high judicial office he laboriously performed its functions. His conscience would not permit him to

[Birthplace of Montesquieu.]

sacrifice the public business to his literary and philosophical tastes, and he resigned his chair in 1726. He had five years earlier printed the most popular, but not the most important of his works, the '*Lettres Persannes*.' A violent literary dispute has arisen from the question whether he withdrew or disavowed some of the religious opinions in this work, with the view of removing the king's opposition to his being a member of the Academy—at all events he succeeded in gaining his object. In 1748 he published his '*Esprit des Lois*,' one of the most laborious books ever written. It had an immense influence on the literature of the age, and founded that method of philosophising and finding out facts to justify opinion, which characterized his followers of the French school, and entered in a great measure into the spirit of the Scottish school of philosophy. Like most original minded men he brought to his work a degree of genius and knowledge which his imitators could not cope with, and which concealed, in his hands, the defects of the system. His life is the history of his works, and the even tenor of his days were little disturbed by external events. Little is known of his personal character and habits, and it is hence interesting to find a curious notice of him in the memoirs of Lord Charlemont. He, when a young man, visited Montesquieu. They set off together on a ramble, when, as the narrator says, 'we soon arrived at the skirts of a beautiful wood, cut into walks, and paled round, the entrance to which was barricaded with a movable bar, about three feet high, fastened with a padlock—"Come," said he, searching in his pocket, "it is not worth our while to wait for the key; you, I am sure, can leap as well as I can, and this bar shall not stop me." So saying he ran at the bar and fairly jumped over it, while we followed him with amazement, but not without delight to see the philosopher likely to become our play-fellow. This behavior had exactly the effect which he meant it should have. He had observed our awkward timidity, and was determined to rid us of it.'—(*Memoirs*, 33). Montesquieu died in February, 1755. [J.H.B.]

MONTET, J., a French chemist, 1722–1782.

MONTEITH, or MONTEITH, ROBERT, names common to two Scottish writers, one on historical subjects, and the other a collector of all the epitaphs of Scotland; last century.

MONTEZUMA, emperor of Mexico at the time of the Spanish invasion. Having, by his despotic government, made himself many enemies, they willingly joined Cortez, and assisted him in his progress. Seized in the heart of his capital, and kept as a hostage at the Spanish quarters, he was at first treated

with respect, which was soon changed into insult, and fetters were put on his legs. He was at length obliged to acknowledge his vassalage to the king of Spain, but he could not be brought to change his religion. He died in 1520, from being struck on the temple with a stone, while persuading his tumultuous subjects to receive the Spanish yoke. Charles V. gave a grant of lands, and the title of count of Montezuma, to one of the sons, who was the founder of a noble family in Spain.

MONTFAUCON, BERNARD DE, a celebrated French critic and antiquary, was born at the castle of Sontage, in Languedoc, in 1655; became a Benedictine monk, after having engaged in the military service; and died in 1741. He was a voluminous writer; but the most important of his works is that treasure of classical archæology, entitled '*L'Antiquité expliquée et représentée en Figures*.'

MONTFORT, A. DE, a Dutch painter, 1532–83.

MONTFORT, L. M. GRIGNON DE, a Fr. Jesuit and missionary, kn. as a relig. founder, 1673–1716.

MONTFORT, SIMON DE. 1. This name, famous in the middle age history of France and England, was first borne by a knight crusader, descended from the lords of Montfort, near Paris. His career dates from 1199, when he went to the Holy Land, companion-in-arms of Thibault, count of Champagne, but it becomes of more historical importance in 1208, when he was appointed chief of the barbarous crusade against the Albigenses, then protected by Raymond, count of Toulouse. In 1213 he obtained a great victory at Muret over the confederated armies of that prince, of his brother-in-law, Peter, king of Arragon, and the nobles who had united with them, and was then appointed by the pope sovereign of all the countries conquered from the alleged heretics. He was killed while besieging Toulouse, 1218. 2. The SIMON DE MONTFORT of English history, was a younger son of the preceding, who quitted France either in 1231 or 1236, in consequence of a dispute with Queen Blanche, mother of Saint Louis. He was the heir of estates in England, which had been held by his family in the reign of King John, and on going to settle there, received possession of them with the title of earl of Leicester. Henry III., in fact, received him into great favor, permitted him to marry his sister, the countess dowager of Pembroke, and appointed him lieutenant-general, or seneschal, of Gascony. From this time the interest of English history turns on the disputes between this turbulent subject at the head of a confederacy of the barons and the crown, the first incident in it being Montfort's recall from his government. In 1258 Henry had convoked a parliament, to procure supplies for the conquest of Sicily. The occasion was seized by Montfort and the barons, to make an armed protest against his government, the end of which was the appointment of twenty-four of their number, with Montfort as president, to administer the affairs of the kingdom. Such a truce could not in the very nature of things be of long duration. The king and his son, Prince Edward, endeavoring to reconquer the royal authority by force of arms, were defeated at the battle of Lewes, 1264, an event which transferred the government, in reality, to Simon de Montfort, though he acknowledged the bishop of Chichester and the earl of Gloucester as his associates. In the year following, January, 1265, De Montfort convened a parliament, in which representatives were sent from the boroughs for the first time on record, and thus originated the *House of Commons*. He was now the leader of the popular party, and was obliged to take the field by the disaffection of the earl of Gloucester,

who soon after, with many other of the barons, joined Prince Edward, previously a captive with his father in the camp of Montfort. The battle of Evesham, 5th August, 1265, decided the contest. Simon de Montfort, overpowered by numbers, fell in the midst of his friends, and the ruin of his family succeeded as a matter of course. [E.R.]

**MONTGERNON, LOUIS BASIL CARRE DE**, a counsellor of the parliament of Paris, famous for his vindication of the miracles wrought at the tomb of the Abbé Paris, for which he was imprisoned in the Bastille, and then exiled, 1686–1754.

**MONTGLOT, MARQUIS DE**, a French historian, camp-marshal time of Louis XIII. and Louis XIV., 1610–1675.

**MONTGOLFIER, JACQUES ETIENNE**, the inventor of air-balloons, was born in 1745, at Vidallon-les-Annonai. In conjunction with an elder brother, he devoted himself to scientific pursuits, and was the first who manufactured the vellum paper, still so much admired for its beauty. One day while boiling water in a coffee-pot, the top of which was covered with paper folded in a spherical form, he saw the paper swell and rise—a circumstance that furnished him with the idea of a light machine, made buoyant by inflation, and traversing the air. After various preliminary trials, it being ascertained that a balloon, with a car attached to it, could be kept suspended by a supply of heated air, the experiment was repeated on a large scale at Versailles, when the Marquis d'Orlandes ascended in the presence of the royal family, and a vast concourse of spectators. He died in 1799. His brother, before mentioned, who was the inventor of a hydraulic machine, called the water-ram, died in 1810.

**MONTGOMERY**, the name of a noble family, sprung from **ROGER DE MONTGOMERY**, a companion-in-arms of William the Conqueror. The son of Roger was banished the kingdom in the reign of Henry I., and one of his descendants was created earl of Eglinton by James IV., 1502. **GABRIEL MONTGOMERY**, a member of this family, had the misfortune to wound Henry II., in a tournament, of which the king died, 1559. He afterwards distinguished himself in the religious wars of France, and was beheaded by order of the catholic queen, Catherine de Medici, 1576.

**MONTGOMERY, GEORGE WASHINGTON**, an official in the Department of State of the United States, and miscellaneous writer, was born in Spain. His best known works are an historical novel entitled, 'Bernardo del Carpio,' and a translation into Spanish of Irving's 'Conquest of Grenada.' Died 1841.

**MONTGOMERY, JAMES**, an English poet, was born in Scotland in 1771. His father was a Moravian minister, who died while his son was yet a child. The young Montgomery at the age of 12 had already shown the poetical bias of his mind, by the production of various small poems. He was apprenticed to a chandler, but fretted at the uncongenial occupation, and resolved upon freeing himself from its drudgery, and accordingly started away from the shop, determined upon trying his fortune in London. He broke down by the way, and was compelled to seek a subsistence by hiring himself as a shop-boy. His second attempt was more successful, and he arrived in London, with no money in his purse, but with a MSS. volume of poems in his pocket. The publisher to whom he offered his poetical work, refused it, but accepted his services as an attendant in his shop. In 1792 he had the good luck to make the acquaintance of Mr. Gales of Sheffield, who was about establishing a newspaper called the 'Sheffield

Register.' Mr. G. appreciated the talent of Montgomery and availed himself of it in his new journal. The proprietor being forced to fly the country in consequence of the publication of an article, which exposed him to the prosecution of the government, the control of the paper devolved upon the young poet, who changed its name to that of the 'Sheffield Iris.' He supported liberal political views in its columns, and became in his turn amenable to the despotic laws against the freedom of the press, and was punished by a fine and imprisonment. His chief poems were 'Prison Amusements,' 'The Ocean,' 'The Wanderer in Switzerland,' 'Greenland,' 'Pelican Island,' various hymns, &c. Died 1854.

**MONTGOMERY, RICHARD**, a major-general in the revolutionary army, was born in Ireland in 1737. He entered the army of Great Britain and was with Wolfe at the taking of Quebec in 1759. On his return to England he resigned his commission and emigrated to America. On the breaking out of the revolution, the command of the continental forces in the northern department was bestowed upon him. He reduced Fort Cherokee and took Montreal. He fell on 31st Dec. 1775, in an attempt upon Quebec, being struck by a ball from the only gun fired by the enemy. A monument was erected to his memory in front of St. Paul's Church, in the city of New York.

[Monument to Montgomery, St Paul's Church, New York.]

**MONTHOLON, Count De**, a French general under Buonaparte. He was strongly devoted to Napoleon, and followed him with his family into exile on St. Helena. Died in Paris 1853.

**MONTI, J.**, an Italian botanist, 1682–1760.

**MONTI, P. M.**, an Italian cardinal, 1675–1754.

**MONTI, VINCENZO**, one of the most celebrated poets of modern Italy, was born at Fusignano, near Ferrara, in 1753; and became as notorious for the versatility of his political principles as for his poetic talents. He commenced his career as secretary to Luigi Braschi, nephew of pope Pius VI., and was then a violent enemy of the French; he afterwards became a republican; next a panegyrist of Napoleon; and ended by eulogising the emperor of Austria. His 'Basvilliana,' written on the murder of Hugo Basseville, the French ambassador at Rome, is a close imitation of Dante, and gained him a high rep-

ntation. His other chief works were, 'Bardo della Selva nera,' and a translation of Homer's Iliad; and his dramatic writings are the tragedies of 'Galeotti Manfredi,' 'Aristodemo,' and 'Caius Gracchus.' He was successively appointed professor of the belles lettres and of rhetoric in the university of Padua, and historiographer of the kingdom of Italy; and, after the destruction of that state, he was fortunate enough to preserve his place and pension under the new government. He was also a knight of the legion of honor, and a member of many learned societies. Died 1828.

MONTJOIE, F. C. GALART DE, a French royalist and man of letters, author of 'Principles of the French Monarchy,' and of a 'History of Robespierre's Conspiracy,' 1756-1816.

[Tomb of Henry II., Duke of Montmorency, at Moulins.]

MONTMORENCY, the name of a noble French family, the first of whom was BOUCHARD, one of the great feudatories of the 10th century. Those distinguished in succeeding ages are,—MATTHEW, grand constable 1130, regent during the crusade 1147, died 1160. MATTHEW, grandson of the latter, called the great constable, served in crusade against the Albigenses, and under the regency of Blanche, during the minority of her son, Louis IX., died 1230. CHARLES, marshal and governor of Normandy, died 1381. ANNE, constable of France, born 1493, companion-in-arms and in captivity of Francis I., 1525-26, gained the battle of Dreux against the Calvinists, 1562, and that of St. Denis, where he fell gloriously, covered with wounds, 1567. HENRY I., second son of Anne, born 1544, fought with his father, and was created marshal in Piedmont, 1566. He was one of the first to recognize Henry IV., who made him constable 1593; died 1614. HENRY II., son of the latter, born 1595, was named admiral by Louis XIII. as early as 1612, and greatly distinguished himself against the Calvinists. He was beheaded, after vainly opposing himself to the ambition of Richelieu, 1632. He was the last of the first ducal branch of this house. His sister, CHARLOTTE MARGARET, became wife of the second Henry, prince of Condé, and mother of the great Condé; died 1650.

MONTMORT, PETER RAYMOND DE, a French geometrician, the disciple and friend of Malebranche, 1678-1719.

MONTPENSIER, ANNE MARIA LOUISA, of Orleans, better known as Mademoiselle de Montpensier, born at Paris in 1627, was the daughter of Gaston, duke of Orleans, and the niece of Louis XIII.

In the civil contests which distinguished the minority of Louis XIV., she was a zealous partisan of Condé; and, in fact, her whole life was a scene of restless ambition and intrigue. She was privately married to Count Lauzun, and brought him a fortune of 20,000,000 francs, four duchies, the seignury of Dombes, and the palace of Luxembourg; but being treated by him with a degree of hauteur which she could not brook, she at length forbade him ever to appear again in her presence. From that time she lived in retirement, and died in 1693. Her 'Memoirs,' which form eight volumes, are interesting.

MONTPENSIER, ANTHONY PHILIP D'ORLEANS, Duc De, younger brother of Louis Philippe, and an officer under Dumouriez, 1775-1807.

MONTPENSIER, CATHERINE MARIA OF LORRAINE, Duchess De, daughter of the duke of Guise, and wife of the second Louis, duc de Montpensier, noted for her hatred against Henry III., during the wars of the league, 1552-1596.

MONTPENSIER, CHARLES. See BOURBON.

MONTPENSIER, FRANCIS DE BOURBON, Duc De, known as the prince Dauphin, distinguished in the religious wars, and one of the first to acknowledge Henry IV., 1539-1592.

MONTROSE, JAMES GRAHAM, Marquis of, a distinguished royalist under Charles I., was the son of the earl of Montrose, who gave him an excellent education, which was improved by a residence in France, where he held a commission in the Scotch guards. On his return home he experienced such neglect through the jealousy of the Marquis of Hamilton, as induced him to join the Covenanters: but he afterwards took a very active part on the side of the king; and in a few months gained the battles of Perth, Aberdeen, and Inverlochy; for which services he was created a marquis. In 1645 his fortune changed; and after suffering a defeat from Lesley, he was obliged to leave the kingdom, when he landed in Orkney with a few followers, but was soon overpowered, conveyed to Edinburgh, and there hung and quartered.

[St. Giles Cathedral Edinburgh, the burial-place of Montrose.]

MONTUCCI, ANTONIO, a learned philologist, particularly excelling as a Chinese scholar, was born at Sienna, in 1762, and studied at the university there, devoting himself to the living languages with almost incredible application. In 1785 he was appointed professor of English in Tolomei college; and in 1789, accompanied Mr. Wedgewood to England as Italian teacher in his family. Being in London

in 1792, when preparations were making for Lord Macartney's embassy to China, Montucci took the opportunity of obtaining assistance from some Chinese youths attached to the embassy, in acquiring their language, with which he was before only imperfectly acquainted. The result was, that he projected a Chinese dictionary, the prospectus of which he forwarded to several princes and academies in Europe. In 1806 he went to Berlin, on the invitation of the king of Prussia; but the invasion of the country by Buonaparte for some time interrupted his plans; and, returning to Italy, he died at Sienna in 1829. He is the author of a 'Chinese Dictionary,' an 'Italian Pocket Dictionary,' and several elementary works in that language; and he edited the 'Poesie inedite of Lorenzo de Medici,' published at the expense of Mr. Roscoe.

MONTUCLA, JOHN STEPHEN, an eminent French mathematician, was born at Lyons, in 1725; studied at the Jesuits' college, and acquired legal knowledge at Toulouse, but relinquished the law for the cultivation of mathematical science; was sent to Cayenne, in 1764, as royal astronomer; and died in 1799. His chief work is his 'Histoire des Mathématiques,' 4 vols.

MONVEL, J. M. BOUTET DE, a French dramatic writer and actor, 1742-1811.

MOOR, KAREL DE, a portrait painter, was born at Leyden, in 1656. He studied under Gerard Douw and Francis Mieris. His works were greatly admired, and the emperor of Germany conferred on him the honor of knighthood. Died 1737.

MOORCROFT, WILLIAM, a writer of travels to the Himalayan parts of Hindostan, died 1823.

MOORE, BENJAMIN, bishop of the Protestant Episcopal church of the diocese of New York, was born on Long Island 1748. Died 1816.

MOORE, EDWARD, an English poet and dramatic writer, was the son of a dissenting minister at Abingdon, in Berkshire, and born there in 1712. He was brought up as a linen-draper in London, but quitted business for literary pursuits. In 1744 he published his 'Fables for the Female Sex,' which became deservedly popular, and procured him friends among the great, particularly Lord Lyttleton, whom he afterwards complimented in a piece, entitled 'The Trial of Selim.' After two ineffectual attempts at dramatic composition, in the comedies of the 'Foundling,' and 'Gil Blas,' he succeeded completely in the tragedy of 'The Gamester.' He next became the editor of a periodical paper, called 'The World,' in which he was assisted by Lords Lyttleton, Chesterfield, and many other men of rank and talent. Died 1757.

MOORE, F., an African traveller, last century.

MOORE, SIR HENRY, colonial governor of New York, appointed in 1765 and continued in the office until his death in 1769.

MOORE, JAMES, colonial governor of South Carolina from 1700 to 1703, and again appointed to the same office in 1719 by the people, to whose interests he was warmly devoted. In 1702 by his advice, the colony of South Carolina undertook an expedition against the Spaniards of St. Augustine in Florida; the result was unsuccessful, and the expense incurred great and embarrassing to the government. As a consequence, the first issue of paper money under the name of bills of credit, took place.

MOORE, JOHN, an eminent prelate and promoter of letters in the reign of William and Mary, born 1662, died bishop of Ely, 1714.

MOORE, JOHN, archbishop of Canterbury, was the son of a grazier at Gloucester, and educated at

the grammar school of that city, after which he went to Pembroke College, Oxford. Becoming chaplain to the Duke of Marlborough, and tutor to one of his sons, he obtained by that interest a prebendal stall in the cathedral of Durham; in 1771, the deanery of Canterbury; in 1776, the bishopric of Bangor; and in 1783, he was raised to the metropolitan see. Died 1804.

MOORE, JOHN, a physician and miscellaneous writer of great repute, was born in 1730 at Stirling; studied medicine and surgery at Glasgow; and was successively a surgeon's mate in the Netherlands, and surgeon to the English ambassador at Paris. In 1772 he took his degree as physician, and became the partner of Dr. Gordon, an eminent practitioner at Glasgow. After this he spent five years in travelling upon the continent with the Duke of Hamilton; and on his return he settled in London. In 1799 he published the fruits of his travels in 'A View of Society and Manners in France, Switzerland, and Germany,' 2 vols. This work was so well received, that, in 1781, he added two volumes more, entitled 'A View of Society and Manners in Italy.' After this, he published his 'Medical Sketches.' His next performance was a novel of a very superior character, entitled 'Zeluco,' 2 vols., which abounds with incident, and affords a striking illustration of Italian character and manners. In 1795 he published 'A View of the Causes and Progress of the French Revolution,' 2 vols.; describing scenes which he had witnessed during his residence at Paris. He subsequently published a novel, entitled 'Edward, or Various Views of Human Nature,' and 'Mordaunt, or Sketches of Life, Character, and Manners in Various Countries.' Died 1802.

MOORE, SIR JOHN, was born at Glasgow in 1761. He was the son of Dr. John Moore, the well known physician and author. He entered the army young, and soon rose to rank and distinction. He served in Corsica in 1785, and afterwards in the West Indies, in Holland, and Egypt. In 1802 he did permanent benefit to the English army by disciplining several regiments as light infantry in a camp of instruction in Kent. He then introduced several tactical improvements, which have since been generally adopted in the service. After taking part in two expeditions to Sicily and Sweden, Moore received his most important command in 1808. He was then placed at the head of the British army, which was to co-operate with the patriots in Spain and Portugal, against the French invaders of the Peninsula. Moore advanced through the north of Spain to Salamanca; but the Spanish armies with which he was to co-operate were routed by the French; Madrid, which he was to protect, surrendered while Moore was on his march; the reports and promises of the Spanish juntas and their agents proved to be mere bombast and lies; and Moore found that the whole of the vast French armies in the Peninsula were gathered round him to overwhelm the small force that he commanded. A rapid retreat to the northern coast of Spain was the only chance of saving the English troops from destruction or surrender. This retreat was made in the midst of the severe winter of 1808-9, through the rugged country of Galicia; and it is almost unparalleled in military history for the sufferings of the retiring army. Moore at last reached Corunna, closely pursued by superior forces under Soult. Transports lay in the harbor to receive the British troops; but Soult pressed hastily forward, so that it was impossible to effect the embarkation without either checking the enemy by a battle, or entering into a con-

vention. Moore indignantly spurned the dishonoring proposal of a convention, and on the 16th January, 1809, drew his men out, though exhausted and shattered by the horrors of their retreat, to face the advancing French before Corunna. The troops did their duty, and repulsed Soult's columns on every point with severe loss; but the victory was dearly purchased by the death of General Moore, who was struck down by a cannon shot, just as he had called on the 42d Highlanders to 'Remember Egypt,' and reminded them that 'though powder was short they had their bayonets.' Moore's wound was mortal: but he survived long enough to know that the enemy were beaten, and to remind his surviving friends that 'he had always wished to die in that way.' His last words were a hope that 'the people of England would be satisfied, that his country would do him justice.' He was buried that very night, 'with his martial cloak around him,' in a

grave hastily dug on the ramparts of Corunna. The glorious stanzas of Wolfe have ennobled that burial; but it ought to be mentioned to the honor of the French as well as of the English general, that Soult, when he entered Corunna after the embarkation and departure of the British, ordered a fitting monument to be erected to Sir John Moore. Moore's only fault was an excessive sensibility to popular opinion, which impaired that political courage, which (as Nelson has truly said) is essential to a great commander. But a braver soldier, a more humane and excellent man, never stepped on a battle-field, than he who died the death of fame in command of the British army at Corunna. [E.S.C.]

MOORE, Sir JONAS, an eminent mathematician, was born about 1620, at Whitby, in Lancashire. His skill in mathematical learning recommended him to Charles II., by whom he was employed in several works, and made surveyor general of the ordnance. He was also one of the governors of Christ's Hospital, and was the principal means of the above monarch's endowing a mathematical school in that seminary. Sir Jonas compiled for the use of that institution, a 'General System of Mathematics,' in 2 vols. 4to., which was published after his death, in 1681.

MOORE, PHILIP, a minister resident in the Isle of Man, known as a Manx scholar, died 1783.

MOORE, THOMAS, was born in 1780, in Dublin, where his father carried on business with no great success as a wine merchant. He showed from boyhood an imaginative and musical turn; and various

circumstances concurred in impressing him early with that indignant and melancholy sense of the wrongs and sufferings of Ireland to which his poetry owes so many of its most powerful touches. His family professed the Roman Catholic creed, as he himself always continued to do; and among his father's friends were several of the United Irishmen, with others who were ardently bent on extorting redress from the government. The political disturbances broke out into rebellion while Moore was a student in Trinity College; he wrote anonymously for a seditious newspaper, and was only saved from implicating himself deeply by faithfully keeping a promise which his mother prevailed on him to give. —He took his degree in 1798, and went to London to keep his terms for the bar. Poetry, however, had taken possession of his mind; and the amatory cast which always prevailed in his poems, was allowed in some of the earliest of them to degenerate into reprehensible looseness. His gay translation of Anacreon, published in 1800, was followed by the notorious 'Poems of Thomas Little;' and the just severity with which these and another miscellaneous volume of his were treated in the *Edinburgh Review*, produced the abortive duel between Moore and Jeffrey. At this period the poet's means were very slender, and his prospects discouragingly uncertain. But his rising reputation as a song-writer, his musical accomplishments, and his pleasing manners, facilitated his introduction into aristocratic society. In 1804, having obtained a registrarship in Bermuda, through the patronage of Lord Moira, he went out to discharge the duties of the office. It proved to be much less lucrative than he had expected; and in a very few months he returned home, being allowed to leave a deputy, whose defalcation soon plunged Moore into embarrassments from which he was long in being able to extricate himself. He refused all aid from his friends, Jeffrey, now cordially intimate with him, offering generous help. In the end, the claims being favorably adjusted, he paid the whole sum from his literary earnings, while he con-

tinued to contribute liberally to the comfort of his parents.—From the time of his return to England his course of life was very uneventful. He was thenceforth wholly the man of letters, supporting himself by his pen, and courted in society, especially that of the higher Whig circles of London. In

1811 he married Miss Dyke, who had been for a short time on the Dublin stage, an amiable, attractive, and domestic lady. Soon afterwards he took up his residence in a cottage near Ashbourne in Derbyshire, whence he removed to Sloperton near Devizes. There he continued to live ever afterwards, visiting London however frequently, and making other excursions, and being obliged soon after his removal to the place to take refuge on the continent from his Bermuda creditors. In 1835 he received from Lord Melbourne's government a pension of three hundred a-year; and in 1850, when his health was completely broken, and all his four children were dead, Mrs. Moore obtained a pension of a hundred pounds. He died in the beginning of 1852.—Moore's writings fall into three groups; the serious poems, the comic and satiric rhymes; and the biographies and other works in prose. In the first of these classes, the compositions that support his fame are the 'Irish Melodies' (the series of which began in 1813) and other lyrics. Many of these are exquisite for grace of diction, for beauty, not without sameness of imagery, and for a refined and ideal kind of pathos. They are poems for the drawing-room, and admirable as such. In 'Lalla Rookh,' published in 1817, the poet tried a more ambitious flight; and, while there is here very great skill and care of execution, with a marvellous richness of fancy, and singular correctness of costume, it cannot be said that he has vindicated his claim to be ranked with Scott or Byron, among the great painters of romantic narrative. The second group of Moore's works, perhaps, shows his genius in a more brilliant light than any of the others. Unsparingly severe in his attacks on those public persons who were obnoxious to the Whig party, he has made satire as gaily witty, and as irresistibly amusing, as it ever can be. His chief political satires, besides many fugitive contributions to newspapers, were 'The Twopenny Post Bag,' 'Tom Crib's Memorial to Congress,' and the 'Fables for the Holy Alliance.' A lighter vein was opened in 'The Fudge Family in Paris.' Moore's prose works were really tasks performed for the sake of the gain they brought; and the best of them can only be asserted to be performed with good taste and care. If any of them was a labor of love it was the gorgeous romance of 'The Epicurean,' which appeared in 1827. The only others that require to be named are the 'Life of Sheridan' (1825); and the 'Notices of the Life of Lord Byron' (1830). [W.S.]

MOORSON, SIR R., a Br. nav. offic., 1760–1835.

MORALES, AMBROSE, a learned Dominican, was born at Cordova, 1513; became historiographer to Philip II., king of Spain; and died in 1590. He was the author of several works on the history and antiquities of Spain; but his extreme credulity greatly deteriorates the value of his writings.

MORALES, C., a Spanish singer, 16th century.

MORALES, J. B., a Spanish missionary, 1597–1664.

MORALES, L., a Spanish painter, 1509–1586.

MORAND, JOHN, a French surgeon, 1658–1726. SAUVEUR FRANCOIS, his son, greatly distinguished as a surgical writer, 1697–1773. JOHN FRANCIS CLEMENT, son of the latter, an anatomist and mineralogist, 1726–1784.

MORAND, J. A., a Fr. architect, 1727–1794.

MORAND, LOUIS CHARLES ANT. ALEXIS, Count, a French general, disting. at the period of the revolution and the empire, 1770–1835.

MORAND, P. DE, a Fr. dramatist, 1701–1737.

MORANDE, C. THEVENOT DE, a French journal-

ist, author of 'Memoires of Madame du Barry,' and 'Anecdotes of the Court of France,' 1748–92.

MORANT, PHILIP, an antiquary and divine, was born in the island of Jersey, and educated at Pembroke college, Oxford. He edited several works, and wrote a 'History of Colchester,' 'The History of Essex,' &c. Born 1700; died 1770.

MORATA, OLYMPIA FULVIA, an Italian lady of protestant principles, distinguished as the most learned woman of her age, 1526–1555.

MORATIN, NICHOLAS FERNANDEZ DE, a celebrated Spanish dramatic poet; born at Madrid in 1737; died 1780. He was well acquainted with the old Castilian chroniclers, and made excellent use of them in his lyric poems and plays. He wrote three tragedies, a comedy, a didactic poem, entitled 'Diana, or the Art of Hunting,' and various other works.

MORATIN, LEANDRO FERNANDEZ DE, a son of the preceding, was born about 1760, and is considered superior to his father as a dramatic poet. He was patronized by the minister Godoy, who enabled him to visit the principal theatres of England, France, and Italy, at the royal expense; and on his return home, appointed him to the situation of principal secretary interpreter. Under the government of Joseph Buonaparte he was made royal librarian; but he was subsequently obliged to quit Spain, and died at Paris in 1828. He took Moliere for his model; and among his dramatic efforts are the comedies of 'El Cafe,' 'El Baron,' &c.

MORATO, FLAVIO PELLEGRINO, an Italian writer, father of Olympia Morata, died 1547.

MORCELLI, S. ANTONIO, an Italian Jesuit and archæologist, born 1737.

MORDAUNT, CHARLES, earl of Peterborough, was born about 1658, and succeeded his father, John, Lord Mordaunt, in 1675. He entered into the navy, and distinguished himself at Tangier when it was besieged by the Moors. In 1697, on the death of his uncle, he succeeded to the earldom of Peterborough; was employed as commander of the English army in Spain; and, having greatly distinguished himself by his courage and activity, was subsequently appointed generalissimo of the imperial forces. Died, 1735.

MORE, ALEXANDER, a French protestant minister, appointed professor of divinity, and pastor of the church at Middleburg in Zealand, author of theological works, 1616–1670.

MORE, ANTONIO, a celebrated portrait painter, born at Utrecht, in 1519. He was very successful in his portraits, of which he painted several in England, in the reign of queen Mary, on whose death he accompanied Philip II. to Spain, where he lived on terms of great intimacy with that monarch for some time; but presuming too much on his familiarity, he incurred the displeasure of the king, and quitted the country. He then entered into the service of the Duke of Alva, by whom he was made receiver-general of the revenues of West Flanders. Thus patronized, he was enabled to live in a style of magnificence during the remainder of his life. Died 1575.

MORE, FRANCIS, a famous lawyer, 1558–1621.

MORE, HANNAH, the greatest name in the list of female writers on moral and religious subjects in the last century, was born at Stapleton, Gloucestershire, in 1744. Her father, who had taken orders in the Church of England, was master of a foundation school, in that town, and gave his four daughters a liberal education. They were all highly accomplished, but Hannah was distinguished above the rest of her sisters, both by her natural talents and

her extraordinary thirst for knowledge. The Misses More, resolved on rendering themselves independent, opened a boarding school for young ladies in the village, and soon after, on the advice of friends, transferred their seminary to Bristol. In that town, they met with signal success. Their school grew in reputation, and every year added to its numbers, till it outstripped all other institutions of a similar kind, in the south and west of England. Hannah had early tried her powers in original composition, and at the age of seventeen wrote her pastoral drama 'The Search after Happiness.' Having obtained the friendship of Garrick, she prepared several pieces for the stage, 'The Fatal Falsehood,' 'Percy,' 'The Inflexible Captive.' On attaining higher views of the character and duties of a Christian, she relinquished all thoughts of writing for the stage. But although she renounced the theatre, she still retained her respect and friendship for Garrick, with whom, as literary friends, she conjoined Johnson, Burke, Reynolds, and their learned associates. The death of Garrick produced a great change on her character. Reading and reflection made her a Christian; and she thenceforth dedicated her time and energies to works of piety and benevolence. She fixed her residence at Cowslip Green, a beautiful

[Hannah More's Cottage.]

residence in the neighborhood of Bristol, and there devoted her time to literary pursuits. Having projected a series of didactic works, she published, in 1786, a little volume entitled 'Thoughts on the Manners of the Great,' 'An Estimate of the Religion of the Fashionable World.' To counteract the principles of the French Revolution, she published 'Village Politics,' by Will Chip; and, next, a periodical work, 'The Cheap Repository Tracts,' including 'The Shepherd of Salisbury Plain.' Resuming her didactic series, she published 'Strictures on the Modern System of Female Education,' which obtained the high approval of Bishop Porteus, who recommended the writer for the office of governess to the Princess Charlotte. This was followed in rapid succession by 'Hints towards Forming the Character of a Young Princess,' 'Cœlebs in Search of a Wife,' and 'Practical Piety,' 'An Essay on the Character and Writings of St. Paul,' 'Christian Morals,' and 'The Spirit of Prayer.' By her various writings she amassed upwards of £30,000. Her sisters and she now relinquished public teaching, and devoted all their energies to the erection of schools, where there were no resident clergymen, and in which no less than twelve hundred children received, through their instrumentality, the benefits of a moral and religious education. In short, they produced, by their benevolent and christian labors, so great a change on the aspect of society, that what had been a

moral desert had produced in rich abundance, the excellent fruits of wide-spread intelligence, of elevated morality, and religious excellence. Miss More died in September, 1833. [R.J.]

MORE, HENRY, a dissenting minister, d. 1802.

MORE, HENRY, one of that profoundly learned and influential class of philosophical divines who arose in the 17th century to exorcise the spirit of Calvinism from the English universities. Born in 1614, and educated at Cambridge, he took his degree of B.A. in 1635, when he had already run through the scholastic philosophy, and rejected it with disgust for the warmer light and richer fancies of Platonism. The 'Germany Theology' of Taulemus soon after riveted his attention, as the summit of the mystic divinity which he had pursued through the writings of the Platonists and the school of Mercurius Trismegistus. In the works of Tauler the mystic divinity was Christianized, and written from a certain depth of experience, and from the age of Luther to the close of the 17th century, he exercised a vast influence upon the class of minds that revolted from the dogmatism of Geneva. In this class Henry More holds a distinguished place with Cudworth, Glanville, Whichcote, and others of less note, and while he is on a level with the best of them as a prose writer and philosopher, he has the merit of being their representative among the poets. In 1640, after being admitted M. A., he published his 'Psychozoia,' or first part of the 'Song of the Soul,' containing 'A Christiano-Platonical Display of Life,' in passages which may be pronounced rich and beautiful in their very obscurity. His most popular work, however, is the 'Divine Dialogues,' and while the erudition and beauty of such productions are admitted, it is curious to read the exception taken by biographers against the author's consciousness of their origin, in thoughts, full of spiritual wonder, communicated to his spirit. Henry More refused the highest ecclesiastical preferments, and chose a life of learned retirement and undisturbed contemplation, chiefly passed at the seat of Lord Conway. He died universally beloved 1687. His works were published in 3 vols. folio, 1679. [E.R.]

MORE, SIR THOMAS, was born in Milk-street, London, in the year 1480. His father, Sir John, was one of the justices of the king's bench. He was, according to the practice of the day, placed in the household of Morton, the cardinal archbishop of Canterbury, where the boy obtained a precocious reputation for ready wit and subtlety of remark, which excited high expectations of future eminence. After having studied at Oxford, he entered for chancery practice at the New Inn, then the rival of the other inns of court, but now almost forgotten. He entered parliament when he was in his twenty-second year, and immediately made for himself a place in history by standing forth for the privileges of the House of Commons to treat all questions of supply as their own exclusive business.—Through his influence the aid demanded by Henry VII. for the marriage of his daughter to the king of Scots was refused. It was not to be expected that after a victory of this kind, More should rise in the court of Henry VII. He lived for some time in retirement under the shadow of the royal displeasure, and it was then that without absolutely neglecting professional advancement he enriched his mind with the treasures of learning, which made him so illustrious among the statesmen of his age. A great portion of his studies lay in divinity, and he delivered lectures on St. Augustine's treatises on the City of God. On the accession of Henry VIII. he was soon put on

[Chancellor's Costume in Sir Thomas More's time.]

the path of promotion. In 1521 he was knighted and made treasurer of the exchequer. He appears to have ere this time considerably enriched himself by practice, and with his wife, a daughter of Mr. Colt of Newhall in Essex, he kept up a noble hospitality. Henry VIII., who knew and appreciated genius, though he as little permitted it as he did feminine beauty and worth to stand in the way of his ferocious passions, used to be a frequent guest at More's table, where he enjoyed the intellectual repast. According to the account of Erasmus, the circle there collected must have been one of the most brilliant and engaging that the world has ever seen, and it was adorned by virtues, which to other associations, high in intellect, have often been wanting. In 1523, he became speaker of the House of Commons, and in 1529 succeeded Wolsey in the perilous eminence of the woosack. He had in the mean time published, among other works, his curious history of Richard III., and his *Utopia*, which, derived from the Greek for happy land, has become the source of a proverbial expression in our language. That he meant this imaginary republic seriously to embody his notions of a sound system of government can scarcely be believed by any one who reads it, and remembers that the entirely fanciful and abstract existence there depicted was the dream of one who thoroughly knew man in all his complicated relations, and was deeply conversant in practical government. When Henry began those attacks on the papal supremacy, which, however sad his motive might be, were instrumental in procuring the reformation, More at once took up the position which his conscience dictated to him as a supporter of the old system. Henry marked him out for vengeance as an opponent of his matrimonial views. He endeavored to shield himself by an early retirement from office. He was requested to take the oath to maintain the lawfulness of the marriage with Anne Boleyn. Though it was known that he would be the last man to disturb the succession, he refused to take the oath. This refusal was interpreted into high treason, under the statute. He was condemned to death, and beheaded on the 6th of July, 1535.

MOREAU, H., a French poet, 1810-1838.

MOREAU, JACOB NICHOLAS, a French historian, appointed librarian to the queen, and historiographer royal, author of 'Memoirs' towards the history of our own times, 'The Duties of a Prince,' 'Principles of Morality and Polity, and of Public Rights,' (written for the use of the dauphin, afterwards Louis XVI.,) and of a political journal, written against England, 1717-1803.

MOREAU, JEAN, a French historian, 16th cent.

MOREAU, J. L., a physician, better known as 'Moreau de la Sarthe,' author of a work entitled 'Histoire Naturelle de la Femme,' 1771-1826.

MOREAU, JEAN MICHEL, an eminent designer and engraver, was born at Paris, 1741. He was a man of extensive information on works of art, and his industry was truly surprising. In 1700 he was commissioned to prepare all the drawings required for the public festivities and those of the court; and he commenced his duties with the sketches for the celebration of the nuptials of the dauphin and the other royal princess. In 1775 he published engravings, executed by himself, of his drawings for the coronation of Louis XVI., and was made member of the academy of painting, and draughtsman of the royal cabinet. Besides what he completed as royal draughtsman, the number of drawings which he executed for engravings amounted to 2400; while, as an engraver also, his labor was prodigious. He prepared 160 plates of the History of France, 80 for the New Testament, 60 for Gesner's works, upwards of 100 for editions of Voltaire and Moliere, and an immense number more for the illustration of the standard works of ancient and modern authors. Died, 1814.

[Monument to Moreau, at Dresden.]

MOREAU, JEAN VICTOR, one of the most celebrated generals of the French republic, was born at Morlaix, in 1763. Though destined for the law, he abruptly left his studies and enlisted in a regiment, before he had attained his 18th year; but his father would not allow him to indulge his passion for a military life, and procured his discharge. The revolution, however, enabled him to gratify his wishes; and he became commander of the first battalion of volunteers raised in the department of Morbihan, at the head of which he joined the army of the north. Having greatly distinguished himself at the head of his battalion, Pichegru, under whom he served, did all he could to befriend him: and, in 1794, being made general of division, he was intrusted with a separate force, to act in Flanders, where he took

many towns. He was soon after named commander-in-chief of the army of the Rhine, and began that course of arduous operations which terminated in the celebrated retreat, from the extremity of Germany to the French frontier, in the face of a superior force, by which his skill as a consummate tactician was so much exalted. Meantime, the republic being torn with intestine dissensions, he, for a time, retired from active service; but his talents as a general again brought him forward; and Buonaparte having returned from Egypt, and being now first consul, intrusted him with the command of the armies of the Danube and the Rhine, which, in 1800, was productive of the decisive victory of Hohenlinden. Having, some time subsequent to this brilliant campaign, been implicated with Pichegru, Georges, and other royalists, in a plot against the consular government, he was brought to trial with 54 other persons, declared guilty upon slight evidence, and sentenced to two years' imprisonment. This was, however, commuted to a sort of voluntary banishment; and he accordingly retired to North America, where he bought an estate near Trenton, on the Delaware. He there resided some years in the enjoyment of ease and tranquillity, until listening to the invitation of the allies, and more especially of Russia, he embarked for Europe in July, 1813. At Prague he found the emperors of Austria and Russia, with the king of Prussia, all of whom received him with great cordiality; and he was induced to aid in the direction of the allied armies against his countrymen. Soon after his arrival, while conversing with the emperor Alexander on horseback, in the battle before Dresden, a cannon ball fractured his right knee and leg. Amputation was immediately performed; but the wound proved mortal; and he died on the 1st of September, 1813. Moreau was brave, generous, and humane; possessing rare merits as a soldier, and highly esteemed by those who served under him, for the affability and simplicity of his manners. It was thought, and probably with truth, that he was looked upon with a jealous eye by Buonaparte, whose fear of finding in Moreau a successful rival, led to his expatriation.

MOREAU, R., a French physician, 1587-1656.

MOREAU-SAINT-MERY, M. L. E., a deputy to the constituent assembly, and known as a writer on the French colonies of America, 1750-1819.

MOREELSE, N., a Dutch painter, 1571-1638.

MOREL, A., a Swiss antiquarian, 1646-1703.

MOREL, J. A., a Fr. wr. on music, 1775-1825.

MOREL, R., a Fr. devotional writer, 1653-1731.

MORELL, THOMAS, an eminent critic and lexicographer, was born at Eton, in 1703. He published valuable editions of Ainsworth's Latin Dictionary, and Hedericus's Greek Lexicon, and was the author of 'Annotations on Locke's Essay on the Human Understanding.' He edited the plays of Euripides and Æschylus, translated the Epistles of Seneca; assisted Hogarth in writing his Analysis of Beauty; and selected the passages of Scripture for Handel's Oratorios. Died 1784.

MORELL, WM., an Englishman by birth who came to this country in 1633, and on his return to England, wrote a poem, in which he embodied his observations on America, &c.

MORELLET, ANDRÉ, a celebrated abbé, born at Lyons, in 1727. He wrote some works on political economy and statistics; lived in habits of friendship with the most eminent of his countrymen; wrote many political brochures during the revolution; and died in 1819. He published 'Literary and Philosophical Miscellanies of the Eighteenth Century,' and his

'Memoirs on the Eighteenth Century' appeared after his death.

MORELLI, J., an Italian critic, 1745-1819.

MORELOS, J. M., a priest and general in the Mexican war of independence, shot 1815.

MORERI, LOUIS, a French ecclesiastic, and the first author of the 'Biographical Dictionary' which bears his name, was born in Provence, in 1643; was educated among the Jesuits at Aix; became almoner to the bishop of Apt; and died in 1680. The voluminous compilation which Moreri commenced owed its origin to the prelate before mentioned: when it was first published by Moreri, it consisted of one folio volume; but the additions made to it by subsequent writers have extended it to ten.

MORES, EDW. ROWE, author of the 'History and Antiquities of Tunstal, in Kent,' was born there, his father being rector of the parish, 1730. He was the originator of the Equitable Society for Assurance on Lives, and a writer on that subject. Died 1778.

MORET, J., a French historian, 1615-1705.

MORETO Y CABANA, DON AUGUSTIN, an eminent Spanish dramatic poet of the 17th century, who, after writing 200 plays, became an ecclesiastic. He was contemporary with Calderon, and was patronized by Philip IV. He may fairly be called the Spanish Moliere, many of his comedies still keeping possession of the stage, from their racy humor, striking incidents, and characteristic language of the *dramatis personæ*.

MORGAGNI, JOHN BAPTIST, M.D., F.R.S., an eminent Italian anatomist and physician, was born at Forli in Italy, 1682; and died at Padua 1771. Morgagni was a rather voluminous writer, but the work by which he is best known is that entitled 'De Sedibus et Causis Morborum per Anatome indagatis.' [J.M.C.]

MORGAN, DANIEL, an American revolutionary officer, was born in New Jersey, but removed to Virginia in 1755, where he cultivated a farm. On the breaking out of the revolutionary war, a command of a troop of horse was given him, and he joined the army of Washington then in the neighborhood of Boston. In the expedition against Quebec, he was taken prisoner. On his release, he served under Gates and shared in the defeat and capture of Burgoyne. He also won distinction at the battle of Cowpens, where he had a command as brigadier general. In 1794 he commanded the Virginia militia, in the suppression of the Pennsylvania insurrection. He served as a member of Congress for his adopted State, and died 1799.

MORGAN, G. C., an exp. philosopher, died 1798.

MORGAN, JOHN, an American surgeon and physician, was born in Philadelphia, 1755. In 1775, was made chief physician to the hospitals of the American army. He was subsequently elected Professor of the Practice of Medicine in Philadelphia College. Died 1789.

MORGAN, SIR HENRY, a celebrated commander of buccaneers in the 17th century, was the son of a Welsh farmer. He took Porto Bello and Panama from the Spaniards, and for several years continued to enrich himself and his followers by the success of his marauding expeditions against that nation. Having amassed a large fortune, he settled at Jamaica, of which island he was appointed governor by Charles II., and knighted.

MORGAN, WILLIAM, an eminent Welsh prelate, who had a principal concern in the translation of the Bible into Welsh, printed first in 1588. He died in 1604.

MORGAN, WILLIAM, a distinguished mathemati-

cian, was a native of Glamorganshire. He was actuary to the Equitable Assurance Company, London; and remained connected with that institution 56 years. He was the author of 'The Doctrine of Annuities and Assurances of Lives,' 'A Review of Dr. Crawford's Theory of Heat,' together with various treatises connected with the financial prosperity of Great Britain. Died 1833.

MORGAN, CHARLES W., an American commodore, died 1853, aged 63.

MORGAN, WILLIAM, supposed to have been murdered, in 1826, by the Freemasons, in consequence of his disclosure of the doings of that fraternity in a book which he published.

MORGHEN, RAPHAEL, a celebrated engraver, born at Naples, in 1758. He was invited to Florence in 1782, to engrave the master-pieces of the Florentine gallery; and the reputation he acquired by his labors there, induced the grand-duke to employ him in engraving Leonardo da Vinci's noble composition of the Last Supper, which is painted on the wall of the refectory in the Dominicans' convent, at Milan. In 1803 he was chosen an associate of the French Institute; and, in 1812, he was invited to Paris by Napoleon, who treated him with the most flattering kindness. His works are numerous, and include some of the most remarkable productions of the great masters.

MORHOFF, D. G., a German writer, 1639-1691.

MORICE, SIR WILLIAM, an English gentleman, memorable for the share which he had in bringing about the restoration of Charles II. He was the kinsman of General Monk, who procured him the place of secretary of state, which he resigned in 1668, and died in 1676.

MORICE DE BEAUBOIS, DON P. HYACINTH, an ecclesiastic and antiquary of Brittany, editor of Lorraine's History, &c., 1693-1750.

MORIER, JAMES, whose novels descriptive of Eastern life and manners enjoyed at one time great popularity both at home and abroad, was born in 1780. When still very young, he made an extensive tour through the East, the main incidents of which he described in his 'Travels through Persia, Armenia, Asia Minor, to Constantinople.' In 1810 he was appointed British envoy to the Court of Persia, where he remained till 1816, and soon after his return he published 'A Second Journey through Persia,' &c. During his stay in the East, he made great use of his opportunity of studying the character of the people; and the knowledge thus acquired was turned to excellent account in his 'Adventures of Hajji Baba of Ispahan' (a species of Gil Blas, like Hope's 'Anastasius'), whose 'adventures in England' he described in a second series; 'Zohrab, or the Hostage,' 'Ayesha, or the Maid of Kars,' 'Abel Alnutt,' 'The Banished,' &c.; in all of which, but especially in the first three, the manners, customs, and modes of thought prevalent in the East are portrayed with a liveliness, skill, and truthfulness to nature attained by few. Died 1848.

MORILLO, G., a Spanish poet, 16th century.

MORILLO, P., a Spanish general, 1777-1837.

MORIN, B., a French lexicographer, 1746-1817.

MORIN, J., a French mathematician, 1705-64.

MORIN, J., a French Orientalist, 1591-1659.

MORIN, JOHN BAPTIST, a French physician, born at Villefranche, in 1583; became regius professor of mathematics at the university of Paris; and died in 1656. He was the author of 'Astrologia Gallica,' a work which cost him 30 years' labor, and was published after his death at the Hague.

MORIN, LOUIS, a famous botanist, 1635-1715.

MORIN, P., a French critic, 1531-1608.

MORIN, S., a French visionary, burnt alive 1663.

MORIN, STEPHEN, a French Protestant divine, born in 1625, at Caen, in which city he settled as pastor of a congregation, and remained there till the revocation of the edict of Nantes, when he retired to Leyden. He was afterwards appointed professor of oriental languages at Amsterdam; and died in 1700. His works are chiefly of a philological character, explanatory of the origin, &c., of the primitive languages.

MORISON, J., a Scottish writer, 1762-1809.

MORISON, ROBERT, an eminent English physician, and professor of botany at Oxford, was born at Aberdeen, in 1620. He studied at the university of his native place till interrupted by the civil wars, in which he displayed great zeal and courage in behalf of the royal cause. After this he went to France, where he took his doctor's degree, and was appointed director of the royal garden at Blois. In 1660 he returned to England, and was nominated physician to Charles II., and regius professor of botany at Oxford. In 1669 he published his 'Preludium Botanicum'; in 1680, a portion of his 'Historia Plantarum' appeared; but his death, in 1683, prevented him from finishing it, and the second volume was published by Bohart.

MORISOT, C. B., a French writer, 1592-1661.

MORISOT, J. M. R., a Fr. architect, 1767-1821.

MORITZ, CHARLES PHILIP, a German writer, was born at Hameln, in 1757. He travelled in England, Switzerland, and Italy; wrote many works, the chief of which are his 'Travels,' 'The Antiquities of Rome,' the novels of 'Anthony Reiser and Andrew Hartknopf,' and various grammatical treatises. Died 1793.

MORLA, TH., a Spanish general, died 1820.

MORLAND, GEORGE, an English painter, famous for his landscape and interiors, embodying scenes in humble life, was born in London 1764, and was at his meridian about 1790. He became the victim of his low tastes and drunken habits, and died under arrest for debt in 1804. His history is one of the most melancholy in the long list of those who have wasted their talents, and misspent their time. His genius, his moral character, and the circumstances under which he produced his works—many of them to discharge an ale score—entitle him to be regarded as the Sheridan of artists. His talent was most surprising in the delineation of pigs, introduced into his rustic scenes, these animals being his favorite subjects.

MORLAND, HENRY ROBERT, a portrait painter, son of a London artist, and father of the preceding George Morland, died 1797.

MORLAND, SIR SAMUEL, a statesman and an able mechanist, was a native of Berkshire, and born in 1625. He was employed in some diplomatic missions by Cromwell; and afterwards rendered considerable service to Charles II., for which, at the Restoration, he was made a baronet. Among his inventions are reckoned the speaking-trumpet, the fire-engine, the capstan, and the steam-engine; but of some of these, it is presumed, he was rather the improver than the original discoverer. He expended a considerable fortune in the prosecution of his favorite speculations, and, like many other projectors, was a benefactor to the public to the detriment of his private concerns. Died about 1696.

MORLEY, GEORGE, an eminent English prelate, was born in London, in 1597. Charles I. gave him a canonry of Christchurch; but, being deprived of it by the parliament, he left England, and remained abroad till the Restoration, when he was made dean of Christchurch, and, in 1666, consecrated bishop of

Worcester. He was next appointed dean of the chapel-royal, and, in 1662, translated to Winchester, to which see he was a great benefactor. He also founded five scholarships in Pembroke College, and gave large sums to various charitable uses. Died 1684.

MORLEY, THOMAS, a pupil of the celebrated Byrde, and one of the gentlemen of Queen Elizabeth's chapel, acquired much fame for his work, entitled 'A Plaine and Easie Introduction to Practical Musicke.' He composed many songs, ballads, canzonets, and madrigals. A burial service of his composition still continues to be performed on solemn occasions in Westminster Abbey. It is supposed that he died about the year 1604. [J.M.]

MORLIN, J., a German divine, 1514-1571.

MORNAY, PHILIP DE, sieur du Plessis Morlay, a celebrated French statesman and writer, was born at Buhl, Normandy, in 1549. He was a Protestant, and after the massacre of St. Bartholomew's, he left the country, and travelled in many parts of the Continent, visiting England also, where he was received by Elizabeth with distinguished marks of favor. In 1575 he entered into the service of the king of Navarre, afterwards Henry IV., whom for 30 years he served in the cabinet and the field with the utmost zeal and activity. After Henry had reconciled himself to the church of Rome, De Mornay sent in his resignation, and, retiring from a public sphere, devoted the remainder of his life to literary pursuits, advocating with his pen the cause which he had defended with his sword. His first work, a 'Treatise on the Church,' appeared in 1578, and was followed the succeeding year by another, entitled, 'The Truth of Christianity.' But his most celebrated one was a 'Treatise on the Sacrament of the Lord's Supper,' in which he opposed the doctrine of transubstantiation. So great was his learning, and such was his influence over the Huguenots, that he acquired from them the appellation of the Protestant pope; while his constancy and unblemished character obtained the respect even of his opponents. Died 1623.

MORNINGTON, GARRETT WELLESLEY, earl of, father of the duke of Wellington, acquired considerable celebrity for his musical compositions. He showed an early liking for music, and became, for an amateur, a very tolerable violinist. 'Here in Cool Grot,' is the most admired of his vocal works. The university of Dublin conferred upon him their degree of Doctor in Music. He was born in Meath about the year 1720, and died in 1781. [J.M.]

MORO, or MOORE, ANTONY, a Dutch painter, favorite of Charles V. and Philip II., 1512-1568.

MORO, CHRISTOPHER, a Venet. doge, 1462-71.

MOROSI, J., an Ital. mechanician, 1772-1840.

MOROSINI, the name of several famous Venetians,—1. DOMINICHINO, doge from 1148 to 1156. 2. MICHAEL, succeeded as doge, and died the same year, 1382. 3. PAUL, ambassador to the emperor, and to the kings of Poland, Bohemia, and Naples, 1406-1483. 4. ANDREA, a senator and historian of the republic, 1558-1618. 5. FRANCESCO, born 1618, distinguished in the wars with the Turks as generalissimo of the Venetian troops, afterwards procurator of St. Mark, and successor of Giustinian as doge 1688, died 1694.

MORRELL, B., an American navigator, 1795-1839.

MORRIS, JACOB, an American revolutionary officer, second son of Gen. Lewis Morris, a signer of the declaration of independence, was Aid-de-Camp to Gen. Lee, born at Morrisania, 1755, died 1844.

MORRIS, JUDAH, a Jewish convert to the Chris-

tianity, a native of Italy, but came to this country, and was an instructor of Hebrew in Harvard University. He was the author of a Hebrew Grammar and some religious books.

MORRIS, L., a Welsh antiquary, 1702-1765.

MORRISON, the Rev. ROBERT, D. D. His ancestors were Scottish husbandmen; but his father, quitting Perthshire and the plough, became a mechanic and a man of substance in Northumberland, where Robert, the youngest of seven children, was born in 1782. He was bred to last-making by his father, who was also an elder of the Scotch church. But Robert had a propensity for high classical attainments. He obtained the rudiments of the Latin, Greek, and Hebrew languages from the local preacher he attended; and was, at length, sent by the London Missionary Society to China (having previously studied the language of that country), where he arrived in 1807. In the course of a year or two he had prepared a grammar and dictionary of the Chinese language for the press, besides a Chinese version of the New Testament, which were afterwards printed. He was appointed by the East India Company as their correspondent and interpreter; but never lost sight of the chief object of his toil, namely to extend and establish the tenets of the Christian doctrine. In 1817, the degree of D. D. was conferred upon him by the university of Glasgow; and in the same year he accompanied Lord Amherst in his embassy to Peking. He afterwards projected an Anglo-Chinese college at Malacca, of which he was a liberal patron until his death, which took place at Macao, in 1834. In him was lost to the world the greatest Chinese scholar Europe ever produced, and one of the most zealous of Christian laborers.

MORRIS, GOUVERNEUR, an American revolutionist and statesman, was born at Morrisania near the city of New York, in 1752. He studied law, and was admitted to the bar. He commenced his political career as a member of the Provincial Congress in 1775, and, in 1777, was chosen a delegate of the continental Congress. In 1781, he was a superintendent of finance conjointly with Robert Morris. While a resident of Philadelphia, in 1780, he was thrown from his carriage, by which accident his leg was so severely fractured that amputation became necessary, and he wore ever after a rough wooden stick which had been hurriedly used in the first instance as an expedient for his lost leg. In 1787, he was a member of the convention which formed the United States constitution. He was appointed minister to France in 1792, from which post he was recalled at the request of the French government in 1794. He was chosen a senator of the United States in 1800. He was an able statesman, an eloquent debater, and his work entitled 'Observations on the American Revolution,' with other productions, prove him to have been no mean writer. He died in 1816 at Morrisania. His brother, LEWIS MORRIS, an American revolutionist, and one of the signers of the declaration of independence, was born at Morrisania near the city of New York in 1726, died 1798. There were two other brothers, Staats, who was an officer of the British army and member of parliament, and Richard, who was a judge of the vice-admiralty court at New York, and subsequently chief justice. The founder of the family was Richard Morris, who had been an officer under Cromwell, and went to America after the restoration of Charles the Second, where a grant of land was bestowed upon him, to which he gave the name of Morrisania. His son, Lewis Morris, was governor

of New Jersey, and a son of his was the father of Gouverneur, Lewis, &c.

MORRIS, ROBERT, superintendent of the finance of the United States during the revolutionary war, and signer of the declaration of independence, was born in Lancashire, England, but came to this country at the early age of 13. He entered the counting house of Charles Willing, an eminent merchant of Philadelphia, on whose death he formed a copartnership with his son, Thomas Willing, and carried on a large commercial establishment for the space of 39 years. At the commencement of the revolution, in 1775, he was appointed a delegate to Congress. In 1781, he received the appointment of superintendent of finance, and by his extensive credit, and commercial skill, proved himself of immense benefit to the cause of his adopted country. He sustained the public credit by his private resources, and by his skillful financial operations did as much for the revolution, as some of his contemporaries effected by their more brilliant exploits. He was a member of the convention which framed the United States constitution, and was subsequently elected a senator. After retirement from public life in his old age, he engaged in some land speculations by which he lost his large fortune, and was so reduced that he was confined in prison for debt. Died 1806.

MORROW, JEREMIAH, an early settler in the north-west territory, and subsequently, when it became the state of Ohio, governor and senator, d. 1852 at the age of 82.

MORSE, J., an American geographer, died 1826.

MORSER, A., a Swiss mechanician, 1771-1840.

MORTIER, EDMUND ADOLPH CASIMIR JOSEPH MORTIER, marshal of France and duke of Treviso, was born at Chateau-Cambresis in 1768. He joined a regiment of volunteers at the beginning of the revolutionary war, and served under Kleber, Marceau, Pichegru, and Moreau, in the early campaigns of that contest. In 1799 he had reached the rank of general of division, and commanded the right wing of Massena's army at the battle of Zurich. Napoleon made him one of his marshals in 1804; and he was highly distinguished in the campaigns of the next year against the Austrians and Russians. In 1806 he took possession of Hanover and Hamburg, and acted with singular moderation to the inhabitants. He signalized himself at the battle of Friedland in 1807; and was then employed by the emperor in Spain, where he won the battle of Ocana. In 1812 he served in Russia, and took an active part in the military operations of that year, and in those of 1813 and 1814. In conjunction with Marshal Marmont, Mortier defended Paris against the Allies, and fought the final battle of Montmartre, but was obliged to capitulate. Marshal Mortier's high character for integrity, and his administrative ability, caused him to be much trusted and employed by the Bourbons after their restoration. Louis Philippe placed equal confidence in him; and he was riding by his side at a review of the national guard of Paris, 28th July, 1835, when the infernal machine, which Fieschi had prepared against that king, exploded, and killed among many others the veteran marshal.

MORTIMER, JOHN, an English gentleman, known as a writer on husbandry, died 1736. His son, THOMAS, vice-consul in the Austrian Netherlands, known as a writer on commercial and miscellaneous subjects, 1739-1809.

MORTIMER, JOHN HAMILTON, an English painter, was born at Eastbourne, in Sussex, in 1739. In 1779 he was appointed by his majesty a royal aca-

demician, without any solicitation; and died the same year. He excelled in sketches of banditti and terrific subjects.

MORTIMER, ROGER, earl of, the paramour of Queen Isabella, born in Wales 1287, executed 1330.

MORTON, C., a learned antiquarian, 1716-99.

MORTON, JAMES, earl of. See DOUGLAS.

MORTON, JACOB, an American militia general, well known for the part he bore on all occasions of civic demonstration in the city of New York; d. 1836.

MORTON, JOHN, archbishop of Canterbury, and cardinal, distinguished as a statesman and partisan of the house of Lancaster, was born in 1410. He rose in dignity through several succeeding reigns, from that of Henry VI. to Henry VIII., having escaped the hands of Richard, however, in this interval, and fled to the continent, where he joined the earl of Richmond. Died 1500.

MORTON, JOHN, one of the signers of the declaration of independence, was born in Pennsylvania; died 1777.

MORTON, NATHANIEL, an American author and colonial secretary, was an Englishman by birth, and one of the first settlers of Plymouth, New England. His best known works are a 'History of the Church at Plymouth' and 'New England's Memorial'; born 1612, died 1685.

MORTON, SAMUEL G., an American naturalist and ethnologist, was born in Philadelphia. His 'Crania Americana' and 'Crania Egyptica,' and other works, have established his reputation, as one of the most scientific men of the age. Died 1851.

MORTON, R., a medical writer. Died 1698.

MORTON, THOMAS, a learned prelate of the same family as the famous Cardinal Morton, 1564-1659.

MORTON, THOMAS, an eminent and successful dramatist, was born at Durham, in 1764. He entered as a student at Lincoln's Inn, but his taste for theatricals caused him to abandon his profession, and he soon gave proofs of his talents as a dramatic writer. It is remarkable, indeed, that nearly all his pieces still keep possession of the stage. They consist of 'The Way to get Married,' 'Columbus,' 'Town and Country,' 'Zorinski,' 'A Cure for the Heart-ache,' 'Speed the Plough,' 'Secrets Worth Knowing,' 'The Blind Girl,' 'The Children in the Wood,' 'The School of Reform,' 'The School for Grown Gentlemen,' 'A Rowland for an Oliver,' and 'The Invincibles.' Died 1838.

MORUS, S. F. N., a German theologian, 1736-92.

MORVAN, a king of Brittany, 818.

MORVEAU. See GUYTON DE MORVEAU.

MORVILLE, CH. JOHN BAPT. FLEURIAN, Count De, a French ambassador and minister, 1686-1732.

MOSCATI, P., a French politician, 1740-1824.

MOSCHENI, M. C., an Italian poetess, 1786-1831.

MOSCHUS, a Greek poet, about 200 B.C.

MOSCHUS, D., a Gr. poet and refugee, 15th ct.

MOSCHUS, J., a Greek monk, author of the Lives of the Saints he had known in his travels, died 620.

MOSELEY, BENJAMIN, a physician, was a native of Essex, and born about 1739. For several years he practised as a surgeon and apothecary at Kingston, in Jamaica; took his degree at Leyden; settled in London, as a physician, in 1785; was appointed physician of Chelsea Hospital; and died in 1819. He wrote 'Observations on the Dysentery of the West Indies'; two treatises 'On Coffee and Sugar,' &c.; and made himself very conspicuous by his violent opposition to vaccine inoculation.

MOSER, G. M., a Swiss artist, 1705-1783.

MOSER, JOHN JAMES, a German writer on public law, author of a great number of important works, 1701-1785. His son, FREDERIC CHARLES, a statesman and writer, 1731-1798.

MOSER, W. G., a writer on forests, 1729-1793.

MOSES, the leader and legislator of the Hebrews on their departure from Egypt, supposed date 1725-1605 B.C.

MOSES ALSCHECH, a Syrian rabbin, 16th c.

MOSES BEN-NOCHMANN, a Spanish rabbi, author of 'Wars of the Lord,' &c., 1194-1300.

MOSES, C., an Armenian prelate, 5th century.

MOSHEIM, JOHN LAURENCE VON, was born of a noted family at Lubec, 9th October, 1694. He was educated at the university of Kiel, where, though a very young man, he became professor of philosophy. He was especially distinguished as a preacher. He framed his discourses on the best French and English models, and published some volumes of sermons. Such was his popularity, that the king of Denmark invited him to a chair in the university of Copenhagen. In 1725 he was called by the duke of Brunswick to the professorship of theology at Helmstadt, a sphere which he worthily occupied for twenty-two years. In 1747 he was appointed by George II. of Britain to the divinity chair, and to the chancellorship of the university of Göttingen. In this responsible position he remained eight years, when he died, 9th September, 1755. The works of Mosheim are extensive, consisting of numerous translations, treatises, sermons, and letters. He is chiefly known among us as a church historian, by his 'Commentaries,' and by his 'Institutes,' both written in Latin. The Institutes, which are a brief and able compound, have been translated into German by Von Einem and Schlegel, and into English in 1764, by MacLaine, minister at the Hague, and recently by Dr. Murdoch of this country, a third edition of whose admirable translation appeared in 1845. The last translation is incomparably the best, and must remove some prejudices against Mosheim which MacLaine's dry and unfaithful version may have originated. Mosheim's Latin style is too succinct to be either classical or elegant. His endeavor in recording the history and struggles of various religious parties was to preserve a dignified neutrality, which has been carried to such an extent, that to many it has appeared to wear the aspect of complete indifference. Such a view, however, would be very unjust, for those who read his sermons, and other treatises, will discover in them a decided, intelligent, and ardent piety. [J.E.]

MOSNERON, J., a French writer, 1738-1830.

MOSS, ROBERT, chaplain to William III., and a sharer in the Bangorian controversy, 1666-1729. His nephew, CHARLES, successively bishop of St. David's and of Bath and Wells, d. 1802. CHARLES, son of the latter, bishop of Oxford, died 1811.

MOSSOM, ROBERT, a learned Irish prelate, who suffered much in the civil wars, but on the Restoration he was made dean of Christchurch, Dublin; with which he held the bishopric of Londonderry, where he died in 1679. His works are, 'The Preacher's Tripartite,' 'Variæ colloquendi Formulæ,' 'Narrative of George Wild, Bishop of Derry,' and 'Zion's Prospect in its first View.'

MOSSOP, HENRY, an eminent tragic actor, born in Ireland, in 1729, was the son of a clergyman, and was educated at Trinity College, Dublin. He made his first appearance on the Dublin stage as 'Zanga,' in the *Revenge*; but soon removed to London, where, next to Garrick and Henderson, he was esteemed the first tragedian of his time. In 1761 he became manager of one of the Dublin theatres; but the spec-

ulation proved his ruin; and he died in absolute penury at Chelsea, in 1773.

MOSTAERT, JOHN, a D. painter, 1499-1555.

MOSTOWSKI, COUNT THADDEUS, one of the most courageous defenders of the independence of Poland, 1766-1842.

MOTHE-LE-VAYER. See LAMOTHE.

MOTHERBY, G., an English physician, 1731-93.

MOTHERWELL, WILLIAM, a poet, was born at Glasgow in 1798; and when a youth he obtained a situation in the sheriff clerk's office at Paisley, where he continued till within a few years of his death. In 1827 he published a very interesting and valuable collection of ballads, entitled 'Minstrelsy, Ancient and Modern;' and he was afterwards successively editor of the Paisley Magazine, Paisley Advertiser, and the Glasgow Courier. In 1833 was published a collected edition of his own poems, some of which possess a pathos and an intensity of feeling not often surpassed. Died, 1835.

MOTTE. See LA-MOTTE.

MOTTEVILLE, FRANÇOISE BERTAUD, Dame De, the favorite and biographer of Anne of Austria, time of Richelieu, 1621-1689.

MOTTLEY, JOHN, son of Colonel Mottley, an adherent of James II., known as the biographer of Peter the Great and Catherine of Russia, and the alleged author of 'Joe Miller's Jests,' 1692-1750.

MOTTEUX, PIERRE ANTOINE, a miscellaneous writer, was born at Rouen, in Normandy, in 1660; settled in England after the revocation of the edict of Nantes; and embarking his property in trade, opened an East India warehouse in Leadenhall Street, London, and also obtained a situation in the post office. He wrote nearly twenty dramatic pieces, and translated 'Don Quixote' and 'Rabelais.' Died 1718.

MOTTRAYE, A. DE LA, a French traveller and historical critic, 1674-1743.

MOUCHON, PETER, a Genevese ecclesiastic, and friend of Rousseau, author of a 'Table Analytique et Raisonnée de l'Encyclopédie,' 1733-1797.

MOUFET, or MUFFET, THOMAS, a physician and naturalist, was born in London, and educated at Cambridge, after which he travelled through several parts of Europe; took the degree of M.D. while abroad; and, on his return, settled in London, where he practised with great reputation. He accompanied Lord Willoughby on an embassy to Denmark, was with the Earl of Essex when he encamped in Normandy; and died about 1604. His works are, 'De Jure et Præstantia Chemicorum Medicamentorum,' 'Epistolæ quinque Medicinales,' 'Nosomantica Hippocratica,' 'Health's Improvement, or Rules for preparing Food,' 'Insectorum, sive minimorum Animalium Theatrum.'

MOULIN. See DUMOULIN.

MOULIN, J. F. A., a Fr. general, 1752-1810.

MOULTRIE, WM., an Amer. revolutionary officer, was born in England, but came at an early age to South Carolina. In 1760, he distinguished himself in Indian warfare, and at the beginning of the revolution was chosen member of the provincial Congress, and given the command of a regiment. The fort of Sullivan's Island was so bravely defended by him in 1776, that he was thought worthy of the honor of the public thanks of Congress and of giving his name to the fortress, in the defence of which he had evinced so much bravery. He was victor over the British at Beaufort in 1779. He was subsequently

made major-general, and was second in command to Lincoln at the siege of Charleston. After having been chosen repeatedly governor of S. Carolina, he died in 1805. He was the author of 'Memoirs of the Revolution in the Carolinas and Georgia.'

MOULIN, PETER DU, a Protestant divine, was born at Bechny, in the Vexin, in 1568. He studied first at Sedan, and next at Cambridge, from which university he removed to a professorship of philosophy at Leyden, where he also taught Greek; but in 1599 he returned to France, and became minister at Charenton. On the assassination of Henry IV., Du Moulin charged the guilt of that detestable deed upon the Jesuits, which produced a violent controversy between him and some of that society; and, in 1615, visited England on the invitation of James I., who gave him a prebend in Canterbury Cathedral. He did not continue long in England; but after refusing the divinity professorship at Leyden, he finally settled at Sedan, of which place he became the pastor, filling at the same time the theological chair there. Among his writings are, 'A History of Monachism,' a treatise 'On the recent Origin of Popery,' &c. Died, 1658.—PETER DU MOULIN, his son, was born in 1600 at Paris, and graduated at Leyden; but coming afterwards to England, obtained, like his father, a prebend at Canterbury, and was one of the chaplains to king Charles II. He was the author of 'The Peace of the Soul,' 'Clamor Regii Sanguinis,' which, being anonymous, was attributed, by Milton, to Alexander More, and 'A Defence of the Protestant Church.'—LOUIS DU MOULIN, his brother, became a violent Independent, and wrote 'Parænesis ad Ædificatores Imperii,' dedicated to Oliver Cromwell; and 'Patronus Bonæ Fidei,' a fierce invective against the Church of England. Died 1683.

MOUNIER, JOHN JOSEPH, a distinguished member of the states-general in 1789, was born at Grenoble, in 1758; was brought up to the legal profession; and was successively advocate of the parliament of Grenoble and judge-royal. While he was a member of the National Assembly he exerted all his talents and influence to promote the establishment in France of a limited monarchy; but finding his efforts vain, he retired first to his native place, and afterwards removed to Geneva, where he published 'Recherches sur les Causes qui ont empêché les Français de devenir Libres.' He subsequently visited England, but resided chiefly in Switzerland, Italy, or Germany, till 1801, when he returned to France. In 1804 he was nominated a counsellor of state, and died in 1806.

MOUNT, GEORGE, the author of a journal of the proceedings of the English plantation, settled at Plymouth, N. E., published in 1622.

MOUNTAGUE, or MONTAGUE, RICHARD, a learned prelate, distinguished for his knowledge of ecclesiastical antiquities, and known to history as the personal friend and associate in principle of Archbishop Laud, 1578-1641.

MOUNTFORT, WILLIAM, an English actor and dramatic writer, was born in Staffordshire, in 1659. He was an excellent comic performer; and being in the flower of his age, and one of the handsomest men on the boards, the parts of the lovers were usually allotted to him. In one of these he had captivated the affections of Mrs. Bracegirdle, an actress much admired for her personal charms. This lady had rejected the addresses of a Captain Hill, who, in company with Lord Mohun waylaid Mountfort one night, in the winter of 1692, as he was returning from the theatre to his lodgings, in Norfolk Street, Strand; and, before he could draw his sword, ran

him through the body, and killed him on the spot. Hill made his escape to the Continent, and Lord Mohun was tried by his peers for the murder, but, for the want of sufficient evidence, was acquitted. This nobleman was himself eventually killed by the duke of Hamilton, in a duel fought in Hyde Park. Mountfort was the author of five plays, and was in the zenith of his reputation at the time of his death.

MOURAD-BEY, chief of the Mamelukes, and companion-in-arms of Ibrahim Bey, was born in Circassia 1750. On the invasion of Egypt by Buonaparte, he won the admiration of the French by his gallant resistance, but was forced to submit to Kléber, who left him the government of Upper Egypt, under the French protectorate. Died 1801.

MOURADGEA, D'OHSSON, IGNATIUS, an Armenian by descent, was born at Constantinople, in 1740. At the age of twenty-four he understood most of the Oriental languages; and, from having been secretary and first interpreter to the Swedish embassy, was eventually appointed minister of Sweden to the Porte. Died 1807. He was the author of two valuable works, 'A General View of the Ottoman Empire' and an 'Historical View of the East.'

MOURAVIEF, M. NIKITISCH, a Russian poet, philosopher, and historian, tutor in the family of Catherine II., 1757-1807.

MOURET, J. J., a Fr. composer, 1682-1738.

MOURGUES, MICHAEL, a French Jesuit, and a man of profound erudition, was born at Auvergne, in 1643; became professor royal of mathematics and rhetoric in the academy of Toulouse; and died there in 1713. Among his best works are, 'A Parallel between Christian Morality and that of the Ancient Philosophers,' 'An Explanation of the Theology of the Pythagoreans,' 'New Elements of Geometry,' and a 'Treatise on French Poetry.'

MOUSKES, PHILIP, a Fr. historian, died 1282.

MOUTON, G., a French astronomer, 1618-94.

MOUTON, J. B., SYLVAIN, a Fr. Jansenist, one of the last refugees living in Holland, 1740-1803.

MOXON, JOSEPH, hydrographer to Charles II. and a mathematical writer, was born at Wakefield in Yorkshire, in 1627, and died in London, about 1700. He published several scientific books, taught the mathematics, and carried on the trade of a globe and map manufacturer.

MOYLE, WALTER, a miscellaneous writer, was born at Cornwall, in 1672; studied at Oxford and the Temple; and died at his seat in Cornwall, in 1721. His works, consisting of an 'Essay on the Miracle of the Thundering Legion,' an 'Essay on the Lacedæmonian Government,' another on the 'Roman Constitution,' and 'Letters,' were printed after his death, with a biographical memoir, in 3 vols.

MOYSART, F., a French writer, 1735-1813.

MOYSES, DAVID, page to King James, and author of a diary, published as 'Memoirs' of Scottish History, 1573-1630.

MOZART, JOHANN CHRYSOSTOMUS WOLFGANG GOTTLIEB, born in Salzburg, on the 25th of January, 1756, was the son of Leopold Mozart, a bookbinder of Augsburg, who studied music at Salzburg, and was in 1762 admitted as one of the musicians of the prince-archbishop of that town. The young Mozart, born amidst music, soon evinced a most remarkable musical precocity. At three years old he first began to shown signs of that astonishing ability which afterwards made him one of the greatest amongst many great musicians. At four years old, almost without a lesson, he was able to play upon the harpsichord several minuets and other pieces of music. At five he made his first essays as a composer. In

all the other studies proper to his age, as letters and arithmetic, he showed a marvellous aptitude, and very rapidly became a proficient in his juvenile tasks. Music, however, was always his favorite study, and his principal amusement. At six years of age, Mozart's father removed with all his family to Munich, where he, with his sister Mary-Anne, had the honor of performing before the elector, who received the infant artists with the most marked condescension. About this time he began privately to study the violin, and before his father, or any one else, was aware of his proficiency upon this instrument, he was able to acquit himself like a master in the second part of some most difficult concertos. Amid all the wonder and admiration which his great talents caused, Mozart never ceased to be a simple, good-natured, and unassuming child, and his instant obedience to the slightest request of his parents was one of his distinguishing traits. In 1763, when only seven years old, his family left Germany, and after having visited and performed in the principal cities of his fatherland, he in November arrived in Paris, and was introduced to play upon the organ at Versailles in presence of the whole court. Here he published his two first compositions, and the wonderful powers of Mozart created quite an excitement amongst all classes of people. In 1764 he came to England, where he received the most unbounded applause, both from the court and the nobility before whom he performed. During his residence in England, he composed and printed six sonatas, which were by request dedicated to the Queen. He returned to France in 1765, and from thence went to Holland, and at the Hague, when not more than eight years old, composed a symphony for a full orchestra, on occasion of the installation of the prince of Orange. They then returned to Paris, where they resided for two months, and where the young artist and his gifted sister were feted and caressed by all manner of people. They then turned their course toward Germany, and from this time forward Mozart devoted himself with increased ardor to the study of his art. In 1768 the two children performed before the emperor Joseph II. at Vienna, who ordered young Wolfgang to compose music to the opera buffo, *La Finta Semplice*, which, though never performed, was approved of by all the masters and cognoscenti of the period. In 1769 young Mozart was nominated concert master to the archbishop of Salzburg. In the same year he went to Italy, where he was most rapturously welcomed. His first performance in Italy was given at Milan, where he was engaged to return and compose the first opera for the carnival of 1771. At Bologna and Florence the reception he met with was equally flattering to the young musician. At the latter city he made the acquaintance of Thomas Linley, who, about his age, was then a pupil under Martini, the celebrated violinist. Mozart arrived at Rome in Passion Week, and on Wednesday went to the Sistine chapel, where he heard for the first time the celebrated *Miserere*, which was prohibited to be copied, or in any manner published, on pain of excommunication. On Good Friday the same *Miserere* was again performed, when Mozart was present with the MS. copy he had made from memory concealed in his hat, that he might have an opportunity of making corrections. This circumstance created an immense excitement at Rome, because the peculiarities of the *Miserere* were thought impossible to be expressed by musical notation, and when young Mozart, in presence of some Sistine choristers, sang the composition in the very manner in which it was sung by those who had acquired it only after long practice,

the professional singers expressed their astonishment in terms of unmeasured admiration. The fame of Mozart after this event was spread far and wide. His wonderful musical talents and power of performing on the organ were attributed to a charm which it was supposed he carried in his ring. When the pope first heard him perform, he conferred upon him the order of the Golden Spur, and at Bologna he was elected a member of the Philharmonic Society, which was at that time an honor rarely conferred even upon the greatest musicians. On the 26th of December, 1770, he produced at Milan his 'Mithridates,' which had a successful run of twenty nights, and caused him to be engaged to compose the first opera for the year 1773. This opera was 'Lucio Silla,' which was performed twenty-six nights in succession. In the interval between the years named above, he went to Venice and Verona, where he received the highest musical honors.—At Milan, he, in 1771, composed an opera, and in Salzburg in 1772 he composed another, for the election of the new archbishop. In 1775 his fame was so completely established, and so widely known, that he could have made choice of engagements in all the capitals of Europe. His father preferred Paris, and therefore, in 1777, he, with his mother, commenced his second journey towards that city. The death of his mother made Paris insupportable, and he returned to his father at the beginning of the year 1779. Some time after this Mozart went to Munich, whence he went to Vienna, and entered the service of the emperor, to whom he remained attached during the rest of his life, though tempted to leave him by many advantageous offers. His principal works, composed about and after this time, were 'Cosi Fan Tutti,' 'Idomeneo,' 'L'Enlevement du Serail,' 'Nozze de Figaro,' 'Don Giovanni,' 'Zauberflöte,' 'Clemenza di Tito,' 'Masses,' and his world-renowned 'Requiem.' During the time he was engaged in the composition of the 'Zauberflöte' he began to be subject to fainting fits, which recurred at short periods till the close of his life, which took place on the 5th of December, 1792, when he had not attained to his thirty-sixth year. He left a widow and two sons. His works, which are too numerous to mention by name, were in all styles of his art, and all great. He is one of the greatest masters of music, and his works will live to all time.

[J.M.]

MOZZI, L., a controversial writer, 1746-1813.

MOZZI, M. A., an Italian historian, 1678-1736.

MUDGE, ZACHARY, a dissenting minister, who

afterwards entered the Church of England, author of Sermons, &c., died 1769. THOMAS, his son, distinguished for his improvement of the chronometer, 1715-1794. JOHN, brother of the latter, a physician and professional writer, most distinguished for his improvement of the reflecting telescope, died 1793. WILLIAM, son of John, an officer in the army, and an employé in the trigonometrical survey, 1762-1820.

MUDIE, ROBERT, author of numerous works in natural history, and others of an entertaining and instructive character, was born in Forfarshire, in 1777. In 1802 he was appointed Gaelic professor and teacher of drawing in the Inverness academy. He subsequently filled other situations of a like nature; but at length turned his attention exclusively to authorship, and commenced his career with a novel, entitled 'Glenfurgus,' in 3 vols. He then for a while sought employment as a reporter for the London newspapers, and his literary efforts were henceforth unceasing. Independently of his contributions to periodicals, upwards of 80 volumes from his fertile pen were in rapid succession brought before the public. Of these we can only afford room for the titles of the most prominent: 'Modern Athens' (a description of Edinburgh); 'Babylon the Great' (a description of London), 4 vols.; 'The British Naturalist,' 2 vols.; 'The Feathered Tribes of the British Islands,' 2 vols.; 'Conversations in Moral Philosophy,' 2 vols.; 'The Elements; the Heavens, the Earth, the Air, the Sea,' 4 vols.; 'Popular Mathematics,' 'Man, in his Physical Structure, Intellectual Faculties,' &c. 4 vols.; 'The Seasons,' 4 vols.; 'History of Hampshire and the Channel Islands,' 3 vols.; 'Domesticated Animals,' 'Gleanings of Nature,' 'China and its Resources,' &c. So much industry and perseverance one might fairly have expected to see rewarded by a happy independence in the decline of life. That it was not so—that the very reverse, indeed, was the fact—we lament to hear; and, apart from any morbid feeling on the subject, we are compelled to admit, that although in the common routine of mechanical or commercial pursuits, industry and perseverance are generally attended with a fortunate issue, yet, as regards the higher operations of the intellect, the rule which holds good in other cases can no longer be depended upon. Died May, 1842, aged 64.

MUGGLETON, LODOWICKE, the principal of two enthusiasts (his companion being John Reeve), who in the year 1651, announced themselves as the two last witnesses, and went from place to place, denouncing with great violence all whom they regarded as false professors of religion, and even magistrates and persons in authority. Their principal attacks were directed against the Quakers and Ranters, some of whom replied to them in writing. The first publication of Muggleton is entitled 'A Remonstrance from the Eternal God: declaring several Spiritual Transactions unto the Parliament and Commonwealth of England, unto his Excellency the Lord General Cromwell, the Council of State, the Council of War, and to all that love the second appearing of the Lord Jesus, the only wise God and everlasting Father, Blessed for ever.' This pamphlet was first printed in 1653, and was republished in 1710, with a portrait of the author, the subscription to which gives the true date of his life—'Dyed the 14th of March, 1698, then aged eighty-eight years, seven months, and fourteen days.' Muggleton is depicted with long thin hair, low forehead, protruding brow, broad high cheek bones, and what physiognomists would call the aggressive nose. The

exposition of his doctrines is given in his work called 'The Divine Looking-Glass,' published 1656, and his followers formed a sect which has survived to the present times. His fanaticism was perfectly sincere, and he more than once suffered imprisonment for the vigorous manner in which he prosecuted his 'Commission.' [E.R.]

MUHLENBERG, HENRY MELCHOIR, the founder of the German Lutheran Church in the United States, was born in Germany, in 1711, died in Philadelphia, 1787. His three sons all rose to considerable distinction. PETER became a revolutionary officer and United States senator; HENRY a distinguished clergyman and naturalist; and FREDERICK treasurer of Pennsylvania, president of the convention which ratified the constitution, and speaker of the House of Representatives in 1794.

MUIS, S. M. DE, a Fr. Hebraist, 1587-1644.

MULLER, ANDREW, a German divine and Oriental scholar, especially distinguished for his labors in illustration of the Chinese language, 1630-1694.

MULLER, CARL OTTFRIED, an eminent modern scholar and historian, was born in 1797, at Brieg, in Silesia. He was a professor of archæology in the university of Gottingen, and distinguished himself by his researches into mythologic lore, analyzing it, and disentangling the allegorical parts from the historical. But his knowledge was by no means confined to that department of literature. His work on the Eumenides of Æschylus, and many others, fully prove his classic erudition; and his histories of the Dorians and the Etruscans have become naturalized in England as standard works. While travelling in Greece, with a view to the commencement of an elaborate work on the history of that country, he was taken ill, and died at Athens, August 1, 1840.

MULLER, GERARD FREDERIC, a German traveller and writer, skilled in the Russian language, and a long time resident in that country as historiographer of the empire. He is considered the father of Russian history, and is author of numerous valuable works in that branch of inquiry. Born in Westphalia 1705; died in Moscow, where he had been appointed keeper of the archives, 1783.

MULLER, HENRY, a Ger. divine, 1631-1675.

MULLER, J., a Dutch engraver, b. about 1570.

MULLER, JOHN, called Regiomontanus, from Mons Regius, or Königsberg, where he was born in 1436. After studying at Leipsic, he removed to Vienna, where he studied the mathematics under Purbach, whom he assisted in his observations. At the desire of Cardinal Bessarion, Regiomontanus and his master went to Rome, to complete the Latin version of Ptolemy's *Almagest*; but while there, Purbach died, and the whole task devolved upon his associate. After a long stay in Italy, he went to Buda; but on the breaking out of the war with the Turks he removed to Nuremberg, where he built an observatory, and founded a printing-office. He died in 1476, at Rome, whither he had been called by Sixtus IV., to assist in reforming the calendar, having been previously raised, for his services, to the archbishopric of Ratisbon. He wrote various astronomical works, and constructed some curious automata.

MULLER, JOHN VON, an eminent Swiss historian, was born in 1752 at Schaffhausen, and studied at Gottingen. In 1780 he published the first part of his 'History of the Swiss Confederation;' and shortly after he went to Berlin, where he printed 'Historical Essays.' His other principal work was a 'Course of Universal History,' but he was also the author of several others, which were published col-

lectively at Tübingen, in 27 vols. Muller was successively professor of Greek at Schaffhausen, and of history at Cassel, councillor of the imperial chancery, secretary of state for the ephemeral kingdom of Westphalia, and director-general of public instruction. Died 1809.

MULLER, J. S., a Germ. engraver, 1715-1782.

MULLER, LOUIS, a celebrated Prussian engineer. He served in the seven years' war under Frederic; rose to the rank of major; and died in 1804, aged 70. He was the author of a 'View of the Wars of Frederic the Great,' and other works relating to the military art.

MULLER, OTHON FREDERIC, an eminent naturalist, was born at Copenhagen in 1730. He died in 1784. He was born of parents in a humble sphere of life, and was destined for the church. Recommended by his learning and regularity of manners to the situation of tutor to the young Count Schulin, he travelled into various countries with him; and was induced by his pupil's mother, a woman of excellent understanding, to engage in the study of natural history. Marrying advantageously, he abandoned his intention of going into the church, and was enabled to devote himself exclusively to scientific occupations. As a naturalist he acquired a high reputation both at home and abroad, and was honored by his sovereign, who conferred upon him various marks of high distinction. His first works were the Entomology and Botany of the part of his native country where he was born and resided, which was followed by a continuation of the great work begun by Oeder, the Flora of Denmark. Zoology, however, soon superseded botany; and we know no naturalist who has more ably illustrated the fauna of his native country than Muller has done his. Selecting chiefly those portions of the animal kingdom, which, from their diminutive proportions, had till then been but little attended to, he struck out an original path, and clothing his descriptions of the little animals of his studies in elegant Latin, he has rendered his works accessible to, and made them the delight of all succeeding zoologists. His histories, or monographs of the infusoria, the hydrachnæ or water spiders, and the entomostraca of Denmark and Norway, are models of composition and monuments of prodigious patience; while his great work, which, however, he did not live to finish, the *Zoologia Danica*, is one of amazing accuracy, both in the descriptions and in the figures of the animals described, and is indispensable to every naturalist even of the present day. The younger Linnæus has named a genus of plants after him, *Mullera*.

MULLER, W., a German writer, 1794-1827.

MUMMIUS, L., a consul of Rome, B.C. 146.

MUNCER, MUNTZER, or MUNZER, THOMAS, a chief of the German anabaptists, executed 1525.

MUNCHAUSEN, GERLACH ADOLPHUS, Baron Von, Hanoverian prime minister, and founder of the university of Göttingen, 1688-1770.

MUNCHHAUSEN, JEROME CHARLES FREDERIC VON, was a German officer in the Russian service, who served in several campaigns against the Turks. He was a passionate lover of horses and hounds; of which, and of his adventures among the Turks, he told the most extravagant stories, till his fancy so completely got the better of his memory, that he really believed his most extravagant fictions, and felt very much offended if any doubt was expressed on the subject. Having become acquainted with Burger at Pyrmont, and related these waking dreams to him, the poet published them in 1787, with his own improvements, under the title of 'Wun-

derbare Abenteuer und Reisen des Herrn von Munchhausen.' The wit and humor of the work gave it great success, and it was translated into several foreign languages. Died 1797.

MUNCK, J., a Danish navigator, died 1628.

MUNDAY, ANTHONY, a dramatic poet of the 16th century. He was the author of the 'City Pageants,' enlarged Stowe's Survey of London, and died in 1633.

MUNDEN, JOSEPH SAUNDERS, a comic actor, distinguished for humor, born in London, 1758. He was intended by his parents for the medical profession; but, disliking it, he was next apprenticed to a law-stationer. Here having learned to copy, he was originally engaged to write out the parts for the performers, and thus introduced to the histrionic profession, was sometimes permitted to tread the stage as mute, and at length joined a strolling company at Rochdale, Lancashire. In 1780, he was engaged as low comedian at the Canterbury theatre. It was not, however, until 1780 that he made his *débüt* in London, when he appeared at Covent Garden, as *Sir Francis Gripe*, in 'The Busy Body,' and *Jemmy Jumps*, in 'The Farmer.' Transferred in 1813 to Drury Lane, he continued there till 31st May, 1824, when he retired. *Old Dornton*, in 'The Road to Ruin,' was one of his most successful characters. Munden indulged in broad grimace, but added to his humor a pathos which was sometimes irresistibly touching. Unlike most actors he was distinguished in private life by his economical habits, and accumulated a large fortune. He died 6th February, 1832, in Bernard Street, Russell Square, where he had long resided. [J.A.H.]

MUNNICH, BURCHARD CHRISTOPHER, Count, a military officer, was born in Oldenburgh, in 1683. After distinguishing himself in the German wars, he entered into the Russian service, and rose to the rank of marshal; but in 1741 the empress Elizabeth condemned him to perpetual exile in Siberia. He was, however, recalled from banishment on the accession of Peter III., and, on his arrival at court, made his appearance before the emperor in the sheepskin dress which he had worn during his captivity. Died 1767.

MUNOZ, JOHN BAPTIST, a Spanish historian, was born in 1745, at Museros, near Valentia. He was appointed cosmographer of the Indies, and undertook, by order of the king, a history of America, of which he lived to publish only one volume. His other works are, 'De recto Philosophiæ recentis in Theologia Usu, Dissertatio,' 'De Scriptorum Gentilium Lectione,' 'Institutiones Philosophicæ,' &c.

MUNOZ, S., a Spanish painter, 1745-1799.

MUNOZ, T., a Spanish engineer, 1743-1823.

MUNRO, ALEXANDER, M.D., the son of Dr. Alexander Munro, professor of anatomy in the university of Edinburgh, was born at Edinburgh on the 20th of May, 1733, and after having been carefully educated as an anatomist, he was associated with his father in the chair of anatomy in the year 1755, and ultimately succeeded him in that charge. This chair he held for the remainder of his life, which was terminated on the 2d of October, 1817, when he had attained to the eighty-fifth year of his age. He is generally known in medical biography as Munro Secundus, and, with his father, contributed largely to the establishment of the fame of the Edinburgh school of medicine; but though a skilful anatomist and physiologist, he could lay no claim to the possession of the inventive powers and the original genius of the Hunters, with both of whom he was contemporary, and with the elder of whom he main-

tained a bitter, but now forgotten, controversy on the origin of the lymphatics. [J.M'C.]

MUNRO, SIR T., gover. of Madras, 1760-1827.

MUNSTER, Count, a Hanoverian statesman. In 1806, Hanover being invaded by the Prussians, he entered a spirited protest and retired to England, where, on account chiefly of that protest, he was so great a court favorite, that when the mental malady of George III. was past all doubt, the count was one of the commissioners appointed to protect and administer his private property. But he is chiefly known for the part he took in the congress of Vienna, 1814, and the declaration of 1815, by which Napoleon was put out of the pale of the law. Died 1836.

MUNSTER, GEORGE FITZCLARENCE, Earl of, was the eldest son of the Duke of Clarence (afterwards William IV.) and the celebrated Mrs. Jordan. He was born January 29, 1794, and after receiving the elements of instruction at Sunbury, under Dr. Moore, was at twelve years of age received into the Royal Military College at Marlow; and when scarcely fifteen he commenced actual service in the Peninsula as cornet in the Prince of Wales's hussars, and became aide-de-camp to General Slade. On the disastrous termination of Sir John Moore's expedition he returned to England for a few weeks, and then started to join the army in Portugal as aide-de-camp to Lord Londonderry, then Sir Charles Stewart, with whom the young soldier (now a captain) joined the army under Sir Arthur Wellesley, when that gallant chief took the field in 1809. From this period to the conclusion of the war, he served on the staff at head-quarters, and was present at twelve general engagements; and on some of those occasions, but more especially at the celebrated battle of Fuentes d'Onoro, his conduct was marked by extraordinary skill and presence of mind; so much so, indeed, that although he was only 17, a troop was given him in the prince regent's own regiment as a reward for his valor and discretion. At Toulouse he was also severely wounded in leading a charge against cavalry. A new sphere of action now awaited him. He exchanged into the 20th dragoons, and in January, 1815, Captain Fitzclarence sailed for India as aide-de-camp to Lord Hastings, and while there he closely studied the Oriental languages and literature. During the Mahratta war of 1817, he had several opportunities of distinguishing himself, by which his military reputation was considerably enhanced. On the conclusion of peace with Scindiah, he was intrusted with what was at that time a hazardous duty, namely, the carrying home the overland despatches from India; and in 1819 he published his 'Overland Tour.' At the recommendation of his friend the Duke of Wellington, he received the brevet of lieutenant-colonel; soon after which he married Miss Mary Wyndham, a natural daughter of the late Earl of Egremont, and had seven children. Ere his royal father had been a year on the throne, he determined to confer such defined rank upon his offspring as should at once be consistent with their birth, and agreeable to the feelings of the people; and in pursuance of such determination he created his eldest son earl of Munster, viscount Fitzclarence, and baron Tewkesbury. 'No person,' says Mr. Dodd in his Annual Obituary, 'who has observed the career of Lord Munster, can overlook the fact, that he felt himself continually urged, by his peculiar position, to both mental and physical exertions, which were perhaps beyond his strength. He was the acknowledged son of a monarch, ruling over one of the most powerful nations

of the earth; he was within view, but excluded from the possession, of dominion; his whole life was an object of attention to thousands of his father's subjects; he was exposed to all the prominence of a great man without having attained that position by his own actions; and he dared not live in retirement lest he should be thought a fool. The ill consequences of every temporary indisposition were aggravated by his mental sensibility, and in the month of March, 1842, a considerable change was observed in his manner. Not having given any very decided indications of insanity, he was accidentally left alone on the evening of the 20th of March. He took that opportunity of using one of his pistols, and having wounded himself in the right hand, he rung the bell, and despatched the servant for medical assistance. Immediately afterwards he put an end to his existence by firing a second pistol into his mouth.' Died 1842.

MUNSTER, SEBASTIAN, professor of Hebrew at Basle, one of the most learned men of his time, author of numerous works, 1489-1552.

MUNTER, B., a German divine, 1735-1793.

MUNTER, F., a Ger. Orientalist, 1760-1830.

MUNTING, ABRAHAM, father and son, distinguished as physicians and botanists, the former died 1628, the latter 1626-1683.

MURA, F. DE, a painter of Naples, died 1740.

MURAND, E., a Dutch painter, 1622-1700.

[Murat.]

MURAT. JOACHIM MURAT, *le beau sabreur* of the imperial armies, was born in 1767, near Perigord. His father was a country innkeeper. Young Murat was distinguished even in boyhood, for his courage, and for his horsemanship. He was intended for the church; but he entered the army at the age of 20, and soon became notorious for his duels, and for the fervor of his democratic opinions. In 1795, when Buonaparte put down the rising of the Sections of Paris, Murat was an officer in one of the regiments of cavalry in the capital; and he was of the greatest service to his future master by securing for him the possession of the park of artillery, which was employed by Buonaparte so effectively against the insurgents. When Napoleon was made general of the army of Italy, he placed Murat on his personal staff: and he afterwards took him with him to Egypt. Both against the Austrians and Piedmontese in Italy, and against the Mamelukes and Turks in Egypt, Murat proved his brilliant valor, and his ability as a leader of horse. He returned from Egypt with Napoleon, and throughout the consular and early imperial campaigns in Germany, he in-

creased his martial renown. His height of stature, his handsome features, his showy costume, and the unrivalled skill and grace of his horsemanship, all combined to increase the effect which his daring courage and personal prowess produced both on friends and foes. His white plume, like that of Henri Quatre, was the standard which the men followed best through the thick of every fight. He had little strategic ability. Napoleon, when at Elba, described him truly in these words—'Murat is a good soldier—one of the most brilliant men I ever saw on the field of battle. Of no superior talents; without much moral courage; timid even in forming his plan of operations: but the moment he saw the enemy, all that vanished—his eye was the most sure, and the most rapid—his courage truly chivalrous. Moreover, he is a fine man, tall, and well-dressed, though at times rather fantastically. It was really a magnificent sight to see him in battle heading the cavalry.' Murat married Caroline Buonaparte, Napoleon's youngest sister. He was made a marshal of France, when the empire was established, and in 1806 Napoleon gave him the grand duchy of Berg and Cleves. In 1808 Murat received from his imperial patron the crown of Naples, and reigned over that beautiful country for seven years. Botta, the Italian historian, says of him, 'He was courteous and affable to all; he was no lover of rapine, still less of cruelty; praise only was necessary to his happiness.' Such was Murat's general character, both before and during his royalty; but his implicit devotion to Napoleon made him on several occasions become the instrument, if not the cause, of acts of great barbarity and injustice.—In 1812 he joined Napoleon in the great expedition against Russia, and was general of the whole cavalry of the Grand Army. After the disasters of that campaign, Murat continued to serve under Napoleon against the Allies in Germany, till the great defeat of the emperor at Leipzig in the autumn of 1813, seemed to render his cause desperate. Murat then sought to secure his own possession of the Neapolitan throne. He basely betrayed his benefactor; and, joining himself to the Allied Sovereigns against France, he attacked Napoleon's forces in Italy. By this treachery he preserved himself as king of Naples during 1814; but he found that the Allied Sovereigns, though they suffered him to reign, regarded him with suspicion and ill-will. On learning Napoleon's escape from Elba in 1815, Murat determined to change sides again; and he attacked the Austrians in Italy. He was speedily defeated, and obliged to take refuge in France, before the opening of the campaign in Belgium between Napoleon and the Allies, by which the war was decided. So deep was the abhorrence among the French soldiery of Murat for his treachery in the preceding year, that Napoleon did not dare bring him to the French army; though the emperor knew well Murat's value in the day of battle. Afterwards, at St. Helena, Napoleon referred to the subject, and said, that perhaps Murat, had he been at Waterloo, might have changed the fate of that battle, and of the world. 'There were moments during the battle,' said the emperor, 'when the breaking of a single English square might have given us the victory; and if ever there was the cavalry officer who could have done it, Murat was the man.' After the second fall of Napoleon, Murat wandered about for some months in the south of France and in Corsica: and finally, on the 7th October, 1815, he landed with a small band of armed followers on the Calabrian coast, in the chimerical hope of reconquering his kingdom

of Naples. He was speedily overpowered and taken prisoner. The Bourbon Neapolitan court showed him no mercy. He was sent before a military commission, tried, condemned, and shot within half-an-hour after sentence. He met his fate with the chivalric courage that had ever distinguished him; and his last letter to his wife, written by him while the preparations were making for his court-martial, is one of the most pathetic and heroic that history has preserved. When he confronted the soldiers who were to shoot him, he refused to have his eyes bandaged, and bade them 'spare the face, and shoot straight to the heart.' Then he pointed to his heart with his right hand; and held in the left a medallion picture of his wife and children, on which he was gazing when the soldiers fired, and he was stretched a corpse at the instant, still holding the medallion to the very last. MURAT, CHARLES LOUIS NAPOLEON ACHILLE, the son of Joachim Murat and Caroline Buonaparte, king and queen of Naples. After the expulsion of his family from Italy he resided in Austria until 1821, when he emigrated to Florida and settled there as a quiet country gentleman. Died April 15, 1846, aged 46.

MURATORI, D., an Ital. painter, born 1661.

MURATORI, LOUIS ANTHONY, an eminent Italian historian and antiquary, was born in 1672 at Vignola, in the Modenese territories; was made keeper of the Ambrosian library at Milan, and, subsequently, librarian and archivist to the Duke of Modena. His literary productions are numerous and valuable, but his fame chiefly depends on the vast erudition he has shown in editing the works of others. His great historical collection, entitled '*Rerum Italicarum Scriptores, ab anno Æræ Christianæ*,' 29 vols. folio; '*Antiquitates Italicæ, Mediæ Ævi*,' 6 vols. folio; '*Anecdota Latina*' 4 vols. 4to.; '*Anecdota Græca*,' 4 vols. 4to.; '*Annali d'Italia*,' 18 vols. 8vo.; with many others, attest the magnitude of his literary labors. Died 1750.

MURDOC, a king of Scotland, 715–730.

MURE, SIR W., a Scotch poet, died 1657.

MURENA, C., an Italian architect, 1715–1764.

MURET, J. L., a Swiss economist, 1715–1796

MURET, M. A. F., an Ital. *savant*, 1526–1585.

MURILLO, BARTHOLOME ESTEBAN, was born at Seville 1st January, 1618. He was the pupil of his relative Juan del Castillo. In 1642 he visited Madrid, and was aided by Velazquez, then painter to the king, who procured him permission to copy in the Royal Galleries. Murillo returned to Seville in 1645, where he commenced that great series of works which have now made his name so glorious. He married a lady of fortune in 1648, which much aided his personal influence, and he succeeded in establishing an academy of the arts at Seville in 1660, and acted as president the first year. He died at Seville, 3d April, 1682, in consequence of a fall from a scaffolding at Cadiz, where he was engaged in the church of the Capuchins, painting a large altar piece of St. Catherine.—Murillo's principal works are eight large pictures which he painted for the hospital of St. George, called *La Caridad*, finished in 1674, but which were dispersed during the peninsular war: three are in this country—'The Return of the Prodigal Son,' and 'Abraham Visited by the Angels,' in the possession of the duke of Sutherland; and 'Christ Healing the Sick of the Palsy,' called 'The Pool of Bethesda,' in the possession of Mr. George Tomline, London, 'Our Lady of the Immaculate Conception,' painted in 1678, and lately purchased by the French government, for the enormous sum of £23,600 sterling, and the picture of the 'Holy Family,' or 'Trin-

ity,' in the British National Gallery, are fine examples of Murillo's later style. In the latter part of his life Murillo changed both his style and his subjects; his earlier pictures, chiefly fancy subjects, and illustrative of humble life, are painted in a forcible manner, with predominant dark shadows; his latter works are of equal truth of character, but in a more elevated and chaste style, and are almost exclusively of religious subjects.—(Cean Bermudez, *Diccionario Historico de los mas Ilustres Profesores de las Belas Artes en Espana*, Madrid, 1806; Stirling, *Annals of the Artists of Spain*.) [R.N.W.]

MURNER, TH., a French poet, 1465–1533.

MURPHY, ARTHUR, a dramatic and miscellaneous writer, was born at Cork in 1727, and educated at St. Omer's. At the age of 18 he returned to Ireland, and was placed under a merchant, who was his relation. But not liking that profession he came to London, and tried his dramatic powers in the farce of 'The Apprentice,' which was soon followed by that of 'The Upholsterer;' and, having a great inclination to the stage, he made an effort in the character of Othello, but without success. He then produced the 'Orphan of China,' a tragedy, which was well received. He also wrote a weekly paper, called the 'Gray's Inn Journal;' and two others, in defence of government, entitled the 'Test' and the 'Auditor.' In these, however, he failed; and some ludicrous mistakes, into which he was insidiously led by his antagonists, exposed him to ridicule. Having studied the law, he was called to the bar by the society of Lincoln's Inn, but never had much practice. His plays of the 'Grecian Daughter,' 'All in the Wrong,' 'The Way to Keep Him,' and the 'Citizen,' had great success, and produced the author wealth and fame. Mr. Murphy also acquired considerable reputation by his 'Essay on the Life and Genius of Dr. Johnson,' published in 1792; as well as by his translation of Tacitus and Sallust, and the 'Life of Garrick.' He was zealous in defence of the government measures; and during his latter years he obtained the appointment of a commissioner of bankrupts, and a pension of £200 per annum. He died in 1805, aged 77.

MURPHY, JAMES CAVANAGH, an Irish architect and antiq., au. of works on Portugal, died 1816.

MURR, CHR. THEOPHILUS VON, born at Nuremberg 1735, distinguished as a literary *savant*, Orientalist, and bibliopole, died 1811.

MURRAY, ALEXANDER, a self-taught linguist, was born in 1775, at Kitterick, in Galloway; and his father being a shepherd, he also was employed, at the age of 10, to assist as a shepherd's boy. By extraordinary application he made himself master of the Latin, Greek, Hebrew, and French languages; and when, in 1794, the fame of his acquirements gained him admission to the university of Edinburgh, he made a rapid progress also in the Eastern dialects. In 1806 he became assistant to Dr. Muirhead, the minister of the parish of Urr, and soon afterwards he succeeded him in his pastoral charge; but in 1812 he was called from thence to fill the chair of Oriental languages at Edinburgh, and at the same time received the degree of D.D. He left a 'History of the European Languages,' which was printed, with his life prefixed, in 2 vols. Died 1813.

MURRAY, CHARLES, a theatrical performer and dramatic writer, was born in 1754, at Cheshunt, in Hertfordshire. He was the son of Sir John Murray of Broughton, who acted as secretary to the Pretender in 1745; was brought up as a surgeon in the naval service, which he quitted for the stage; performed at the chief provincial towns in England;

made his debut at Covent Garden in 1796, as Shylock; and ultimately became manager of the theatre at Edinburgh, where he spent the latter part of his life. He was the author of 'The New Maid of the Oaks' and 'The Experiment.' Died 1821.

MURRAY, DANIEL, late Roman Catholic archbishop of Dublin, was born in 1768, and educated at Salamanca, where he was ordained priest in 1790. He succeeded to the archbishopric in 1823, and during the agitation for catholic emancipation supported that measure by his influence, after which he took no part in political questions. In 1831, he was joined with Archbishop Whately and others in the commission for Irish education, and sanctioned the institution of the Queen's Colleges; he withdrew, however, on knowing the contrary pleasure of the pope. Died 1852.

MURRAY, Right Hon. SIR GEORGE, a gallant British general, governor of the Royal Military College at Woolwich, &c., was born at the family seat, in Perthshire, in 1772, was educated at the high school and university of Edinburgh, and entered the army in 1789, and gained great distinction in almost every quarter of the globe for his military achievements, and more especially for the skill and ability with which he discharged on some occasions the difficult office of quarter-master-general. In 1812 he was appointed to the government of the Canadas, but on hearing that Napoleon had escaped from Elba, he obtained his release from the governorship of Canada, and joined the English Army in France. On his return to England he was appointed governor of Edinburgh Castle; and in 1819 the governorship of the Royal Military College was given him. In 1823 he became lieutenant-general of the ordnance, was soon after elected M.P. for Perthshire, and in 1828 took office as secretary of state for the colonies. In Sir R. Peel's administration of 1834–5 he filled the office of master-general of the ordnance; but lost his seat for Perthshire. At the Westminster election in 1837 he opposed and was defeated by Sir Lacy de Evans and Mr. Leader. When the Whigs resigned in 1841, Sir George again received the appointment of master-general of the ordnance. Sir George Murray came before the public as the editor of 'Marlborough's Dispatches,' 5 vols.; but it is not necessary to speak of him in any other capacity than that of a gallant and successful soldier and an able minister. He died, July 28, 1846, aged 74.

MURRAY, HUGH, a most voluminous and successful writer on geography and kindred subjects, was born at the manse of North Berwick, 1779, the living of which his ancestors had held uninterruptedly from the period of the revolution till the death of the last incumbent, his elder brother, in 1824. At an early age he became a clerk in the excise office in Edinburgh, where his official duties leaving him considerable leisure, he cultivated a taste for literature with rare and indefatigable ardor. In the early part of his career he edited the Scots' Magazine, then in the hands of Mr. Constable, and contributed to the Edinburgh Gazetteer; and published successively discoveries and travels in Africa, Asia, and America, all of which acquired for their author a liberal share of popularity. At a later period of his life he contributed no fewer than 15 volumes to the Edinburgh Cabinet Library, on subjects connected with his favorite study; but the work on which his fame will chiefly rest is his 'Encyclopædia of Geography,' a stupendous monument of reading, industry, and research. Died 1846.

MURRAY, JAMES, a Scotch divine, 1702–1758.

MURRAY, JAMES, a dissenting divine, d. 1782.

MURRAY, JAMES, an American by birth, whose real name was Lillibridge, was a partisan officer in the service of the East India Company. He entered the service of Holkar, the famous Mahratta chief, about the year 1790, and soon became noted for his bravery, military skill and the good offices he performed to certain British officers, who had been taken prisoners, and who, but for his humane interference, would have been put to the sword. When the war broke out between the British government and Scindia, in which Holkar assisted the latter, Murray joined the British general, Lord Lake, with a body of 7,000 cavalry. The Marquis of Wellesley at that period had issued a proclamation recalling all British subjects from the service of the native princes, but this order could not extend to Murray, as being an American. He was treated by the British commander with great consideration, and was employed in many dangerous and important services, still retaining the command of the cavalry which he had brought with him. At the siege of Bhurtpore, where the British army lost nearly 10,000 men, in four attempts to take the fort by storm, he was in continual action, and attained the character of being the best partisan officer in the army. Died 1807.

MURRAY, JAMES STUART, earl of, a natural son of James V., king of Scotland, was born 1531, and educated in France with his sister, Mary, but joined the reformers soon after her marriage with the dauphin. His political history is connected with the fortunes of the queen, after whose imprisonment in Lochleven castle, 1567, he was proclaimed Regent, and defeated her troops at the battle of Langside. He was shot by James Hamilton, whose wife he had seduced, 1570.

MURRAY, JOHN, an eminent physician, was a native of Scotland, and educated at Edinburgh, where he rose to eminence as a lecturer in natural philosophy, chemistry, the materia medica, and pharmacy. He was the author of 'Elements of Chemistry,' 2 vols.; 'Elements of Materia Medica and Pharmacy,' 2 vols.; 'A System of Chemistry,' 4 vols.; and 'A System of Materia Medica and Pharmacy,' 2 vols. Died 1820.

MURRAY, JOHN, F. S. A., an eminent publisher, known wherever the English language is known, by his connection with the works of Lord Byron, was born in 1778. Mr. Murray was himself a man of considerable literary acquirements; and while his singular acuteness and judgment insured his success as a man of business, his fluency, his store of anecdote, and a certain dry quiet humor, closely allied to wit, rendered him an agreeable companion for such men as Scott, Byron, Moore, Southey, Lockhart, and a number of other celebrated writers, who were at various times his guests, and at all times, from their first acquaintance with him, his fast friends. In their dealings with him, literary men were soon convinced that no paltry attempts would be made to depreciate real merit, or to depress below a fair remunerating standard the wages due to intellectual labor: nay, so generous were his impulses, that if he found a work profitable to him beyond what he had calculated upon, he frequently added to the stipulated price of copyright—sometimes even doubling it! Of this we might adduce several instances, did our space permit: we shall conclude by observing, that as he was one of the most successful publishers, so he highly deserved success, were it only for his wise and consistent liberality. Died June 27, 1843, aged 65.

MURRAY, JOHN AND., a Swedish naturalist, 1740–1791. His brother, ADOLPHUS, professor of anatomy, 1750–1803. A third brother, J. PHILIP, distinguished as a man of letters, 1726–1776.

MURRAY, LINDLEY, a grammarian, and moral writer, was born in 1745, of Quaker parents, at Swatara, near Lancaster, in Pennsylvania. He was originally destined for the mercantile profession; but having been severely chastised for a breach of domestic discipline, he privately left his father, who was then residing at New York, and, taking up his abode in a seminary at Burlington, New Jersey, he there contracted a love of books and study. He afterwards studied the law, and practised as a barrister; but in course of time he quitted the bar for the counting-house, and by mercantile pursuits having realized a competency, he eventually settled at Holdgate, near York. His works consist of an 'English Grammar,' 'English Exercises' and 'Key;' the 'English Reader,' with an 'Introduction' and 'Sequel' to the same; two French selections, 'Le Lecteur François,' and 'Introduction au Lecteur François,' 'The English Spelling Book,' 'The Power of Religion on the Mind,' and 'The Duty and Benefit of Reading the Scriptures.' These publications were all lucrative, and deservedly so; and it is no small satisfaction to know, that his private life was as amiable as his labors in the cause of education and morals were successful. He died in 1826, aged 85.

MURRAY, PATRICK, fifth Lord Elibank, a writer on the currency and public credit, 1707–78.

MURRAY, WILLIAM. See MANSFIELD.

MURRAY, W. H., a Scotch actor, 36 years manager of the Theatre Royal, Edinburgh, 1791–1852.

MURRAY, WILLIAM VANS, a distinguished American diplomatist, was born in Maryland, about 1762. He studied the law in England, practised it in his native country, and became a Senator of the United States. As minister at the Hague he succeeded in preserving harmony between the American and Batavian republics; and the reconciliation between the United States and France was effected chiefly through his agency as envoy extraordinary to the French republic. Died 1803.

MUSA, ABU ABDDALLAH MAHAMMED BEN, the earliest Arabian writer on Algebra.

MUSA, ANTONIUS, a Roman physician, celebrated for his skilful cure of Augustus.

MUSA, IBN N., an Arabian general, 640–717.

MUSÆUS, a philosopher and poet of antiquity, who is said to have been the son of Orpheus, and president of the Eleusinian mysteries at Athens. He versified the oracles, and wrote a poem on the sphere. A hill near Athens was called by his name. He is to be distinguished from Musæus the grammarian, who wrote a poem, called 'The Loves of Hero and Leander.'

MUSÆUS, a Greek poet of the 4th century, author of the 'Loves of Hero and Leander.'

MUSÆUS, JOHN CHARLES AUGUSTUS, an eminent German writer, born at Jena, in 1735, was professor at the gymnasium of Weimar, and author of 'Physiognomical Travels,' 'Popular Tales of the Germans,' &c. Died 1787.

MUSCALUS, A., a German divine, died 1580.

MUSCHER, M. VAN, a Dutch painter, 1645–1705.

MUSCULUS, WOLFGANG, one of the early reformers, born at Dieuze, in Lorraine, in 1497. He was originally a Benedictine monk; and on embracing the doctrines of Luther, he was obliged to fly to Strasburg, from which city he removed to Augsburg; and afterwards went to Berne, where he was

appointed professor of divinity. His commentaries on the Scriptures are valuable; besides which he published several translations from the Greek, particularly of the ecclesiastical historians. Died 1563.

MUSGRAVE, Sir RICHARD, bart., an Irish historian, was born about 1758. He was a member of parliament, and collector of the excise for Dublin. In 1801 he published 'Memoirs of the Rebellions in Ireland,' 4to., a work which gave great offence to the Roman Catholics, on account of the glowing picture exhibited in it of the atrocities committed by the insurgents in 1798. Sir Richard died in 1818.

MUSGRAVE, SAMUEL, a physician of Exeter, known as a classical scholar and critic, died 1782.

MUSGRAVE, WILLIAM, grandfather of the preceding, known as a medical writer and antiquarian, 1657-1721.

MUSONIUS, a Stoic philosopher, 15th century.

MUSS, CHARLES, an ingenious painter in enamel, whose 'Holy Family,' after Parmegiano, is said to be the largest piece of enamel ever painted. Died 1824.

MUSSATO, ALBERTIN, an historian and poet, was born in Padua, in 1261. He rose from a state of indigence to public employments in his native city; but notwithstanding his services, he became an object of popular fury; and in 1314 an attempt was made to murder him. The ringleaders in this conspiracy were put to death; but Mussato was afterwards banished to Chiozzo, where he died in 1330. In his exile he wrote 'Historia Augusta Henrici VII. Imp.'

MUSSCHENBROEK, PETER VAN, a celebrated Dutch natural philosopher and mathematician, was born at Leyden, in 1692. He applied himself chiefly to natural philosophy; held professorships at various places, and was a member of the Royal Society, and the French Academy of Sciences. His 'Course of Natural and Experimental Philosophy,' is a valuable work, and has been translated into English by Colson, in 2 vols. Musschenbroek was also the author of 'Tentamina Experimentorum,' 'Institutiones Physicæ,' and 'Compendium Physicæ Experimentalis.' Died 1761.

MUSSO, C., an Italian prelate, 1511-1574.

MUSURUS, M., a Greek *savant*, 1470-1517.

MUTIANO, GIROLAMO, an Italian painter, born at Brescia. He was a great favorite with Pope Gregory XIII., who employed him to paint a picture of St. Paul the hermit, and another of St. Anthony, for the church of St. Peter. Sixtus V. also held him in esteem, and intrusted to him the designs for the bas-reliefs of the column of Trajan. At the instance of this artist, pope Gregory founded the academy of St. Luke, which Sixtus confirmed by a brief; and Mutiano gave two houses to the institution. Died 1590.

MUTIS, JOSEPH CELESTINO, a celebrated naturalist, was born at Cadiz, in 1731. In 1760 he accompanied the Marquis della Verga to New Granada, and spent nearly half a century in South America, contributing greatly to the spreading of science and the arts of civilization in that country. On his return to Europe he was appointed keeper of the royal garden at Madrid. He was the first botanist that distinguished the various species of cinchona. Died 1808.

MUTIUS, CÆLIUS, first named Codrus, and afterwards Scævola, an illustrious Roman, who distinguished himself in the war against Porsenna. When that prince besieged Rome, Mutius entered his camp to assassinate him, and, by mistake, stabbed one of

his attendants. Being seized and brought before Porsenna, he said that he was one of three hundred who had engaged by oath to slay him, and added, 'This hand, which has missed its purpose, ought to suffer.' On saying this he thrust it into the coals which were burning upon the altar, and suffered it to be consumed. Porsenna, struck with his intrepidity, made peace with the Romans. The name of Scævola, or left-handed, was given as a mark of distinction to Mutius and his family.

MUZIO, G., an Italian writer, 1496-1576.

MYCONIUS, FREDERIC, a German divine, originally a Franciscan monk, was born at Lichtenfelt, in Franconia, in 1491. When Luther declared against indulgences, Myconius opposed him, but soon changed his sentiments, and became a missionary for the propagation of the principles of the Reformation. In 1538 he accompanied the chancellor of Weimar in an embassy to England; and, while there, held a disputation with some bishops and other divines. On his return, he was employed to reform the churches of Thuringia; but he protested strongly against the alienation of the ecclesiastical and monastic revenues to secular purposes. Died 1546.

MYCONIUS, OSWALD, or GEISSHAUSER, a reformer, born at Lucerne, in Switzerland, in 1488. He studied at Basle, under Erasmus and Glareanus, after which he became successively master of the schools of St. Theodore and St. Peter. He next removed to Zurich, where he held the office of regent of the college three years; after which he returned to Basle, obtained the head pastorship of the church, and was chosen professor of theology. He wrote several commentaries on the Scripture, a Latin version of the Catechism of Cœcolampadius, and a 'Narrative of the Life and Death of Zuinglius.' Died 1552.

MYDORGE, C., a French mathematician, 1585-1647.

MYLE, A. VANDER, a D. philolog., 1558-1637.

MYLIUS, J. C., a German bibliographer, 1710-1757.

MYLNE, ROBERT, an architect of considerable eminence, was born at Edinburgh, in 1734. While studying at Rome, he gained the chief architectural prize at the academy of St. Luke; of which academy, as well as those of Florence and Bologna, he was a member. Mr. Mylne was the builder of Blackfriar's Bridge, which was commenced in 1760, and completed in 1770. It was the first work of the kind executed in England, in which arches approaching to the form of an ellipsis were substituted for semicircles. He also obtained the appointment of surveyor of St. Paul's cathedral, and was employed to erect many private edifices in various parts of the kingdom. Died 1811.

MYN, H. VANDER, a D. painter, 1684-1741.

MYRO, a Greek poetess, 3d century B.C.

MYRON, one of the most celebrated artists of antiquity, was born at Eleutheræ in Bœotia about 432 B.C. He was the pupil of Ageladas, and contemporary with Phidias and Polycletus: he was established at Athens. Myron is remarkable among Greek sculptors for the comparative naturalism of his forms as contrasted with the ideal style of Phidias and other great Greeks; he represented man and animal with equal success; he almost, says Petronius, gave the souls of men and animals to brass. 'He was,' says Pliny, 'curious in all corporeal detail, but paid little regard to expression;' this is not a bad description of what is now termed naturalism. The works of Myron, of which very many are recorded, were mostly in bronze, of Delos; but he was also a sculptor in

marble, a carver in wood, and an engraver of metals. The celebrated Townley Discobolus, or quoit-thrower, found in the villa of Hadrian, near Tivoli, in 1791, is the work of Myron, though supposed to be a marble copy of the original; still, amongst all his great works, the most celebrated was a bronze cow suckling a calf, set up in a public place at Athens: there are thirty-six epigrams on this work in the Greek anthology. So extraordinary a popularity can be owing only to life-like imitation, which must have been a comparative novelty. No quality in art is so popular, it is what the most vulgar and least informed can understand.—The following will serve as a specimen of the high reputation of this remarkable work; it is from an old Greek epigram in Curl's *Anacreon*:—

'This heifer is not cast, but rolling years  
Hardened the life to what it now appears:  
Myron unjustly would the honor claim,  
But nature has prevented him in fame.'

The cow was, in the time of Procopius, the sixth century, in the temple of Peace at Rome. See a full account of Myron and his works, by the writer, in the *Supplement to the Penny Cyclopædia*. [R.N.W.]

MYRTIS, a poetess of Bœotia, 5th cent. B.C.

MYRTIUS, CHERUBIN, a local historian, born near Treves, and settled in an Italian monastery in 1592; date of his death unknown.

MYSON, one of the seven wise men of Greece.

MYTENS, ARNOLD, a Flemish painter of scriptural history, 1541–1602.

MYTENS, DANIEL, the name of two Dutch painters, father and son, the elder, known to have been living in 1656, the younger, 1636–1688.

MYTENS, M., a Swedish painter, famous for his imitations of the antique, born at Stockholm, 1695; died at Vienna, where he was painter to the court, 1755.

MYTZES, a king of the Bulgarians, 1258.

## N

NABEGA, an Arabian poet, 6th century.

NABI-EFFENDI, a Turkish poet, 17th cent.

NABIS, a tyrant of Sparta, who commenced his reign about the year 205 B.C. He was surrounded by an armed guard, had a number of secret spies in his service, put to death or banished every suspected person, and indulged in the exercise of every species of cruelty. He contrived an instrument of torture in the form of a beautiful woman, whose rich dress concealed a number of iron spikes in her bosom and arms. When any one, therefore, opposed his demands, he would say, 'If I have not talents enough to prevail with you, perhaps my Apega may persuade you.' The automaton statue then appeared; which Nabis taking by the hand, led up to the person, who, being embraced by it, was thus tortured into compliance. He plundered Messina and Argos, and would have continued to extend his dominion still wider over Peloponnesus, had not the Romans, in alliance with the Achæans, declared war against him. He pursued the war with inveterate enmity, and was for a time successful; but he was at length defeated by Philopœmen, at the head of the army of the Achæan league, and was killed while attempting to escape, B.C. 194.

NABONASSAR, a king of Babylonia, whose name marks an era commencing 26th Feb., 747 B.C.

NABOPOLASSAR. See NEBUCHADNEZZAR.

NADAB, a king of Israel, 343–341 B.C.

NADAL, A., a French miscellaneous writer, 1659–1741.

NADASTI, or DE NADAZD, THOMAS, a Hungarian nobleman, distinguished in the wars of Ferdinand of Austria against Solymán II., and in those of Charles V., 16th century. His grandson, FRANCIS, Count de Forgatsch, a patriot and historian, executed 1671.

NADAUD, Jos., a French ecclesiastic, d. 1792.

NADAULT, J., a French naturalist, 1701–1782.

NADIR SHAH, otherwise THAMASP KOULI KHAN, a famous military adventurer, who was born in Khorassan, 1688; and by 1736 had raised himself by a series of crimes and conquest to the throne of Persia. He then invaded the empire of the Mogul, and after carrying fire and sword through some of its richest provinces, enriched himself and his officers with nearly a hundred millions sterling in money, jewels, and effects. He was despatched in his tent, after a fierce personal struggle with the conspirators, 19th June, 1747.

NAEVIUS, a famous augur in the reign of Tarquin, of whom it is related, that in order to convince the king and the Romans of his supernatural power, he cut a flint with a razor, and thus turned the ridicule of the populace into admiration. Cicero, however, who had himself been an augur, treats this miraculous event as a mere fiction.

NALSON, V., a Church of England divine, 1641–1724.

NANGIS, WILLIAM DE, a French historian of the 14th century, was a Benedictine monk in the abbey of St. Denis. He wrote the 'Lives of St. Philip and Louis le Hardi,' together with two chronicles of France.

NANI, GIOVANNI BATTISTA, a Venetian historian, was born in 1616. He distinguished himself as ambassador to the French court, where he obtained success for the Republic to carry on the war against Turkey. He was afterwards employed in other missions of importance, for which he was made proctor of St. Mark and captain-general of the marine. He was the author of 'Istoria della Repubblica Veneta,' and was historiographer and keeper of the archives of the republic. Died 1678.

NANEK, or NANUK, was a native of Hindostan,

and the founder of the sect of Sikhs in India, which has now grown into a powerful nation. He was born at Talwendy, in Lahore, in 1469; propagated his doctrines with great success; and died in 1539.

NAPIER, LIEUTENANT-GEN. SIR CHARLES JAMES, who combined the talents of a great administrator with those of a conqueror, and was in many respects one of the most remarkable men of the present age, was born in 1782, and began his military career in Ireland at the period of the rebellion. He won his first laurels in the peninsular war, where he fought desperately under Sir John Moore, and became the prisoner of Ney, dreadfully lacerated by the wounds he had received during the retreat on Corunna. Being permitted to return to England on parole, he filled up a period of military inaction by writing several works on colonization, the state of Ireland, military law, and engineering. In 1811 he joined Wellington as a volunteer, and was present at some of his hardest fought actions in the peninsula, including Fuentes d'Onore and Badajoz. It was his fate to be absent on a cruising expedition when Europe was surprised by the sudden return of Napoleon, but he reached the army three days after the battle of Waterloo, assisted in what fighting there remained to do, and accompanied it to Paris. He was then some years governor of Cephallonia, and drew up a plan in conjunction with Lord Byron, for achieving the independence of Greece, won the lasting gratitude of the Cephallonians, who call him the father of their country, and was ultimately recalled. In 1841, during the administration of Lord Auckland in India, he was appointed commander of the Bombay army, and commenced that reform of abuses which rendered his name a hateful one to the magnates of Leadenhall-Street, and the authorities under their influence. On the appointment of Lord Ellenborough, his plan for a campaign in Affghanistan found support in a kindred spirit, and taking the field with only 2,000 men, he found himself face to face with an army of 30,000, whom he defeated with dreadful slaughter at the famous battle of Meeanee, 17th February, 1843. His forces were afterwards augmented to 5,000, and with these he completed the conquest of Scinde, by the defeat of Shere Mahomed at the head of 25,000 men in a pitched battle at Hyderabad. Lord Ellenborough appointed him governor of the conquered territory, and it was now that his brilliant talents as a ruler found the scope necessary for their development. Troops of bandits had to be put down, suttee abolished, a general survey of the country taken, roads made, the laws revised, the whole of the administration reorganized; yet in addition to all this, Sir Charles Napier added to his labors the social improvement and education of the people; besides writing and arguing against the opposition of the civil authorities of India. In the midst of these toils the battles of Ferozeshah and Sobraon finished the scheme of conquest while he was speculating on its enlargement, and in 1847 he was induced by the declining health of Lady Napier to return to England. In 1849 another Sikh war had broken out, and the anxious eyes of the country were fixed

on Sir Charles Napier, who, conscious that his only friends were in the army and the people of England, for some time declined going. He yielded at last to the duke of Wellington, whose last words were,—*'If you don't go, I must,'* and forty-three days after he was in Bombay, where he learned that the war had been concluded. The manner of his reception by Lord Dalhousie completely realized his misgivings. In ten minutes (says Sir Charles), he told me in substance, nay, the words were,—*'That in letters from England he had been warned against my endeavoring to encroach upon his power, and had answered he would take d——d good care I should not!'* On such terms it is rather surprising that Napier remained commander of the army two years than that he tendered his resignation at the end of that period and returned home—not, however, until he had effected further reforms in all that came under his authority. He died at Oaklands, near Portsmouth, 29th August, 1853, leaving a name that will long be honored among the worthies of England—a great soldier, a great ruler, and a fearless exposé of all manner of abuses. His last appearance in public was at the funeral of the duke of Wellington, when his usual grotesque appearance on horseback was rendered painful by his too evident infirmity. The vanity so conspicuous in his writings, is rendered less objectionable than it might otherwise be, by his soldier-like frankness, and graphic skill in circumstantial description. The last from his pen is entitled *'Defects, Civil and Military, in the Indian Government,'* lately edited by his brother, Sir W. F. P. Napier; the most interesting is his account of Scinde as he found it and as he left it. [E.R.]

NAPIER, JOHN, Baron of Merchiston, the illustrious inventor of logarithms, was the eldest son of Archibald Napier, of Edinbellie and Merchiston, master of the mint in Scotland. He was born at Merchiston castle, near Edinburgh, in 1550. After going through the usual course of study at St. Andrews, he is said to have applied himself to mathematics, during a tour to the Netherlands, France, and Italy. Upon his return to Scotland, he declined all civil employment in order that he might devote himself entirely to literary and scientific pursuits. The principal subjects of his study were mathematics and the sacred writings, and he began his career as an author by the publication of his commentaries on the apocalypse, under the title of *'A Plain Discovery of the Revelation of St. John.'* This work was translated into French, and published, as revised by himself, at Rochelle in 1602, and afterwards in 1605 and 1607. It was highly lauded by the protestants of France, owing to the zeal and learning with which he endeavored to show that the pope was the antichrist of Scripture; but he was more successful in this discussion than in others, in which he vainly attempted to predict future events from the revelations at Patmos. The attention of Napier was at this time directed to other subjects than theology, though religious feeling was the motive which impelled him to the task. In 1596 he addressed a letter to Anthony Bacon (the original of which is in the Archiepiscopal Library of Lambeth), entitled—*'Secret Inventions Necessary in these Days for the Defence of this Island, and Withstanding Strangers, Enemies to God's Truth and Religion.'* The first of these inventions, is a burning mirror for destroying the enemy's ships at any distance, by reflecting to a focus the beams of the sun; and the second, another mirror for effecting the same object by reflecting *'the beams of any material fire or flame.'* It does not appear that Napier

made any experiments with these mirrors, or placed his inventions in the hands of those who alone could apply them. When, a short time before his death, a particular friend implored him not to bury in the grave with himself such excellent inventions, he replied that there were already too many devices for the ruin and overthrow of man; and that as the malice of the human heart would not allow mankind to diminish the number of them, 'they should never be increased by any new conceit of his.' There is reason to believe that Napier had, previous to 1594, begun those investigations which led him to the invention of logarithms. We are informed by Wood in his 'Athenæ Oxonienses,' that Dr. Craig, a Scotchman, who had come from Denmark, told Napier that Longomontanus had invented a method 'of saving the tedious multiplications and divisions in astronomical calculations,' and that this was done by 'proportionable numbers,' 'which hint Napier taking, he desired him upon his return to call upon him again. Craig, after some weeks had passed, did so, and Napier then showed him a rude draught of what he called *Canon Mirabilis Logarithmorum*; which draught, with some alterations, he printed in 1614.' Wood adds, 'that it came into the hands of our author Briggs, and of William Oughtres, from whom the relation of this matter came.' It is quite possible that Longomontanus may have been occupied with the attempt to abridge astronomical calculations, but if he had made the slightest progress in such an investigation, his friend Kepler would not have failed to give him the credit which he may have deserved. Whereas, in a letter to Cruger, he distinctly states that nothing can surpass the method of Napier, (*Nepereanam rationem*). The work in which Napier gave his great invention to the world, was published at Edinburgh in 1614, with the title of 'Mirifici Logarithmorum Canonis Descriptio.' When the invention of logarithms was first made known to Mr. Henry Briggs, Reader in astronomy at Gresham College, and the improver of logarithms, he was so surprised with admiration that he could not rest till he saw the inventor. When Napier heard of this he invited Briggs to Scotland. When they met, 'about one quarter of an hour was spent each beholding the other with admiration before one word was spoken.' The Baron entertained his guest most nobly, and Briggs visited Merchiston castle every summer during the life of his friend. Baron Napier improved trigonometry by the invention of his universal rules, which he calls *the first circular parts*, for solving all the cases of right-angled spherical triangles, and which was published in his posthumous work, 'Mirifici Logarithmorum Canonis Constructio,' which appeared in 1619. The last production of our noble author was his 'Rabdologia seu numerationis per virgulas,' published in 1617, and reprinted at Lyons in 1618, and 1620. The instrument here described is known by the name of 'Napier's Rods or Bones,' an account of which will be found in our various encyclopædias. This was the last work written by Napier. He died at Merchiston castle, on the 4th April, o.s., 1617, in the sixty-eighth year of his age, and was buried in the church of St. Giles, Edinburgh, where a stone tablet, with a Latin inscription, points out the burial-place of the Napiers. Baron Napier was twice married, and has left behind him a race distinguished by their talents, by their writings, and by their military and naval services. So high was Napier's reputation, that the illustrious Kepler dedicated to him his 'Ephemerides,' which appeared in 1617; but the greatest compliment that has been paid to his memory was that of Laplace,

when speaking of the value of logarithms in astronomy:—'This admirable invention,' he says, 'added to the ingenious algorithm of the Indians, by reducing to a few days the labor of several months, doubles, if we may so speak, the life of astronomers, and spares them the errors and disgust inseparable from long calculations; an invention, too, which is the more satisfying to the human mind, from its having been entirely deduced from its own resources. In the arts man makes use of the materials and the forms of nature to increase his powers, but in this case, it is all his own work,' ('Système du Monde,' Liv. v., chap. iv. edit. 2mo, p. 326). See the 'Accounts of the Life, Writings, and Inventions of John Napier of Merchiston, by the earl of Buchan, Perth, 1787; and the life of him by one of his descendants, Mark Napier, Esq., Edinburgh, 1834. [D.B.]

NAPIER, MACVEY, whose name will long be memorable in connection with the Edinburgh Review and the Encyclopædia Britannica, was professor of conveyancing in the university of Edinburgh, and one of the principal clerks of the court of session. He passed as a writer to the signet in 1799; but he soon discovered a decided bias for literary pursuits and his various acquirements, literary and legal, his profound erudition, and his sound judgment, found ample scope for their development in the last edition of the Encyclopædia Britannica, of which he became the editor. In 1829 he succeeded Mr. (afterwards Lord) Jeffrey in the editorship of the Edinburgh Review; and it is no light praise to say that, under his management, which embraced a period of 17 years, that leading organ of constitutional and liberal doctrines, and of manly and enlightened criticism, suffered no decay. Died, 1847.

NAPIER, WILLIAM JOHN, Lord, a British naval officer, was born at Kinsale, in 1787. He entered the service at the age of 16, and was a midshipman on board the *Defiance* at the battle of Trafalgar. In 1833 he was appointed superintendent of the trade and interests of the British nation in China, and he arrived at Macao, in July, 1834. Here, however, the object of his voyage was frustrated by the governor of Canton, who appeared anxious that his lordship should not reach that place until notice should have been sent to the court at Peking, and the answer of the emperor be made known upon the subject. Lord Napier was not inclined to delay the superintendence of those interests which he had been appointed to protect, and, getting into his boat on the 24th of July, sailed up the Canton River, and arrived at the factory (Canton) on the next morning. The orders and edicts of the governor, that he should return to Macao, were replied to by the latter in terms of positive refusal; commercial transactions between the British and Chinese merchants were prohibited by the governor; and he sent the *Imogene* and *Andromache* frigates up the Boyne River, which were fired at by the forts, and which, in return, battered the forts about the ears of the Chinese soldiers. This occurred on the 7th of September; but, owing to calms, the ships were obliged to come to an anchor for several days. On the 14th of the same month, Lord Napier became seriously indisposed; and that the interests of the British merchants might not be injured by a farther suspension of their arrangements, the men-of-war were ordered to 'move out of the river,' and he returned to Macao, where, on the 11th of October, 1834, he expired.

NAPIONE, C. A. GALEANI, an Ital. officer and mineralogist, died 1814. His brother, J. GALEANI, Count de Napione, dist. as a dramatic writer.

NAPOLÉON BUONAPARTE, was born at Ajac-

[Napoleon.]

cio, in Corsica, on the 5th February, 1768. He afterwards gave out that he was born on 15th August, 1769, being his saint's day, and that is usually considered as the period of his nativity; but that the former is the real date is proved in the most authentic way by the attestation of himself, his brother Joseph, and the principal members of his family, on occasion of his marriage with Josephine, in 1795, which still exists in the parish register, in Paris, where the marriage was solemnized. He had no interest at that time, and on that occasion, to make himself older than he really was, though he had a decided interest afterwards to make himself younger, as in the interval between Feb., 1768, and Aug., 1769, Corsica was annexed to France, so that he could not be a French citizen by nativity, without understating his birth. His family was respectable but not illustrious, and he always disdained to take advantage of the adventitious lustre of events. When some Italian genealogists, in the days of his greatness, tried to flatter him by tracing back his pedigree to the dukes of Treviso, he cut them short by saying that his patent of nobility dated from the battle of Montenotte, his first victory over the Austrians, in Italy. His mother was a woman of great beauty, courage, and ability, a peculiarity generally observed with those destined for future greatness; and having been taken with her pains in church, she was brought home, and Napoleon was brought into the world on a couch representing the heroes of the Iliad. He received the rudiments of his education at Ajaccio, in Corsica, where, by a curious coincidence, Count Pozzo de Borgo, afterwards his persevering and bitter opponent through life, was also instructed. Having early evinced a decided taste for military life, he was, at the age of eleven, sent to the military school, at Brienne, in Champagne, where he remained till he obtained his commission in the artillery. Pichegru, afterwards so famous, and whom Napoleon in the end destroyed, left the academy soon after the young Napoleon. At this academy, where he remained several years, his talents especially for mathematics and the exact sciences, attracted the attention of his preceptors, who reported in the highest terms on his capacity to the government of Paris, and one of their memorandum books had this entry: 'Keep an eye on young Buonaparte, and promote him as fast as possible, for if you do not he will make his way for himself.' While at school, in a severe winter, the boys made bastions

and ravelins of snow, and Napoleon distinguished himself at the head of the storming party. He received his first commission in the artillery at the age of sixteen. His figure was then diminutive and so thin that when he first appeared with his uniform on, and the huge part of it on his legs, he looked so ridiculous that Madle. Permon, afterwards duchess of Abrantes, with whom he was in love, burst into an immoderate fit of laughter, which gave no small offence to the young soldier. His first employment in real service was at the siege of Toulon, in 1794, when it was observed 'that a young lieutenant of artillery was very busy about a gun.' Even in that subordinate situation, however, his talents made themselves felt, and it was by his advice that the operations were directed against an outwork on the Mount Taron, which, when taken, by commanding the ships in the harbor, rendered the place no longer tenable. When dictating a despatch there on the head of a drum to an unknown sergeant of artillery, a cannon ball fell close to them and threw a quantity of dust on the paper. 'That is lucky,' exclaimed the sergeant, 'we shall not require sand for this paper.' 'What can I do for you,' said Napoleon, 'to evince my regard?' 'Every thing,' said the sergeant, 'you can convert my worsted shoulder-knot into an epaulette.' Napoleon recommended him for promotion, and he got his commission. His name was JUNOT, and he became duke of Abrantes, and one of the most distinguished marshals of France. After the fall of Toulon, Napoleon was for some time out of employment. He was suspected, not without reason, of being implicated with the government of Robespierre; and he shared in the disgrace of its fall. He remained in consequence about five years at Paris without any occupation, and in a state of extreme poverty. So low indeed were the fortunes of the future emperor fallen at this period, that, as he himself said, he never got his boots blackened, and never wore gloves, for they were a useless expense. His imagination, however, abated nothing of its vigor by the decline of his fortunes, and despairing of effecting any thing in Europe he dreamed of the East, and entertained serious thoughts of offering his services to the grand seignor, with a view to pushing his fortunes in Asia. 'Asia,' said he, 'contains six hundred millions of men; it is there alone that any thing is to be done! Europe is worn out, there is nothing practicable here.' He was ere long, however, called to active and important duties in his own country. Though suspected and therefore unemployed by the government of the Directory, his abilities were well known; and when the directors were reduced to extremities by the insurrection of the sections in October, 1795, the first great reaction against the crown and honor of the revolution, they cast their eyes upon him as the only man who could resuscitate their tottering fortunes. The first day's conflict, in which Gen. Menou commanded, turned out entirely to the advantage of the insurgents, who were 30,000 strong, all national guards, and comprised the whole flower and educated classes of Paris. In great agitation the directors sent for Napoleon in the evening, and gave him the command of their forces, which were only 5,000, shut up in the squares of the Carrousel and the Louvre. Napoleon instantly took his line. In the night he despatched an officer, destined for future greatness, MURAT, to Sablons, a village in the neighborhood of Paris, where a park of fifty pieces of artillery was placed, which the chiefs of the national guard with inconceivable infatuation had neglected to seize. Murat got possession of the guns and brought them to the Tuileries. This decided

the affair. Next day the insurgents commenced their attack from the church of St. Roch, in the Rue d'Honore, and at the same time from the opposite side of the river. But they were received with so terrible a discharge of grape shot that after standing several rounds they broke and fled, leaving the victory to the regular troops and the government of the Directory firmly established. Napoleon was rewarded, as well he might be, for this important victory, by the command of the army of Italy. The favor of Barras as leading member of the Directory, contributed also to this elevation, as he had recently married JOSEPHINE BEAUHARNAIS, his future empress, who had been intimate with that profligate director. When young Napoleon took the command of the army of Italy he was only 27 years of age, and wholly unaccustomed to high command. He found the troops in the most miserable condition, perched on the shining summits of the maritime Alps, whither they had been driven by the united arms of the Austrians and the Piedmontese, in the preceding campaign, and in want of every thing. From their long sufferings he predicted a speedy change of their fortunes. 'Famine, cold, and misery,' said he, in his first proclamation, 'are the school of good soldiers. Here on the plains of Italy you will conquer them, and then you will find comfort and riches and glory.' He was as good as his word. Descending like a torrent from the summit of the Alps he soon carried every thing before him. Having defeated the combined armies in several battles, he appeared before the walls of Turin and forced the Piedmontese government to conclude a separate peace with France, the condition of which was the cession of all their fortresses to the conquering republic, which at once gave him a solid footing in Italy, and secure basis for ulterior operations against the Austrians. He was not long of turning this basis to the best account. Having refreshed his troops with a fortnight's rest and his prisoners with ample contributions he advanced to Milan, where he was received by the revolutionary party with transports, which were soon cooled by the imposition of a contribution of £800,000 on its inhabitants, suppressed with dreadful severity an insurrection in Pavia, and forced the 'terrible bridge of Lodi,' as he himself called it, though defended by 25,000 Austrians. It was then, as he has told us in his memoirs, that high ambition took possession of his soul; he became impressed with the idea he was destined to do great things. Following up his career of success he defeated the Austrians in several encounters and compelled their commanders to shut themselves up in Mantua, a strong fortress in the centre of the plain of Lombardy. Impressed with the importance of this stronghold, the bulwark of their possessions in Italy, the Austrian government made the greatest efforts for its relief. They successively collected three powerful armies to relieve it; one of which, after a series of desperate actions, succeeded under the veteran Marshal Wurmser in penetrating to the fortress and reinforcing the garrison. But this advantage was gained only by incurring defeats in other quarters; for Napoleon raising the siege concentrated his forces and severely defeated the Austrians, who were incautiously advancing in two columns separated from each other by the lake of Garda. The blockade of Mantua encumbered with 10,000 additional mouths, was now resumed, and the Austrians assembled a second army for its relief, but it was defeated by Napoleon with desperate loss on the dykes of Arcola. A third collected in Tyrol, com-

posed of the best troops in the monarchy, and shared the same fate on the Plateau of Rivoli, on the banks of the Adige, between Verona and Trent. Despairing now of being relieved, and having exhausted all his means of subsistence, Wurmser was obliged to capitulate. Napoleon respecting his age and valor, granted him honorable terms, and this campaign closed with the French flag flying on Mantua and the whole fortresses of the Adige, the barrier in that quarter of the Austrian monarchy. Seriously alarmed now for the very existence of the monarchy, the cabinet of Vienna withdrew the archduke Charles, who in the preceding campaign, had gained successes nearly as great in Germany, as Napoleon had in Italy, to oppose the redoubtable conqueror on the Venetian plains. He brought with him 30,000 of his best troops, flushed with victory on the Bavarian plains, and the two youthful conquerors were arrayed against each other on the banks of the Tagliamento. But the star of Napoleon prevailed. With equal skill and daring he forced the passage of the Tagliamento, and drove the archduke out of the Venetian plains into the passes of the Alps, and following him up there, he drove him from one pass and one position to another, till he had placed his standards on the Simmering, the last ridge of the Alps, before they melt away into the valley of the Danube, and from whence the steeples of Vienna are visible. Driven now to their last shifts, the Austrians sued for peace, which Napoleon willingly accorded, for in truth his position, how brilliant soever, was full of peril from being too far advanced, with only 35,000 men, into the Austrian dominions. On this occasion Austria and France adjusted their differences without difficulty, for in return for large concessions to the conquering republic, the French handed over to them the whole dominions of the republic of Venice, a state which at first had been neutral, and had, in the close of the contest, effected a revolution *in favor of France*; one of the blackest instances of national ingratitude recorded in history. After this peace Napoleon remained inactive for about a year, an object of the utmost jealousy and terror to the French government, to whom his unbending disposition, his ambition, and fame rendered him an object of the utmost apprehension. To get rid of so formidable a rival, they fell upon the experiment of offering him the command of a great

expedition they were preparing against Egypt, and as this promised to bring Napoleon into the theatre of his early and favorite dreams of ambition, and as he conceived matters were not ripe for the revolution he meditated in Europe, he acceded to their offer. The expedition, the greatest that ever set sail in modern times from the shores of Europe, accordingly sailed, having 35,000 soldiers on board, conveyed by fourteen ships of the line and above 300 transports. Though Nelson was in the Mediterranean straining every nerve to intercept the expedition, it arrived in safety before Malta, which at once capitulated to the French arms, and then steering for Alexandria, disembarked the whole troops there in safety in June, 1798. Napoleon overjoyed with his good fortune in having escaped the English fleet, pursued his advantage with the utmost alacrity. Advancing from Alexandria towards Cairo, his army after undergoing incredible hardships in the desert, arrived in sight of the Pyramids, where they beheld the Turkish army 30,000 strong, of which 15,000 were splendid Mameluke horse, ready to receive them. Impressed but not daunted by the noble spectacle, Napoleon said to his men, 'From the summit of these monuments forty centuries are gazing upon you.' They were not unworthy of their mission. Drawn up in squares, a deadly rolling fire as from so many flaming citadels issued from their ranks, a charge of cavalry completed the rout of the Turks, Cairo opened its gates, and the French dominion was established over the whole of Egypt. Meanwhile, a dreadful reverse, apparently fatal to Napoleon's prospects in Europe, had occurred at sea, Nelson having at length discovered where the French fleet was, had stood into the bay of Aboukir, where they lay moored under the protection of the land batteries, and totally destroyed it, one only sail having escaped to carry the mournful tidings to France. This catastrophe seemed fatal to the French army, for it cut them off from any communication with their country. Napoleon, however, was not discouraged. 'We must remain here,' said he, 'or emerge from it great like the ancients;' and he immediately set about preparing an expedition into Syria. His plan was to rouse the Christian population of Lebanon and Asia Minor, and reinforcing by their aid his French troops, to approach Constantinople from the Asiatic side, and place himself on the throne of the East. Surprising success in the first instance attended his efforts. He crossed the desert which separates Asia and Africa; stormed Jaffa, and cruelly massacred 4,000 prisoners taken in cold blood, laid siege to Acre, pushed on to Nazareth, the early dwelling-place of our Saviour, and defeated 40,000 Ottomans with great slaughter, at Mount Thabor. But this was the summit of his success. Sir Sidney Smith landed with a party of marines from the British ships at Acre, placed himself with his brave followers in the breach, when the place was on the point of falling, and infused such vigor into the defences, that all the assaults of the French were repulsed, and Napoleon, abandoning all his ideas of Oriental conquest, was obliged to wend his way back with disgrace to Egypt. During the retreat, he poisoned several hundreds of his wounded soldiers, to prevent them from falling into the hands of the Turks, by whom they would have been barbarously massacred, and soon after was consoled for his reverses by a victory over 20,000 Janissaries, whom the English landed in the bay of Aboukir. Yet though so great a career awaited him in Europe, Napoleon never ceased lamenting his check at Acre, and repeatedly said, especially when revolving

his eventful career in the solitude of St. Helena, when speaking of Sir Sidney Smith, 'That man made me miss my destiny.' But another fate awaited the young general. France speedily felt the want of his tutelary arm when it was withdrawn. 'The sun of Buonaparte,' as Mr. Pitt expressed it, 'was falling before the rising star of Suwarrow.' That daring and celebrated general, at the head of a combined Austrian and Russian army, had defeated the French in several pitched battles on the plains of Lombardy, regained all the fortresses, surmounted the maritime Alps, and appeared on the shores of the Var, on the frontiers of Provence. The republicans had been entirely driven out of Germany, and Massena, shut up in France with 50,000 men with difficulty maintained himself against the superior army of the archduke Charles and Korsakow. In these circumstances all eyes were turned to Napoleon as the only man capable of saving the country. He now felt, in his own words, that 'the pear was ripe,' and he resolved to return to Europe. His usual good fortune did not desert him on this occasion. Setting sail in a single frigate from Alexandria, he eluded the English cruisers who were anxiously looking out to intercept his return, and landed safe at Cannes, in Provence, in October, 1799. From thence he proceeded to Paris, where finding the government of the Directory utterly discredited, and in the last stage of decrepitude, he ventured on the bold stroke of a *coup d'etat*, expelled the Legislatures from their halls by means of fixed bayonets, and under the name of 'first consul' seated himself on the throne of France. His first care after this great success, was to expel the Austrians from Italy, the scene of his earliest triumphs and of such obstinate conflicts between them and the French. His plan for this purpose was laid with equal skill and secrecy. Assembling an army, styled 'the army of reserve,' at Dijon, in the heart of France, he suddenly led them across the St. Bernard, a pass 8,000 feet high, deemed impassable for artillery or carriages, overcame the resistance of the fort of Bard, in the southern declivity of the mountain, entered Milan in triumph, defeated the Austrian advanced guard, 10,000 strong, at Stradilla, and encountered their main body 30,000 strong returning from the Var, at Marengo. After an obstinate conflict, in which he was on the point of being destroyed, he defeated them with great slaughter. The peculiar position of the two armies rendered this victory decisive, and demonstrated the strategical skill with which Napoleon's plan and campaign of the march across the St. Bernard had been laid. The Austrians, returning from the Var, fought with their faces towards Vienna, and their backs towards the maritime Alps and the bay of Genoa. Defeat in such circumstances was ruin; and Melas, the Austrian commander, was too happy to conclude a convention, in virtue of which, he was allowed to retire to Mantua, after delivering up the whole of the fortresses of Piedmont to the victorious French. Securely seated by this great triumph on the Consular throne, Napoleon ere long forced the Austrians to make peace at Luneville, and thereby pacified the whole continent. He underwent a deep mortification, however, soon after by the successful result of the English expedition, under Sir Ralph Abercrombie, to Egypt, and the wresting from his grasp of his whole conquests on the banks of the Nile. His projects for the destruction of Great Britain, also the great object of his life, were blasted about the same time by Nelson's victory at Copenhagen, which destroyed the northern coalition, and the death of the emperor Paul, which

withdrew Russia from that formidable alliance. England and France now had no longer the means of fighting. They could not reach each other, for they were both victorious on their respective elements, and like monsters of the land and deep their hostility could not be exerted against each other. Sensible of this they concluded peace in June, 1801, which put the first period to the dreadful hostilities of the revolutionary war. The peace, however, proved only an armed truce. Both parties were only gaining breath for a renewal of the fight. Napoleon did great things during its continuance. He reformed the whole civil administration of the country, and commenced the code Napoleon, which has survived his fall, and forms the most glorious monument to his memory. He was indefatigable during the interval of hostilities in increasing his navy; and the English government, in obedience to the usual infatuated demand of the country for a reduction of the national armaments on the return of peace, had seriously diminished the British fleet, and Great Britain was all but overmatched on her own element when hostilities broke out again in 1803. Encouraged by this hopeful state of affairs, Napoleon formed a gigantic fleet for the subjugation of England, which was very near proving successful. Having succeeded in forcing Spain into his alliance, he had a project for assembling 70 sail of the line in the channel, who were to transport 130,000 men into England, and 30,000 into Ireland, on board of 2,000 gun-boats, which he had prepared at Boulogne for their conveyance across the channel. Vast as the plan was, it was on the very verge of proving successful. The Toulon fleet set sail from Cadiz, and decoyed Nelson into the West Indies; speedily returning, it encountered Sir R. Calder off Finisterre, who, with 15 sail of the line, defeated their 27 and took two sail of the line. This action proved fatal to the whole design. Villeneuve, who commanded the combined squadron, retreated to Terrol, where instead of proceeding to Brest, where admiral Gantheaume was ready with 21 sail of the line to join him, he went to Cadiz, where he was soon blockaded by Nelson, and totally defeated by him with the loss of twenty sail of the line, on 21st October, 1805. Thenceforward the maritime war was at an end, and Napoleon had to trust solely to continental victories for the destruction of the English. Instantly taking his line, he extracted out of his maritime defeat the means of achieving his greatest land triumphs. Russia had joined Austria, and the army of the latter, 80,000 strong, had advanced to Ulm, in Bavaria. Crossing France and the north of Germany with incredible rapidity, Napoleon defeated the Austrians in several actions, and at length shut up 30,000 in Ulm, where they were forced to capitulate the very day before the battle of Trafalgar. Advancing then, at the head of 180,000 men, down the valley of the Danube, he captured Vienna, and totally defeated the combined Austrian and Russian armies, under the emperor Alexander in person, on Dec. 2. This catastrophe drove Austria to a separate peace, which she only purchased by great concessions of territory; and the Russians, weakened by the loss of 30,000 men, wended their way back in mourning to their own dominions. Next year the Prussians with infatuated hardihood rushed into the field. Napoleon encountered them at Jena and Auerstadt, and defeated them with such loss that in a few weeks 100,000 men had disappeared out of 120,000, with which they had commenced the conflict. Prussia was speedily overrun, Berlin taken, and the remnant of their armies driven back to the
